[9] *DOD Functional Area Code(s).* The four or five alpha/numeric character designator listed in Appendix A that describes the type of CA to be converted to contract. This would be one code for a single CA or possibly several codes for a large package. A series of codes shall be separated by commas.

[10] *Status Code.* A single alpha character that identifies the current status of the conversion. Enter one of the following codes:

P—In progress
C—Complete
X—Canceled. The DCR shall be excluded from future update listings.
Z—Consolidated. The conversion has been consolidated with one or more other contracts into a single contract package. The DCR for the contract that has been consolidated shall be excluded from future update listings. (See data element [16])
B—Broken out. The conversion has been broken into two or more separate contracts. The previous DCR shall be excluded from future update listings. (See data element [16])

[11] *Manpower Estimate Civilian* and [11A] *Manpower Estimate Military.* The number of civilian and military authorizations allocated to the CA(s) to be converted. This number in all cases shall be those manpower figures identified in the correspondence requesting the direct conversion.

[11B] *Estimated In-House Cost.* The annualized in-house cost estimated in the simplified cost comparison prepared for request to directly convert a CA. This data element is not applicable to direct conversions of exclusively military personnel CAs.

[12] *Estimated Contract Cost.* The annualized contract cost estimated in the simplified cost comparison prepared for request to directly convert a CA. Do not include the 10 percent cost of conversion differential. This data element is not applicable to direct conversions of exclusively military personnel CAs.

Section Two

Event: The Solicitation Is Issued

The entries in this section of the DCR provide information on the manpower authorized to perform the workload in the PWS, the number of workyears used to accomplish the workload in the PWS, the type and kind of solicitation, and the number of bids or offers received.

The DoD Component shall enter the following data elements at the first quarterly update subsequent to the issuance of the solicitation:

[13] *Date Solicitation Issued.* The date the solicitation was issued by the contracting officer.

[14] *Solicitation-Type Code.* A one-character alpha designator that identifies the type of solicitation used to obtain contract bids or offers. Use either the CBD as the source document or information received from the contracting officer for this entry. Solicitations under Section 8(a) of the Small Business Act are negotiated. Enter one of the following codes:

S—Sealed Bid
N—Negotiated

[15] *Solicitation-Kind Code.* A one-character (or two-character, if "W" suffix is used) alpha designator indicating whether the solicitation for the contract has been limited to a specific class of offerors. Use either the CBD as the source document or information received from the contracting officer to enter one of the following codes:

A—Restricted to small business
B—Small Business Administration 8(a)
C—Javits-Wagner-O'Day Act (JWOD)
D—Other mandatory sources
U—Unrestricted
W—(Optional suffix) Unrestricted after initial restriction

[16] *Current Authorized Civilians* and [17] *Current Authorized Military.* The number of civilian and military authorizations allocated on the DoD Component's Manpower documents to perform the work described in the PWS. This number refines the initial authorization estimate (section one, data elements [11] and [12]).

[18] *Baseline Annual Workyears Civilian* and [19] *Baseline Annual Workyears Military.* The number of annual workyears it has taken to perform the work described by the PWS.

[20] *Number of Offers Received.* The number of commercial offers received by the contracting officer in response to the solicitation.

Section Three

Event: The Contracting Officer Either Awards The Contract or Cancels the Solicitation

The entries in this section provide information on the contract.

The DoD Component shall enter the following data elements in the first quarterly update subsequent to the date the contracting officer either awards a contract or cancels the solicitation:

[21] *Contract Award/Solicitation Cancellation Date.* This is the date a contract shall be awarded in a formal advertised solicitation or the date the contractor shall be authorized to proceed on a conditioned award contract in a negotiated solicitation. For retention in-house, this is the date the solicitation is canceled (when the contracting officer publishes an amendment canceling the solicitation).

[22] *Contract-Type Code.* Enter one of the following alpha codes for the type of contract used in the direct conversion.

FFP—Firm Fixed Price
FP-EPA—Fixed Price with Economic Price Adjustment
FPI—Fixed Price Incentive
CPIF—Cost Plus Incentive Fee
CPAF—Cost Plus Award Fee
CPFF—Cost Plus Fixed Fee

[23] *Prime Contractor Size*
S—Small/small disadvantaged business
L—Large business

[24] *Performance Period.* Expressed in months, the length of time covered by the contract. Do not include any option periods.

Section Four

Event: The Contract Starts

The entries in this section identify the contract start date and the personnel actions taken as a result of the direct conversion.

The DoD Component shall enter the following data elements in the first quarterly update subsequent to the start of the contract:

[25] *Contract Start Date.* The actual date the contractor began full operation of the CA(s) as reflected in the contracting documents.

[1] [26] *Permanent Employees Reassigned To Equivalent Positions.* The number of permanent employees who were reassigned to positions of equal grade as of the contract start date.

[1] [27] *Permanent Employees Changed To Lower Positions.* The number of permanent employees who were reassigned to lower grade positions as of the contract start date.

[1] [28] *Employees Taking Early Retirement.* The number of employees who took early retirement as of the contract start date.

[1] [29] *Employees Taking Normal Retirement.* The number of employees who took normal retirement as of the contract start date.

[1] [30] *Permanent Employees Separated.* The number of permanent employees who were separated from Federal employment as of the contract start date.

[1] [31] *Temporary Employees Separated.* The number of temporary employees who were separated from Federal employment as of the contract start date.

[1] [32] *Employees Entitled To Severance.* The estimated number of employees entitled to severance upon their separation from Federal employment.

[1] [33] *Total Amount Of Severance Entitlements ($000).* The total estimated amount of severance to be paid to all employees, in thousands of dollars, as of the contract start date.

[1] [34] *Number of Employees Hired by the Contractor.* The number of estimated DoD civilian employees (full-time or otherwise) that will be hired by the contractor, or their subcontractors at the contract start date.

[1] Note: Data for data elements [26] through [34] shall be entered only when data element [16] is greater than 45

Administrative Appeal

[35] *Filed*—Were administrative appeals filed? Answer: Y or No.

[36] *Source—Who filed the appeal? Answer: In-house (I), Contractor (C), or Both (B).*

[37] *Result*—Were the appeals finally upheld? Answer: Y or N (if both appealed, explain the result in data element [43]).

GAO Protest

[38] *Filed*—Was a protest filed with GAO? Answer: Y or N.

[39] *Source*—Who filed the protest? Answer: In-house (I), Contractor (C), or Both (B).

[40] *Result*—Was the protest finally upheld? Answer: Y or N (explain result in data element [43]). If GAO protest is still in progress as of the start date of the contract, enter P.

Arbitration

[41] *Requested*—Was the FLRA asked to arbitrate? Answer: Y or N.

[42] *Result*—Was the case found arbitrable? Answer: Y or N (explain result in data element [43]). If arbitration is still in progress as of the start date of the contract, enter P.

General Information

[43] *DoD Component Comments.* Enter comments, as required, to explain situations that affect the direct conversion.

[44] *Effective Date.* "As of" date of the most current update for the direct conversion. Shall be generated by DMDC.

Section Five

Event: Quarter Following Contract/Option Renewal

The entries in section five identify actual contract costs, original contract offer, and information on subsequent contract actions. This data shall be utilized to determine the accuracy of the cost comparison.

The DoD Component shall enter the following data elements in the first quarterly update subsequent to the receipt of actual annual contract cost data.

[45] *Contract Offer ($000).* Enter the contractor offer.

[46] *Actual Contract Cost First Performance Period ($000).* Enter the actual contract cost for the first performance period, including all change orders, in thousands of dollars, rounded to the nearest thousand.

[47] *Actual Contract Cost Second Performance Period ($000).* Enter the actual contract cost for the second performance period, including all change orders, in thousands of dollars, rounded to the nearest thousand.

[48] *Actual Contract Cost Third Performance Period ($000).* Enter the actual contract cost for the third performance period, including all change orders, in thousands of dollars, rounded to the nearest thousand.

[49] *Contractor Change.* Enter one of the following alpha codes to indicate whether the contractor for the second or third performance period has changed from the original contractor.

Y—Yes, the contractor has changed
N—No, the contractor has not changed

Data elements [50] through [51] are not required if the answer to [49] is no (N).

[50] *Prime Contractor Size*
S—New contractor is small/small disadvantaged business
L—New contractor is large business

[51] *Reason For Change. DoD Components shall enter one of the codes listed below followed by the last two digits of the fiscal year in which the change occurred:*
R—Returned in-house temporarily pending resolicitation due to contractor default, etc.
D—New contractor takes over because original contractor defaults.
N—New contractor replaced original contractor because government opted not to renew contract in option years.
U—Contract workload consolidated into a larger (umbrella) cost comparison.
C—Contract workload consolidated with other existing contract workload.

BILLING CODE 3810-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6955]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed modified base (100-year) flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program.

DATES: The period for comment will be ninety (90) days following the second publication of the proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Matticks, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2767.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of modified base (100-year) flood elevations for selected locations in the nation, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These elevations, together with the floodplain management measures requires by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

VOL 54 ISS 73 AP 18 1989 UMI

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed modified flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the floodplain area. The local community voluntarily adopts floodplain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the floodplain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

BILLING CODE 6718-03-M

DEPARTMENT OF DEFENSE

Department of the Army

48 CFR Parts 5145 and 5152

Federal Acquisition Regulation Supplement; Government Furnished Property

AGENCY: Department of the Army (DA), DOD.

ACTION: Proposed rule and request for comments.

SUMMARY: The Defense Acquisition Regulatory Council approved for a two-year test period, Department of the Army deviation to Defense Acquisition Regulation Supplement (DFARS) Subpart 245.3 and section 252.245. The deviation permits the Army to provide existing Government property under installation support services contracts without retaining the responsibility for replacement.

DATES: This rule will become effective upon publication of a final rule.

Comments: Interested parties should submit written comments to: U.S. Army Contracting Support Agency, HQ DA/SFRD-KP, ATTN: Mary M. Pearson, Room 1C616, The Pentagon, Washington, DC 20310-0103 not later than May 18, 1989, to be considered in the formulation of a final rule. Please cite Deviation Case 88-915 in all correspondence related to this subject.

FOR FURTHER INFORMATION CONTACT: Mary M. Pearson, Department of the Army, SFRD-KP, telephone (202) 697-1004.

SUPPLEMENTARY INFORMATION:

A. Background

It is the Departamentof Defense policy that contractors shall provide all facilities and materials required for performing Government contracts. In the case of support service contracts performed on installations (particularly those subject to OMB Circular No. A-76 (FAR Subpart 7.3), the installation has normally invested in existing facilities which, if not provided to contractors, could result in additional expenditures to the Government. The procedures implemented by this deviation permit the Government to obtain the maximum use of existing Government property. The deviation procedures will also permit the Government to reduce the amount of Government property furnished to contractors as directed by the Under Secretary of Defense (Acquisition). Contracts will be closely monitored to ensure that the invoices are in accordance with proposals. That is, for fixed-price contracts any replacement item cost is amortized in accordance with FAR Part 31 cost principles and the allocable portion included in the fixed price for each appropriate year. For cost-type contracts the cost must be amortized in accordance with FAR Part 31 cost principles and the allocable portion shown appropriately. These costs are not to be charged as direct line item costs.

At the end of the two-year test period, the Army will report to the DAR Council such results as: contractor reaction; problems with proposal evaluations or cost comparisons; impact on contract service support and problems with follow-on contracts.

B. Regulatory Flexibility Act

An initial Regulatory Flexibility Act Analysis has not been prepared because the proposed rule does not appear to have a significant impact on a substantial number of small entities.

VOL 54 ISS 73 AP 18 1989 UMI

Comments to the contrary will be considered.

C. Paperwork Reduction Act

This rule does not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501 et. seq.

List of Subjects in 48 CFR Parts 5145 and 5152.

Government procurement, Government property.

Therefore, 48 CFR Chapter 51 is proposed to be amended as follows:

1. Part 5145 is added to read as follows:

PART 5145—GOVERNMENT PROPERTY

Subpart 245.3—Providing Government Property to Contractors

Sec.
5145.301 Definitions
5145.302-3 Other contracts.
5145.302-6 Required Government property clauses for facilities contracts.
5145.303 Providing material.

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DoD Directive 5000.35, and DoD FAR Supplement 201.301.

Subpart 245.3—Providing Government Property to Contractors

5145.301 Definitions.

"Other Government Property" means all property, other than special Use property as defined below, which may be offered to a contractor for use in performance of installation support services contracts.

"Special Use Property" means property that is (a) "agency peculiar property", (b) necessary for mobilization requirements; or (c) property for which it has been determined that title should remain with the Government.

5145.302-3 Other contracts.

(S–90) (1) When it is determined that contractor use of existing Government facilities, other than special use property, in the performance of installation support services contracts, is in the best interest of the Government, the Government facilities will be offered to a contractor for use in the performance of the Government Contract. Facilities provided to a contractor under this authority will not be replaced by the Government when they can no longer be used by the contractor. Nevertheless, it will be the contractor's responsibility to continue performance in accordance with the terms of the contract.

(2) (i) New facilities shall not be purchased in order to provide them to contractors. Prior to offering existing facilities under this authority, a contracting officer shall make a written determination, based on the detailed justification provided by the approving officials and program/project manager, that such use is in the best interest of the Government. The written determination shall be kept in the contract file.

(ii) Existing facilities offered for contractor use will be offered to all bidders/offerors for their consideration in the preparation of the their bids and offers. Bidders/offerors may choose to use any or all of the facilities offered.

(3) When it is determined that contractor use of special use property in the performance of installation support services contracts is in the best interest of the the Government, such property will be provided. It will be accounted for and managed under the appropriate Government property clause.

For example, FAR 52.245–2 for fixed-price contracts or FAR 52.245–5 for cost-reimbursement contracts and any appropriate provision from FAR 52.245–11, Facilities Use Clause.

5145.302-6 Required Government property clauses for facilities contracts.

(S–90) In addition to the clauses at FAR 52.245–2 and 52–245–19, the Contracting Officer shall insert the clause at 5152.245–9000, Government Property for Installation Support Services (Fixed-Price Contracts), in solicitations and contracts when a fixed-price contract is contemplated and Government property will be provided without being replaced by the Government.

(S–91) The Contracting Officer shall insert the clause at 5152.245–9001, Government Property for Installation Support Services (Cost-Reimbursement Contracts), in solicitations and contracts when a cost-reimbursement type contract is contemplated and the Government property will be provided without being replaced by the Government.

5145.303 Providing material.

(S–90) Existing Government material on hand or being used prior to conversion to contractor performance of commercial activities may be offered to contractors if it is determined to be in the best interest of the Government per FAR 45.303–1. If the material is to be provided without replacement by the Government, the solicitation must state that it will not be replaced. If it is determined that the Government will be responsible for replacement of any of the material, those items must be listed on a separate Technical Exhibit and the solicitation state that replacement will be by the Government. These items will be governed by the appropriate Government Property clause in the contract in accordance with FAR 52.245–2 for fixed-price and FAR 52.245–5 for cost-reimbursement type contracts.

2. Part 5152 is added to read as follows:

PART 5152—SOLICITATIONS PROVISIONS AND CONTRACT CLAUSES

Sec.
5152.245–9000 Government property for installation support services (fixed-price contracts).
5152.245–9001 Government property for installation support services (cost-reimbursement contracts).

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DOD Directive 5000.35, and DOD FAR Supplement 201.301.

5152.245–9000 Government property for installation support services (fixed-price contracts).

As prescribed in 5145.302–6(S–90), insert the following:

Government Property for Installation Support Services (Fixed-Price Contracts) (XXX 1989) (DEV)

The Government property listed at Technical Exhibit _____ is provided "as is" to the contractor for use in the performance of this contract. This property may be used by the Contractor until the Contractor no longer desires to use it for contract performance or the Contracting Officer withdraws it from use under this contract in accordance with FAR 52.245–2(b). The Contractor will comply with instructions from the Contracting Officer relative to disposition of the property. No equitable adjustment or other claim will be payable to the Contractor based upon the condition or availability of the property, except as provided in FAR 52.245–19. The Contractor remains responsible for performance of the required services under this contract regardless of the length of time which the property provided hereunder remains operational. Property provided by or obtained by the Contractor under this contract remains Contractor property. Except as provided herein, the property listed at Technical Exhibit _____ will be governed by FAR 52.245–2, Government Property [Fixed-Price Contracts], and FAR 52.245–19, Government Property Furnished "as is".

5152.245–9001 Government property for installation support services (cost-reimbursement contracts).

As prescribed in 5145.302–6(S–91), insert the following clause:

Government Property for Installation Support Services (Cost-Reimbursement Contracts) (XXX 89) (DEV)

(a) *Government-furnished property.* The Government property listed at Technical Exhibit _____ is provided to the Contractor for use in the performance of this contract for installation support services. This property will be used, maintained and administered by the Contractor until it is no longer required by the Contractor. Cessation of such use of the property, and subsequent turn-in, must be approved by the Contracting Officer. The Contracting Officer will provide the Contractor with appropriate disposition instructions. The Contractor will continue to perform following such disposition with Contractor-owned property. No equitable adjustment or claim will be payable resulting from turn-in or unsuitability for intended use of this property. No change to this contract is indicated by approval of turn-in of the property. No delay claim or performance delay will be allowed based on unsuitability of property or turn-in. The Contractor's proposal includes an estimate of the costs for providing its own property for the period following turn-in of Government property.

(b) *Changes in Government-furnished property.* The Contracting Officer may, by written notice, decrease the Government-furnished property or substitute other property for the property being used by the Contractor. In the case of this withdrawal, of property by the Contracting Officer, an equitable adjustment may be appropriate. Nevertheless, even in the case of such withdrawal the Contractor is obligated to continue performance under this contract.

(c) *Title in Government property.* (1) Title to the property shall remain in the Government. Title to parts replaced by the Contractor in carrying out its normal maintenance obligations under paragraph (g) of this clause shall pass to and vest in the Government upon completion of their installation in the property.

(2) Title to the property shall not be affected by their incorporation into or attachment to any property not owned by the Government, nor shall any item of the property become a fixture or lose its identity as personal property by being attached to any real property. The Contractor shall keep the property free and clear of all liens and encumbrances and, except as otherwise authorized by this contract or by the Contracting Officer, shall not remove or otherwise part with possession of, or permit the use by others of any of the property.

(3) The Contractor may, with the written approval of the Contracting Officer, install, arrange, or rearrange, on Government furnished premises, readily removable machinery, equipment and other items belonging to the Contractor. Title to any such item shall remain in the Contractor even though it may be attached to real property owned by the Government, unless the Contracting Officer determines that it is so permanently attached that removal would cause substantial injury to Government property.

(4) The Contractor shall not construct or install, at its own expense, any fixed improvement or structural alterations in Government buildings or other real property without advance written approval of the Contracting Officer. Fixed improvement or structural alterations, as used herein, means any alteration or improvement in the nature of the building or other real property that, after completion, cannot be removed without substantial loss of value or damage to the premises. The term does not include foundations for production equipment.

(d) *Location of the property.* The Contractor may use the property only at the installation location(s) specified in the schedule. Written approval of the Contracting Officer is required prior to moving the property to any other location. In granting this approval, the Contracting Officer may prescribe such terms and conditions as may be deemed necessary for protecting the Government's interest in the property involved. Those terms and conditions shall take precedence over any conflicting provisions of this contract.

(e) *Notice of use of the property.* The Contractor shall notify the Contracting Officer in writing whenever any item of the property is no longer needed or usable for performing under this contract. The contract officer will then make a decision as to disposition if agreement is reached with the Contractor that the property is no longer usable or suitable for its intended use.

(f) *Property control.* The Contractor shall maintain property control procedures and records, and a system of identification of the property, in accordance with the provisions of FAR Subpart 45.5 in effect on the date of this contract.

(g) *Maintenance.* (1) Except as otherwise provided in the Schedule, the Contractor shall protect, preserve, maintain (including normal parts replacement), and repair the property in accordance with sound industrial practice.

(2) No later than 45 days after the execution of this contract, the Contractor shall submit to the Contracting Officer a written proposed maintanance program, including a maintenance records system, in sufficient detail to show the adequacy of the proposed program. If the Contracting Officer agrees to the proposed program, it shall become the normal maintenance obligation of the Contractor. The Contractor's performance according to the approved program shall satisfy the Contractor's obligations under subparagraphs (g) (1) and (45) of this clause.

(3) The Contracting Officer may at any time direct the Contractor in writing to reduce the work required by the normal maintenance program. If such order reduces the cost of performing the maintenance, an appropriate equitable adjustment may be made.

(4) The Contractor shall perform any maintenance work directed by the Contracting Officer in writing. Work in excess of the maintenance required under (g)(1) through (g)(3) of this clause shall be at Government expense. The Contractor shall notify the Contracting Officer in writing when sound industrial practice requires maintenance in excess of the normal maintenance program. The Contracting Officer shall then make a determination whether to repair the facilities or whether the Contractor should provide contractor property while continuing to perform.

(5) The Contractor shall keep records of all work done on the property and shall give the Government reasonable opportunity to inspect such records. When property is disposed of under this contract, the Contractor shall deliver the related records to the Government, or, if directed by the Contracting Officer, to third persons.

(6) The Contractor's obligation under this clause for each item of property shall continue until the item is removed, abandoned, or disposed of in accordance with Contracting Officer's instructions.

(h) *Access.* The Government and any persons designated by it shall, at all reasonable times have access to the premises where any of the property is located.

(i) *Indemnification of the Government.* The Contractor shall indemnify the Government and hold it harmless against claims for injury to persons or damage to property of the Contractor or others arising from the Contractor's possession or use of the property under this contract. Nevertheless, this provision applies only to injury arising out of use of property provided under this clause.

(j) *Representation and warranties.* (1) The Government makes no warranty, express or implied, regarding the condition or fitness for use of any property. To the extent practical, the Contactor shall be allowed to inspect all the property to be furnished by the Government.

(2) If, however, the Contractor receives property in a condition not suitable for the intended use, the Contractor shall, within 30 days after receipt and installation thereof, so notify the Contracting Officer, detailing the facts, and, as directed by the Contracting Officer, and at Government expense, either return such item or otherwise dispose of it or effect repairs or modifications. If the determination is made by the Contracting Officer to require turn-in rather than repair of the property, then the Contractor will continue to perform the contract by using its own property, for which reimbursement will be made in accordance with applicable cost principles.

(k) *Limited risk of loss.* (1) The Contractor shall not be liable for loss or destruction of, or damage to, the Government property provided under this contract or for expenses incidental to such loss, destruction, or damage, except as provided in subparagraphs (k) (2) and (3) of this clause.

(2) The Contractor shall be responsible for loss or destruction of, or damage to, the Government property provided under this contract (including expenses incidental to such loss, destruction, or damage)—

(i) That results from a risk expressly required to be insured under this contract, but only to the extent of the insurance required to be purchased and maintained or the extent of insurance actually purchased and maintained, whichever is greater;

(ii) That results from a risk that is in fact covered by insurance or for which the Contractor is otherwise reimbursed, but only to the extent of such insurance or reimbursement;

(iii) For which the Contractor is otherwise responsible under the express terms of this contract;

VOL 54 ISS 73 AP 18 1989 UMI

(iv) That results from willful misconduct or lack of good faith on the part of the Contractor's managerial personnel; or

(v) That results from a failure on the part of the Contractor, due to willful misconduct or lack of good faith on the part of the Contractor's managerial personnel, to establish and administer a program or system for the control, use, protection, preservation, maintenance, and repair of Government property as required by paragraph (f) of this clause.

(3) (i) If the Contractor fails to act as provided by subdivision (k)(2)(v) of this clause, after being notified (by certified mail addressed to one of the Contractor's managerial personnel) of the Government's disapproval, withdrawal of approval, or nonacceptance of the system or program, it shall be conclusively presumed that such failure was due to willful misconduct or lack of good faith on the part of the Contractor's managerial personnel.

(ii) In such event, any loss or destruction of, or damage to, the Government property shall be presumed to have resulted from such failure unless the Contractor can establish by clear and convincing evidence that such loss, destruction, or damage—

(A) Did not result from the Contractor's failure to maintain an approved program or system; or

(B) Occurred while an approved program or system was maintained by the Contractor.

(4) If the Contractor transfers Government property to the possession and control of a subcontractor, the transfer shall not affect the liability of the Contractor for loss or destruction of, or damage to, the property as set forth above. However, the Contractor shall require the subcontractor to assume the risk of, and be responsible for, any loss or destruction of, or damage to, the property while in the subcontractor's possession or control, except to the extent that the subcontract, with the advance approval of the Contracting Officer, relieves the subcontractor from such liability. In the absence of such approval, the subcontract shall contain appropriate provisions requiring the return of all Government property in as good condition as when received, except for reasonable wear and tear or for its use in accordance with the provisions of the prime contract.

(5) Upon loss or destruction of, or damage to, Government property provided under this contract, the Contractor shall so notify the Contracting Office and shall communicate with the loss and salvage organization, if any, designated by the Contracting Officer. With the assistance of any such organization, the Contractor shall take all reasonable action to protect the Government property from further damage, separate the damaged and undamaged Government property, put all the affected Government property in the best possible order, and furnish to the Contracting Officer a statement of—

(i) The lost, destroyed, or damaged Government property;

(ii) The time and origin of the loss, destruction, or damage;

(iii) All known interests in commingled property of which the Government property is a part; and

(iv) The insurance, if any, covering any part of or interest in such commingled property.

(6) The Contractor shall repair, renovate, and take such other action with respect to damaged Government property as the Contracting Officer directs. If the Government property is destroyed or damaged beyond practical repair, or is damaged and so commingled or combined with property of others (including the Contractor's) that separation is impractical, the Contractor may, with the approval of and subject to any conditions imposed by the Contracting Officer, sell such property for the account of the Government. Such sales may be made in order to minimize the loss to the Government, to permit the resumption of business, or to accomplish a similar purpose. The Contractor shall be entitled to an equitable adjustment in the contract price for the expenditures made in performing the obligations under this subparagraph (k)(6). However, the Government may directly reimburse the loss and salvage organization for any of their charges. The Contracting Officer shall give due regard to the Contractor's liability under this paragraph (k) when making any such equitable adjustment.

(7) The Contractor shall not be reimbursed for, and shall not include as an item of overhead, the cost of insurance or of any reserve covering risk of loss or destruction of, or damage to, Government property, except to the extent that the Government may have expressly required the Contractor to carry such insurance under another provision of this contract.

(8) In the event the Contractor is reimbursed or otherwise compensated for any loss or destruction of, or damage to, Government property, the Contractor shall use the proceeds to repair, renovate, or replace the lost, destroyed, or damaged Government property or shall otherwise credit the proceeds to, or equitably reimburse, the Government, as directed by the Contracting Officer.

(9) The Contractor shall do nothing to prejudice the Government's rights to recover against third parties for any loss or destruction of, or damage to, Government property. Upon the request of the Contracting Officer, the Contactor shall, at the Government's expense, furnish to the Government all reasonable assistance and cooperation (including the prosecution of suit and the execution of instruments of assignment in favor of the Government) in obtaining recovery. In addition, where a subcontractor has not been relieved from liability for any loss or destruction of, or damage to, Government property, the Contractor shall enforce for the benefit of the Government the liability of the subcontractor for such loss, destruction, or damage.

(l) *Disposition of the facilities.* (1) The provisions of this paragarph shall apply to facilities whose use has been terminated by either the Contracting Officer or the Contractor because the property is no longer suitable for intended use, no longer desired, or is withdrawn from use by the Government.

(2) The Contractor shall dispose of the property provided hereunder in accordance with guidance provided by the Contracting Officer.

(3) The Contracting Officer shall give disposition instructions within 60 days of agreement that the property should be returned to the Government.

(4) The Government may remove or otherwise dispose of any facilities for which the Contractor's authority to use has been terminated.

(5) When Government property is returned to the Government, upon termination of the contract relationship between Government and Contractor or when Government furnished property is replaced by Contractor property, the Contracting Officer may direct repair of Government property necessitated by the change from Government to Contractor property such as removal of fixtures. When Contractor property is removed from Government property at the end of contract performance, the Government property will be restored to its condition prior to installation of Contractor property in accordance with Contracting Officer direction.

(End of clause)

John O. Roach, II,

Army Liaison Officer with the Federal Register.

BILLING CODE 3710-08-M

---

48 CFR Parts 5108 and 5152

Acquisition Regulations: Solicitations, Provisions and Contract Clauses; Industrial Preparedness Planning

AGENCY: Department of the Army, DOD.

ACTION: Proposed rule and request for comments.

SUMMARY: The Defense Acquisition Regulatory Council approved for a three year test period, Department of the Army deviation to Defense Acquisition Regulation Supplement (DFARS) sections 206.070(b), 206.070(g) and Part 252. The three changes are: (1) Change the definition to delete reference to the DD Form 1519 and to add reference to a Memorandum of Understanding and contractual commitments; (2) change procedure to permit differentiation between planned producers by the degree of commitment required. The differentiation is categorized into three groups. Group A entails the least commitment on both Contractor and Government. It is a Memorandum of Understanding with a DD Form 1519 (test) attached. The contractor agrees to maintain production capability for two years but is not contractually bound to do so. The signatory company is designated a "planned producer" and, as such, becomes eligible to compete in all buys over $25,000 of the planned item which are not restricted to the Mobilization Base in accordance with an approved justification and Approval.

(That is, they must be solicited for full and open buys and for those restricted to U.S. and Canada, but do not participate in buys restricted to a group of named Mobilization Base Planned Producers.) Group B entails a greater degree of commitment on the part of both sides. The contractor agrees to maintain production capability for a negotiated period of time on a no-cost basis and is contractually bound to do so which then entitles the contractor to be solicited for all buys of the item over $25,000 including those acquisitions for which competition is restricted to Mobilization Base planned procedures. Group C involves the payment by the government for a contractor's commitment to maintain production capability; (3) permit the use of contract clause to accomplish the government's obligation under Group C.

DATES: *Comments:* Comments on the proposed rule should be submitted to the address shown below not later than June 2, 1989, to be considered in the formulation of a final rule.

ADDRESS: Interested parties should submit written comments to: Headquarters, U.S. Army Materiel Command, Attn: AMCPP-PP, 5001 Eisenhower Avenue, Alexandria, Virginia 22333-0001. Please cite Deviation Case 89-003 in all correspondence related to this subject.

FOR FURTHER INFORMATION CONTACT: Ms. Dee Emmerich, Contract Policy Division, AMCPP-PP, telephone (202) 274-9619.

SUPPLEMENTARY INFORMATION:

A. Background

In 1985 the Under Secretary of the Army suspended the Army's use of the DD Form 1519 for Industrial Preparedness Production Planning (IPP). In 1987 the Under Secretary of the Army approved the development of a revised system for the conduct of IPP within the Army. The need for such revision was evidenced by poor accuracy in data collection using the DD Form 1519 and the lack of commitment involved with the voluntary only DD Form 1519 process. The new Army system, Production Planning Schedule (PPS), separates data collection from commitment. This allows greater flexibility for planning purposes in that the three aforementioned alternatives are available to enlist commitment, from the parties. The original DD Form 1519 was strictly a voluntary non-binding commitment on either party. Aside from the commitment the original DD Form 1519 has been updated for Army use and a DD Form 1519 (test) is currently undergoing OMB review. The test form will not involve commitment on the part of either party as it will serve only as a data collection instrument. The new form contains definitions and unlike the old form it is explicit in its request for varying data. Nonstandard and misinterpreted answers will be minimized thus improving data accuracy.

B. Regulatory Flexibility Act

An initial Regulatory Flexibility Analysis has not been prepared because the proposed rule does not appear to have a significant impact on a substantial number of small entities. Comments to the contrary will be considered.

C. Paperwork Reduction Act

This rule does not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501 et seq. Application for OMB review and approval has been made for the DD Form 1519 (Test). See FR (54 FR 6565)

List of Subjects in 48 CFR Parts 206 and 252

Government procurement, Industrial preparedness production planning.

Therefore Title 48 of the Code of Federal Regulations is proposed to be amended as follows:

1. Part 5108 is added to read as follows:

PART 5108—REQUIRED SOURCES OF SUPPLIES AND SERVICES.

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DOD Directive 5000.35, and DOD FAR Supplement 201.301.

5108.070 Industrial preparedness production planning.

(b) *Definitions.*

"Mobilization Base Planned Producer" means an industrial firm which is contractually bound to maintain production capacity for a negotiated length of time, to conduct subcontractor planning, and to produce specified military items in the event of a declared national emergency or in the event of mobilization or contingencies short of a declared national emergency. "Planned Producer" means an industrial firm which has indicated its willingness to produce specified military items in a declared national emergency by completing a Memorandum of Understanding with an accompanying Industrial Preparedness Program Production Capacity Survey (DD Form 1519 (Test)).

(g)(1)(i) Solicitation of Mobilization Base Planned Producers in all acquisitions over $25,000 of items for which they have been designated as a Mobilization Base Planned Producer (use clause 252.208-9001.)

(ii) Solicitation of Planned Producers in all acquisitions of $25,000 which have not been restricted to Mobilization Base Planned Producers and which are for items for which they have been designated as a Planned Producer.

PART 5152—SOLICITATIONS PROVISIONS AND CONTRACT CLAUSES

Authority: 5 U.S.C. 301, 10 U.S.C. 2202, DOD Directive 5000.35, and DOD FAR Supplement 201.301.

2. Section 5152.208-9001 is added to read as follows:

5152.208-9001 Industrial preparedness planning.

As prescribed at 5108.070 (g)(1)(i) insert the following clause in full text in contracts where the contractor is designated a Mobilization Base Planned Producer.

Industrial Preparedness Planning (XXX1989) (DEV)

(a) The Government designates the contractor a Mobilization Base Planned Producer (MBPP) for the item(s) listed in subparagraph (e) below. As a MBPP for the listed items, the contractor will be solicited for all acquisitions of the items(s), including those for which competition is restricted to Mobilization Base Planned Producers pursuant to an approved Justification and Approval. The Government reserves the right to obtain the item(s) listed from sources other than the commercial marketplace, i.e., by assigning workload to a government-owned facility.

(b) The Contractor agrees to

(i) Update the Production Capacity Survey DD Form 1519 (test) for each item biennially;

(ii) Accomplish subcontractor planning as required in subparagraph (f) below;

(iii) Permit Government personnel access to records, manufacturing process data, plants and facilities in order to verify data on the Production Capacity Survey DD Form 1519 (test).

(iv) Maintain the surge/mobilization capacity set forth in the Production Planning Schedules during active production of the item and for a period of (negotiated number) years after physical completion of this production contract.

(c) The Contractor is aware of the Government's dependence upon the Production Planning Schedules as a basis to take appropriate measures to ensure the adequacy of the United States Industrial Base. The Contractor also recognizes the Government's intention to convert Production Planning Schedule to contracts on a selective basis, as may be required to minimize materiel shortages during mobilization or to meet contingencies short of a declared national emergency. The Contractor agrees to accept contracts for the item(s) in accordance with the Production Planning Schedules. In

VOL
54
ISS
73
AP
18
1989
UMI

the event mobilization or contingencies short of a declared national emergency occur after active production has ceased, and the allocated capacity is in use for the production of other item(s), the Contractor agrees to immediately discontinue production of such other item(s) if necessary to meet production schedules for the planned item(s). The Contractor further recognizes that it is the Government's intention to require that planned subcontractor support will be similarly converted to production subcontracts. Production delivery obligations under this clause are governed by Title I of the Defense Production Act of 1950, as amended (50 U.S.C. app. 2061, et seq.) (Defense Production Act) and as applicable are within the purview of the Defense Priorities and Allocation System.

(d) For the listed item(s), the Contractor certifies by signing this contract that the plant capacity required to support the mobilization quantity listed on the Production Capacity Survey DD Form 1519 (Test) will be dedicated exclusively for the production of that item at mobilization. Furthermore, the Contractor certifies that this capacity is not shared by any other mobilization production requirements.

(e) This clause covers the item(s) listed below:

Item Schedule No.	Item Nomenclature (Sample)	IPPL Priority
M11111	Fuze, Rocket, MK987	1
M22222	Machine Gun, MK35	2

(f) The Industrial Preparedness Planning List (IPPL) identifies and prioritizes end items and components requiring Industrial Preparedness Planning to maintain an industrial base capable of meeting surge/mobilization requirements. Mandatory vertical (subcontractor) planning will be accomplished by the Contractor for all IPPL priority 1 items (see paragraph (e) above), by using a Production Capacity Survey, DD Form 1519 (Test). The Contractor agrees to coordinate completion of the DD Form 1519 (Test) Production Capacity Survey and finalize prime and subcontractor planning with the Armed Service Production Planning Officer (ASPPO) having cognizance over the prime contractor's facility.

(g) Subcontractors, suppliers and vendors provide many of the components of military end items. The lack of critical components could be one of the major limitations of the United States' ability to support its Armed Forces warfighting capabilities. Therefore, the Government designated critical components and/or subassemblies in Block #27 of the attached Production Capacity Survey DD Form 1519 (Test) are those for which the Contractor will conduct vertical planning if not produced in-house.

(h) Additional critical components and/or subassemblies may be identified by the Contractor in block #21 of the attached Production Capacity Survey DD Form 1519 (Test).

(i) Foreign producers (other than Canada) will not be considered as a source of supply for critical components.

(j) After completion of active production for the item(s), the Government will annually, or as changes occur but not more than annually, furnish the Contractor updated technical data for the item. The Contractor agrees to review the technical data and to report to the Government within 60 days of receipt of the data, the impact of technical changes, if any, to the current Production Planning Schedules at no additional cost to the Government.

(k) Retention by the Contractor of the surge/mobilization capacity set forth in the Production Planning Schedules after completion of active production of the planned item(s) will not necessarily require that the Contractor maintain such capacity in idle status. Contractor utilization of capacity allocated for planned production for production of other non-planned items is consistent with the intent of any postproduction provisions of this contract, provided no degradation of surge/mobilization capacity occurs as a result, and provided that the approval of the Contracting Officer with property cognizance is obtained for the use of any Government-owned property.

(End of clause)

BILLING CODE 3410-20-M

Forest Service

Amendment to the Regional Guide; Rocky Mountain Region; Intent To Prepare an Environmental Impact Statement and an Amendment to the Regional Guide Colorado, Kansas, Nebraska, South Dakota, Wyoming

The Department of Agriculture, Forest Service, will amend the Regional Guide for the Rocky Mountain Region. An environmental analysis is being started to update information in the current Guide which will benefit upcoming scheduled Forest Plan revisions. The 5-State Rocky Mountain Region includes Colorado, Kansas, Nebraska, South Dakota, and that portion of Wyoming east of the Continental Divide.

The Regional Guide amendment may modify existing decisions on: (1) Coordination of National Forest System, State and Private Forestry, and Research programs for the Rocky Mountain Region; and (2) goals and objectives, and standards and guidelines in the existing Guide.

The Regional Guide contains decisions relative to: (1) Regional programs, goals, and objectives; (2) tentative resource objectives for each National Forest administrative unit from the current Resources Planning Act (RPA) Program; (3) Regional management standards and guidelines developed to address major Regional issues and management concerns; (4) specific standards and guidelines, required by regulation for silvicultural practices, timber utilization standards, transportation corridors, and potential air pollution emissions; and (5) description of measures to achieve coordination of National Forest System, State and Private Forestry, and Research programs.

Decisions made in the Regional Guide amendment should not be confused with decisions from other planning levels. There are two levels of decisions below the Regional Guide for units of the National Forest System. These are; (1) Approval of the Forest Land and Resource Management Plans, which includes decisions on (a) Forest multiple-use goals and objective, (b) multiple use prescriptions and associated standards and guidelines, (c) land suited for timber production, (d) allowable sale quantity and associated timber sale schedule, (e) minitoring and evaluation requirements, and (f) project and activity decisions if they are specifically identified; and (2) approval of management practices, projects, and activities that implement Forest plans.

The Regional Guide amendment process will focus only on those aspects of the Regional Guide which reflect a need for change based on new information, changing issues, or results of monitoring. Sources of information to make this determination will include input from State governments, individuals, organizations, and other Federal entities; results of monitoring the Forest Land and Resource Management Plans and current Regional Guide; and the 1990 RPA Assessment and Program.

The Regional Guide amendment will include an assessment of resources and services produced in the Rocky Mountain Region by state or sub-region.

A range of alternatives will be developed to address any major issues identified. Analysis of alternatives will develop and display environmental consequences for public consideration associated with new or revised goals and objectives, standards and guidelines, and as appropriate planning guides. The "no action" alternative will be continued use of the existing Regional Guide without change.

Issues tentatively identified that will likely need to be addressed in scoping the amendment to the Regional Guide include:

—Changing recreation preferences
—Changing use of resources
—Providing economic growth, economic stability, and economic diversity in harmony with states' and counties' goals and objectives
—Addition and/or expansion of winter sports sites
—Increased demands for water and water storage projects
—Management of riparian areas
—Coordination of wildlife habitat management with the states' responsibilities to manage wildlife populations
—Fire protection at the urban wildlands interface
—Use of fire as a management tool
—Communities, business, and individuals dependant on resources from and uses of the National Forests
—Research to carry out the Rocky Mountain Region's research program
—Wild and scenic rivers
—Visual quality
—Coordination in the Greater Yellowatone area
—Forest health
—Roadless areas
—Biological diversity
—Utility corridors
—Public access
—Sections of the existing Regional Guide pertaining to goals and objectives and standards and guidelines.

Additional issues may be identified through public involvement. The Regional Guide will address and deal with issues which are regional or sub-regional in scope. Issues limited to management of individual National

VOL 54 ISS 73 AP 18 1989 UMI

Forests and Grasslands will not be addressed or dealt with in this Regional Guide.

Federal and state agencies, organizations, and other identifiable potentially affected interests will be invited by letter and publication of this notice to participate in the identification of issues. The scoping process will include: (1) Identification of potential issues, concerns, and opportunities to be analyzed; and (2) elimination of inappropriate issues, concerns, or opportunities or those which have been covered by previous environmental review. A variety of public involvement tools will be used. If public meetings are needed they will be held. Thirty days public notice will be given for any public participation activities.

The analysis is expected to take about 18 months. A draft Environmental Impact Statement will be available for public review by September 1990. A final Environmental Impact Statement is scheduled for completion in April 1991.

If the amendment is determined to be significant under the National Forest Management Act, the responsible official will be F. Dale Robertson, Chief, Forest Service, Washington DC. If the amendment is not significant under the National Forest Management Act, the responsible official will be Gary E. Cargill, Regional Forester, Rocky Mountain Region.

Written comments and suggestions concerning the analysis should be sent to the Regional Forester, ATTN: Dick Lindenmuth, Rocky Mountain Region, 11177 W. 8th Avenue, Box 25127, Lakewood, CO 80225–0127 by June 19, 1989. Individuals, organizations, etc., who are on the Regional Guide amendment mailing list will receive National level RPA Program documents.

Questions about the proposed action and analysis should be directed to Dick Lindenmuth, Planning Team Leader, Rocky Mountain Regional Office, phone 303–236–9656 or FTS 776–9656.

Date: April 12, 1989.

S.H. Hanks,

Deputy Regional Forester.

BILLING CODE 3410–11–M

H D Mountains Coalbed Methane Gas Development; San Juan National Forest Archuleta and La Plata Counties, CO; Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service will prepare an Environmental Impact Statement (EIS) to describe alternatives and environmental consequences for the development of the H D Mountains Coalbed Methane Gas Project on the Pine Ranger District. A Record of Decision accompanying the EIS will determine the conditions of use for the developer.

The San Juan National Forest Land and Resource Management Plan was completed in September of 1983. The Plan's EIS contains a projection of expected drilling and production activities and describes the environmental effects of these anticipated activities. The coalbed methane gas project, proposed by AMOCO Production Company, is expected to result in environmental effects which may be greater than those evaluated by the EIS accompanying the Forest Plan. Environmental analysis and appropriate documentation is required for approval of levels of activities not evaluated in the Plan EIS.

A range of alternatives for the development will be considered. One of these will be no further development. Other alternatives will consider varying development rates, and varying degrees of development on the area up to a maximum development of 140 wells. Alternative locations for roads, pipelines and support facilities will be considered.

Scoping was begun in November 1988 by direct letter contact to known interested parties, newspaper announcements in the local newspapers and posting a scoping document at the Pine Range District Office. Forty responses were received. These, plus any other responses will be used for:

1. Identification of the potential issues and concerns associated with the proposed project.
2. Identification of the issues which will be analyzed in depth.
3. Elimination of insignificant issues or those which have been covered by a previous environmental review.
4. Determination of cooperating agencies and assignment of responsibilities.

A public meeting for additional scoping is scheduled at the Lions Club Hall, 451 S. Church Street, Bayfield, Colorado, on May 4, 1989, at 7:00 p.m.

The Bureau of Land Management, Department of the Interior, has been invited to participate as a cooperating agency to evaluate the potential impacts on groundwater production by water from gas wells, subsurface disposal of produced water, and all other technical aspects of drilling and production.

Michael G. Johnson, District Ranger, Pine Ranger District, San Juan National Forest, Bayfield, Colorado is the responsible official.

The analysis is expected to take approximately eight months. The draft Environmental Impact Statement should be available for public review by August 1989. The final Environmental Impact Statement is scheduled to be completed by November 1989.

Written comments and suggestions concerning the analysis should be sent to Michael G. Johnson, District Ranger, Pine Ranger District, P.O. Box 439, Bayfield, Colorado 81122 by May 15, 1989.

Questions about the proposed action and Environmental Impact Statement should be directed to Dick Bell, Pine Ranger District, phone (303) 884–2512.

Date: April 10, 1989

Michael G. Johnson,

District Ranger, USDA Forest Service, R–2, San Juan National Forest.

BILLING CODE 3410–11–M

COMMISSION ON CIVIL RIGHTS

Michigan Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Michigan Advisory Committee to the Commission will convene at 9:00 a.m. and adjourn at 5:00 p.m., on Friday, May 5, 1989, at the Westin Hotel, Renaissance Center, Detroit, Michigan. The purpose of the meeting, which will involve a community forum, is to receive information on the civil rights aspects of minority student dropouts.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson Dennis L. Gibson, Jr., or William F. Muldrow, Acting Director of the Central Regional Division (816) 426–5243, (TDD 816/426–5009). Hearing impaired persons who will attend the meeting and require the services of a sign language interpreter, should contact the Regional Division at least five (5) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, April 7, 1989.

Melvin L. Jenkins,

Acting Staff Director.

DEPARTMENT OF COMMERCE

Office of the Secretary

Advisory Committee; Availability of Report on Closed Meetings

AGENCY: Office of the Secretary; Department of Commerce.

ACTION: Announcing public availability of report on closed meetings of advisory committees.

SUMMARY: The Department of Commerce has prepared its report on the activities of closed or partially-closed meetings of advisory committees as required by the Federal Advisory Committee Act.

ADDRESSES: Copies of the reports have been filed and are available for public inspection at two locations:

Library of Congress, Newspaper and Current Periodicals Reading Room, Room LM133, Madison Building, 1st and Independence Avenues SE., Washington, DC 20540

Department of Commerce, Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th and Constitution Avenue NW., Washington, DC 20230 Telephone (202) 377–3271.

SUPPLEMENTARY INFORMATION: The reports cover the closed and partially-closed meetings held in 1988 of 37 committees and their subcommittees, the names of which are listed below:

Automated Manufacturing Equipment Technical Advisory Committee
Committee of Chairmen of Industry Advisory Committees for Trade Policy Matters (TPM)
Computer Peripherals, Components, and Related Test Equipment Technical Advisory Committee
Computer Systems Technical Advisory Committee
—Hardware Subcommittee
—Software Subcommittee
—Licensing Procedures and Regulations Subcommittee
Electronic Instrumentation Technical Advisory Committee

BILLING CODE 3510–CW–M

Foreign-Trade Zones Board

[Docket No. 3–89]

Foreign-Trade Zone 50, Long Beach, CA; Application for Expansion

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Board of Harbor Commissioners of the Port of Long Beach (BHC), grantee of Foreign-Trade Zone 50, requesting authority to expand the zone to include additional acreage at the California Commerce Center site located in Ontario, California, adjacent to the Los Angeles-Long Beach Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 27, 1989.

The Long Beach zone was approved on September 14, 1979 (Board Order 147, 44 FR 55919, 9/28/79). It was expanded to include a site in Ontario on April 2, 1985 (Board Order 298, 50 FR 15205, 4/17/85). The Ontario site encompasses 1,350 acres in the California Commerce Center (CCC) industrial park. In November 1988, a temporary boundary modification was approved which shifted 505 acres from the northern section of CCC to the southern section. The area involved is bounded by Mission Boulevard, Haven Avenue, the Pomona Freeway and the Cucamonga Channel.

The grantee is now requesting an expansion of the CCC park site to make the temporary 505-acre parcel in the southern section a permanent part of the zone, and to reinstate the 505-acre parcel in the northern section. The applicant states that development of the CCC site has been rapid for both zone and non-zone activity, and that the additional space is needed to accommodate prospective zone users.

No manufacturing approvals are being sought in the application. Such approvals would be requested from the Board on a case-by-case basis.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Dennis Puccinelli (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; John Heinrich, District Director, U.S. Customs Service, Pacific Region, 300 South Ferry Street, Terminal Island, San Pedro, California 90731; and Colonel Tadahiko Ono, District Engineer, U.S. Army Engineer

VOL 54 ISS 73 AP 18 1989 UMI

District, Los Angeles, P.O. Box 2711, Los Angeles, California 90053–2325.

Comments concerning the proposed expansion are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before May 29, 1989.

A copy of the application is available for public inspection at each of the following locations:

U.S. Department of Commerce, District Office, 11777 San Vicente Boulevard, Room 800, Los Angeles, California 90049.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th and Pennsylvania Avenue NW., Room 2835, Washington, DC 20230.

Dated: April 11, 1989.

BILLING CODE 3510-DS-M

[Order No. 430]

Resolution and Order Approving the Application of the Vicksburg/Jackson Foreign-Trade Zone, Inc., for a Foreign-Trade Zone in the Vicksburg/Jackson, MI, Area

Proceedings of the Foreign-Trade Zones Board, Washington, DC

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Vicksburg/Jackson Foreign-Trade Zone, Inc., filed with the Foreign-Trade Zones Board (the Board) on January 11, 1988, requesting a grant of authority for establishing, operating, and maintaining a general-purpose foreign-trade zone at sites near Vicksburg and in Jackson, Mississippi, within and adjacent to the Vicksburg Customs port of entry, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

As the proposal involves open space on which buildings may be constructed by parties other than the grantee, this approval includes authority to the grantee to permit the erection of such buildings, pursuant to § 400.815 of the Board's regulations, as are necessary to carry out the zone proposal, providing that prior to its granting such permission it shall have the concurrences of the local District Director of Customs, the U.S. Army District Engineer, when appropriate, and the Board's Executive Secretary. Further, the grantee shall notify the Board for approval prior to the commencement of any manufacturing operation within the zone. The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority To Establish, Operate, and Maintain a Foreign-Trade Zone in the Vicksburg/Jackson, MI, Area

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States;

Whereas, the Vicksburg/Jackson Foreign-Trade Zone, Inc. (the Grantee) has made application (filed January 11, 1988, FTZ Docket 1–88, 53 FR 1809) in due and proper form to the Board, requesting the establishment, operation, and maintenance of a foreign-trade zone at sites in Vicksburg and Jackson, Mississippi, adjacent to the Vicksburg Customs port of entry;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and

Whereas, the Board has found that the requirements of the Act and the Board's regulations (15 CFR Part 400) are satisfied;

Now, therefore, the Board hereby grants to the Grantee the privilege of establishing, operating, and maintaining a foreign-trade zone, designated on the records of the Board as Zone No. 158, at the locations mentioned above and more particularly described on the maps and drawings accompanying the application in Exhibits IX and X, subject to the provisions, conditions, and restrictions of the Act and the regulations issued thereunder, to the same extent as though the same were fully set forth herein, and also the following express conditions and limitations:

Operation of the foreign-trade zone shall be commenced by the Grantee within a reasonable time from the date of issuance of the grant, and prior thereto the Grantee shall obtain all necessary permits from federal, state, and municipal authorities.

The Grantee shall allow officers and employees of the United States free and unrestricted access to and throughout the foreign-trade zone sites in the performance of their official duties.

The grant does not include authority for manufacturing operations, and the Grantee shall notify the Board for approval prior to the commencement of any manufacturing operations within the zone.

The grant shall not be construed to relieve the Grantee from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said zone, and in no event shall the United States be liable therefor.

The grant is further subject to settlement locally by the District Director of Customs and the Army District Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

In witness whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer at Washington, DC, this 11th day of April 1989, pursuant to Order of the Board.

Foreign-Trade Zones Board.
Robert A. Mosbacher,
Chairman and Executive Officer.

Attest:
John J. Da Ponte, Jr.,
Executive Secretary.

[FR Doc. 89-9195 Filed 4-17-89; 8:45 am]
BILLING CODE 3510-DS-M

[Docket 4-89]

Application for Extension of FTZ Subzone Status for SZ's 22C, 22D, and 22E, Power Packaging, Inc., Plants, Chicago, IL Area

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Illinois International Port District (IIPD), grantee of FTZ 22, requesting a 2-year time extension for FTZ subzone status at three food processing plants of Power Packaging, Inc. (PPI) in the Chicago, Illinois, area. The application was formally filed on April 6, 1989.

In March 1987, the Board authorized subzone status for the PPI plants (Board Order 347, 52 FR 10246, 3/31/87) for a two-year period (from date of activation), subject to extension. Subzone activity is restricted to the production of sugar-containing products subject to the sugar quota program.

Zone procedures are being used for entries on the foreign sugar used to produce cake and flour mixes, breakfast cereals, pudding mixes, soup mixes, and other edible preparations. Customs entries are made on the finished products, and the sugar is ex-quota.

In requesting the extension, PPI indicates that subzone status has helped it compete with lower priced sugar-containing imports, preserving employment at its Chicago plants as had been contended in the original application.

Subzone authority is due to expire on June 29, 1989, and the FTZ Board is considering a temporary time extension of up to one year, during which time the proposal would be evaluated as part of an overall review of sugar-related activity in zones, which would be the subject of a separate Federal Register notice.

The application for a 2-year extension is being reviewed by the FTZ Staff. Comments are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before May 23, 1989.

A copy of the application is available for public inspection at each of the following locations:

U.S. Department of Commerce, District Office, 1406 Mid Continental Plaza Building, 55 East Monroe Street, Chicago, Illinois 60603.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 2835, 14th and Pennsylvania Avenue, NW., Washington, DC 20230.

Dated: April 13, 1989.

John J. Da Ponte, Jr.,
Executive Secretary.

[FR Doc. 89-9251 Filed 4-17-89; 8:45 am]
BILLING CODE 3510-DS-M

International Trade Administration

[A-508-801]

Final Determination of Sales at Less Than Fair Value: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, From Israel

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We determine that industrial belts and components and parts thereof, whether cured or uncured, (hereinafter referred to as industrial belts) from Israel are being, or are likely to be, sold in the United States at less than fair value. We also determine that critical circumstances exist with respect to imports of industrial belts from Israel.

We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Israel as described in the "Continuation of Suspension of Liquidation" section of this notice. The ITC will determine, within 45 days of the publication of this notice, whether these imports materially injure, or threaten material injury to, the U.S. industry.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Louis Apple or Loc Nguyen, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377–1769 or (202) 377–3530.

SUPPLEMENTARY INFORMATION:

Final Determination

We determine that industrial belts from Israel are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) (the Act). The estimated margins are shown in the "Continuation of Suspension of Liquidation" section of this notice. We also determine that critical circumstances exist with respect to industrial belts from Israel.

Case History

On January 26, 1989, we made an affirmative preliminary determination (54 FR 5105, February 1, 1989). We received comments from petitioner and respondent.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS sub-headings. The HTS sub-headings are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are industrial belts from Israel currently provided for under Tariff Schedules of the United States Annotated (TSUSA) item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510 and 773.3520; and currently classifiable under Harmonized Tariff Schedule (HTS) sub-headings 3926.90.55, 3926.90.56, 3926.90.57, 3926.90.59, 3926.90.60, 4010.10.10, 4010.10.50, 4010.91.11, 4010.91.15, 4010.91.19, 4010.91.50, 4010.99.11, 4010.99.15, 4010.99.19, 4010.99.50, 5910.00.10, 5910.00.90, and 7326.20.00.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V–belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Period of Investigation

The period of investigation is January 1, 1988, through June 30, 1988.

Fair Value Comparisons

To determine whether sales of industrial belts from Israel to the United States were made at less than fair value, we compared the United States price to the foreign market value. For our preliminary determination we used best information available as required by section 776(c) of the Act. As best information available, we took the highest margin contained in the petition for each of the product types for the period of investigation and calculated a simple average of those figures to determine a margin for the products under investigation. Since the respondent, Magam, failed to participate in the investigation, we are using the same methodology for calculating a margin for the final determination.

United States Price

United States price was based on the U.S. price information provided in the petition pursuant to section 772 of the Act.

Foreign Market Value

Foreign market value was based on home market prices provided in the

VOL 54 ISS 73 AP 18 1989 UMI

petition pursuant to section 773 of the Act.

Critical Circumstances

On June 30, 1988, petitioner alleged that critical circumstances exist with respect to imports of the subject merchandise from Israel. Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that:

(A)(i) there is a history of dumping in the United states or elsewhere of the class or kind of merchandise which is the subject of the investigation; or

(ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value; and

(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

Since the respondent, Magam, failed to participate in the investigation, we are determining that critical circumstances for this respondent exist based on best information available. As best information available, we are assuming that imports of industrial belts have been massive over a relatively short period of time. In determining knowlege of dumping, the Department normally considers margins of 25% or more sufficient to impute knowledge of dumping under section 735(a)(3)(A) (*sene, e.g., Final Determination of Sales at Less Than Fair Valuie; Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy* (52 FR 24198, June 29, 1987)). Therefore, in accordance with sections 735(a)(3)(A)(ii) and 735(a)(3)(B), we determine that critical circumstances exist with respect to Magam.

With respect to firms covered by the "All Other" rate, we have determined that imports of industrial belts have not been massive over a relatively short period of time and, therefore that critical circumstances do not exist.

Since we do not find that there have been massive imports of industrial belts from firms included in the "All Other" rate, we do not need to consider whether there is a history of dumping or whether importers of these products knew or should have known that the merchandise was being sold at less than fair value.

Interested Party Comments

Comment 1: Petitioner argues that, based on U.S. import statistics, IM 146 data, the Department should find that there have been massive imports of industrial belts over a relatively short period of time. Petitioner further asserts that an antidumping margin of 25% or more is sufficient to impute knowledge to the importer that the exporter was selling the merchandise at less than fair value.

DOC Position: Since the respondent, Magam, failed to participate in the investigation, as best information available, we are assuming that its imports of industrial belts from Israel have been massive over a relatively short period of time. Furthermore, we find that the best information available margin of 89.65% is sufficient to impute knowledge to the importer that the exporter was selling the merchandise at less than fair value.

With regard to firms covered by the "All Other" rate, see the "Critical Circumstances" section of this determination.

Comment 2: Petitioner argues that the Department's final determination should be based on the highest less-than-fair-value margin alleged in the petition.

DOC Position: The Department is applying the same methodology used in the preliminary determination to calculate the margins for the final determination. As best information available, we are taking the highest margin contained in the petition for each of the product types for the period of those figures to determine the margin for the products under investigation.

Comment 3: Petitioner asserts that in its scope of investigation at the preliminary determination, the Department listed only four HTS sub-headings. Petitioner requests that the Department list eighteen HTS sub-headings in its final determination.

DOC Position: We agree. The petition included nine TSUSA item numbers and four HTS sub-headings that petitioner believed would correspond to the TSUSA numbers when the HTS system became effective.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS sub-headings listed in a January 1989 USITC publication, *The Continuity of Import and Export Trade Statistics After Implementation of the Harmonized Commodity Description and Coding System*, petitioner requested that the Department expand the four HTS sub-headings listed in our preliminary determination to eighteen sub-headings. We asked for comments from the interested parties in this investigation concerning industrial belts covered by the eighteen HTS sub-headings.

In our preliminary determinations, as now, we note that the written description of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes es to the scope of the product coverage. We do not view providing additional HTS sub-headings as broadening the scope of this investigation.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Israel, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days prior to the date of publication of the preliminary determination in the Federal Register.

Normally, we would instruct the U.S. Customs Service to require a cash deposit or the posting of a bond equal to the estimated amounts by which the foreign market of subject merchandise from Israel exceeds the United States price as shown below. However, Artical VI.5 of the General Agreement on Tariffs and Trade provides that "no * * * product shall be subject to both antidumping and countervailing duties to compensate for the same situation of dumping or export subsidization." This provision is implemented by section 722(d)(1)(D) of the Act which prohibits assessing dumping duties on the portion of the margin attributable to an export subsidy, since there is not reason to require a cash deposit or bond for the amount. Therefore, the bonding rate in this investigation will be reduced by the rate attributable to the export subsidies found in the concurrent countervailing duty determination. Accordingly, for duty deposit purposes, the bonding rate is 79.25% for Magam and all other manufacturers, producers, and exporters of the subject merchandise from Israel.

The cash deposit or bonding rate established in the preliminary determination shall remain in effect with respect to entries or withdrawals from warehouse made prior to the date of publication of this notice in the Federal Register. The suspension of liquidation will remain in effect until further notice.

The margin percentages are shown below:

Manufacturer/producer/exporter	Margin percentage
Magam	79.25
All others	79.25

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or threat of material injury, does not exist, the proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that material injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on industrial belts from Israel entered, or withdrawn for warehouse, for consumption on or after the effective date of the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

April 11, 1989.

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-475-802]

Final Determination of Sales at Less Than Fair Value: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, From Italy

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We determine that industrial belts and components and parts thereof, whether cured or uncured, (hereinafter referred to as industrial belts) from Italy are being, or are likely to be, sold in the United States at less than fair value. We also determine that critical circumstances exist with respect to imports of industrial belts from Italy.

We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Italy as described in the "Continuation of Suspension of Liquidation" section of this notice. The ITC will determine, within 45 days of the publication of this notice, whether these imports materially injure, or threaten material injury to, the U.S. industry.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Louis Apple or Loc Nguyen, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1769 or (202) 377-3530.

SUPPLEMENTARY INFORMATION:

Final Determination

We determine that industrial belts from Italy are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) (the Act). The estimated margin is shown in the "Continuation of Suspension of Liquidation" section of this notice. We also determine that critical circumstances exist with respect to industrial belts from Italy.

Case History

On January 26, 1989, we made an affirmative preliminary determination (54 FR 5103, February 1, 1989). On January 26, 1989, Pirelli submitted revised computer tapes, and on February 21, 1989, Pirelli submitted a product concordance. On March 23, 1989, the Department held a public hearing. Interested parties submitted comments for the record.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date will be classified solely according to the appropriate HTS sub-headings. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are industrial belts from Italy provided for under Tariff Schedules of the United States Annotated (TSUSA) item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510 and 773.3520; and currently classifiable under Harmonized Tariff Schedule (HTS) sub-headings 3926.90.55, 3926.90.56, 3926.90.57, 3926.90.59, 3926.90.60, 4010.10.10, 4010.10.50, 4010.91.11, 4010.91.15, 4010.91.19, 4010.91.50, 4010.99.11, 4010.99.15, 4010.99.19, 4010.99.50, 5910.00.10, 5910.00.90, and 7326.20.00.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Period of Investigation

The period of investigation is January 1, 1988, through June 30, 1988.

Fair Value Comparisons

To determine whether sales of industrial belts from Italy to the United States were made at less than fair value, we compared the United States price to the foreign market value. For our preliminary determination we used best information available as required by section 776(c) of the Act. As best information available, we took the highest margin contained in the petition for each of the product types and averaged those figures to determine a margin for the products under investigation. Since the respondent, Pirelli, failed to provide an adequate response, we are using the same methodology for calculating a margin for the final determination. *See* DOC Position to Comment 2.

United States Price

United States price was based on the U.S. price information provided in the petition pursuant to section 772 of the Act.

VOL 54 ISS 73 AP 18 1989 UMI

Foreign Market Value

Foreign market value was based on home market prices provided in the petition pursuant to section 773 of the Act.

Critical Circumstances

On June 30, 1988, petitioner alleged that critical circumstances exist with respect to imports of the subject merchandise from Italy. Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that:

(A) (i) there is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation; or

(ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value; and

(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

Because the Department's import data pertaining to the subject merchandise are based on basket TSUSA categories, we requested specific data on shipments of the subject merchandise as the most appropriate basis for our determinations of critical circumstances. Furthermore, we believe that company-specific critical circumstances determinations better fulfill the objective of the critical circumstances provision of deterring specific companies that may try to increase imports massively prior to the suspension of liquidation.

We asked Pirelli to supply monthly volume shipment data from November, 1987 to January, 1989 in order for the Department to base the critical circumstances determination on company-specific data. Pirelli provided the Department with information concerning monthly import data.

Since the response of Pirelli in this investigation was not used in making fair value comparisons (*see* Comment 2), we are determining that critical circumstances for this respondent exist based on best information available. As best information available, and as a statement made against its own interest, we used the company-specific information that Pirelli provided to determine that critical circumstances exist. Comparing the seven months after the month in which the petition was filed to the seven months before and including the month in which the petition was filed, shipments by Pirelli increased 99%.

In determining knowledge of dumping, the Department normally considers margins of 25% or more sufficient to impute knowledge of dumping under section 735(a)(3)(A) (*see, e.g., Final Determination of Sales at Less Than Fair Value; Tapered Roller Bearings and Parts thereof, Finished or Unfinished, from Italy* (52 FR 24198, June 29, 1987)). Therefore, in accordance with sections 735(a)(3)(A)(ii) and 735(a)(3)(B), we determine that critical circumstances exist with respect to Pirelli.

With respect to firms covered by the "All Other" rate, we determine that critical circumstances do not exist because we have determined that imports of industrial belts have not been massive over a relatively short period of time. Since we do not find that there have been massive imports of industrial belts from firms included in the "All Other" rate, we do not need to consider whether there is a history of dumping or whether importers of these products knew or should have known that the merchandise was being sold at less than fair value.

Interested Party Comments

Comment 1: Petitioner alleges that the Department's negative critical circumstances preliminary determination was in error because company-specific data was not used. The respondent urges the Department to make a negative critical circumstances determination with respect to Pirelli.

DOC Position: We have determined that imports of industrial belts from Italy have been massive over a relatively short period of time, as best information available. Furthermore, the dumping margin of 74.9% leads us to conclude that the importer knew or should have known that the exporter was selling the merchandise at less than its fair value.

With regard to firms covered by the "All Other" rate, see the "Critical Circumstances" section of this determination.

Comment 2: Petitioner argues that the Department's final determination should be based on the highest less-than-fair-value margin alleged in the petition.

Respondent argues that the Department should have accepted and verified the actual sales information submitted by Pirelli for purposes of the final determination because information submitted by Pirelli after the preliminary determination did not constitute a new response.

The respondent further alleges that, should the Department decide to use best information available, the best information available is not that used in the preliminary determination. Respondent suggests that, because of its good faith efforts to cooperate, best information available should be the lower of (1) the highest rate found for any participating respondent, or (2) an average of the lowest rates alleged in the petition for each category of belt actually sold by Pirelli, or (3) the weighted average of the rates alleged in the petition for all belts actually sold by Pirelli.

DOC Position: To determine whether sales of industrial belts from Italy were made at less than fair value, we compared the United States price to the foreign market value as discussed in the *Fair Value Comparisons* section of this notice. For the reasons cited below we have determined, in accordance with section 776(c) of the Act, that the use of best information available is appropriate for the subject merchandise from Italy. Section 776(c) requires the Department to use best information available "whenever a party or any other person refuses or is unable to produce information requested in a timely manner or in the form required, or otherwise significantly impedes an investigation."

Twenty-six days after the preliminary determination Pirelli submitted extensive corrections to its earlier submissions. Despite its earlier statements that all U.S. sales had identical matches, Pirelli's submission included a product concordance matching certain U.S. sales with sales of "similar" merchandise in the home market. Even with this information, only a little over 60% by volume and value of the subject merchandise sold by Pirelli in the U.S. had a match in the home market.

Given the significance of this new information, the Department determined that the submission by Pirelli was so substantial that it constituted a new response. While the Department normally allows minor revisions to questionnaire responses after the preliminary determination and during verification, it is our well established policy not to accept new responses that are filed after the preliminary determination. Moreover, to accept this new information at such a late point in the investigation would have denied the petitioner and other interested parties their statutorily-mandated opportunity to comment on the new response and otherwise to participate in this investigation with regard to Pirelli.

While the Department may differentiate between cooperative and non-cooperative firms in assessing best information available, we were not able to adopt any of the alternatives suggested by respondent in this case. There were no other responding firms in Italy and the other alternatives would require use of unverified information about products actually sold by Pirelli.

Comment 3: Petitioner asserts that in its scope of investigation at the preliminary determination, the Department listed only four HTS sub-headings. Petitioner requests that the Department list eighteen HTS sub-headings in its final determination.

DOC Position: We agree. The petition included nine TSUSA item numbers and four HTS sub-headings that petitioner believed would correspond to the TSUSA numbers when the HTS system became effective.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS sub-headings listed in January 1989 USITC publication, *The Continuity of Import and Export Trade Statistics after Implementation of the Harmonized Commodity Description and Coding System*, petitioner requested that the Department expand the four HTS sub-headings listed in our preliminary determination to eighteen sub-headings.

We asked for comments from the interested parties in this investigation concerning industrial belts covered by the eighteen HTS sub-headings. We have received no objections to the petitioner's request.

In our preliminary determinations, as now, we note that the written discription of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage. We do not view providing additional HTS sub-headings as broadening the scope of the investigation.

Comment 4: V. B. Splaun & Son, an importer, believes it is inappropriate to include nylon core flat belts imported from Italy in the scope of this investigation. V. B. Splaun & Son requests that these nylon-core belts be excluded from this investigation.

DOC Position: The information received was insufficient to determine whether the merchandise is properly excluded from the scope of this investigation. In addition, the information received from these firms arrived too late to be analyzed and verified for this final determination. If the final determination of the ITC results in an antidumping duty order on this merchandise, and upon receipt of proper documentation, the Department may conduct a scope ruling procedure concerning the products imported by these firms.

Continuation of Suspension of Liquidation: We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Italy, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days prior to the date of publication of the notice of the preliminary determination in the Federal Register. The U.S. Customs Services shall continue to require a cash deposit or posting of a bond equal to the estimated amounts by which the foreign market value of the subject merchandise from Italy exceeds the United States price as shown below. This suspension of liquidation will remain in effect until further notice. The margins are as follows:

Manufacturer/producer/exporter	Margin percentage
Pirelli Trasmissioni Industriali, S.p.A.	74.90
All others	74.90

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or threat of material injury, does not exist, the proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that material injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on industrial belts from Italy entered, or withdrawn from warehouse, for consumption, on or after the effective date of the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

[FR Doc. 89-9253 Filed 4-17-89; 8:45 am]

BILLING CODE 3510-DS-M

[A-588-807]

Final Determination of Sales of Less Than Fair Value: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from Japan

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We determine that industrial belts and components and parts thereof, whether cured or uncured (hereinafter referred to as industrial belts) from Japan are being, or are likely to be, sold in the United States at less than fair value. We also determine that critical circumstances exist with respect to import of industrial belts from Japan.

We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Japan as described in the "Continuation of Suspension of Liquidation" section if this notice. The ITC will determine, within 45 days of the publication of this notice, whether these imports materially injure, or threaten material injury to, the U.S. industry.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Louis Apple or Loc Nguyen, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1769 or (202) 377-3530.

SUPPLEMENTARY INFORMATION:

Final Determination

We determine that industrial belts from Japan are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) (the Act). The estimated margin is shown in the "Continuation of Suspension of Liquidation" section of this notice. We also determine that critical circumstances exist with respect to industrial belts from Japan.

VOL 54 ISS 73 AP 18 1989 UMI

Case History

On January 26, 1989, we made an affirmative preliminary determination (54 FR 5114, February 1, 1989). We received comments from petitioner. We have received a number of requests for exclusion of merchandise from the scope of this final determination (*see* comment number 4).

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS sub-headings. The HTS sub-headings are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are industrial belts from Japan currently provided for under Tariff Schedules of the United States Annotated (TSUSA) item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510 and 773.3520; and currently classifiable under Harmonized Tariff Schedule (HTS) sub-headings 3926.90.55, 3926.90.56, 3926.90.57, 3926.90.59, 3926.90.60, 4010.10.10, 4010.10.50, 4010.91.11, 4010.91.15, 4010.91.19, 4010.91.50, 4010.99.11, 4010.99.15, 4010.99.19, 4010.99.50, 5910.00.10, 5910.00.90, and 7326.20.00.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber of plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (*i.e.*, closed loop) or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment power by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Period of Investigation

The period of investigation is January 1, 1988, through June 30, 1988.

Fair Value Comparisons

To determine whether sales of industrial belts from Japan to the United States were made at less than fair value, we compared the United States price to the foreign market value. For our preliminary determination we used best information available as required by section 776(c) of the Act. As best information available, we took the highest margin contained in the petition for each of the product types for the period of investigation and calculated a simple average of those figures to determine a margin for the products under investigation. Since the respondent, Bando, failed to participate in the investigation, we are using the same methodology for calculating a margin for the final determination.

United States Price

United States price was based on the U.S. price information provided in the petition pursuant to section 772 of the Act.

Foreign Market Value

Foreign market value was based on home market prices provided in the petition pursuant to section 773 of the Act.

Critical Circumstances

On June 30, 1988, petitioner alleged that critical circumstances exist with respect to imports of the subject merchandise from Japan. Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that:

(A)(i) there is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation; or

(ii) the person whom or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value; and

(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

Since the respondent, Bando Chemical Industries (Bando), failed to participate in the investigation, we are determining that critical circumstances for this respondent exist based on best information available information. As best information available, we are assuming that imports of industrial belts have been massive over a relatively short period of time. In determining knowledge of dumping, the Department normally considers margins of 25% or more sufficient to impute knowledge of dumping under section 735(a)(3)(A) (*see, e.g., Final Determination of Sales at Less Than Fair Value; Tapered Roller Bearings and Parts Therefor, Finished or Unfinished, from Italy* (52 FR 24198, June 29, 1987)). Therefore, in accordance with sections 735(a)(3)(A)(ii) and 735(a)(3)(B), we determine that critical circumstances exist with respect to Bando.

With respect to firms covered by the "All Other" rate, we have determined that imports of industrial belts have not been massive over a relatively short period of time and, therefore, that critical circumstances do not exist.

Since we do not find that there have been massive imports of industrial belts from firms included in the "All Other" rate, we do not need to consider whether there is a history of dumping or whether importers of these products know or should have known that the merchandise was being sold at less than fair value.

Interested Party Comments

Comment 1: Petitioner argues that, based on U.S. import statistics, IM 146 data, the Department should find that there has been massive imports of industrial belts over a relatively short period of time. Petitioner further asserts that an antidumping margin of 25% or more is sufficient to impute knowledge to the importer that the exporter was selling the merchandise at less than fair value.

DOC Position: Since the respondent, Bando, failed to participate in the investigation, as best information available, we are assuming that its imports of industrial belts from Japan have been massive over a relatively short period of time. Furthermore, we find that the best information available margin of 93.16% is sufficient to impute knowledge to the importer that the exporter was selling the merchandise at less than fair value.

With regard to firms covered by the "All Other" rate, see the "Critical Circumstances" section of this determination.

Comment 2: Petitioner argues that the Department's final determination should be based on the highest less-than-fair-value margin alleged in the petition.

DOC Position: The Department is applying the same methodology used in the preliminary determination to calculate the margins for the final determination. As best information available, we are taking the highest margin contained in the petition for each of the product types for the period of investigation and then calculating a simple average of those figures to determine the margin for the products under investigation.

Comment 3: Petitioner asserts that in its scope of investigation at the preliminary determination, the Department listed only four HTS sub-headings. Petitioner requests that the Department list eighteen HTS sub-headings in its final determination.

DOC Position: We agree. The petition included nine TSUSA item numbers and four HTS sub-headings that petitioner believed would correspond to the TSUSA numbers when the HTS system became effective.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS sub-headings listed in a January 1989 USITC publication, *The Continuity of Import and Export Trade Statistics After Implementation of the Harmonized Commodity Description and Coding System*, petitioner requested that the Department expand the four HTS sub-headings listed in our preliminary determination to eighteen sub-headings.

We asked for comments from the interested parties in this investigation concerning industrial belts covered by the eighteen HTS sub-headings.

In our preliminary determinations, as now, we note that the written description of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage. We do not view providing additional HTS sub-headings as broadening the scope of this investigation.

Comment 4: Nitta International and V.B. Splawn & Son, importers, believe it is inappropriate to include nylon core flat belts imported from Japan in the scope of this investigation. They request that these nylon-core belts be excluded from this investigation.

DOC Position: The information received was insufficient to determine whether the merchandise is properly excluded from the scope of this investigation. In addition, the information received from these firms arrived too late to be analyzed and verified for this final determination. If the final determination of the ITC results in an antidumping duty order on this merchandise, and upon receipt of proper documentation, the Department may conduct a scope ruling procedure concerning the products imported by these firms.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Japan, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days prior to the date of publication of the preliminary determination in the Federal Register. The U.S. Customs Service shall continue to require a cash deposit or posting of a bond equal to the estimated amounts by which the foreign market value of the subject merchandise from Japan exceeds the United States price as shown below. This suspension of liquidation will remain in effect until further notice. The average of the highest margin for each of the product types listed in the petition for the period of investigation is as follows:

Manufacturer/producer/exporter	Margin percentage
Bando	93.16
All others	93.16

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or threat of material injury, does not exist, the proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that material injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on industrial belts from Japan entered, or withdrawn from warehouse, for consumption, on or after the effective date of the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

April 11, 1989.

BILLING CODE 3510-DS-M

[A-580-801]

Final Determination of Sales at Less Than Fair Value: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from the Republic of Korea

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We determine that industrial belts and components and parts thereof, whether cured or uncured, (hereinafter referred to as industrial belts) from the Republic of Korea are being, or are likely to be, sold in the United States at less than fair value. We also determine that critical circumstances exist with respect to imports of industrial belts from the Republic of Korea.

We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from the Republic of Korea as described in the "Continuation of Suspension of Liquidation" section of this notice. The ITC will determine, within 45 days of the publication of this notice, whether these imports materially injure, or threaten material injury to, the U.S. industry.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Louis Apple or Loc Nguyen, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1769 or (202) 377-3530.

SUPPLEMENTAL INFORMATION:

Final Determination

We determine that industrial belts from the Republic of Korea are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (19 U.S.C 1673d(a)) (the Act). The estimated margins are shown in the "Continuation of Suspension of

UMI

Liquidation" section of this notice. We also determine that critical circumstances exist with respect to industrial belts from the Republic of Korea.

Case History

On January 26, 1989, we made an affirmative preliminary determination (54 FR 5116, February 1, 1989). On March 13, 1989, Dunlop Belting Products, Ltd. submitted some pricing data concerning their imports of industrial belts from Dongil Rubber Belting Co. (Dongil).

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS sub-headings. The HTS sub-headings are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are industrial belts from the Republic of Korea currently provided for under Tariff Schedules of the United States Annotated (TSUSA) item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510 and 773.3520; and currently classifiable under Harmonized Tariff Schedule (HTS) sub-headings 3926.90.55, 3926.90.56, 3926.90.57, 3926.90.59, 3926.90.60, 4010.10.10, 4010.10.50, 4010.91.11, 4010.91.15, 4010.91.19, 4010.91.50, 4010.99.11, 4010.99.15, 4010.99.19, 4010.99.50, 5910.00.10, 5910.00.90, and 7328.20.00.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Period of Investigation

The period of investigation is January 1, 1988, through June 30, 1988.

Fair Value Comparisons

To determine whether sales of industrial belts from the Republic of Korea to the United States were made at less than fair value, we compared the United States price to the foreign market value. For our preliminary determination we used best information available as required by section 776(c) of the Act. As best information available, we took the highest margin contained in the petition for each of the product types for the period of investigation and calculated a simple average of those figures to determine a margin for the products under investigation. Since the respondents, Dongil, failed to participate in the investigation, we are using the same methodology for calculating a margin for the final determination.

United States Price

United States price was based on the U.S. price information provided in the petition pursuant to section 772 of the Act.

Foreign Market Value

Foreign market value was based on home market prices provided in the petition pursuant to section 773 of the Act.

Critical Circumstances

On June 30, 1988, petitioner alleged that critical circumstances exist with respect to imports of the subject merchandise from the Republic of Korea. Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that:

(A)(i) there is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation; or

(ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value; and

(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

Since the respondent, Dongil, failed to participate in the investigation, we are determining that critical circumstances for this respondent exist based on best information available. As best information available, we are assuming that imports of industrial belts have been massive over a relatively short period of time. In determining knowledge of dumping, the Department normally considers margins of 25% or more, sufficient to impute knowledge of dumping under section 735(a)(3)(A) (*see, e.g., Final Determination of Sales at Less Than Fair Value; Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy* (52 FR 24198, June 29, 1987)). Therefore, in accordance with sections 735(a)(3)(A)(ii) and 735(a)(3)(B), we determine that critical circumstances exist with respect to Dongil.

With respect to firms covered by the "All Other" rate, we have determined that imports of industrial belts have not been massive over a relatively short period of time and, therefore, that critical circumstances do not exist.

Since we do not find that there have been massive imports of industrial belts from other firms included in the "All Other" rate, we do not need to consider whether there is a history of dumping or whether importers of these products knew or should have known that the merchandise was being sold at less than fair value.

Interested Party Comments

Comment 1: Petitioner argues that, based on U.S. import statistics, IM 146 data, the Department should find that there have been massive imports of industrial belts over a relatively short period of time. Petitioner further asserts that an antidumping margin of 25% or more is sufficient to impute knowledge to the importer that the exporter was selling the merchandise at less than fair value.

Doc Postion: Since the respondent, Dongil, failed to participate in the investigation, as best information available, we are assuming that its imports of industrial belts from the Republic of Korea have been massive over a relatively short period of time. Furthermore, we find that the best information available margin of 64.37% is sufficient to impute knowledge to the importer that the exporter was selling the merchandise at less than fair value.

With regard to firms covered by the "All Other" rate, see the "Critical circumstances" section of this determionation.

Comment 2: Petitioner argues that the Department's final determination should be based on the highest less-than-fair-value margin alleged in the petition.

DOC Postion: The Department is applying the same methodology used in the preliminary determination to calculate the margins for the final determination. As best information available, we are taking the highest margin contained in the petition for each of the product types the period of investigation and then calculating a simple average of those figures to determine the margin for the products under investigation.

Comment 3: Petitioner asserts that in its scope of investigation at the preliminary determination, the Department listed only four HTS sub-headings. Petitioner requests that the Department list eighteen HTS sub-headings in its final determination.

DOC Position: We agree. The petition included nine TSUSA item numbers and four HTS sub-headings that petitioner believed would correspond to the TSUSA numbers when the HTS system became effective.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS sub-headings listed in a January 1989 USITC publication, *The Continuity of Import and Export Trade Statistics After Implementation of the Harmonized Commodity Description and Coding System*, petitioner requested that the Department expand the four HTS sub-headings listed in our preliminary determination to eighteen sub-headings.

We asked for comments from the interested parties in this investigation concerning industrial belts covered by the eighteen HTS sub-headings.

In our preliminary determinations, as now, we note that the written description of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage. We do not view providing additional HTS sub-headings as broadening the scope of this investigation.

Comment 4: On March 13, 1989, Dunlop Belting Products, Ltd. submitted pricing data concerning its imports of industrial belts from Dongil. Dunlop requests the Department to weight average the data relied on in the petition as best available information in calculating the fair value comparisons.

DOC Position: We have continued to take a simple average of the margins contained in the petition. It would not be appropriate, in our view, to use data submitted by Dunlop because it was not verified and we have no way of knowing whether it represents the totality of imports from Dongil. See our position to comment 2 concerning our methodology for making margin calculations in this determination.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from the Republic of Korea, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days prior to the date of publication of the preliminary determination in the Federal Register. The U.S. Customs Service shall continue to require a cash deposit or posting of a bond equal to the estimated amounts by which the foreign market value of the subject merchandise from the Reupblic of Korea exceeds the United States price as shown below. This suspension of liquidation will remain in effect until further notice. The average of the highest margin for each of the product types listed in the petition for the period of investigation is as follows:

Manufacturer/producer/exporter	Margin percentage
Dongil	64.37
All others	64.37

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or threat of material injury, does not exist, the proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that material injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on industrial belts from the Republic of Korea entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Timothy N. Bergan,
Acting Assistant Secretary
April 11, 1989.

Final Determination of Sales at Less Than Fair Value: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from Singapore

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We determine that industrial belts and components and parts thereof, whether cured or uncured, (hereinafter referred to as industrial belts) from Singapore are being, or are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed The U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Singapore as described in the "Continuation of Suspension of Liquidation" section of this notice. The ITC will determine, within 45 days of the publication of this notice, whether these imports are materially injuring, or are threatening material injury to, a United States industry. We also determine that critical circumstances do not exist with respect to imports of industrial belts from Singapore.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Loc Nguyen or Karmi Leiman, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-3530 (Nguyen) or (202) 377-8371 (Leiman).

SUPPLEMENTAL INFORMATION:

Final Determination

We determine that industrial belts from Singapore are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) (the Act).

The estimated weighted-average margins are shown in the "Continuation of Suspension of Liquidation" section of this notice.

Case History

On January 26, 1989, we made an affirmative preliminary determination (54 FR 5110, February 1, 1989). The following events have occurred since the publication of that notice.

The questionnaire responses from Mitsuboshi Belting (Singapore) Pte. Ltd. (MBS), and its subsidiaries, Mitsuboshi Belting Ltd. of the United States (MBL USA) and Mitsuboshi Belting Ltd. of Canada (MBL Canada), were verified in Singapore from February 22–24, 1989, in Calgary, Canada from February 13–15, and in Lombard, Illinois from February 16–17, 1989.

On March 24, 1989, the Department held a public hearing. Interested parties also submitted comments for the record in their pre-hearing briefs of March 17, 1989, and in their post-hearing briefs of March 31, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS subheadings. The HTS numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are industrial belts and components and parts thereof, whether cured or uncured, provided for under *Tariff Schedules of the United States Annotated* (TSUSA) item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510, and 773.3520 and currently classifiable under HTS subheadings 3926.90.55, 3926.90.56, 3926.90.57, 3926.90.59, 3926.90.60, 4010.10.10, 4010.10.50, 4010.91.11, 4010.91.15, 4010.91.19, 4010.91.50, 4010.99.11, 4010.99.15, 4010.99.19, 4010.99.50, 5910.00.10, 5910.00.90, and 7326.20.00.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Period of Investigation

The period of investigation (POI) is January 1, 1988, through June 30, 1988.

Such or Similar Comparisons

For MBS, pursuant to section 771(16)(C) of the Act, we established one category of "such or similar" merchandise: V-belts.

Fair Value Comparisons

To determine whether sales of industrial belts from Singapore to the United States were made at less than fair value, we compared the United States price to the foreign market value, pursuant to sections 772 and 773 of the Act, respectively.

United States Price

For those sales by MBS that were made through a related sales agent in the United States to an unrelated purchaser prior to the date of importation, we used purchase price as the basis for determining United States price. For these sales, the Department determined that purchase price was the most appropriate indicator of United States price based on the following elements:

1. The merchandise in question was shipped directly from the manufacturer to the unrelated buyer, without being introduced into the inventory of the related selling agent;
2. This was the customary commercial channel for sales of this merchandise between the parties involved; and
3. The related selling agent located in the United States acted only as the processor of sales-related documentation and a communication link with the unrelated U.S. buyers.

Where all the above elements are met, we regard the routine selling functions of the exporter as having been merely relocated geographically from the country of exportation to the United States, where the sales agent performs them. Whether these functions are done in the United States or abroad does not change the substance of the transactions or the functions themselves.

In instances where merchandise is ordinarily diverted into the related U.S. selling agent's inventory, we regard this factor as an important distinction because it is associated with a materially different type of selling activity than the mere facilitation of a transaction such as occurs on a direct shipment to an unrelated U.S. purchaser. In situations where the related party places the merchandise into inventory, additional storage and financial carrying costs are commonly incurred. We use the inventory test because it can be readily understood and applied by respondents who must respond to Department questionnaires in a short period of time.

We calculated purchase price based on the packed, c.i.f., duty paid prices to unrelated purchasers in the United States. We made deductions from the purchase price, where appropriate, for foreign inland freight, U.S. and foreign brokerage and handling charges, ocean freight, marine insurance, U.S. duty, and U.S. inland freight, pursuant to section 772(d)(2)(A) of the Act.

For those sales placed into inventory, we based United States price on exporter's sales price (ESP), in accordance with section 772(c) of the Act, since the first sale to an unrelated customer was made after importation. We calculated ESP based on packed, ex-warehouse or delivered, duty-paid prices to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, U.S. and foreign brokerage and handling charges, ocean freight, marine insurance, U.S. duty, U.S. inland freight, discounts, rebates, repacking, commissions, credit expenses, and other indirect selling expenses.

Foreign Market Value

We verified that home market sales of MBS are less than five percent of its third country sales and have, therefore, selected Canada as the appropriate third country, in accordance with § 353.5(c) of our regulations.

Because MBS is a subsidiary of Mitsuboshi Belting Ltd. of Japan, a producer of such or similar belts, petitioner requested that we invoke the rule under section 773(d) of the Act for calculating foreign market value for certain multinational corporations. The multinational provision allows foreign market value to be determined by reference to the foreign market value of "such or similar merchandise" sold by a related party in a country other than the country of exportation. Use of the provision requires the Department to determine that the following three conditions are met:

(1) The production facilities in the country of exportation are owned or controlled by a corporation which also owns or controls facilities for the production of such or similar merchandise located in another country or countries;

(2) Sales of such or similar merchandise in the country of exportation are nonexistent or inadequate as a basis of comparison with sales of the merchandise to the United States;

(3) The foreign market value of such or similar merchandise produced in one or more facilities outside the country of exportation is higher than the foreign market value of such or similar merchandise produced in facilities in the country of exportation.

The first two conditions of section 773(d) are met. However, petitioner's allegation with respect to section 773(d)(3) is deficient. Where Japan-Canada price comparisons involved identical merchandise, export prices to Canada were found to be significantly higher than Japanese home market prices. Where price comparisons involved non-identical merchandise, it was not apparent to the Department from information submitted by the petitioner that the price comparisons were based on "similar" merchandise. For these reasons, we did not initiate the multinational provision.

As stated above, it was determined that Singapore's home market was not viable for comparison purposes. Therefore, in accordance with section 773(a) of the Act, we calculated foreign market value based on delivered, packed, third country (Canada) prices to unrelated purchasers. We made deductions, where appropriate, for Singapore and Canadian inland freight, Singapore and Canadian brokerage and handling charges, ocean freight, marine insurance, Canadian duty, discounts and rebates.

For foreign market value compared with U.S. purchase price we made adjustments under § 325.15 of our regulations for differences in circumstances of sale for commissions and credit expenses in the U.S. and Canadian markets.

For foreign market value compared with ESP, we deducted credit expenses and commissions, in accordance with § 353.15(c). We also deducted indirect selling expenses incurred on third country sales up to the amount of indirect selling expenses incurred on sales in the U.S. market, in accordance with § 353.15(c) of our regulations.

In order to adjust for differences in packing between the two markets, we deducted canadian packing costs from foreign market value and added U.S. packing costs.

Currency Conversion

For comparisons involving purchase price transactions, we used the official exchange rates in effect on the dates of sale, in accordance with § 353.56(a)(1) of our regulations. For comparisons involving ESP transactions, we used the official exchange rates in effect on the dates of sale, in accordance with section 773(a)(1) of the Act, as amended by section 615 of the Trade and Tariff Act of 1984. All currency conversions were made at the rates certified by the Federal Reserve Bank of New York.

Critical Circumstances

Petitioner alleges that "critical circumstances" exist with respect to imports of the subject merchandise from Singapore. Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that:

(A)(i) there is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and

(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3)(B), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

Because the Department's import data pertaining to the subject merchandise are based on TSUSA basket categories, for purposes of the final determination, we used specific data on shipments of the subject merchandise as the most appropriate basis for our determination of critical circumstances. Furthermore, we believe that company-specific critical circumstances determinations better fulfill the objective of the critical circumstances provision of deterring companies from increasing imports massively prior to the suspension of liquidation. We asked MBS to supply monthly volume shipment data from November 1987 to January 1989 in order for the Department to base the critical circumstances determination on company-specific data. We verified the information submitted by MBS.

Based on our analysis of respondent's shipment data, we do not find that there have been massive imports of industrial belts from Singapore. Consequently, the requirements of section 735(a)(3)(B) have not been met and critical circumstances do not exist with respect to imports of industrial belts from Singapore.

Verification

We verified the information used in making our final determination in this investigation in accordance with section 776(b) of the Act. We used standard verification procedures, including examination of relevant accounting records and original source documents provided by the respondents.

Interested Party Comments

Comment 1: Petitioner asserts that the Department discovered a significant number of discrepancies with the respondent's third-country data or problems with the methodologies employed. Therefore, the Department should not utilize respondent's submission, but use best information available.

Respondent argues that there is no basis for disallowing corrections to data made during verification. Respondents are required to prepare and submit voluminous data in a very short period of time, so the existence of clerical mistakes in the response can be expected. Respondent argues that petitioner's position, that no corrections should be allowed at or subsequent to verification, would prevent the Department from making a fair value determination based on accurate information.

DOC Position: We agree with respondent. A careful review of past antidumping cases, *Antifriction Bearings from the FRG* (which has been published in the Federal Register), *Light-Walled Welded Rectangular Carbon Steel Tubing from Argentina* (54 FR 13913, April 6, 1989), *Certain Granite Products from Italy* (53 FR 27187, July 19, 1988), and *Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy* (52 FR 24198, June 29, 1987) reveals that the facts involved in this case more closely resemble situations where the Department used responses rather than rejecting them due to verification corrections and new submissions. The minor revisions found at verification did not substantially exceed the methodological problems and mathematical errors commonly found during other investigations in which the Department used the response for purposes of the final determination. Furthermore, in both *Antifriction Bearings from the FRG* and *Tapered Roller Bearings and Parts Thereof,*

VOL 54 ISS 73 AP 18 1989 UMI

Finished or Unfinsihed, from Italy, certain information contained in the response could not be supported at verification. This is not the situation in this case. All data has been satisfactorily verified using standard verification practices and techniques.

Comment 2: Petitioner alleges that based on the company-specific data submitted by MBS, critical circumstances clearly exist with respect to imports of the subject merchandise from Singapore. Petitioner further argues that it has obtained additional evidence that MBL is increasing its U.S. inventory levels of industrial belts. Hence, for purposes of the final determination, the Department should render an affirmative critical circumstances finding.

Respondent argues that, contrary to petitioner's assertions, the facts of this case do not support an affirmative determination regarding critical circumstances. Respondent argues that the Department should compare the six month periods before and after the petition was filed rather than applying the three-month periods advocated by petitioner in this case.

DOC Response: In examining whether critical circumstances exist, it has been the Department's policy in recent cases to apply the principle of capturing shipment data up to the point of the preliminary determination. In this case, the preliminary determination was made in February 1989; therefore, we have compared the period between November 1987-June 1988 with the period between July 1988-January 1989. See section on *Critical Circumstances.*

Comment 3. Petitioner argues that the Department should heve calculated foreign market value using the special rule for multinational corporations, 19 U.S.C. 1677b(d). Petitioner asserts that contrary to the Department's finding in the preliminary determination, it has provided sufficient price information to establish that the foreign market value of MBS Singapore's belts sold in Canada is lower than the foreign market value of "such and similar" merchandise produced and sold by MBL Japan in Japan, as required by 19 U.S.C. 1677b(d)(3). Specifically, petitioner argues that the Japan-Canada price comparison was based on "similar" merchandise. Petitioner states it has shown that the LA and LB belts sold by MBL in Japan are "such or similar" to the fractional horse power (FHP) belts (3L, 4L, and 5L) exported by MBS Singapore to the United States and Canada. Petitioner further argues that, in the case of industrial belts from Taiwan, the Department preliminarily determined that SM, SA, and SB belts manufactured by Hsing Kwo in Taiwan were "similar" merchandise to FHP belts (3L, 4L, and 5L) exported by Hsing Kwo to the U.S. The Department, therefore, should render a consistent decision in this investigation by concluding MBS's 4L, 5L FHP sold in the U.S. and Canada are "similar" to the LA and LB series sold by MBL in Japan. In rendering this decision, the Department must conclude that petitioner has satisfied the requirements of 19 U.S.C. 1677b(d)(3) by establishing that MBL's prices for belts sold in Japan were significantly higher than the prices for similar belts sold by MBS in Canada.

Respondents argue that 3L, 4L, and 5L belts are not "similar" to the LA and LB series. Bando's SA and SB series are similar to MBL's LA and LB series belts, and in fact compete in the same end-user market in Japan, *i.e.,* agricultural equipment. Furthermore, petitioner stated in the related investigation of industrial belts from Japan that SA and SB belts produced in Japan by Bando were not similar to the 3L, 4L and 5L series, and, therefore, the petitioner should be bound by its allegations.

DOC Position: The petitioner has not satified the requirements of 19 U.S.C. 1677b(d)(3). In the petition a concordance compares the models of FHP belts sold in the U.S. by MBL and Bando with those sold by the same companies in Japan. While, the petition indicates that the 4L and 5L series belts sold by MBS in the U.S. and Canda are in concordance with the SA and SB belts of Bando and the LA and LB belts of MBL sold in Japan, the Department made a preliminary determination that the Japan-Canada price comparison was not based on "similar" merchandise. Petitioner has failed to provide any new information showing the LA/LB series to be similar to the 4L/5L series of belts. Specifically, petitioner has failed to explain its inconsistent allegation in the investigation of Japanese industrial belts, that SA/SB belts are not similar to 4L/5L belts. In addition, petitioner has failed to refute the claim made by respondent that SA/SB are dissimilar to 4L/5L belts. Therefore, the issue of whether LA/LB and 4L/5L are similar remains unresolved. It is the petitioner's obligation to provide the Department with a reasonable basis to believe that the foreign market value of such or similar merchandise sold by MBL in Japan are higher than the foreign market value of similar merchandise sold by MBS in Canada. The fact that in the case of industrial belts from Taiwan, the Department made differences in merchandise adjustments between SM, SA, and SB belts manufactured by Hsing Kwo in Taiwan and FHP belts (3L, 4L, and 5L) exported by Hsing Kwo to the U.S. is irrelevant. Petitioner has not supplied information establishing the comparability of industrial belts between different producers in different countries.

Comment 4: Petitioner argues that 19 U.S.C. 1677b(d) and the legislative history do not require the petitioner to produce information pertaining to differences between the cost of merchandise sold in the country of exportation and the merchandise sold outside the country of exportation. Petitioner states that such adjustments are discretionary and that, in fact, it has never alleged that any adjustments should be made. Accordingly, the lack of information with respect to price adjustments for differences in merchandise or cost of production data does not provide a sufficient basis for the Department to refrain from invoking the special statutory rule for multinational corporations. Petitioner argues that if the Department believes that such adjustments are necessary, publicly available information can be utilized.

DOC Position: Within the context of this proceeding, section 773(d)(3) requires that the foreign market value of such or similar merchandise produced by Mitsuboshi in Japan be higher than the foreign market value of such or similar merchandise produced in Singepore (and exported to Canada). This requirement is more than just a simple price comparison. A difference between Japanese home market prices and export prices to Canada does not imply a difference between the respective foreign market values. If the price differential is wholly attributable to differences in merchandise, the foreign market values will be equal. Similarly, equal prices do not imply equal foreign market values. Therefore, a comparison of prices unadjusted for differences in merchandise does not constitute sufficient support for an allegation made with respect to 773(d)(3).

Comment 5: Petitioner argues that the Department should not make any adjustments to third country prices with regard to transportation charges, because the reported per unit movement charges are average costs based on the incorrect allocation of expenses incurred in a prior period. Petitioner argues that in order for the agency to accept the reasonebleness of respondent's methodology, respondent should be required to demonstrate: (1) that once merchandise is sold (*i.e.,* withdrawn from the U.S. subsidiary's inventory), the subsidiary has no means for tracking that particular merchandise back to the point at which it was received into inventory; and (2) that documentary evidence exists which shows that expenses of the prior period advocated by the respondent are the expenses that are directly related to the sales under consideration.

Respondent argues that what petitioner calls the use of "historical data" is not "historical" at all. Respondent argues that in any investigation of sales of fungible merchandise from an importer's inventory, the use of costs incurred outside the POI is necessary. Since the importer, by definition, does not manufacture the merchandise but imports it from a foreign country, in order to have the merchandise on hand for sales from inventory, the importer must have laid the merchandise into inventory at a date which preceded the date of sale. In determining what costs to use for expenses prior to the sale, the question is, therefore, at what period was the merchandise which was sold put into inventory. The best method for determining this period is the use of financial accounting records. An examination of MBL Canada's and MBL USA's financial records, performed by the Department at verification, reveals that the average turnover period for merchandise put in inventory in both countries is as stated by the companies. This methodology has been used consistently on both sides of the calculations for out-of-inventory sales in both markets. Respondent argues that the use of data from the period of investigation for the calculation of movement expenses from Singapore to the warehouse would not provide data on the belts sold from inventory on dates during that period. The transit time alone from Singapore to warehouse is at least a month and may be as much as six weeks. The belts must then be added to inventory, where they are treated as being completely fungible with other belts of the same description. Such fungible merchandise is completely different from television sets, large machinery, or automobiles which have serial numbers and may be sold and inventoried on that basis. For merchandise such as belts, there is simply no alternative but the first-in-first-out method used here. The Department has accepted this methodology before and accepted it in the preliminary determination in this case and verified it. At this point in the investigation, the Department has given respondents no indication that this methodology is incorrect.

DOC Position: We agree with respondent. Respondent has not used "historical" expenses related to past sales as a proxy for expenses related to sales during the POI, as is done when estimating warranty expenses. Instead, respondent has reasonably estimated the expenses incurred on belts sold during the POI. Therefore, we are accepting respondent's claimed expense for our final determination.

Comment 7: Petitioner argues that any claim for a downward adjustment to foreign market value for freight-out expenses (freight from MBL Canada's warehouse to the ultimate end-user) should be rejected because the allocation is based on total inland freight expenses, *i.e.,* expenses which are attributable to merchandise outside the scope of the investigation as well as to the sales under consideration. Petitioner asserts that such expenses cannot be tied directly to the merchandise subject to investigation and, therefore, there is no way to ensure that the reported per pound freight expenses are accurately reflective of the actual freight-out expenses on the subject merchandise.

DOC Position: We disagree. In most cases, when companies manufacture and/or sell more than one product, shipments are usually a mix of many products. It is almost impossible for these companies to segregate freight expenses of one product from freight expenses of another product in the same shipment. Thus, their accounting records only reflect total freight expenses. We verified that this is true for MBS Singapore, MBL USA, and MBL Canada. It is our policy to allow allocations based on total expenses over total sales in these cases.

Furthermore, if we disallow the adjustment for the Canadian market, we would also have to disallow the adjustment for the U.S. market, because the accounting records are kept exactly the same way in both countries and the calculation methodology used for U.S. sales is the same as that used for Canadian sales. Petitioner has not argued that the adjustment in the U.S. should be disallowed.

Comment 8: Petitioner argues that no deduction from foreign market value for cash discounts should be permitted, because verification shows that in several instances MBS incorrectly reported that the customer took early payment discounts even when the customer did not do so.

DOC Position: We checked all sales made to one customer and found that respondent correctly reported the discount given. We also checked twelve other sales at random and found that the actual discounts on nine sales were reported correctly. The discounts on two sales were quite a bit higher than was reported in the response, and there was one sale on which no discount was taken, although respondent reported giving a two percent discount. Because the misreported discounts were relatively few in number and involved errors in both directions, we are accepting respondent's claim for discounts.

Comment 9: Petitioner states that the revised short-term borrowing rate submitted by MBL Canada at verification constitutes "new information" and should be utilized, if at all, only as "best information otherwise available." Moreover, the revised figure itself is based on data derived from the period May 1987 to June 1988 and not during the period of investigation. *International Financial Statistics* show that lending rates in Canada during the POI were, on average, 10.09%. In the absence of period specific data, the Department should utilize the IMF data for its final determination.

DOC Response: We disagree. We verified that the revised short-term borrowing rate submitted is the actual rate paid by MBL Canada. The revised rate submitted was only slightly different from the estimated rate provided in the response.

Comment 10: Petitioner argues that the Department should disallow indirect selling expenses and inventory carrying costs for Canadian sales because MNBL Canada used expenses related to an earlier period to calculate these expenses for the POI and because MBL provided revised data, which is "new information," at verification.

Respondent argues that data concerning MBL Canada's indirect selling expenses were provided to the Department and to petitioner's counsel under Administrative Protective Order on January 4, 1989, well in advance of verification. Under these facts, petitioner is completely wrong in asserting that the information on MBL Canada's indirect selling expenses submitted at verification amounts to new information. On the contrary, the problems were called to the Department's attention and the corrected information was presented at the time most appropriate for its consideration.

DOC Response: We agree with respondent. We verified that the revised information submitted at vertification was correct.

Comment 11: Petitioner alleges that MBS did not provide movement charges

VOL 54 ISS 73 APR 18 1989 UMI

related to U.S. sales on a transaction-specific basis. MBS incorrectly calculated these expenses based on aggregate expenses. Furthermore, MBS made incorrect assertions with respect to ocean freight and marine insurance. Moreover, certain charges were reported in the wrong currencies, a fact which undermines the overall credibility of MBS's responses.

DOC Position: We disagree. We have verified all information regarding movement charges used in this determination. See also DOC response to Comment 7.

Comment 12: Petitioner claims that MBS reported per unit duty expenses on U.S. and Canadian sales using an incorrect methodology. As best information available, the DOC should apply the *ad valorem* duty rate listed in the TSUSA schedules to the imputed entered customs value, which would be the gross price less any U.S. movement charges.

DOC Position: In the original responses, both MBL USA and MBL Canada calculated duty expenses based on weight. At verification, we checked customs entry forms and requested that the two companies recalculate their duty expenses based on entry value for each product. They have done so and provided us with customs documents upon which these calculations were based. We have used these recalculated expenses for our final determination.

Comment 13: Petitioner argues that MBS did not report per unit packing expenses on transaction-specific charges and that respondent incorrectly aggregated the packing expenses and derived a POI average. Petitioner argues that the Department should apply the highest shipment-specific unit charge to all U.S. purchase price sales.

DOC Position: We disagree. We verified that MBS accurately reported Canadian and U.S. packing costs.

Comment 14: Petitioner asserts that, for purposes of the final determination, the Department should apply the discount discovered at verification to the appropriate ESP transactions.

DOC Position: We have done so.

Comment 15: Petitioner claims that the Department should apply the cash discount given to several ESP customers which was discovered during verification to all U.S. purchase price sales as well, since it is unclear from the verification report whether such expenses are exclusively related to ESP transactions.

DOC Position: We disagree. We found no indication at verification in Singapore that the cash discount given by MBL USA to its customers was given by MBS to its direct sale customers.

Comment 16: Petitioner argues that since the information given for commissions paid to the commision agent on direct sales made through MBL USA is not verified, the Department should use as best information available the highest rate reported in MBS's response.

DOC Response: We disagree. The statute does not require that we verify all information provided. Since we verified that the commissions paid by MBS on Canadian purchase price sales were accurate, there is no reason for us to believe that the reported commissions paid by MBS on U.S. purchase price sales are incorrect.

Comment 17: Petitioner asserts that the transportation expenses from MBS to MBL USA are not an accurate reflection of the actual expenses incurred on a transaction-specific basis, because they are based on the derivation of an average costs which have no direct relationship to the sales under consideration. Furthermore, MBS used an aggregate figure which included expenses for automotive as well as industrial belts.

DOC Position: We disagree. See DOC Position on Comment 7.

Comment 18: Petitioner argues that all packing expenses on U.S. EPS sales prices should be recalculated on the basis of financial statement figures. Furthermore, petitioner argues that since the verification team did not verify MBS's claim that only a certain percentage of its warehouse workers' time is spent packing the subject merchandise, the entire portion of those workers' wages and benefits should be included in the U.S. packing expenses claim.

DOC Position: The packing expenses on U.S. ESP sales have been recalculated on the basis of the financial statement.

We disagree with petitioner's argument that, because we did not verify the percentage of time the warehouse workers spent on packing, we should include the entire portion of those workers' wages and benefits in the U.S. packing claim. Respondent used the exact same percentage to calculate Canadian packing expenses. At verification in Canada, we visited the warehouse and checked the duty summary to show the variety of tasks performed by warehouse personnel and determined that forty percent was a reasonable estimate of the time spent by warehouse labor on packing. Because the same tasks are performed by warehouse personnel in the U.S., the forty percent is also a reasonable estimate for the U.S. market.

Comment 19: Petitioner asserts that during verification MBS provided no source documentation demonstrating that the pre-sale technical service expenses were included in the reported U.S. indirect selling expenses. Because the Department cannot ensure that such expenses have, in fact, been reported, it should increase foreign market value by the amount of U.S. technical service expenses but make no deduction for any technical expenses incurred in the home market.

DOC Position: We disagree. The travel expenses related to pre-sale technical service expenses are included in the travel and promotions expense reported in the response. At verification, we found no other technical service travel expenses in MBL USA's records.

Comment 20: Petitioner claims that, even though respondent reported that during the period of investigation no warranty expenses were incurred, there is frequently a substantial lag time between the sale of a product and any warranty claims made by the customer. Petitioner claims that MBS should have submitted warranty expenses related to sales of the products in each of the five years preceding the period of investigation. Since MBS did not do so, the Departemnt should use, as best information available, the highest warranty claim reported by respondents in the other antidumping duty investigations involving industrial belts.

DOC Position: MBS failed to report historical warranty expenses incurred on merchandise sold to either market. The Department, therefore, utilized the best information available. The Department, therefore, utilized the best information available. In considering the information available to us, we noted that MBL Canada has an express warranty of freedom from defects in material and workmanship, but incurred no warranty expenses during the POI. MBL USA also has an express warranty that the Three Star brand belts conform to or exceed the RMA standards, but did not incur any warranty expenses during the POI. Furthermore, MBS sells identical merchandise in the Canadian and U.S. markets. Therefore, we have assumed that warranty expenses were basically the same for both markets, and we did not make an adjustment for warranty expenses to either foreign market value or United States price.

Comment 22: Petitioner argues that in *Consumer Products Division, SCM Corp.* v. *Silver Reed America*, 753 F.2d 1033 9 Fed. Cir. 1985), the Federal Circuit approved the ESP offset on the basis of agency discretion. The court affirmed that primarily and in general deductions

should be limited to direct selling expenses. The ESP offset, fundamentally, is an exception. Thus, it is clear that when the amount of the offset exceeds the amount deducted from U.S. price, the general rule identified by the Court (*i.e.*, that adjustments be limited to directly related expenses) is thwarted. Given that exporter's sales price is a unit price, it is clear that the offset also should be on a per unit basis. MBL's theory of aggregate expenses would undermine that purpose of the offset and run afoul of the general rule limiting deductions to directly related expenses.

Petitioner further argues that the Department has consistently applied the ESP offset cap on a sale-by-sale basis and that respondent has failed to provide a sufficient justification for the proposed radical departure from the Department's well-established policy. In addition, a cap based on per unit expenses alleviates the administrative burden of closely scrutinizing alleged indirect selling expenses. Petitioner further argues that the respondent has misconstrued the Department's regulation and agency practice with respect to the commisison offset. Petitioner claims that the commission offset is also applied on a per unit basis.

Respondent claims that the Department should apply the ESP cap on the aggregate amount of indirect selling expenses in the United States and Canada and not on a sale-by-sale, product-by-product basis, because the Department's regulation provides that the offset be made "for all actual selling expenses in the home market up to the amount of selling expenses incurred in the United States market." Respondent claims that the Department's determinations in *Color Television Receivers from Korea*, 49 FR 7628, and *Television Receiving Sets, Monochrome and Color, from Japan*, 46 FR 30163 (June 5, 1981) show that on occasion the Department has applied the ESP offset cap on an aggregate basis. Respondent argues that the ESP offset cap should be treated in the same manner as the commission offset.

DOC Position: We agree with petitioner that it has been the Department's policy to calculate the ESP offset on a per unit basis. As we said in *Certain Internal Combustion, Industrial Forklift Trucks from Japan*, 53 FR 12552:

Capping on an aggregate basis would not reflect the individual circumstances of each sale, and may lead to adjustments distarted by the comparative size of each market. Thus, we continue to use our standard policy of capping home market indirect selling expenses on a sale-by-sale basis, as described in the Department's 1985 Adjustment Study.

Comment 23: Respondent argues that the manner in which the Department applied the ESP cap in the preliminary determination amounts to double ESP capping.

Petitioner argues that, contrary to the respondent's assertion, the Department has not utilized a two-step ESP cap procedure in this proceeding. Instead, consistent with agency practice, the Department capped the third country market indirect selling expenses on a sale-by-sale basis.

DOC Position: In the preliminary determination, we used our standard procedure and capped the third country market indirect selling expenses on a sale-by-sale basis. This did not amount to double ESP capping.

Comment 24: Petitioner asserts that in its scope of investigation at the preliminary determination, the Department listed only four HTS subheadings. Petitioner requests that the Department list eighteen HTS subheadings in its final determination.

DOC Position: We agree. The petition included nine TSUSA item numbers and four HTS subheadings that petitioner believed would correspond to the TSUSA numbers when the HTS system became effective.

The HTS went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS subheadings listed in a January 1989 USITC publication, *"The Continuity of Import and Export Trade Statistics After Implementation of the Harmonized Commodity Description and Coding System,"* petitioner requested that the Department expand the four HTS subheadings listed in our preliminary to 18 subheadings. We asked for comments from the interested parties in this investigation concerning industrial belts covered by the 18 HTS subheadings.

In our preliminary determination as now, we note that the written description of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage. We do not view providing additional HTS subheadings as broadening the scope of this investigation.

Continuation of Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Singapore, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption, on or after January 26, 1989, the date of publication of the preliminary determination in the **Federal Register**. The U.S. Customs Service shall continue to require a cash deposit or posting of bond equal to the estimated amounts by which the foreign market value of the merchandise subject to this investigation exceeds the United States price, as shown below. This suspension of liquidation will remain in effect until further notice.

The weighted-average margins are as follows:

Manufacturer/producer/exporter	Weighted-average margin percentage
Mitsuboshi Belting (Singapore) Pte. Ltd.	31.73
All others	31.73

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or threat of material injury, does not exist, the proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that material injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on industrial belts from Singapore entered, or withdrawn from warehouse, for consumption, on or after the effective date of the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

April 11, 1989.

Final Determination of Sales at Less Than Fair Value: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, From Taiwan

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We determine that industrial belts and components and parts thereof, whether cured or uncured, (hereinafter referred to as industrial belts) from Taiwan are being, or are likely to be, sold in the United States (U.S.) at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Taiwan as described in the "Suspension of Liquidation" section of this notice. The ITC will determine, within 45 days of the date of publication of this notice, whether these imports are materially injuring, or threaten material injury to, a U.S. industry. We also determine that critical circumstances do not exist with respect to imports of industrial belts from Taiwan.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Michael Ready or Joel Fischl, Office of Antidumping Investigations, Import Administration, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2613 or (202) 377-3003.

SUPPLEMENTAL INFORMATION:

Final Determination

We determine that industrial belts from Taiwan are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d) (the Act). The estimated weighted-average margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since our preliminary determination (54 FR 5112, February 1, 1989), the following events have occurred. A public hearing was held on March 28, 1989. Petitioner filed a pre-hearing brief on March 22, 1989, and a post-hearing brief on March 31, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), and all merchandise entered or withdrawn from warehouse for consumption on or after that date is now classified solely according to the appropriate HTS item number(s). The Department is providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions for convenience and Customs purposes. The Department's written description of the products under investigation remains dispositive as to the scope of the products covered by this investigation.

The products covered by this investigation are industrial belts from Taiwan, currently provided for under TSUSA item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 356.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510, and 773.3520 and currently classifiable under HTS item numbers 5910.00.10, 5910.00.90, 4010.10.10, 4010.10.50, 3926.90.55, 4010.91.11, 4010.99.11, 3926.90.56, 3926.90.59, 4010.91.19, 4010.99.19, 3926.90.57, 4010.91.15, 4010.99.15, 7326.20.00, 3926.90.60, 4010.91.50 and 4010.99.50.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Period of Investigation

The period of investigation is January 1, 1988 through June 30, 1988.

Our investigation was limited to Hsing Kwo Rubber Mfg. Co., Ltd. (Hsing Kwo), the producer responsible for the bulk of Taiwanese exports of this product to the United States.

Such or Similar Comparisons

For Hsing Kwo, pursuant to section 771(16)(C) of the Act, we established one category of "such or similar" merchandise: V-belts.

Fair Value Comparisons

To determine whether sales of industrial belts from Taiwan to the U.S. were made at less than fair value, we compared the United States price to the foreign market value, pursuant to sections 772 and 773 of the Act, respectively.

United States Price

In our preliminary determination we calculated United States price using exporter's sales price methodology. However, as a result of information gathered at verification, we determined that purchase price would be the appropriate method. Virtually all of Hsing Kwo's sales are made through a related sales agent in the U.S. prior to importation. The related sales agent, Hsing Kwo USA (HKUSA), receives orders and transmits them to Taiwan. The manufacturer in Taiwan then packs the merchandise for each order in cartons stamped with shipping marks identifying the ultimate customer. The cartons are then packed into international shipping containers (along with cartons of V-belts destined for other customers as well as cartons of merchandise not covered by this investigation) which are shipped to HKUSA. HKUSA unpacks the containers and forwards the individual cartons on to the ultimate purchasers.

For these sales, the Department has determined that purchase price is the appropriate basis for U.S. price based on the following elements:

1. The merchandise in question was not introduced into the inventory of a related selling agent;

2. This was the customary commercial channel for sales of this merchandise between the parties involved; and

3. The related selling agent located in the U.S. acted as a processor of sales-related documentation, as a communication link with the unrelated U.S. buyer, and as a freight forwarder.

Given this, we regard the routine selling functions of the exporter as merely having been relocated geographically from the country of exportation to the U.S., where the sales agent performs them. Whether these functions take place in the U.S. or abroad does not change the substance of the transactions or the functions themselves.

Because the balance of Hsing Kwo's sales (exporter's sales price transactions) was minimal, we have disregarded them for purposes of this determination.

We calculated purchase price based on packed, f.o.b. seller's warehouse prices to unrelated purchasers in the U.S. We made deductions, where appropriate, for a harbor construction tax, inland freight and brokerage in Taiwan, ocean freight, marine insurance, and merchandise processing fees, harbor maintenance fees, customs duty, customs brokerage, and inland freight in the U.S. An addition was made, pursuant to section 772(d)(1)(B) of the Act, for import duties imposed by the country of exportation which have been rebated, or which have not been collected by reason of the exportation of the merchandise to the United States. We also added the amount of value added taxes which would have been collected if the merchandise had not been exported.

Minor revisions were made to certain charges. Based on verified information, brokerage, inland freight (for both Taiwan and the U.S.), and ocean freight were recalculated on a per inch basis, rather than value. All other charges, which had been allocated based on U.S. sales value were reallocated according to the basis on which they were incurred (*e.g.*, c.i.f. Los Angeles, f.o.b. Taiwan port).

Foreign Market Value

We determined there were sufficient sales in the home market to serve as the basis for calculating foreign market value. In accordance with section 773 of the Act, we calculated foreign market value based on packed, f.o.b. seller's warehouse or delivered prices to unrelated purchasers in Taiwan. We made deductions, where appropriate, for inland freight.

We made adjustments, where applicable, for differences in the physical characteristics of the merchandise in accordance with § 353.16 of the regulations.

We made adjustments under § 353.15(a) of the Commerce Regulations for differences in circumstances of sale for credit expenses where appropriate, and we offset commissions paid in the U.S. market with indirect selling expenses incurred in the home market.

We made an upward adjustment to the tax-exclusive home market prices for the value-added tax we computed for U.S. price.

Based on verified information, corrections were made to U.S. packing. Certain other charges and corrections were made using verified data.

Inland freight was recalculated on a per-inch basis.

Unreported credit and commission expenses on U.S. sales were included.

The home market interest rate was corrected, and difference in merchandise adjustments which had originally been applied to three belt types were applied to other belt types, where appropriate.

Currency Conversion

As noted above, we are basing United States price for all of our fair value comparisons on purchase price. Section 353.56(as)(1) of the Department of Commerce Regulations requires that in the case of purchase price transactions, the conversion of foreign currency into U.S. dollars shall be made as of the date of purchase or agreement to purchase. In this instance, because Hsing Kwo apparently assumed that United States price would be based on exporter's sales price, it provided only the date the merchandise was "sold" (invoiced) by Hsing Kwo's related selling agent in the U.S.—not the date the goods were purchased (ordered) by the ultimate unrelated customer. Since the date of purchase was not supplied by Hsing Kwo, we have used as best information available, the highest exchange rate certified by the Federal Reserve Bank of New York for the period of investigation.

Critical Circumstances

On June 30, 1988, petitioner alleged that "critical circumstances" exist with respect to imports of the subject merchandise from Taiwan. Section 735(a)(3) of the Act provides that critical circumstances exist if we determined that:

(A)(i) there is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation; or

(ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value; and

(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

We generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

Because the Department's import data pertaining to the subject merchandise are based on basket TSUSA categories, we requested specific data on shipments of the subject merchandise as the most appropriate basis for our determinations of critical circumstances. Furthermore, we believe that company-specific critical circumstances determinations better fulfill the objective of the critical circumstances provision of deterring specific companies that may try to increase imports massively prior to the suspension of liquidation.

We have asked Hsing Kwo to supply monthly volume shipment data in order for the Department to base the critical circumstances determination on company-specific data. We verified the information submitted by Hsing Kwo.

Because the verified data submitted by Hsing Kwo indicates that there have not been massive imports over a relatively short period, we find that the requirements of section 735(a)(3)(B) are not satisfied for Hsing Kwo.

We examined recent antidumping duty cases and found that there are currently no findings of dumping in the United States or elsewhere of the subject merchandise by Hsing Kwo. It is our standard practice to impute knowledge of dumping under section 735(a)(3)(A) of the Act when the estimated margins in our determinations are of such a magnitude that the importer should realize that dumping exists with regard to the subject merchandise. Normally we consider estimated margins of 25 percent or greater to be sufficient. [See, e.g., Final Determination of Sales at Less Than Fair Value; Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy (52 FR 24198, June 29, 1987).] However, in cases where the foreign manufacturer sells in the U.S. through a related company, we consider that lower margins may be sufficient. [See, e.g., Final Determination of Sales at Less Than Fair Value; Certain Internal-Combustion, Industrial Forklift Turcks from Japan (53 FR 12552, April 15, 1988).] Although Hsing Kwo sells in the U.S. through a related company, their margins are not sufficiently high to find that the requirements of section 735(a)(3)(A) are met. Therefore, we determine that critical circumstances do not exist with respect to imports of industrial belts from Taiwan.

Verification

We verified the information used in making our final determination in accordance with section 776(b) of the Act. We used standard verification procedures including examination of relevant accounting records and original documents of the respondent.

Interested Party Comments

Comment 1: Petitioner contends that the rate for all Taiwanese companies should be based on the best information available due to "substantive deficiencies" in Hsing Kwo's response.

VOL 54 ISS 73 AP 18 1989 UMI

For further discussion of these "deficiencies", see the "United States Price" and "Foreign Market Value" sections of this notice, as well as comments 2–4, and 6–10.

DOC Position: The Department disagrees. A careful review of past antidumping cases, *Antifriction Bearings from FRG* (which has been published in the Federal Register, *Light-Walled Welded Rectangular Carbon Steel Tubing from Argentina* (54 FR 13913, April 6, 1989), *Certain Granite Products from Italy* (53 FR 27187, July 19, 1988), and *Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy* (52 FR 24198, June 29, 1987), reveals that the facts involved in Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from Taiwan more closely resemble situations where the Department used responses, rather than rejecting them due to verification corrections and new submissions. The recalculations and revisions submitted at verification did not substantially exceed the methodological problems and mathematical errors commonly found during other investigations. Futhermore, in both *Antifriction Bearings from FRG* and *Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy*, there was unverified response data. This is not the situation in this case. All data has been satisfactorily verified using standard verification practices and techniques.

Comment 2: Petitioner contends that the Department's review of clerical errors found in Hsing Kwo's sales listing at verification was one-sided. Petitioner is particularly concerned with the verification team's focus on transactions "where there were high LTFV margins", but alleged lack of focus on negative LTFV margins.

DOC Position: The Department disagrees. Petitioner erroneously assumes that only errors beneficial to Hsing Kwo were reviewed and corrected. This is not the case. Errors that worked both in Hsing Kwo's favor and against Hsing Kwo were discovered by the verification team. The verification report states that "outlier" sales are "sales that were considerably higher or lower than the norm", which included sales that had both high and low LTFV margins. A thorough verification of 280 randomly chosen sales were conducted, in addition to a review of 62 "outlier" sales. Petitioner's claim that error correction was one-sided is not correct.

Comment 3: Petitioner contends that because the Department could not verify the accuracy of the reported dates of sale, "it is likely that HK excluded various sales that were actually made during the POL"

DOC Position: We disagree. While Hsing Kwo reported home market sales on the basis of invoice date, rather than purchase order date, the difference between the two dates was not significant. Therefore, we have accepted home market sales reported on the basis of invoice date. With respect to U.S. sales, Hsing Kwo treated these as exporter's sales price sales and, hence, reported its sales based on the date that the merchandise was invoiced to the unrelated U.S. customer. As discussed above, we have determined that these transactions are properly treated as purchase price transactions. As a result, U.S. sales should have been reported based on the date of the purchase order. To compensate for this, we have applied the highest exchange rate in effect during the period of investigation.

Comment 4: Petitioner contends that the Department was unable to verify the volume and value of sales.

DOC Position: The Department disagrees. The volume and value of sales were thoroughly verified, and a minor mathematical error made by respondent was corrected.

Comment 5: Petitioner argues that if the Department treats Hsing Kwo's United States sales as purchase price transactions, all selling expenses incurred by HKUSA should be included in adjustments made pursuant to 19 U.S.C. 1677a(d)(2) and 19 CFR 353.15(a).

DOC Position: We have made a circumstance of sale adjustment for all differences in direct selling expenses pursuant to 19 CFR § 353.15(a). Furthermore, movement expenses were deducted pursuant to 19 U.S.C. 1677a(d)(2).

Comment 6: Petitioner contends that Hsing Kwo incorrectly reported its U.S. sales, resulting in "substantial revision and restatement" of all U.S. sales transactions. Additionally, because the corrections cannot be verified, it will be impossible for the Department to determine the integrity of the response.

DOC Position: We disagree. The revisions referred to by petitioner were simply separate reporting of previously aggregated data. Moreover, the verification team retained copies of all pertinent invoices, which enables the Department to check Hsing Kwo's corrections using verified information for the purpose of making our final determination.

Comment 7: Petitioner contends that Hsing Kwo did not properly identify customer relationships prior to the preliminary determination.

DOC Position: We disagree. Hsing Kwo did properly identify customer relationships. Petitioner seems to be referring to a minor error where Hsing Kwo reported a miniscule number of sales to two related customers in the home market. During verification, these sales were identified; Hsing Kwo was asked to delete these from their corrected tape. These sales were dropped from the data base as requested.

Comment 8: Petitioner contends that because Hsing Kwo did not report packing costs in the home market, the Department is precluded from making an adjustment to foreign market value for home market packing for the purposes of the final determination.

DOC Position: We agree.

Comment 9: Petitioner contends that no deduction from foreign market value for inland freight should be allowed because respondents should not "construct a questionnaire response materially different from the original response" during verification.

DOC Position: We disagree. We determined at verification that a quantity-based methodology was preferable to the value-based methodology employed by Hsing Kwo to calculate inland freight expense. We used verified data to recalculate inland freight.

Comment 10: Petitioner contends that difference in merchandise adjustment corrections made during verification should not be allowed.

DOC Position: We disagree. We used verified data to recalculate these adjustments.

Comment 11: Petitioner contends that because Hsing Kwo was not able to demonstrate clearly direct expenses, that the Department should not make adjustments to foreign market value for these selling expenses if purchase price is used as the basis for United States price.

DOC Position: We agree with respect to the expense categories alluded to in petitioner's comment. However, as noted above in the foreign market value section of this notice, based upon verified data, we did make circumstance of sale adjustments for credit expenses. We also offset U.S. commission expenses with indirect selling expenses incurred in the home market.

Comment 12: Petitioner contends that Hsing Kwo cannot reasonably advertise its belts to customers of its original equipment manufacturer (OEM) customers. Also, petitioner contends that the Department should release all advertisements obtained during verification.

DOC Position: We agree that no advertising expense adjustment should be made with respect to Hsing Kwo's sales to OEM customers. Because we are unable to identify OEM sales in Hsing Kwo's sales listing, we have made no circumstance of sale adjustment for advertising expense. Instead, we included Hsing Kwo's advertising expense in the pool of indirect expenses used to offset commissions paid on certain U.S. sales. Also, the Department has released all samples of Hsing Kwo's advertising we collected to the petitioner.

Comment 13: Petitioner contends that the effective interest rate discovered at verification should be used to calculate credit costs in the home market. Additionally, because the Department verified payment dates to be inaccurate, these dates should not be relied on and a credit adjustment should not be allowed. If an adjustment is allowed, the shortest verified payment date of nine days should be used.

DOC Position: We agree that the effective interest rate discovered at verification should be used to calculate credit costs. Concerning the credit adjustment, based on verified payment and sales dates, we calculated an average time between shipment and payment which we used for the purpose of the final determination.

Comment 14: Petitioner argues that packing costs in the U.S. market should be deducted from United States price. Petitioner further argues that according to the Department's verification report, Hsing Kwo underreported U.S. packing costs and that consequently, if the Department is uncertain of these costs, the highest packing costs for any shipment should be used for all shipments.

DOC Position: Our methodology requires that we make no deduction from the United States sales price for U.S. packing expense, pursuant to section 772(d). Rather, we add the U.S. packing expense in calculating foreign market value, pursuant to section 772(d)(1), while subtracting home market packing expense. As noted above in the "Foreign Market Value" section of this notice, the respondent did not report home market packing expense, and we have made no deduction from foreign market value for the amount.

With regard to the second part of petitioner's comment, verification revealed that U.S. packing expense was *overstated*, rather than understated in the questionnaire response. For purposes of this final determination, we made the adjustment by using the verified average U.S. packing expense.

Comment 15: Petitioner argues that in calculating United States price, the Department should make an addition for duty drawback only on sales of belts that have a polyester cord.

DOC Position: As all of the belts sold to the U.S. by Hsing Kwo during the period of investigation are of polyester cord construction, we made an addition for duty drawback for all U.S. sales.

Comment 16: Petitioner argues that in calculating imputed U.S. credit expense, the Department should use the longest period (104 days) between shipment and payment found at verification for any of Hsing Kwo's U.S. sales.

DOC Position: We disagree. We calculated an average payment period based on verified payment and sale dates.

Comment 17: Petitioner contends that an adjustment for technical service expense incurred on U.S. sales is required.

DOC Position: We disagree. In its questionnaire response, Hsing Kwo misinterpreted the term "technical service." The technical service expenses originally reported by Hsing Kwo with respect to its U.S.sales were in fact indirect expenses for which no adjustment is warranted when a comparison involves purchase price sales.

Comment 18: Petitioner contends that specific documents collected at verification should be released under Administrative Protective Order (APO).

DOC Position: We have released to petitioner, under APO, certain supplemental submissions collected during verification that contained information not previously on the record. As to the verification exhibits, it is our policy not to release a respondent's supporting source documents under an administrative protective order when we have requested this additional information solely to further support a respondent's claim. Release of such documents can be damaging to the competitive position of the respondent. If petitioners did not agree with our position, the proper remedy was to appeal the refusal to release verification exhibits under APO, to the CIT while this investigation was in progress 19 U.S.C. 1677f(c)(2).

Comment 19: Petitioner argues that with respect to San Wu, a Taiwanese manufacturer of the subject merchandise to whom we did not present a questionnaire, and who consequently has not participated in this investigation, the final determination antidumping margin should be based upon "best information available" (company specific information from the petition) rather than the "all other rate" (the weighted average of the margin percentage the Department calculates for all questionnaire respondents). In this case, since there is only one questionnaire respondent, Hsing Kwo, the "all other rate" is the same as the margin percentage calculated for Hsing Kwo. Petitioner argues that only if the margin percentage the Department calculates for Hsing Kwo is higher than the rate shown for San Wu in the petition should the Department assign to San Wu the all other (Hsing Kwo) rate. Petitioner makes this argument due to the affiliation of San Wu with respondents in the companion investigations involving this same merchandise imported from Singapore and Japan respectively, and with these respondents' related U.S. importer. Based on the results of our preliminary determinations, petitioner anticipates that the final determination margin percentages calculated by the Department for San Wu's affiliates in Singapore and Japan will be higher than the margin percentage the Department calculates for Hsing Kwo in the Taiwan investigation, and that consequently, the related U.S. importer will have an incentive to shift its sources from Japan or Singapore to avoid any antidumping duty orders imposed on the subject merchandise from those countries.

DOC Position: We disagree. The Department's policy, as stated in § 353.38 of the Regulations, is to examine at least 60 percent of the exports from any given country under investigation, and to assign the "all other" rate to those products not investigated. The 60 percent minimum was satisfied by Hsing Kwo's exports. Exports of belts produced by San Wu in Taiwan (assuming an antidumping duty order with respect to Taiwan) would be subject to a suspension of liquidation, and the "all other" duty deposit rate pending an annual review pursuant to section 751 of the Act which would establish antidumping duties due, which may be more or less than duties deposited at entry of the merchandise.

Comment 20: Petitioner argues that critical circumstances exist with respect to imports of industrial belts from Taiwan.

DOC Position: We disagree. See our discussion of "Critical Circumstances" above.

Comment 21: In a letter to the Department dated April 5, 1989, petitioner makes certain allegations regarding Hsing Kwo's U.S. sales data.

DOC Position: Petitioner's comments are untimely, and improperly summarized in the public version. As such, the Department cannot consider information in the petitioner's April 5, 1989 submission. Comments submitted three working days before the final

VOL 54 ISS 73 AP 18 1989 UMI

determination do not allow the Department adequate time to properly analyze, or respond to, said comments. Furthermore, the public version of the above submission was improperly prepared; petitioner deleted the entire second and third pages of a three page submission. Only pertinent business proprietary information should be deleted or summarized from the public version.

Comment 22: Petitioner asserts that in its scope of investigation at the preliminary determination, the Department listed only four HTS sub-headings. Petitioner requests that the Department list eighteen HTS sub-headings in its final determination.

DOC Position: We agree. The petition included nine TSUSA item numbers and four HTS sub-headings that petitioner believed would correspond to the TSUSA numbers when the HTS system became effective.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS sub-headings listed in a January 1989 USITC publication, *"The Continuity of Import and Export Trade statistics After Implementation of the Harmonized Commodity Description and Coding System"*, petitioner requested that the Department expand the four HTS sub-headings listed in our preliminary determination to eighteen sub-headings. We asked for comments from the interested parties in this investigation concerning industrial belts covered by the eighteen HTS sub-headings.

In our preliminary determinations, as now, we note that the written description of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage. We do not view providing additional HTS sub-headings as broadening the scope of this investigation.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from Taiwan, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register**. The U.S. Customs Service shall continue to require a cash deposit or posting of a bond equal to the estimated amounts by which the foreign market value of the subject merchandise from Taiwan exceeds the U.S. price as shown below. This suspension of liquidation will remain in effect until further notice. The weighted-average margins are as follows:

Manufacturer/producer/exporter	Weighted-average margin percentage
Hsing Kwo	12.13
All Others	12.13

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing Customs officers to assess an antidumping duty on industrial belts from Taiwan entered, or withdrawn from warehouse, for consumption after the effective date of the suspension of liquidation, equal to the amount by which the foreign market value exceeds the U.S. price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673(d)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-412-802]

Final Determination of Sales at Less Than Fair Value: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, From the United Kingdom

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We determine that industrial belts and components and parts thereof, whether cured or uncured, (hereinafter referred to as industrial belts) from the United Kingdom (UK) are being, or are likely to be, sold in the United States at less than fair value.

We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of the subject merchandise from the UK as described in the "Continuation of Suspension of Liquidation" section of this notice. The ITC will determine, within 45 days of the publication of this notice, whether these imports materially injure, or threaten material injury to, the U.S. industry.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Louis Apple, or Mary Jenkins, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone: (202) 377-1769, or 377-1756, respectively.

SUPPLEMENTARY INFORMATION:

Final Determination

We determine that industrial belts from the UK are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a) (the Act). The average dumping margins are shown in the "Suspension of Liquidation" section of this notice. We also determine that critical circumstances exist with respect to imports from Arntz Belting Company, Ltd. (Optibelt). We have determined that critical circumstances do not exist with respect to imports from J.H. Fenner & Company and all other exporters and producers from the UK, as outlined in the "Critical Circumstances" section of this notice.

Case History

Since our notice of preliminary determination (54 FR 5108, February 1, 1989), the following events have occurred:

Verification of the questionnaire responses provided by Fenner was conducted in the UK and the United States during February and March 1989

A public hearing was held on March 20, 1989. Petitioner, respondent, and other interested parties have filed pre- and post-hearing briefs.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), and all merchandise entered or withdrawn from warehouse for consumption on or after that date is now classified solely according to the appropriate HTS item number(s). The Department is providing both the appropriate *Tariff Schedules of the United States Annotated* (TSUSA) item number(s) and the appropriate HTS item number(s) with its product descriptions for convenience and Customs purposes. The Department's written description of the products under investigation remains dispositive as to the scope of the products covered by this investigation.

The products covered by this investigation are industrial belts and components and parts thereof, whether cured or uncured, from the UK provided for under TSUSA item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510 and 773.3520, and currently classifiable under HTS item numbers 5910.00.10, 5910.00.90, 4010.10.10, 4010.10.50, 3926.90.55, 3926.90.56, 3926.90.57, 3926.90.59, 3926.90.60, 4010.91.11, 4010.91.15, 4010.91.19, 4010.91.50, 4010.99.11, 4010.99.15, 4010.00.19, 4010.99.50 and 7326.20.00.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (*i.e.*, closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Period of Investigation

The period of investigation (POI), is January 1, 1988 through June 30, 1988.

Our investigation was limited to J.H. Fenner, a voluntary respondent. Arntz Belting Company, Ltd. (Optibelt), the producer responsible for the bulk of the United Kingdom exports of this product to the United States, did not respond to the Department's questionnaire.

Such or Similar Comparisons

For Fenner, pursuant to section 771(16)(C) of the Act, we established one category of "such or similar" merchandise: V-belts.

Fair Value Comparisons

Fenner

To determine whether sales of industrial belts from the UK to the United States were made at less than fair value, we compared the U.S. price using exporter's sales price with the foreign market value pursuant to sections 772 and 773 of the Act, respectively.

Optibelt

To determine whether sales of industrial belts from the UK to the United States were made at less than fair value, we compared the United States price to the foreign market value. For our preliminary determination we used best information available as required by section 776(c) of the Act. As best information available, we took the highest margin contained in the petition for each of the product types for the POI and calculated a simple average of those figures to determine a margin for the products under investigation. Since the respondent, Optibelt failed to participate in the investigation we are using the same methodology for calculating a margin for the final determination.

United States Price

Fenner

Fenner's U.S. sales are treated as exporter's sale price transactions (ESP) for the following reasons: Fenner Manheim, a Fenner U.S. subsidiary, is more than a mere facilitator of transactions between Fenner U.K. and U.S. customers. Fenner Manheim purchases the merchandise from Fenner U.K. at a transfer price and resells the subject merchandise to its unrelated U.S. customers. Fenner Manheim independently determines the price and other terms of sale to U.S. unrelated customers based on market demand. Terms of sale to unrelated U.S. customers are also subject to change without penalty prior to the date Fenner Manheim ships the merchandise and invoices its U.S. customer.

To calculate ESP in accordance with section 772(c) of the Act, we used the packed, f.o.b. prices of industrial belts to unrelated purchasers in the United States.

During the POI, some of Fenner's shipments of V-belts also included products that were not subject to our investigation.

Fenner took the total movement charges for all products in each shipment of V-belts and allocated the movement expenses for V-belts by value for total merchandise shipped. We have not accepted Fenner's allocation of these expenses by value because shipping documents show that these expenses are based on the weight of each shipment. Because Fenner did not calculate movement expenses based on weight for the merchandise under investigation, we verified Fenner's actual movement expenses for V-belts and all products included in the same shipment with V-belts. As best information available (BIA), the total actual verified movement expenses were allocated over the total shipments of V-belts during the POI.

We made deductions for air freight, foreign inland freight and insurance, brokerage and handling charges, U.S. Custom duty, U.S. inland freight and other processing fees. We deducted indirect selling expenses in the home market and indirect selling expenses in the United States, inventory carrying cost in the home market and inventory carrying cost in the United States and cost for the time merchandise was in transit. We imputed inventory carrying cost based on Fenner's value of merchandise, the number of days merchandise was in inventory and Fenner's short-term borrowing rate. We deducted credit expenses. We made further deductions, where appropriate, for U.S. commissions paid to Fenner Manheim's sales representatives.

All movement charges, commissions and indirect selling expenses were calculated as a percentage of sales price to unrelated purchasers in the United States.

The total of the indirect selling expenses and commissions and inventory carrying cost formed the cap for the allowable home market indirect selling expenses offset under § 353.15(c) of our regulations (*see* 19 CFR 315.15(c)). We added the amount of value added tax which would have been collected if the merchandise had not been exported.

Optibelt

In accordance with section 772 of the Act, United States price was based on the U.S. price information provided in the petition.

Foreign Market Value

Fenner

In accordance with section 773(a) of the Act, we calculated foreign market

VOL
54
ISS
73
AP
18
1989
UMI

value based on the packed, f.o.b. prices to unrelated customers in the home market. To these prices we added the cost of U.S. packing. Fenner did not provide the cost of home market packing. Therefore, no deduction was made for home market packing cost.

We made deductions from the home market price for discounts. We made further deductions from the home market price for credit expenses. We deducted indirect selling expenses and inventory costs incurred on home market sales up to the amount of commissions and indirect selling expenses incurred on sales in the U.S. market, in accordance with section 353.15(c) of our regulations. We have made an upward adjustment to the tax-exclusive home market prices for the value added tax we computed for U.S. price. We have added export packing cost to the foreign market value.

Optibelt

In accordance with section 773 of the Act, foreign market value was based on home market prices provided in the petition.

Currency Conversion

We used the official exchange rates in effect on the dates of sale, in accordance with section 773(a)(1) of the Act. All currency conversions were made at the rates certified by the Federal Reserve Bank of New York.

Critical Circumstances

On August 1, 1988, petitioner alleged that "critical circumstances" exist with respect to imports of the subject merchandise from the UK. Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that:

(A)(i) there is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation; or

(ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporters was selling the merchandise which is the subject of the investigation at less than its fair value; and

(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

Fenner

Because the Department's import data pertaining to the subject merchandise are based on basket TSUSA categories, we requested specific data on shipments of the subject merchandise as the most appropriate basis for our determination of critical circumstances. Furthermore, we believe that a company-specific critical circumstances determination better fulfills the critical circumstances provisions's objective of deterring a company from increasing imports massively prior to the suspension of liquidation.

We asked Fenner to supply monthly volume shipment data from November 1987 through January 1989 in order for the Department to base the critical circumstances determination on company-specific data. We verified the information submitted by Fenner.

Because the verified data submitted by Fenner indicate that there have not been massive imports over a relatively short period, we find that the requirements of section 735(a)(3)(B) are not satisfied for Fenner.

Optibelt

Since the respondent, Optibelt, failed to participate in the investigation, we are determining that critical circumstances for this respondent exist. Based on best information available, we are assuming that imports of industrial belts have been massive over a relatively short period of time. In determining whether there is a knowledge of dumping, the Department normally considers margins of 25 percent or more to impute knowledge of dumping under section 735(a)(3)(A). (*see* e.g. *Final Determination of Sales at Less Than Fair Value; Tapered Roller Bearings and Parts thereof, Finished or Unfinished, from Italy* (52 FR 24198, June 29, 1987)). Therefore, in accordance with section 735(a)(3)(A)(ii) and 735(a)(3)(B), we determine that critical circumstances exist with respect to Optibelt.

With respect to other firms covered by the "All others" rate, we have determined that imports of industrial belts have not been massive over a relatively short period of time. Since we do not find that there have been massive imports of industrial belts from other firms included in the "All Other" rate, we do not need to consider whether there is a history of dumping or whether importers of these products knew or should have known that the merchandise was being sold at less than fair value.

Verification

As provided in section 776(b) of the Act, we verified all information provided by Fenner and used this information in reaching the final determination in this investigation. We used standard verification procedures including examination of relevant accounting records and original source documents provided by the respondent.

Interested Party Comments

Comment 1: Petitioner asserts that, in its scope of investigation at the preliminary determination, the Department listed only four HTS subheadings. Petitioner requests that the Department list all eighteen HTS subheadings in its final determination.

DOC Position: We agree. The petition includes nine TSUSA item numbers and four HTS sub-headings that petitioner believed would correspond to the TSUSA numbers when the HTS system become effective.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS sub-headings listed in a January 1989 USITC publication, *The Continuity of Import and Export Trade Statistics After Implementation of the Harmonized Commodity Description and Coding System*, petitioner requested that the Department expand the four HTS sub-headings listed in our preliminary determination to eighteen sub-headings. We asked for comments from the interested parties in this investigation concerning industrial belts covered by the eighteen HTS sub-headings.

In our preliminary determination, as now, we note that the written description of the products covered by the investigation is dispostive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage. Accordingly, we do not view this as a broadening of the scope of this investigation.

Comment 2: Petitioner argues that the best information available (BIA) dumping margin for Optibelt should be the highest margin found in the petition since Optibelt failed to respond to the Department's questionnaire. Petitioner notes that it provided extremely detailed information in the petition with regard to Optibelt. Petitioner also stated that BTL, Ltd. a voluntary respondent who also did not respond to the questionnaire, should be subject to the "All other" rate.

DOC Position: The Department is applying the same methodology used inthe preliminary determination to calculate the margins for the final determination. As best information available, we are taking the highest margin contained in the petition for each of the product types for the period of investigation and then simple averaging those figurers to determine the margins for the products under investigation. We agree with petitioner with regard to BTL and they are included in the "All other" rate.

Comment 3: Petitioner claims that Fenner's response should be deemed inadequate and should be rejected and that the margin for Fenner should be based on the highest margin found in the petition.

Respondent claims that for purposes of the final determination, the dumping margin for Fenner should be based on the information submitted by Fenner and verified by the Department. This would include the original questionnaire response and the supplement responses.

DOC Position: A careful review of past antidumping cases, *e.g., Antifriction Bearings from FRG* (issued by the Department on March 24, 1989), *Light-walled Welded Rectangular Carbon Steel Tubing from Argentina* (54 FR 13913, April 6, 1989), and *Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy* (52 FR 24198, June 29, 1987), reveals that the facts involved in this case more closely resemble situations where the Department used responses, rather than rejected them due to verification corrections and new submissions. The recalculations and revisions submitted at verification were typical minor methodological problems and mathematical errors similar to those commonly found during other investigations. This case differs substantially from both *Antifriction Bearings from the FRG* and *Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy*, where submitted data were incorrect and the Department was never provided accurate and verifiable data. In this case, all data have been satisfactorily verified using standard verification practices and techniques.

Comment 4: Petitioner states that in many instances the revisions Fenner submitted during verification affect all of the sales reported in a particular market. Also, according to petitioner, most of the changes are quite substantial and favor the respondent. In addition, petitioner believes that respondent's revised response was not timely. Petitioner claims that rejection of the response is especially appropriate since Fenner is a voluntary respondent.

Respondent claims the corrections to the response made by the Department at verification should be considered for purposes of the final determination. Respondent argues that the changes were minor and were limited to the correction of information already on the administrative record and therefore did not amount to the submission of new information. Respondent states that it is the long established policy of the Department to accept corrections to the original response to conform to the information verified. Finally, respondent strongly disagrees with the suggestion by petitioner that Fenner adopted a "wait and see" attitude before telling the Department about discrepancies it discovered prior to verification. Respondent asserts it has always cooperated fully with the Department in this investigation.

DOC Position: Only revisions to Fenner's response concerning indirect selling expenses affect all sales in a particular market. In that instance, the correct indirect selling expenses were submitted by Fenner at verification and verified by the Department. Errors that worked both for Fenner and against Fenner were discovered during verification. These corrections were verified and the corrections were submitted to the Department. verification.

Comment 5: Petitioner claims Fenner has failed to adequately demonstrate that any adjustments should be made to foreign market value. Petitioner states that since neither verification nor post-verification submissions should be used to correct deficiencies in these adjustments, the Department should continue to disallow all adjustments claimed by Fenner.

DOC Position: We have accepted corrections for minor deficiencies found in Fenner's home market sales response. All adjustments relating to these deficiencies have been verified by the Department. We have determined that Fenner has adequately demonstrated the validity of the corrected information.

Comment 6: Petitioner states that in the event the Department uses Fenner's response, no deduction from foreign market value should be made for discounts, or, if discounts are allowed, the smallest discount should be applied to all sales. Petitioner claims that corrected information on home market discounts was submitted during and after verification and was revised to such a degree as to preclude its inclusion in the final determination.

DOC Position: We disagree. Although Fenner's methodology used in reporting gross price and discounts was determined to be inadequate at verification, during verification we found that net price was accurately reported on all home market sales. Fenner has adequately explained its methodology used in determining adjustments for other discounts and gross price. Based on Fenner's explanation, the Department has determined that the corrections to Fenner's gross price and other discounts are minor and that they do not warrant omission of adjustments to foreign market value.

Comment 7: Petitioner argues the Department should disallow any deduction from foreign market value for home market credit expenses since repondent calculated these costs using standard payment terms rather than actual number of days between date of sale and payment date. If revised payment periods are used by the Department, they should be used only for the individual transactions actually verified.

Respondent states that for purposes of the final determination, a credit expense should be imputed to each non-cash sale based on the verified company-specific interest rate during the POI and an average 45 day credit extension period for outstanding payments. Respondent claims the imputed average 45 day credit period is a conservative estimate of the actual average credit extension period and that the use of an average collection period is consistent with past Department practice.

DOC Position: The Department prefers to have credit reported on a transaction-by-transaction basis. However, given the massive number of transactions in the home market, we do not consider a methodology based on average credit days outstanding to be unreasonable. We verified the number of days credit was outstanding for a number of sales transactions and used the lowest number of days for payment outstanding found in these sales to calculate credit expenses.

Comment 8: With regard to home market indirect selling expenses, petitioner claims the Department should disallow this claim since respondent's revised data could not be verified.

Respondent argues that the Department should make appropriate deductions from foreign market value to account for indirect selling expenses incurred on home market sales. Respondent claims revised indirect selling expenses for the POI were verified.

DOC Position: The Department verified indirect selling expenses for all sales of all products sold by Fenner in the home market. The expenses verified by the Department and reported in its verification report were used to

VOL 54 ISS 73 APR 18 1989 UMI

calculate Fenner's indirect selling expenses.

Comment 9: Petitioner argues that the Department should disallow any inventory carrying costs claimed on home market sales. Petitioner believes it would be improper to deduct any home market warehousing or credit costs for the period in warehouse because such costs were not deducted from exporter's sales price sales in the preliminary determination.

DOC Position: For the final determination the Department has deducted from both sides inventory carrying costs for exporter's sales price transactions. We have also allowed inventory carrying costs claimed on home market sales.

Comment 10: Petitioner states that, according to the U.S. verification report, Fenner failed to report all of its U.S. sales during the period of investigation. Petitioner also believes that much of the information originally submitted by Fenner was unfairly revised during the U.S. verification. The revisions and omissions require the use of best information available for the final determination.

Respondent argues that the addition of three additional belt models to the U.S. and home market sales listings does not constitute an entirely new response. Accordingly to respondent, an inadvertent omission which is less than five percent of total sales is not a substantial deficiency, especially since the Department was informed about the omitted sales prior to starting verification and the Department verified the corrected volume and value of sales.

DOC Position: Prior to starting verification we were informed by Fenner that sales relative to three models had been omitted from its questionnaire response. Fenner was forthright in informing us of these omissions, and it cooperated in providing all information relating to sales of the omitted models. The Department examined all of Fenner's transfer invoices for sales of the subject merchandise to the United States during the POI. We confirmed that sales of the three omitted models were included in one shipment on one invoice that contained a large number of different products that were not subject to our investigation. We instructed Fenner to submit a revised response including the three omitted models and the verified adjustments associated with those models. We also instructed Fenner to include in the submission other minor corrections to its response that were made during verification. We do not consider these corrections to be substantial enough to warrant rejecting Fenner's response and using BIA.

Comment 11: Petitioner argues that revised and new information on U.S. movement and packing charges and U.S. credit costs provided at verification should have been submitted prior to verification. Because it was not, it should be rejected for purposes of the final determination.

With regard to credit expense, respondent claims that the verified company interest rate during the period of investigation should be used. For purposes of movement and packing expenses, Fenner claims the revised factors it provided, and the Department verified, should be used.

DOC Position: We are using verified movement and packing expenses as submitted in Fenner's responses prior to verification.

With regard to credit expense, the Department has verified a short-term borrowing rate for Fenner during the period of investigation. The interest rate Fenner originally reported was based on Fenner's short-term borrowing rate outside the period of investigation. Therefore, we are using the revised verified rate.

Comment 12: Petitioner claims that since the reported U.S. commission rates were found to be unreliable at verification they should be rejected. However, in the event the Department decides to deduct the commission rate from the exporter's sales price sales, the highest reported rate should be used.

DOC Position: We disagree. At verification we determined that there was one minor discrepancy in Fenner's reported commission rate. We were able to verify the correct rate. Therefore, we are using Fenner's commission rate as verified and reported in its corrected submission.

Comment 13: Petitioner claims Fenner's U.S. selling expenses are not attributable to U.S. sales of the subject merchandise during the period of investigation. Since no verified information is available, the Department should reject Fenner's response in its entirety and use BIA for the final determination.

DOC Petition: We are accepting Fenner's allocation of U.S. selling expenses. Our preference is for product-specific expenses; however, given the number of products sold by Fenner and the difficulty of assigning specific expenses to specific products, which include products not subject to the investigation, we believe it is reasonable to accept allocations. We were able to verify independently the amounts for each category that were included in the selling expense. We also verified that Fenner does not maintain records in such a way as to enable it to report its expenses for each separate class or kind of merchandise.

Comment 14: If the Department decides against using BIA, Fenner's home market selling expenses should be used as a reasonable proxy for non-U.S. indirect selling expenses incurred on U.S. sales.

DOC Position: We agree. To calculate non-U.S. indirect selling expense, we used as best information available a ratio of total indirect selling expenses in the home market to total sales made by Fenner during the period of investigation.

Comment 15: Petitioner states that Fenner failed to report imputed inventory costs on U.S. sales. For purposes of the final determination, the Department should use the information on the record to calculate these imputed costs on U.S. sales. Petitioner claims that these costs should be calculated from the time the merchandise leaves the foreign producer to the time the material is shipped from Fenner's U.S. subsidiary to the U.S. customer.

DOC Position: We have calculated inventory carrying costs for United States sales using the methodology outlined by the petitioner.

Comment 16: Petitioner believes the Department should determine that critical circumstances exist with regard to all U.S. sales of the subject merchandise from the U.K. Petitioner argues that given the size of the dumping margins and the absence of company-specific data, an adverse determination should be made.

Respondent claims that there was no substantial increase in export of the subject merchandise during the five months after the filing of the petition as compared to exports in the five months preceding the filing of the petition.

DOC Position: We have determined that since Optibelt failed to participate in the investigation, as best information available, we are assuming that imports of industrial belts from Optibelt have been massive over a relatively short period of time. Furthermore, we find that the best information available margin of 74.16 percent imputes knowledge that the importer knew or should have known that the exporter was selling the merchandise at less than its fair value.

With regard to other firms covered by the "All others" rate, see the Critical Circumstances section of this determination.

We have also determined that critical circumstances do not with regard to imports from Fenner. *See also* the Critical Circumstances section of this determination.

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of the subject merchandise from the UK, as defined in the "Scope of Investigations" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Where we have found affirmative critical circumstances in this final determination, we are instructing the U.S. Cusoms Service to suspend liquidation of such entries that are entered or withdrawn from warehouse, for consumption, on or after the date which is 90 days prior to the date of publication of the notice of the preliminary determinations in these investigations in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or posting of a bond equal to the estimated amounts by which the foreign market value of the subject merchandise from the UK exceeds the United States price, as shown below. This suspension of liquidation will remain in effect until further notice. The margins are as follows:

Manufacturers/producers/exporters	Margin percentage
J. H. Fenner & Co.	6.80
Arntz Belting Co., Ltd. (Optibelt)	74.16
All others	73.85

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determinations. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or threat of material injury, does not exist with respect to subject merchandise, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that such injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on industrial belts from the UK entered or withdrawn from warehouse, for consumption, on or after the effective date of the suspension of liquidation, equal to the amount by which the foreign market value exceeds the U.S. price.

These determinations are published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-428-802]

Final Determination of Sales at Less Than Fair Value: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, From the Federal Republic of Germany

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We determine that industrial belts and components and parts thereof, whether cured or uncured, (hereinafter referred to as industrial belts) from the Federal Republic of Germany are being, or are likely to be, sold in the United States at less than fair value. We also determine that critical circumstances exist with respect to imports of industrial belts from the Federal Republic of Germany.

We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from the Federal Republic of Germany as described in the "Continuation of Suspension of Liquidation" section of this notice. The ITC will determine, within 45 days of the publication of this notice, whether these imports materially injure, or threaten material injury to the U.S. industry.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Contact Louis Apple or Loc Nguyen, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-1769 or (202) 377-3530.

SUPPLEMENTARY INFORMATION:

Final Determination

We determine that industrial belts from the Federal Republic of Germany are being, or are likely to be, sold in the United States at less than fair value, as provided in section 735 of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) (the Act). The estimated margins are shown in the "Continuation of Suspension of Liquidation" section of this notice. We also determine that critical circumstances exist with respect to industrial belts from the Federal Republic of Germany.

Case History

On January 26, 1989, we made an affirmative preliminary determination (54 FR 5106, February 1, 1989). We have received a number of requests for exclusion of merchandise from the scope of this final determination (*see* comment numbers 4 and 5).

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS sub-headings. The HTS sub-headings are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are industrial belts from the Federal Republic of Germany currently provided for under Tariff Schedules of the United States Annotated (TSUSA) item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510 and 773.3520; and currently classifiable under Harmonized Tariff Schedule (HTS) sub-headings 3926.90.55, 3926.90.56, 3926.90.57, 3926.90.59, 3926.90.60, 4010.10.10, 4010.10.50, 4010.91.11, 4010.91.15, 4010.91.19, 4010.91.50, 4010.99.11, 4010.99.15, 4010.99.19, 4010.99.50, 5910.00.10, 5910.00.90, and 7328.20.00.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and

VOL
54
ISS
73
AP
18
1989
UMI

whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Period of Investigation

The period of investigation is January 1, 1988, through June 30, 1988.

Fair Value Comparisons

To determine whether sales of industrial belts from the Federal Republic of Germany to the United Staes were made at less than fair value, we compared the United States price to the foreign market value. For our preliminary determination, we used best information available as required by section 776(c) of the Act. As best information available, we took the highest margin contained in the petition for each of the product types for the period of investigation and calculated a simple average of those figures to determine a margin for the products under investigation. Since the respondent, Optibelt, failed to participate in the investigation, we are using the same methodology for calculating a margin for the final determination.

United States Price

United States price was based on the U.S. price information provided in the petition pursuant to section 772 of the Act.

Foreign Market Value

Foreign market value was based on home market prices provided in the petition pursuant to section 773 of the Act.

Critical Circumstances

On June 30, 1988, petitioner alleged that critical circumstances exist with respect to imports of the subject merchandise from the Federal Republic of Germany. Section 735(a)(3) of the Act provides that critical circumstances exist if we determine that:

(A)(i) there is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation; or

(ii) the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value; and

(B) there have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

Pursuant to section 735(a)(3), we generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports.

Since the respondent, Optibelt, failed to participate in the investigation, we are determining that critical circumstances for this respondent exist based on best information available. As best information available, we are assuming that imports of industrial belts have been massive over a relatively short period of time. In determining knowledge of dumping, the Department normally considers margins of 25% or more sufficient to impute knowledge of dumping under section 735(a)(3)(A) (*see, e.g., Final Determination of Sales at Less Than Fair Value; Tapered Roller Bearings and Parts Thereof, Finished or Unfinished, from Italy* (52 FR 24198, June 29, 1987)). Therefore, in accordance with sections 735(a)(3)(A)(ii) and 735(a)(3)(B), we determine that critical circumstances exist with respect to Optibelt.

With respect to firms covered by the "All Other" rate, we have determined that imports of industrial belts have not been massive over a relatively short period of time and, therefore, that critical circumstances do not exist.

Since we do not find that there have been massive imports of industrial belts form firms included in the "All Other" rate, we do not need to consider whether there is a history of dumping or whether importers of these products knew or should have known that the merchandise was being sold at less than fair value.

Interested Party Comments

Comment 1: Petitioner argues that, based on U.S. import statistics, IM 146 data, the Department should find that there have been massive imports of industrial belts over a relatively short period of time. Petitioner further asserts that an antidumping margin of 25% or more is sufficient to impute knowledge to the importer that the exporter was selling the merchandise at less than fair value.

DOC Position: Since the respondent, Optibelt, failed to participate in the investigation, as best information available, we are assuming that its imports of industrial belts from the Federal Republic of Germany have been massive over a relatively short period of time. Furthermore, we find that the best information available margin of 100.60% is sufficient to impute knowledge to the importer that the exporter was selling the merchandise at less than fair value.

With regard to firms covered by the "All Other" rate, see the "Critical Circumstances" section of this determination.

Comment 2: Petitioner argues that the Department's final determination should be based on the highest less-than-fair-value margin alleged in the petition.

DOC Position: The Department is applying the same methodology used in the preliminary determination to calculate the margins for the final determination. As best information available, we are taking the highest margin contained in the petition for each of the product types for the period of investigation and then calculating a simple average of those figures to determine the margin for the products under investigation.

Comment 3: Petitioner asserts that in its scope of investigation at the preliminary determination, the Department listed only four HTS sub-hearings. Petitioner requests that the Department list eighteen HTS sub-headings in its final determination.

DOC Position: We agree. The petition included nine TSUSA item numbers and four HTS sub-headings that petitioner believed would correspond to the TSUSA numbers when the HTS system became effective.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS sub-headings listed in a January 1989 USITC publication, *The Continuity of Import and Export Trade Statistics After Implementation of the Harmonized Commodity Description and Coding System*, petitioner requested that the Department expand the four HTS sub-headings listed in our preliminary determination to eighteen sub-headings. We asked for comments from the interested parties in this investigation concerning industrial belts covered by the eighteen HTS sub-headings.

In our preliminary determinations, as now, we note that the written description of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage. We do not view providing additional HTS sub-headings as broadening the scope of this investigation.

Comment 4: Siegling America, Belting Industries Co., Dovey Corporation and IRO Inc., importers, believe it is inappropriate to include nylon core, rubber and leather flat belts, urethane steel timing belts, knit carcas belts

treated with neophrene, corrugator belts, and cog belts, imported from the Federal Republic of Germany in the scope of this investigation. They request that these belt categories be excluded from this investigation.

DOC Position: The information received was insufficient to determine whether the merchandise is properly excluded from the scope of this investigation. In addition, the information received from these firms arrived too late to be analyzed and verified for this final determination. If the final determination of the ITC results in an antidumping duty order on this merchandise, and upon receipt of proper documentation, the Department may conduct a scope ruling procedure concerning the products imported by these firms.

Comment 5: On March 8, 1989, Continental AG submitted some information concerning synchronous belts imported from the Federal Republic of Germany.

DOC Position: We have notified Continental AG that we will not be using their submission in making a final determination because the information was not filed in time to be analyzed, verified and used in this final determination. (*see also* the DOC Position concerning Comment 4).

Continuation of Suspension of Liquidation

We are directing the U.S. Customs Service to continue to suspend liquidation of all entries of industrial belts from the Federal Republic of Germany, as defined in the "Scope of Investigation" section of this notice, that are entered, or withdrawn from warehouse, for consumption on or after the date which is 90 days prior to the date of publication of the preliminary determination in the Federal Register. The U.S. Customs Service shall continue to require a cash deposit or posting of a bond equal to the estimated amounts by which the foreign market value of the subject merchandise from the Federal Republic of Germany exceeds the United States price as shown below. This suspension of liquidation will remain in effect until further notice. The average of the highest margin for each of the product types listed in the petition for the period of investigation is as follows:

Manufacturer/producer/exporter	Margin percentage
Optibelt Corporation	100.60
All Others	100.60

ITC Notification

In accordance with section 735(d) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or threat of material injury, does not exist with respect to any of the products under investigation, the proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. However, if the ITC determines that material injury does exist, the Department will issue an antidumping duty order directing Customs officials to assess antidumping duties on industrial belts from the Federal Republic of Germany entered, or withdrawn from wearehouse, for consumption, on or after the effective date of the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price.

This determination is published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

April 11, 1989.

Preliminary Determination of Sales at Less Than Fair Value; 12-Volt Motorcycle Batteries From Taiwan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that 12-volt motorcycle batteries from Taiwan are being, or are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination and have directed the U.S. Customs Service to suspend liquidation of all entries of 12-volt motorcycle batteries from Taiwan as described in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make a final determination by June 22, 1989.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Mary Martin, John Gloninger, or Mary S. Clapp, Office of Antidumping Investigation, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW. Washington, DC 20230; telephone: (202) 377-2830, 377-8330, or 377-3965.

SUPPLEMENTAL INFORMATION:

Preliminary Determination

We preliminarily determine that 12-volt motorcycle batteries are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice.

Case History

Since the notice of reinstitution of antidumping duty investigation (53 FR 46903, November 21, 1988), the following events have occurred: On November 29, 1988, the Department presented antidumping duty questionnaires to Ztong Yee Industrial Co., Ltd. (Ztong Yee), Wei Long Electric Industrial Co., Ltd. (Wei Long), and Cheng Kwang Storage Battery Co., Ltd. (Cheng Kwang). These companies accounted for a substantial portion of exports of the subject merchandise from Taiwan to the United States during the period of investigation. Responses to Section A to the questionnaire were due on December 13, 1988, and responses to the remaining sections were due on December 29, 1988.

At the request of the respondents, response deadlines were extended to December 20, 1988 for Section A, and to January 13, 1989 for sections B and C of the questionnaire. Responses to section A were filed on December 21, 1988, and to sections B and C on January 13, 1989 by all respondents. The Department issued deficiency letters on January 23, 1989 and on February 21, 1989. Supplemental responses were received from the respondents prior to this determination.

On December 30, 1988, the petitioner requested that the preliminary determination be postponed. On January 11, 1989 in accordance with section 733(c)(1)(A) of the Act, we postponed the preliminary determination to April 7, 1989 (54 FR 2197, January 19, 1989).

VOL 54 ISS 73 AP 18 1989 UMI

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule (HTS) as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered or withdrawn from warehouse for consumption on or after this date will be classified solely according to the appropriate HTS item numbers. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are 12-volt motorcycle batteries. Motorcycle batteries are lead-acid storage batteries which are rated from 2 to 32 ampere hours (10 hour rate) with voltage levels of either 6 or 12 volts. This investigation is limited to 12-volt motorcycle batteries. The batteries are mainly used as replacement batteries for motorcycles, but may, to a very limited extent, be used in snowmobiles, lawnmovers, and other such equipment. They are currently classifiable under HTS item number 8507.10.00.

Period of Investigation

The period of investigation is April 1, 1988, through September 30, 1988.

Fair Value Comparisons

To determine whether sales of 12-volt motorcycle batteries from Taiwan to the United States were made at less than fair value, we compared the United States price to the foreign market value, as specified in the United States price and foreign market value sections of this notice.

United States Price

Since all sales used in our analysis were made directly to unrelated parties prior to importation into the United States, we based the United States price on purchase price, in accordance with section 772(b) of the Act. The calculation of United States price for each respondent is detailed below.

A. Ztong Yee

We calculated purchase price based on the packed, C.I.F. price to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, marine insurance, brokerage and handling in Taiwan, bank processing fees, and port changes.

We made additions for duty drawback and value-added taxes which would have been collected if the merchandise had not been exported.

Ztong Yee incorrectly reported sales to a related purchaser in the United States as purchase price sales. On March 28, 1989, the Department requested that Ztong Yee supply exporter's sales price information for sales made to a related purchaser in the United States, but we did not receive the information in time to use it in this preliminary determination. Therefore, for purposes of this preliminary determination, and in accordance with section 776(c) of the Act, we have used Ztong Yee's calculated rate for sales to unrelated purchasers, as the best information available (BIA), for sales to the related purchaser.

B. Wei Long

We calculated purchase price based on the packed, F.O.B. or C.I.F. price to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, marine insurance, brokerage and handling charges in Taiwan, quantity discounts, port and bank processing fees.

C. Cheng Kwang

We calculated purchase price based on the packed, F.O.B. or C.I.F. prices to unrelated purchasers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, marine insurance, brokerage and handling charges in Taiwan, bank processing fees, port charges, and inspection fees.

Foreign Market Value

In accordance with section 773(a)(1) of the Act, we calculated foreign market value based on home market or third country sales. The calculation of foreign market value for each respondent is detailed below.

A. Ztong Yee

For Ztong Yee, we determined there were sufficient sales in the home market to serve as a basis for calculating foreign market value. We calculated foreign market value based on packed F.O.B. and C.I.F. prices to unrelated purchasers in Taiwan. We made deductions, where appropriate, for inland freight and rebates.

We made circumstance of sale adjustments for differences in credit pursuant to 19 CFR 353.15. We made an upward adjustment to tax-exclusive home market prices for the value added tax we computed for United States price. In addition, we added commissions paid to selling agents in the United States where appropriate. We allowed an offset for indirect selling expenses in the home market (which includes advertising, travel and entertainment expenses, inventory carrying costs, warranty expenses and inspection fees) up to the amount of the commissions in the U.S. market in accordance with 19 CFR 353.15(c).

We made adjustments, where applicable, for differences in the physical characteristics of the merchandise in accordance with 19 CFR 353.16. Ztong Yee did not provide the cost of packing, claiming packing costs were the same for all markets. Therefore, no adjustment was made for packing. Ztong Yee, however, did report that batteries sold in the home market have acid packs. We treated the additional cost of these acid packs as part of the difference in merchandise adjustments.

Ztong Yee claimed advertising as a direct selling expense. However, its claim was not adequately supported, and we have treated advertising as an indirect selling expense for purposes of this determination.

B. Wei Long

Because Wei Long had no home market sales during the period of investigation, we used third country sales to an unrelated Taiwanese trading company and direct sales to a third country for the purpose of determining foreign market value in accordance with section 773(a)(1)(B) of the Act. We calculated foreign market value based on the packed, F.O.B. price to the unrelated trading company, and F.O.B. or C.I.F. prices for the direct sales. We made deductions where appropriate for brokerage and handling charges, foreign inland freight, ocean freight, marine insurance, quantity discounts, and port fees. We made circumstance of sale adjustments for differences in credit and warranty expenses pursuant to 19 CFR 353.15. We deducted third country packing and added U.S. packing.

In addition, we added commissions incurred on U.S. sales to foreign market value. However, Wei Long claimed an offset to U.S. commissions of "indirect selling expenses" incurred on sales to the third country market. It did not, however, include the requisite itemized breakdown of the indirect expenses claimed. Therefore, we have disallowed these expenses for purposes of the preliminary determination and have not performed the offset. If the appropriate information is submitted and verified, we will consider it for the final determination.

C. Cheng Kwang

Because Cheng Kwang's home market sales during the period of investigation were inadequate for determining foreign market value, we used third country sales to unrelated Taiwanese trading companies and direct sales to other third countries in accordance with section 773(a)(1)(B) of the Act. We calculated foreign market value comparisons based on the packed, F.O.B. or C.I.F. prices. We made deductions where appropriate for brokerage and handling charges, foreign inland freight, ocean freight, marine insurance, port usage fees, banking charges, and inspection charges.

We made a circumstance of sale adjustment for differences in credit expenses pursuant to 19 CFR 353.15. We deducted third country packing and added U.S. packing.

We made adjustments, where applicable, for differences in the physical characteristics of the merchandise in accordance with § 353.16 of the Commerce Regulations.

Cheng Kwang claimed an adjustment to third country price for additional costs incurred on smaller production lots. We disallowed this claim for the preliminary determination. If we are able to verify the costs for differing production lots and their corresponding relationship to selling price, we will consider this claim for the final determination.

Currency Conversion

Since we calculated United States price on a purchase price basis, we used the official exchange rates in effect on the date of sale, in accordance with § 353.56(a)(1) of the Commerce Regulations. All currency conversions were made at rates certified by the Federal Reserve Bank of New York.

Verification

We will verify the information used in making our final determination in accordance with section 776(b) of the Act.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of 12-volt motorcycle batteries from Taiwan that are entered or withdrawn from warehouse for consumption on or after the date of publication of this notice in the **Federal Register**. The U.S. Customs Service shall require a cash deposit or posting of a bond equal to the estimated amounts by which the foreign market value of 12-volt motorcycle batteries from Taiwan exceeds the United States price as shown below. This suspension of liquidation will remain in effect until further notice. The margins are as follows:

Manufacturer/producer/exporter:	Margin percentage
Ztong Yee	28.06
Wei Long	3.97
Cheng Kwang	1.00
All others	6.95

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

The ITC will determine whether these imports are materially injuring, or threaten material injury to, a U.S. industry before the later of 120 days after the date of this determination, or 45 days after the final determination, if affirmative.

Public Comment

In accordance with 19 CFR 353.47, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 2:00 p.m. on May 23, 1989, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Assistant Secretary for Import Administration, Room B-099, at the above address within ten days of the publication of this notice. Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; (3) the reasons for attending; and (4) a list of the issues to be discussed.

In addition, prehearing briefs in at least ten copies must be submitted to the Assistant Secretary by May 16, 1989. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, at the above address, in at least ten copies, not less than 30 days before the date of the final determination, or, if a hearing is held, within seven days after the hearing transcript is available.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673b(f)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

April 7, 1989.

BILLING CODE 3510-DS-M

[C-508-802]

Final Affirmative Countervailing Duty Determination: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, From Israel

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Israel of industrial belts and components and parts thereof, whether cured or uncured (industrial belts), as described in the "Scope of Investigation" section of this notice. The estimated net subsidy is 15.42 percent *ad valorem*. In addition, we determine that critical circumstances do exist in this case.

We have notified the United States International Trade Commission (ITC) of our determinations. If the ITC determines that imports of industrial belts materially injure, or threaten material injury to a U.S. industry, we will direct the U.S. Customs Service to resume suspension of liquidation of all entries of industrial belts from Israel that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of our countervailing duty order and to require a cash deposit on entries of industrial belts in an amount equal to the estimated net subsidy.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Roy A. Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-5414.

VOL 54 ISS 73 AP 18 1989 UMI

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that certain benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Israel of industrial belts. For purposes of this investigation, the following programs are found to confer subsidies:

- Encouragement of Capital Investment Law Grants
- Exchange Rate Risk Insurance
- Long-term Industrial Development Loans
- Encouragement of Research and Development Grants

We determine the estimated net subsidy to be 15.42 percent *ad valorem* for all manufacturers, producers, or exporters in Israel of industrial belts.

Case History

Since publication in the **Federal Register** of the *Preliminary Affirmative Countervailing Duty Determination: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from Israel* (53 Fr 48670, December 2, 1988) (*Preliminary Determination*), the following events have occurred. We received requests for a public hearing from petitioner on December 7, 1988, and from respondents on December 9, 1988. On December 9, 1988, petitioner filed a request for alignment of the countervailing duty and antidumping final determinations. This postponement was approved under section 705 of the Act and published in the **Federal Register** on February 13, 1989 (54 FR 6562).

On March 29, 1989, in accordance with Article 5, paragraph 3 of the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade (GATT Subsidies Code), we notified U.S. Customs to terminate the suspension of liquidation in this investigation as of April 1, 1989. Petitioner withdrew its request for a public hearing on March 3, 1989, and respondents withdrew their requests on March 6, 1989. We received written comments from petitioner on March 16 and March 20, 1989, and from respondents on February 23 and March 20, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedules* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS sub-headings. The HTS sub-headings are provided for convenience and Customs purposes.

The products covered by this investigation are industrial belts and components and parts thereof, whether cured or uncured, formerly provided for under TSUSA item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510, and 773.3520 and currently classifiable under HTS item numbers 3926.9055, 3926.9056, 3926.9057, 3926.9059, 3926.9060, 4010.1010, 4010.1050, 4010.9111, 4010.9115, 4010.9119, 4010.9150, 4010.9911, 4010.9915, 4010.9919, 4010.9950, 5910.0010, 5910.0090, and 7326.2000.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Analysis of Programs

Because the Government of Israel (GOI) and Magam United Rubber Industries Ltd. (Magam) withdrew their questionnaire responses, this determination is based on the best information available.

For each program found to be countervailable in prior countervailing duty investigations involving Israel, we used as the best information available the highest rate ever found for that program in previous countervailing duty determinations or administrative reviews involving products from Israel. We did not conduct a verification, since respondents withdrew their responses from the record of the investigation.

Based upon our analysis of the petition, written comments from petitioner and respondents and prior Israeli cases, we determine the following:

I. Programs Determined to Confer Subsidies

We determine that subsidies are being provided to manufactures, producers, or exporters in Israel of industrial belts under the following programs:

A. The Encouragement of Capital Investment Law (ECIL) Grants

The purpose of the ECIL is to attract capial investment to Israel. In order to be eligible to receive various benefits under the ECIL, including investment grants, drawback grants, capital grants, accelerated depreciation, and reduced tax rates, the applicant must obtain "approved enterprise" status. (ECIL interest subsidy payments and tax programs are listed below under "Programs Determined Not to Be Used".) Approved enterprise status is obtained after review of information submitted to the Ministry of Industry and Trade, Investment Center Division.

Using our *Final Affirmative Countervailing Duty Determination: Potassium Chloride from Israel* (49 FR 35122, September 14, 1984) as the best information available, we determine that the provision of investment grants under this program confers a subsidy on exports of industrial belts from Israel and that the estimated net subsidy for all producers and exporters of industrial belts from Israel is 1.18 percent *ad valorem*.

B. Exchange Rate Risk Insurance

The Exchange Rate Risk Insurance Scheme (EIS), operated by the Israel Foreign Trade Risk Insurance Corporation Ltd. (IFTRIC), is aimed at insuring exporters against losses which result when the rate of inflation exceeds the rate of devaluation and the New Israeli Shekel (NIS) value of an exporter's foreign currency receivables does not rise enough to cover increases in local costs.

The EIS scheme is optional and open to any exporter willing to pay premiums to IFTRIC. Compensation is based on a comparison of the change in the rate of devaluation of the NIS against a basket of foreign currencies with the change in the consumer price index. If the rate of inflation is greater than the rate of devaluation, the exporter is compensated by an amount equal to the difference between these two rates multiplied by the value-added of the exports. If the rate of devaluation is higher than the change in the domestic price index, however, the exporter must compensate IFTRIC. The premium is calculated for all participants as a percentage of the value-added sales value of exports. IFTRIC changes this percentage rate periodically but, at any given time, it is the same for all exporters.

In determining whether an export insurance program provides a countervailable benefit, we examine whether the premiums and other charges are adequate to cover the program's long-term operating costs and losses. In the last Israeli investigation, *Final Affirmative Countervailing Duty Determination: Industrial Phosphoric Acid from Israel* (52 FR 25447, July 7, 1987) (*Phosphoric Acid*), we found that this program conferred a countervailable benefit. Using our determination in *Phosphoric Acid* as the best information available, we determine that this program confers an export subsidy on exports of industrial belts from Israel.

For the preliminary determination we used the rate calculated for this program in the *Final Affirmative Countervailing Duty Determination: Certain Fresh Cut Flowers from Israel* (52 FR 3316, February 3, 1987) as the best information available with respect to the amount of the subsidy. For this determination, we are using the rate calculated in *Preliminary Results of Countervailing Duty Administrative Review: Fresh Cut Roses from Israel* (54 FR 10395, March 13, 1989), since it is now the highest rate found for this program in all previous countervailing duty determinations and administrative reviews. On this basis, we determine that the estimated net subsidy for all producers and exporters of industrial belts in Israel is 9.18 percent *ad valorem*.

C. Long-term Industrial Development Loans

Prior to July 1985, approved enterprises were eligible to receive long-term industrial development loans funded by the GOI. In *Phosphoric Acid*, we determined that loans under this program are provided to a diverse number of industries. However, the interest rates charged on these loans vary depending on the development zone location of the borrower. The interest rates on loans to borrowers in Development Zone A are lowest, while those on loans to borrowers in the Central Zone are highest.

In the absence of government and company questionnaire responses and verified information, we assume, as the best information available, that the producers and exporters of industrial belts in Israel are not located in the Central Zone. Therefore, we determine that this program confers a regional subsidy on exports of industrial belts from Israel. Using the rate calculated in the *Final Affirmative Countervailing Duty Determination: Oil Country Tubular Goods from Israel* (52 FR 1651, July 7, 1987) as the best information available, we determine that the estimated net subsidy for all producers and exporters of industrial belts in Israel is 5.02 percent *ad valorem*.

D. Encouragement of Research and Development Law (ERDL) Grants

Petitioner alleges that research and development grants equal to 50 percent of approved project costs are available under ERDL where such activity is directed at export expansion. Using as the best information available our determination in *Phosphoric Acid*, we determine that this program confers a subsidy on exports of industrial belts from Israel and that the estimated net subsidy for all producers and exporters of industrial belts in Israel is 0.04 percent *ad valorem*.

II. Programs Determined Not to be Used

Using as the best information available the non-use of the following programs in previous investigations, we determine that the programs below were not used by manufacturers, producers, or exporters in Israel of industrial belts during the review period. For a full description of these programs, see the *Preliminary Determination*.

A. *Certain Benefits Under the Encouragement of Capital Investment Law (ECIL)*

1. *Accelerated Depreciation Under Section 42*
2. *Direct Reduction of Corporate Tax Under Section 47*
3. *Interest Subsidy Payments*

B. *Labor Training Grants from the Ministry of Labor*

C. *Special Export Marketing Financing from the Bank of Israel*

Critical Circumstances

On June 30, 1988, petitioner alleged that "critical circumstances" exist with respect to imports of the subject merchandise from Israel. Section 705(a)(2) of the Act provides that critical circumstances exist if we determine that:

A. The alleged subsidy is inconsistent with the Agreement, and

B. There have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

We generally consider the following factors in determining whether imports have been massive over a relatively short period of time: (1) The volume and value of the imports; (2) seasonal trends (if applicable); and (3) the share of domestic consumption accounted for by imports. 19 CFR 355.16(f) (53 FR 52306, 52350)

In our preliminary determination of critical circumstances we used import statistics for the basket TSUSA categories applicable to industrial belts and determined that imports of the subject merchandise in the basket TSUSA categories from Israel were not massive over a relatively short period. For our final determination, however, we decided not to rely on basket-category import statistics. Instead, we are using an approach adopted in the recent antidumping determinations on antifriction bearings. In these determinations the Department assumed massive imports when import statistics were based on basket TSUSA categories and respondents did not supply information on company-specific exports of the subject merchandise or the information supplied could not be verified. See, for example, *Final Determinations of Sales at Less than Fair Value: Antifriction Bearings (Other than Tapered Roller Bearings) and Parts Thereof from the Federal Republic of Germany* and *Final Determinations of Sales at Less than Fair Value: Antifriction Bearings (other than Tapered Roller Bearings) and Parts Thereof from the United Kingdom*. The Commerce Department made these final determinations on March 24, 1989.

In this investigation we have circumstances which are similar to those in the antifriction bearings investigations. The import statistics are based on basket TSUSA categories and respondents withdrew their responses. Therefore, as best information available, we are assuming that imports from Israel have been massive over a relatively short period of time.

As described above, we have determined, on the basis of the best information available, that the GOI provides export subsidies on the merchandise under investigation. Article 9 of the GATT Subsidies Code prohibits the use of export subsidies on non-primary products. However, Article 14 provides an exception for developing countries, provided they do not use "export subsidies on their industrial products * * * in a manner which causes serious prejudice to the trade or production of another signatory" (Article 14, paragraph 3).

For a developing country like Israel, then the issue is whether we find that export subsidies are causing "serious prejudice" to U.S. trade or production of industrial belts. Under section 771(7)(c)(iii) of the Act, the ITC evaluates all relevant economic factors

VOL
54
ISS
73
AP
18
1989
UMI

bearing on the state of the industry, including actual and potential decline in output, sales, market share, profits, productivity, return on investment, and capacity utilization. Thus, in making its preliminary and final injury determinations, the ITC considers trade and production in the United States. We conclude that, in principle, serious prejudice can exist where material injury to a U.S. industry occurs by reason of imports benefiting from export subsidies.

Based upon the information in the record and the ITC's affirmative preliminary determination of August 14, 1988, we conclude that serious prejudice exists within the meaning of Article 14, paragraph 3. Therefore, we find that Israel's export subsidies on industrial belts are inconsistent with the GATT Subsidies Code.

For the reasons discussed above, we find that critical circumstances exist within the meaning of section 705(a)(2) of the Act. If the ITC's final determination should be negative, our critical circumstance finding will become moot; in any event, under section 705(a)(4)(A) of the Act, the ITC must make its own affirmative determination of critical circumstances.

Comments

Comment 1: Petitioner claims that the Department should countervail all subsidy programs found to be used in prior Israeli cases at the highest rate calculated for each program, including programs subsequently found to have been discontinued. In making its determination on the basis of the best information available, the Department must adversely infer that respondents failed to supply information on possible new programs that may have been created to replace the discontinued programs. The Department should use the subsidy rates applicable to the discontinued programs as the best information available for the new programs that may have been established.

DOC Position: Since respondents withdrew their responses from the record in this investigation, the Department made its final determination on the basis of the best information available, using as the best information its findings from past countervailing duty determinations or administrative reviews concerning products from Israel. In addition, to calculate a countervailing duty rate in this investigation, the Department used the highest countervailing duty rate previously found in any final countervailing duty determination or administrative review for each of the programs.

In so doing, the Department has adversely inferred that respondent has used each of the ongoing programs previously found countervailable, and that respondent has realized from each program a benefit equal to the highest benefit found in any countervailing duty determination or administrative review. Petitioner has not provided any evidence of new programs that may have been established to replace the programs discontinued. Therefore, the Department sees no reason to make additional adverse inferences.

Comment 2: Petitioner claims that the Department should recognize the existance of a new program granting a partial risk guarantee for unsuccesful export marketing activities and should determine that this program is countervailable. (This program was briefly mentioned in the government response, which, as noted above, was subsequently withdrawn.) Petitioner suggests using the exhange rate risk insurance scheme as a proxy for quantifying the benefit of the program.

DOC Position: We disagree. Both the GOI and Magam withdrew their responses from the record of this investigation. Consequently, the Department made its determination on the basis of the best information available. As the best information available, the Department used the conclusions reached in past Israeli cases. The Department considers it inappropriate to use a portion of the withdrawn response concerning an export market risk guarantee while disregarding the remainder of the responses. As set out in our response to *Comment 3*, we have refused to consider information from the withdrawn response concerning respondent's location within the Central Zone. It would be inconsistent and inappropriate for the Department to pick and choose information from the withdrawn response, using information unfavorable to respondents but not using information favorable to respondent. Furthermore, we note that petitioner has not supplied any substantive information with respect to this possible other program, nor has it described how it might be countervailable.

Comment 3: Respondents maintain that the Department failed to use the best information available in its preliminary determination for two of the programs under investigation: ECIL Grants and Long-Term Industrial Development Loans. Respondents indicate that benefits under these programs vary by zone and that no benefits are received by firms located in the Central Zone. Respondents state that Magam is located in Central Zone and have supplied a letter from the Government of Israel attesting to this statement. Respondents conclude that the Department should find that Magam has received no benefits under these programs, since it is located in the Central Zone.

Petitioner claims that the Department should not accept incomplete information submitted by Magam indicating that it may be within the Central Zone and, therefore, may be precluded from receiving preferential interest rates under the ECIL.

DOC Position: The GOI and Magam chose to withdraw their questionnaire responses in this investigation. Therefore, we were unable to verify any of the information needed to make this final determination. Under the provisions of the Act, we must verify all information used in our final determination. Because we were unable to verify any information in this investigation, it was necessary to make this final determination on the basis of the best information available.

It would be contrary to the provisions of the Act and Department practice to use partial information provided by respondents in the absence of complete and accurate questionnaire responses which were subject to verification. If the Department were to follow such a practice, potential respondents would have no reason to respond to the Department's questionnaire and would, instead, provide only information favorable to their case. Obviously, this would be an unacceptable result. See *Association Colombiana de Exportadores de Flores* v. *United States*, Slip op. 89–3 (Ct. Int'l Trade, January 6, 1989).

Comment 4: Respondents claim that the Department should not make an affirmative determination of critical circumstances, since imports from Israel account for a small percentage of U.S. consumption of the subject merchandise.

DOC Position: Because the Department's import data on the subject merchandise are based on basket TSUSA categories, we would normally look to respondents for accurate data on exports of the subject merchandise to the U.S.

In this case, however, respondents have withdrawn their responses, thus eliminating our usual alternative source of import statistics. Therefore, as best information available, we are assuming that imports from Magam have been massive over a relatively short period. Since, in this case, there are also export subsidies inconsistent with the agreement, as explained in the critical circumstances section of this determination, we have made an affirmative determination of critical circumstances. See our discussion of this issue in the section of this notice on critical circumstances.

Comment 5: Petitioner asserts that, in the scope of investigation at the preliminary determination, the Department listed only four of the 18 HTS items corresponding to the nine TSUSA numbers. Petitioner requests that the Department list all 18 numbers in its final determination.

DOC Position: The scope of this investigation has not changed since the initiation. The petition included nine TSUSA item numbers and four HTS sub-headings that petitioner believed corresponded to the TSUSA numbers.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a January 1989 ITC publication, petitioner requested that the Department expand the four HTS sub-headings to eighteen sub-headings.

We consulted with the respondents in each country subject to concurrent countervailing and antidumping investigations involving industrial belts and received no objections to the petitioner's request.

In our preliminary, as now, we note that the written description of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage.

Verification

As noted above, the questionnaire responses in this investigation were withdrawn. Therefore, we did not conduct a verification. In accordance with section 776(c) of the Act, we made our final determination on the basis of the best information available.

Suspension of Liquidation

In accordance with our preliminary affirmative countervailing duty determination published on December 2, 1988, we directed the U.S. Customs Service to suspend liquidation on the products under investigation and to require a cash deposit or bond equal to the duty deposit rate. This final countervailing duty determination was extended to coincide with the companion final antidumping determinations, pursuant to section 606 of the Trade and Tariff Act of 1984 (section 705(a)(1) of the Act). Under Article 5, paragraph 3 of the GATT Subsidies Code, provisional measures cannot be imposed for more than 120 days without final affirmative determinations of subsidy and injury. Therefore, on March 29, 1989, we instructed the U.S. Customs Service to discontinue the suspension of liquidation on the subject merchandise entered on or after April 1, 1989, but to continue the suspension of liquidation of all entries, or withdrawals from warehouse, for consumption of the subject merchandise entered between December 2, 1988, and March 31, 1989. Since we are now making a final affirmative determination of critical circumstances, the suspension of liquidation becomes retroactive to September 3, 1988, which is 90 days prior to the date on which liquidation was first suspended. We shall instruct the U.S. Customs Service also to suspend liquidation on all unliquidated entries made between September 3, 1988, and December 1, 1988. If the ITC issues a final affirmative injury determination, we will reinstate suspension of liquidation under section 705 of the Act on the date of publication of the countervailing duty order and again require a cash deposit on all entries of the subject merchandise in an amount equal to 15.42 percent *ad valorem*.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or the threat of material injury, does not exist, this proceeding will be terminated and all estimated duties deposited or securities posted as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that such injury does exist, we will issue a countervailing duty order, directing Customs officers to assess countervailing duties on all entries of industrial belts from Israel entered, or withdrawn from warehouse, for consumption, as described in the "Suspension of Liquidation" section of this notice.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

April 7, 1989.

BILLING CODE 3510-DS-M

[C-580-802]

Final Negative Countervailing Duty Determination: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, From the Republic of Korea

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that *de minimis* benefits which constitute subsidies within the meaning of the U.S. countervailing duty law are being provided to manufacturers, producers, or exporters in Korea of industrial belts and components and parts thereof, whether cured or uncured (industrial belts), as described in the "Scope of Investigation" section of this notice. The estimated net subsidy is 0.41 percent *ad valorem*. Since this rate is de minimis, our final countervailing duty determination is negative.

We have notified the United States International Trade Commission (ITC) of our determination.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Roy A. Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–5414.

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that *de minimis* benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters in Korea of industrial belts. For purposes of this investigation, the following programs are found to confer subsidies:

- Short-Term Export Financing
- Export Tax Reserves
- Duty Drawback on Non-Physically Incorporated Items and Allowances for Excessive Loss and Wastage Rates

VOL 54 ISS 73 AP 18 1989 UMI

We determine the estimated net subsidy to be 0.41 percent *ad valorem* for all manufacturers, producers or exporters in Korea of industrial belts. Since this rate is *de minimis*, our final countervailing duty determination is negative.

Case History

Since the last **Federal Register** publication pertaining to this investigation [*Preliminary Affirmative Countervailing Duty Determination: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, from the Republic of Korea* (53 FR 49872, December 2, 1988) (*Preliminary Determination*)], the following events have occurred. On December 9, 1988, petitioner filed a request for alignment of the countervailing duty and antidumping final determinations. This postponement was approved under section 705 of the Act and published in the **Federal Register** on February 13, 1989 (54 FR 6562).

We conducted verification in Korea from January 23 through January 27, 1989, of the questionnaire responses of the Government of Korea (GOK), Dongil Rubber Belt Co., Ltd. (Dongil), and Taelim Moolsan Co., Ltd. (Taelim Moolsan), a trading company whose exports to the United States are purchased from Dongil. At the GOK we also verified information provided in the GOK responses with respect to another producer of industrial belts which exports to the United States, Hankook Belt Industry (Hankook). All the information submitted by the GOK concerning was received prior to verification.

Petitioner and respondents requested a public hearing in this case which was held on March 16, 1989. Both parties filed pre-hearing briefs on March 13, 1989, and post-hearing briefs on March 23, 1989. On March 29, 1989, in accordance with Article 5, paragraph 3 of the Agreement of Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade (GATT Subsidies Code), we notified U.S. Customs to terminate the suspension of liquidation in this investigation as of April 1, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS sub-headings. The HTS sub-headings are provided for convenience and customs purposes. The Department's written description of the products under investigation remains dispositive as to the scope of the product coverage.

The products covered by this investigation are industrial belts and components and parts thereof, whether cured or uncured, formerly provided for under TSUSA item numbers 358.0210, 358.0290, 358.0610, 358.0690, 358.0800, 358.0900, 358.1100, 358.1400, 358.1600, 657.2520, 773.3510 and 773.3520; and currently classifiable under HTS sub-headings 3926.9055, 3926.9056, 3926.9057, 3926.9059, 3926.9060, 4010.1010, 4010.1050, 4010.9111, 4010.9115, 4010.9119, 4010.9150, 4010.9911, 4010.9915, 4010.9919, 4010.9950, 5910.0010, 5910.0090 and 7326.2000.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses and lift trucks.

Analysis of Programs

As mentioned above, we received and were able to verify the questionnaire respones of Dongil and Taelim. Another producer, Hankook, did not directly respond to our questionnaire. However, information with respect to Hankook, which we were also able to verify, was provided in the GOK response. This information was received prior to verification. A certain limited amount of information pertaining to Hankook was not provided by the GOK and could not be verified. For one program described below (see Section I.C.) where we did not have verified information with respect to Hankook, we used the best information available.

We calculated the country-wide estimated net subisdy rate by weight averaging the respective company-specific rates according to the respondent companies' share of exports of the subject merchandise to the United States. Because this rate is *de minimis*, despite Hankook's level of benefits, our final determination is negative. (See, *Final Negative Countervailing Duty Determinations: Standard Line Pipe, Light-walled Rectangular Tubing and Heavy-Walled Rectangular Tubing from Malaysia* (53 FR 46904, November 21, 1988); see also preamble discussion of § 355.20(d) of the Commerce Department's regulations published in the **Federal Register** on December 27, 1988 (53 FR 52306) (to be codified at 19 CFR 355.38), which codifies existing practice.) For informational purposes, at the end of the individual program descriptions below, we have included company-specific rates.

For purposes of this final determination, the period for which we are measuring subsidies ("the review period") is calendar year 1987 which corresponds to the fiscal year of Dongil.

Based upon our analysis of the petition, the responses to our questionnaires, verification, and written comments filed by petitioner and respondents, we determine the following:

I. Programs Determined to Confer Subsidies

We determine that subsidies are being provided to manufacturers, producers and exports in Korea of industrial belts under the following programs:

A. Short-Term Export Financing

The Short-Term Export Financing Regulations provide the guidelines for short-term export financing. Under these regulations, export financing takes the form of loans on bills related to export sales transactions. Eligibility is based upon presentation of export documents or upon past export performance. Export loans based on past performance cannot exceed 90 days, while loans based on specific export documents cannot exceed 180 days and are limited to the terms of the applicable letter of credit. During our review period, the rate of interest charged on short-term export financing remained constant at ten percent, the ceiling established by the Bank of Korea (BOK).

Short-term export financing is available in Korea to finance three types of transactions: (1) Purchases of imported materials, (2) purchases of domestic material, and (3) production. Each type of transaction carries with it a "loan exchange ratio." This ratio, expressed in won, determines the maximum won loan amount per dollar value of the transaction. The ratio varied between small- and medium-sized companies on the one hand, and large-sized companies on the other. We verified that the exchange ratios in effect during the review period were reduced as of February 8, 1988.

The BOK also establishes rediscount ratios that set the proportion of a short-term loan which the commercial bank may rediscount through the central bank. During the period of investigation, the rediscount ratio for short-term export financing was lowered from 60 percent to 40 percent for large-sized firm, and from 90 percent to 60 percent for small- and medium-sized firms. The rediscount ratio on domestic commercial financing remained at 60 percent for large-sized companies. Small- and medium-sized firms are defined as companies with fewer than 300 employees. We verified that both Dongil and Hankook are classified as large companies.

We verified that both Hankook and Dongil received financing under this program. Because only exporters are eligible to use short-term export financing, we determine these loans to be countervailable to the extent that they are provided on preferential terms. Moreover, we determine that the different rediscount ratios applicable to financing for the large firms during the review period resulted in the provisions of export financing on preferential terms for large firms. This is because in lending to large firms, commercial banks had an incentive to channel more funds to finance those firms' export transactions and, thus, fewer funds to finance their domestic transactions. This is the same analysis we employed in *Certain Stainless Steel Cooking Ware from the Republic of Korea: Final Affirmative Countervailing Duty Determination* (51 FR 42687, November 26, 1986) (*Cooking Ware*). At verification, we found that in September 1988, the BOK equalized the rediscount ratios.

To determine the extent to which these loans are provided on preferential terms, we used verified information provided by the GOK to construct a weighted-average short-term interest rate to represent what large firms pay to finance domestic transactions. Because, during the review period, commercial banks had an incentive to direct their loans to large firms for financing export transactions rather than domestic transactions, large firms would have needed to seek alternative sources for financing domestic sales.

The weighted-average interest rate we have computed is a best estimate measure of the preference created by the different rediscount ratios. It incudes the interest rates on commercial bank loans for domestic transactions; the issuance of commercial paper; and financing from investment and finance companies, merchant banking companies, and mutual savings and finance companies. We verified that these sources constitute all the forms of short-term commercial financing in Korea. They differ from those used in our *Preliminary Determination* in that we have deleted mutual credit cooperatives and included merchant banking companies. We verified that the former were used as a source of short-term finance almost exclusively by households and the latter were a source for companies.

The GOK does not maintain detailed statistical information concerning the weighted-average or average interest rate charged by commercial banks. The BOK annual report only lists the interest rate bands within which banks are permitted to make loans Therefore, to determine an average interest rate for commercial banks in Korea, we used as the best information available the results of a survey of Korean commercial banks conducted by the GOK. The survey provides the percentage of short-term loans offered by a number of Korean national and local commercial banks at half-percent intervals within the interest rate band allowed by the BOK. Local commercial banks are allowed to charge interest rates up to one percent higher than national commercial banks. We verified that local banks account for 9.1 percent of all commercial bank loans, and national banks, 90.9 percent. We then weight average the national and local commercial bank average interest rates to determine a single weighted-average commercial bank interest rate for the review period of 11.15 percent.

The weights assigned to each of the other sources of short-term domestic credit (*i.e.*, commercial paper, financing from investment and finance companies, merchant banking companies, and mutual savings and finance companies) were derived from the BOK *Monthly Bulletin*. From the *Monthly Bulletin*, we determined the amount of, and interest rates charged on, short-term financing from each of these sources.

Using the above data, we calculated a weighted-average short-term interest rate benchmark of 11.79 percent. We compared this rate to the 10 percent interest rate on export loans received by Dongil and Hankook. (We verified that Taelim Moolsan did not receive any export loans during the period of review.) To determine the benefit of the preferential interest rate, we subtracted the interest paid on the export loans at 10 percent from the interest the companies would have paid if the loans had been contracted at the benchmark.

Because the benefit was not segregable by product or market, we divided the benefit by the total exports of the respective companies during the review period. On this basis, we calculated an estimated net subsidy of 0.14 percent *ad valorem* for Dongil and 0.17 percent *ad valorem* for Hankook. The country-wide rate equals 0.14 percent *ad valorem*.

B. Export Tax Reserves Under Articles 22 and 23

Articles 22 and 23 of the Act Concerning the Regulation of Tax Reduction and Exemption permit deductions from taxable income by exporting firms for a number of different reserves covering export losses, overseas market development and price fluctuation losses.

Under Article 22, a corporation may establish a reserve amounting to the lesser of one percent of foreign exchange earnings or 50 percent of the foreign exchange earnings component of net income. It certain export losses occur, they may be offset by the reserve fund. Following the tax year in which the reserve amount was created, there is a one-year grace period. After the grace period, amounts remaining in the reserve that have not been offset by actual losses are returned to the taxable income account in three equal annual installments.

Article 23, which governs overseas market development funds, allows a corporation to establish a reserve fund amounting to one percent if its foreign exchange earnings in the respective tax year. Expenses incurred in development overseas markets may be offset from the reserve fund. Funds remaining in the reserve after the tax year are treated as under Article 22.

The balance in both reserve funds is not subject to corporate tax, although all moneys in the reserve funds, if not used to offset losses, are eventually returned to income and subject to corporate tax.

We determine that these export reserves programs confer benefits which constitute export subsidies because they provide a deferment, contingent upon export performance, of direct taxes. We verified that Dongil and Hankook, but not Taelim Moolsan, utilized the provisions under the export tax reserves.

To measure the benefit conferred by the deferments, we followed the same methodology previously use in *Cooking Ware* and calculated the tax savings by multiplying the amount maintained in the reserves by the companies' effective tax rates.

VOL
54
ISS
73
AP
18
1989
UMI

We treated the tax savings on these funds as short-term interest-free loans. Accordingly, to determine the benefit, the amount of the companies' tax savings was multiplied by the average short-term national and local commercial bank interest rate (11.15%) which we calculated under the section above.

On this basis, we calculated an estimated net subsidy of 0.13 percent *ad valorem* for Dongil and 0.00 percent *ad valorem* for Hankook. The country-wide rate is 0.12 percent *ad valorem*.

C. Duty Drawback on Non-Physically Incorporated Items and Allowances for Excessive Loss and Wastage Rates

We examined the Korean duty drawback system to determine whether the companies under investigation were receiving benefits from the allowance of duty drawback on non-physically incorporated items and on recoverable scrap. We verified that input usage rates are determined every four years for producers of exported products. The survey upon which the GOK based its input usage rates was based on an audited survey of Dongil's production process. Tables of these rates are used by Korean Customs for duty drawback purposes.

We verified that recoverable scrap is factored into the usage rates and that, therefore, for Dongil, the loss and waste rates built into the input usage tables are not excessive. Moreover, we verified that Dongil does not have recoverable scrap from its production process. We also verified that Dongil did not receive any duty drawback on non-physically incorporated items. We were unable to make these determinations for Hankook since we could not conduct a complete on-side verification of Hankook and its production process.

We also verified that a fixed rate duty drawback system is used by the GOK for export shipments valued at less than $20,000. The fixed rate duty drawback is calculated yearly on a product-specific basis. The GOK determines the rate, on an industry-wide basis, based on the previous year's non-fixed rate duty drawback experience of a given product. The rate applicable in the review period was 22 won per dollar of export value.

Since we verified that Dongil has no recoverable scrap and that it has not received any duty drawback on non-physically incorporated items, we determine that Dongil receives no subsidy under this program.

We were unable to verify, however, that Hankook did not receive drawback on non-physically incorporated items or on recoverable scrap. Therefore, as the best information available, we assumed that the entire amount of duty drawback received by Hankook during the review period was excessive and therefore constitutes a countervailable subsidy.

We were able to verify the amount of drawback received by Hankook on its total exports of the subject merchandise. However, we could not verify the value of Hankook's total exports of the subject merchandise. Therefore, as the best information available, we used the fixed duty drawback rate of 22 won per dollar of export value to calculate the estimated net subsidy.

We applied the rate of 22 won per dollar to Hankook's total exports of the subject merchandise to the United States as an estimate of the total amount of duty drawback that Hankook received on its shipments of the subject merchandise to the United States. We then converted this won value to a dollar value using, as the best information available, the highest dollar/won exchange rate in effect during the review period. We allocated this amount over Hankook's total exports of the subject merchandise to the United States, a figure we had verified in dollars. The result of this calculation yields an estimated net subsidy of 2.78 percent *ad valorem* for Hankook. The country-wide rate is 0.15 percent *ad valorem*.

We also considered using as the best information available the highest estimated net subsidy found for this program in all previous Korean cases. However, the highest rate previously found for this program is smaller than the rate calculated above. Therefore, we used the methodology detailed above.

II. Programs Determined Not To Be Used

We determine, based on verified information, that the programs listed below were not used by manufacturers, producers and exporters in Korea of industrial belts during the review period. For a full description of these programs, see our *Preliminary Determination*.

A. Unlimited Deduction of Overseas Entertainment Expenses

B. Loans to Promising Small and Medium Enterprises

C. Exemption from the Acquisition Tax

D. Tax Incentives for Businesses Moving to a Provincial Area

E. Free Export Zone Program

F. Export Credit Financing from the Export-Import Bank of Korea (KXMB)

G. Export Guarantees from the KXMB

III. Programs Determined To Have Been Terminated

We determine, based on verified information, that the progrmas listed below were terminated and that no benefits were conferred on producers and exporters in Korea of industrial belts during the review period. For a full description of these programs see our *Preliminary Determination*.

A. Special Depreciation Under Article 11 of the Act Concerning the Regulation of Tax Reduction and Exemption (ACTRE)

B. Tax Credit for Investment for Key Industries

C. Accelerated Depreciation Under Article 25 of the Act Concerning the Regulation of Tax Reduction and Exemption

D. Tariff Reductions on Plant and Equipment

E. Export Tax Reserves Under Article 24

V. Program Determined To Not Exist

We determine that the following program does not exist.

Loans for Expansion or Construction of Manufacturing Facilities

Interested Party Comments

Comment 1: Petitioner asserts that the Department's use of a weighted average of interest rates from various types of financial institutions as the benchmark for the short-term export financing program results in an underestimation of the full benefit. Specifically, petitioner states that, regarding commmercial banks, the Department incorrectly included in the calculation of the benchmark the rates on sources of funds targeted by the government for particular uses. Petitioner also asserts that insofar as Dongil received short-term loans from commercial banks during the review period, it received government-directed financing. In addition, petitioner contends that targeted funds are likely to be provided to a specific enterprise or industry and should not be considered by the Department to be appropriate bases for the benchmark rate. Petitioner also suggests that the Department should adjust the benchmark calculation by excluding the commercial lending rate and including the curb market rate, *i.e.*, the rate charged by private money lenders.

Respondents claim that Dongil's sources of short-term export financing are commercial banks only, so the curb market should not be included in the benchmark rate.

DOC Position: Petitioner's allegation that all commercial bank loans are targeted to specific enterprises or industries was first raised in the March 13, 1989, pre-hearing brief, and is, therefore, untimely and cannot be considered for purposes of this final determination.

The curb market has not been included in our calculation of the benchmark for the following reasons: (a) Information from verification and through discussions with officials of the U.S. Treasury Department, the International Monetary Fund, and the World Bank indicates that the curb market is a very marginal source of funds in the Korean financial markets; (b) these same sources indicate that the curb market is not a viable source of financing for any but the smallest companies; and (c) we do not have adequate information on interest rates in the curb market.

Comment 2: Respondents assert that the Department should use Dongil's company-specific cost of comparable short-term commercial bank financing as the short-term interest rate benchmark. Respondents argue that because short-term interest rates in Korea vary greatly depending on the creditworthiness of individual borrowers, a country-wide average rate would be higher since it includes less creditworthy companies. Moreover, respondents maintain that because Dongil is the only exporter of the subject merchandise and the Department already has information concerning Dongil's cost of alternative financing, the calculation of a company-specific rate would not be overly burdensome.

Petitioner claims that the Department should follow its precedent and its preference articulated in the *Subsidies Appendix* attached to the notice of *Cold-Rolled Cabon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order* (49 FR 18006, April 26, 1984) and use the country-wide short-term benchmark.

DOC Position: In order to administer the countervailing duty law in an administrably manageable way, it is necessary for uniformity that we use a country-wide benchmark for short-term financing programs instead of a company-specific benchmark. See, for example, *Final Affirmative Countervailing Duty Determination and Order: Welded Carbon Steel Pipe and Tube Products from Argentina*, (49 FR 37619, September 27, 1988).

Comment 3: Respondents assert that the Department has verified the actual distribution of commercial bank short-term interest rates in Korea through survey results of Korean banks submitted by the GOK at verification. They contend that the Department should ensure that the country-wide benchmark reflects this survey. Furthermore, respondents argue that the information was timely since it was submitted at verification and before the Department's new regulations took effect.

Petitioner claims that to the extent that the Department may use commercial bank rates in the benchmark for the final determination, the Department should maintain the rate used in the preliminary determination. Petitioner states that the information regarding the interest rate distribution within the regulated band may be incomplete. Moreover, the information, which was not submitted until verification, was untimely.

DOC Position: Although we recognize that the survey results provided by the GOK may not be a precise reflection of the country-wide weighted-average short-term commercial bank interest rate in Korea, we have decided to use the results as the best information available. We note that interest rate information provided in the survey was verified and that it is consistent with information provided in the GOK annual reports and monthly bulletins.

We find that the survey data is timely because we specifically asked the respondent for the data in our deficiency questionnaire of December 15, 1988. In any event, we agree with respondents that the information was timely since the new regulations were not in effect at the time of verification. Furthermore, our findings were in our verification report and petitioner had adequate time to comment.

Comment 4: Respondents assert that the short-term interest rate benchmark ought to be based exclusively on commercial bank lending rates in the final determination. Respondents state that the Department used a weighted-average basket of interest rates because it determined that the higher rediscount ratio for short-term commercial bank export financing conferred a preference on export financing relative to domestic short-term commercial bank financing. However, respondents assert that, as the rediscount ratios for export and domestic financing were equalized before the preliminary determination, there is no longer an incentive to prefer export financing to domestic financing.

DOC Position: We agree with respondents that the equalization of the rediscount ratios constitutes a program-wide change. However, it is the Department's policy to take into account only those program-wide changes which are measurable and verifiable. The equalization of the rediscount ratios took place in September 1988. The interval since then represents too short a time to measure adequately the effect of that change on the lending practices of Korean commercial banks. Moreover, we do not have the information to allow us to calculate a commercial bank short-term interest rate based on the period since September 1988. Therefore, for the purposes of this final determination, we are not taking this change into account because the effects of the change cannot be measured.

Comment 5: Respondents assert that the Department should take into account in the final determination another program-wide change which occurred, with respect to the short-term export financing program, prior to the preliminary determination. Specifically, the Department should take into account the information submitted during verification that the GOK effectively abolished the short-term export financing program by allowing all interest rates in the Korean economy to vary according to market forces.

Petitioner claims that the Department should not take into account the changes in the program because the effects are speculative and it is the Department's policy to take into account only those changes that are quantifiable and verifiable.

DOC Position: It is the Department's policy to take into account program-wide changes which occur prior to the preliminary determination and are both measurable and verifiable. The effective date for the liberalization of interest rates in the Korean economy was December 5, 1988, which was after the date of publication of the *Preliminary Determination*. Therefore, this program-wide change occurred too late to be taken into account.

Comment 6: Respondents assert that the Department should consider as a program-wide change the reduction in the loan exchange ratios in the short-term export financing program. According to respondents, the reduction is measurable and was verified and thus should be taken into account.

Petitioner claims that the Department, by ascribing 1988 loan exchange ratios onto Dongil's export borrowing in 1987 as proposed by respondents, would be indulging in speculation. The effect of the change in the loan exchange ratios, according to petitioner, is neither quantifiable nor verifiable. Hence, no adjustment should be made for the reduction in the loan exchange ratios.

DOC Position: We agree with petitioner. Although this particular change occurred prior to our preliminary determination and we were able to verify the change, we cannot measure the effect of the change on the benefit provided to Dongil under the program. The review period for this investigation

VOL
54
ISS
73
AP
18
1989
UMI

is calendar year 1987. Consequently, we do not have verified information with respect to Dongil's 1988 sales, nor its level of borrowing in 1988. Thus, any calculation performed by the Department would be too speculative.

Comment 7: Petitioner asserts that the Department erred in not finding Dongil's long-term loans countervailable in the preliminary determination. Petitioner claims that long-term financing is regulated by the GOK through various financial institutions and loans received from regulated sources are at interest rates below the benchmark rate and as such are on preferential terms. Also, petitioner maintains that approximately 55 percent of commercial loans are directed loans and on this basis, as best information available, the Department should find the long-term loans of Dongil to be provided to a specific enterprise or industry.

DOC Position: Petitioner first raised this argument in its pre-hearing brief.

It is untimely and cannot be considered for purposes of this final determination because the argument was raised after verification and, consequently, we do not have the information to evaluate the argument.

Comment 8: Petitioner asserts that deductions from taxable income through export tax reserves should be treated solely as tax savings in the year received and not as an interest-free loan. Respondents claim that the export tax reserves programs are tax deferrals and the Department should follow its longstanding practice of treating tax deferrals as short-term interest-free loans. Respondents argue that the actual losses of a company in Korea may be used to reduce ordinary income or to reduce the export tax reserves, but not both. Thus, the tax reserves programs do not result in tax savings, it only creates a tax deferral for a specific, limited period of time.

DOC Position: We agree with respondents. We find that the tax reserves programs provide a tax deferral, not tax savings. All money in the reserves, if not used to offset losses, is eventually added back to income and subject to tax. If used to offset losses, the reserve is reduced by the loss amount.

Comment 9: Petitioner states that Dongil's effective tax rate as reported in its response includes the effects of the subsidy benefit from the export tax reserves programs. Therefore, use of this rate understates Dongil's tax savings resulting from their use of the export tax reserves programs. As an alternative effective tax rate, petitioner proposes a "national" effective tax rate for large corporations as reported in an outside source. Respondents deny that there is a national effective tax rate. Further, they claim that the Department should use company-specific effective tax rates in calculating any benefits received under the export tax reserves programs.

DOC Position: We agree with petitioner that the effective tax rate used to calculate the benefit from the export tax reserves programs should not reflect the benefit from the programs. We disagree, however, with the substitution of an unverified tax rate from an outside source. Instead, we recalculated Dongil's and Hankook's respective effective tax rates by increasing their taxable income by the amount of the reserves set aside under the export tax reserves programs and also increasing the amount of taxes that the companies would have paid absent their use of the tax reserves programs.

Comment 10: Respondents assert that the Department must distinguish between "special exports" and "general exports" in the export tax reserves programs because the amount of export income that can be contributed towards a reserve depends on the country to which the goods have been exported. Thus, respondents claim that, for Dongil, the Department should calculate any subsidy margin by dividing the amount of Dongil's reserves attributable to U.S. exports by Dongil's total U.S. exports. Petitioner claims that the information segregating the tax benefit according to the destination of the exports was provided for the first time at verification. Therefore, under the new procedural regulations, the data submitted was not timely and should not be considered.

DOC Position: The actual benefit attributable to exports to the United States is better measured by the amount of the reserves attributable to the United States and not to worldwide exports. Respondents were able to segregate benefits attributable to exports to the United States at verification and we were able to verify this information. The information provided at verification was not a major change to respondent's original submission, but rather was a clarification to their original submission. We fully described the information submitted by respondent in our verification report. Consequently, petitioner had adequate time to comment. Finally, we note that the new procedural regulations were not in effect at the time of verification and therefore, are not controlling.

Comment 11: Petitioner asserts that the appropriate calculation of the rate for Hankook based on the best information available would be to divide Dongil's total drawback by Hankook's exports. Respondents claim that the GOK supplied Hankook's total duty drawback amount on all exports of the subject merchandise in response to the Department's questionnaires. Additionally, there are no non-physically incorporated inputs in the production of industrial belts and Korea eliminated its practice of permitting drawback on non-physically incorporated items. Therefore, neither Dongil nor Hankook received a countervailable benefit from this program.

DOC Position: We verified the total amount of duty drawback received by Hankook on the subject merchandise. Therefore, there is no justification for substituting Dongil's drawback amount for Hankook's drawback amount. However, because Hankook did not respond to our questionnaires and did not permit a complete on-site verification, as the best information available, we have assumed that Hankook's drawback amount was excessive and calculated the estimated net subsidy as described in Section I.C.

Comment 12: Petitioner asserts that since Hankook's failure to respond to the Department's questionnaires led the Department to the use of the best information available for the preliminary determination, the Department should continue to use best information available for the final determination. Respondents argue that information regarding Hankook's export data and program participation was submitted in the GOK responses and that the only new information submitted at verification related to the type of belt exported. Therefore, the Department should not use best information available.

DOC Position: Prior to our preliminary determination, we received incomplete information on Hankook from the GOK. Therefore, for the purposes of the preliminary determination, some of the information we used for Hankook was the best information available. Subsequent to the preliminary determination, but prior to verification, the GOK provided Hankook's export data and additional information on its program participation. At verification for the first time, Hankook claimed that the belts it exported to the United States were not covered by the scope of the investigation. Since this was new information first submitted at verification we did not accept this information. Moreover, discussions with the ITC product experts suggested that the belts produced by Hankook may be within the scope of the investigation.

We used the verified information to compute Hankook's estimated net subsidy with respect to the short-term export financing and export tax reserves programs. For the duty drawback program, however, we lacked verified data on Hankook's total exports of the subject merchandise to all markets. As best information available, therefore, we derived an estimate of the amount of duty drawback received by Hankook on its exports of the subject merchandise to the United States. We made this calculation as described in Section I.C.

As mentioned above, the only new information submitted at verification related to the type of belt exported by Hankook. We did not use this information for purposes of this final determination (see *DOC Position* on *Comment 15*).

Comment 13: Petitioner asserts that although Dongil did not benefit from the accelerated depreciation program under Article 25 of ACTRE during the review period, it did use the program during the review period and the benefit was reported on its tax return filed in 1988. As such, petitioner states, a separate duty deposit rate should be established. Respondents claim that there was no program-wide change before the preliminary determination; that participation in a program in one year but not in another does not constitute a change in the program; and that changes in levels of participation by individual companies are taken into account in an administration review, not in the duty deposit rate. Therefore, respondents argue that a separate duty deposit rate should not be established.

DOC Position: It is the Department's practice to provide for a separate duty desposit rate only to take into account program-wide changes which occur prior to the preliminary determination and which are measurable and verifiable. We do not consider participation in a program in one year, but not in another, to constitute a program-wide change. The accelerated depreciation provision under Article 25 was claimed by Dongil on its tax return filed after the review period. According to our standard practice, we use a cash-flow analysis for determining when the benefits of a countervailable tax program are received. Under this analysis, we consider the benefit from a tax program to be received when the tax return is filed. Therefore, we have determined that Dongil did not benefit from Article 25 during the review period.

Comment 14: Petitioner asserts that the Department's preliminary finding of critical circumstances should be upheld in the final determination. Petitioner states that a comparison of imports three months prior to the filing of the petition to imports for three months after that point demonstrates that there have been massive imports of the subject merchandise over a relatively short period of time. Respondents claim that critical circumstances did not exist at the time of the preliminary determination and do not exist presently. In fact, they state, Dongil's exports of the subject merchandise have declined since 1987. Therefore, the Department should not find critical circumstances in this case.

DOC Position: As we have found the benefits in this investigation to be *de minimis*, critical circumstances do not exist (see *Critical Circumstances* section below).

Comment 15: Respondents assert that Hankook exports only hexagonal belts used in riding lawnmowers to the United States. They state that hexagonal belts are not covered in the description of the subject merchandise under investigation and in fact are expressly excluded from the scope of the investigation. Therefore, Hankook should be excluded from the final determination.

Petitioner claims that hexagonal belts are within the scope of the investigation and are covered in the general description of the scope. Although certain belts used in integral combustion engines are excluded from the investigation, hexagonal belts do not fall into this category. Therefore, Hankook is an exporter of subject merchandise and should be included in the final determination.

Doc Position: Discussions with product experts at the ITC and information submitted by petitioner indicate that the belts exported by Hankook are not used in the engine of the lawnmower, but rather to turn the mowing blades. Given this fact, hexagonal belts we considered as industrial, not automotive, belts. Furthermore, we note that Hankook did not permit a complete verification, and did not provide until verification, the information on the type of belt the company exports. Therefore, information regarding the type of belt manufactured by Hankook was untimely and not verified.

Comment 16: Petitioner asserts that, in its scope of investigation at the preliminary determination, the Department listed only four of the 18 HTS items corresponding to the nine TSUSA numbers. Petitioner requests that the Department list all 18 HTS numbers in its final determination.

DOC Position: The scope of this investigation has not changed since the initiation. The petition included nine TSUSA item numbers and, at the time, four HTS sub-headings that petitioner believed would correspond to the TSUSA numbers when the HTS system would become effective.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS sub-heading listed in the January 1989 ITC publication "The Continuity of Import and Export Trade Statistics After Implementation of the Harmonizied Commodity Description and Coding System", petitioner requested that the Department expand the four HTS sub-headings and listed in our preliminary determination to eighteeen sub-headings.

We asked for comments from the interested parties in this investigation concerning industrial belts covered by the eighteen HTS sub-headings. We have received no objections in this particular determination.

In our preliminary determination, as now, we note that the written descriptions of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage. Accordingly, we do not view this as a broadening of the scope of this investigation.

Critical Circumstances

Petitioner alleges that "critical circumstances" exist within the meaning of section 703(e)(1) of the Act, with respect to imports of industrial belts from Korea. In determining whether critical circumstances exist, we must examine whether there is a reasonable basis to believe or suspect that (1) the alleged subsidy is inconsistent with the *GATT Subsidies Code*, and (2) there have been massive imports of the subject merchandise over a relatively short period.

Because we determine that the benefit provided to manufacturers, producers, or exporters of industrial belts in Korea is *de minimis*, the final determination is negative. Therefore, critical circumstances do not exist.

Verification

In accordance with section 776(b) of the Act, we verified the information used in making our final determination. As mentioned previously, when we could not verify the information, we used the best information available. During verification, we followed standard verification procedures, including meeting with government and company officials; inspecting documents and ledgers; tracing information in the response to source documents, accounting ledgers, and financial

VOL
54
ISS
73
AP
18
1989
UMI

statements; and collecting additional information that we deemed necessary for making out final determination.

Suspension of liquidation

The estimated net subsidy rate for industrial belts is 0.41 percent *ad valorem*. Under section 355.7 of our regulations, an aggregate net subsidy of less than 0.5 percent *ad valorem* is considered *de minimis*.

Since the suspension of liquidation was discontinued on April 1, 1989, 120 days after our preliminary determination, there is no need to instruct the U.S. Customs Service to discontinue the suspension of liquidation. However, we are instructing the U.S. Customs Service to refund all estimated countervailing duties deposited on all unliquidated entries, or withdrawals from warehouse, for consumption of the subject merchandise entered between September 3, 1988, and March 31, 1989.

ITC Notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. Since we have determined that only *de minimis* countervailing benefits are being provided to manufacturers, producer or exporters in Korea of industrial belts, this investigation will be terminated upon the publication of this notice in the **Federal Register**. Hence, the ITC is not required to make a final injury determination.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

April 11, 1989.

Final Negative Countervailing Duty Determination: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured, From Singapore

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We determine that *de minimis* benefits which constitute bounties or grants within the meaning of the U.S. countervailing duty law are being provided to manufacturers, producers, or exporters in Singapore of industrial belts and components and parts thereof, whether cured or uncured (industrial belts), as described in the "Scope of Investigation" section of this notice. The estimated net bounty or grant is 0.35 percent *ad valorem*. Since this rate is *de minimis*, our final countervailing duty determination is negative.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Roy A. Malmrose, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-5414.

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that *de minimis* countervailable benefits, within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to Singaporean manufacturers, producers, or exporters of industrial belts. For purposes of this investigation, the following program is found to confer bounties or grants:

- Short-term loans provided under the Monetary Authority of Singapore Rediscount Facility

Although we have determined this program to be countervailable, the respondent received *de minimis* benefits during the review period. Since the countervailable benefits are *de minimis*, we determine that no benefits which constitute bounties or grants within the meaning of section 701 of the Act are being provided to Singaporean manufacturers, producers, or exporters of industrial belts. The review period corresponds to the respondent company's fiscal year, April 1, 1987, through March 31, 1988.

Case History

Since the last **Federal Register** publication pertaining to this investigation [Preliminary Negative Countervailing Duty Determination: Industrial Belts and Components and Parts Thereof, Whether Cured or Uncured from Singapore 53 FR 48677, December 2, 1988) Preliminary Determination)], the following events have occurred. On December 9, 1988, petitioner filed a request for alignment of the countervailing duty and antidumping final determinations. This postponement was approved under section 705 of the Act and published in the **Federal Register** on February 13, 1989 (54 FR 6582).

We conducted verification in Singapore, from January 31 through February 2, 1989, of the questionnaire responses of the Government of Singapore (GOS) and Mitsuboshi Belts (Singapore) Pte. Ltd. (MBS).

Petitioner and respondents requested a public hearing, which was held on March 16, 1989. Pre-hearing briefs were filed by petitioner and respondents on March 15 and February 24, respectively. Both parties filed post-hearing briefs on March 28, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS sub-headings. The HTS sub-heading are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are industrial belts and components and parts thereof, whether cured or uncured, currently provided for under TSUSA item numbers 358.0210 358.0290 358.0610 358.0690 358.0800 358.0900 358.1100 358.1400 358.1600, 657.2520, 773.3510, and 773.3520 and currently classifiable under HTS item numbers 3926.9055, 3926.9056, 3926.9057, 3926.9059, 3926.9060, 4010.1010, 4010.1050, 4010.9111, 4010.9115, 4010.9119, 4010.9150, 4010.9911, 4010.9915, 4010.9919, 4010.9950, 5910.0010, 5910.0090 and 7326.2000.

The merchandise covered by this investigation includes certain industrial belts for power transmission. These include V-belts, synchronous belts, round belts and flat belts, in part or wholly of rubber or plastic, and containing textile fiber (including glass fiber) or steel wire, cord or strand, and whether in endless (i.e., closed loop) belts, or in belting in lengths or links. This investigation excludes conveyor belts and automotive belts as well as front engine drive belts found on equipment powered by internal combustion engines, including trucks, tractors, buses, and lift trucks.

Analysis of Programs

For purposes of this final determination, the period for which we are measuring bounties or grants ("the review period") is April 1, 1987 to March 31, 1988, which corresponds to the fiscal year of the respondent company.

Based upon our analysis of the petition, the responses to our questionnaires, verification, and written comments filed by the petitioner and respondents, we determine the following:

I. Program Determined to Confer Bounties or Grants

We determine that bounties or grants are being provided to manufacturers, producers, or exporters in Singapore of industrial belts under the following program

Monetary Authority of Singapore (MAS) Rediscount Facility

Under the MAS Rediscounting Scheme, the MAS rediscounts pre-export and export bills of exchange. A qualifying exporter applies for financing from an approved bank, which then discounts the exporter's bills at an MAS-established discount rate plus a maximum spread of 1.5 percent. The bank subsequently rediscounts the bills with the MAS, at the MAS discount rate. The usual period for financing under this program is three months.

Because this program is available only to exporters, we determine that it is countervailable to the extent that it is offered at preferential rates. To determine whether financing under this program was made at preferential rates, we compared the interest rates charged on these loans to a short-term benchmark. In deriving the short-term benchmark, we followed the same methodology explained in our recent *Final Affirmative Countervailing Duty Determinations and Countervailing Duty Orders: Antifriction Bearings (Other Than Tapered Roller Bearings) and parts Thereof from Singapore*, announced on March 23, 1989. Three types of short-term financing were available, exclusively in Singapore dollars, during the review period: overdrafts, short-term loans and commercial bills. Because none of the types of short-term financing was predominant during the review period, we used a weighted average of the rates on these types of financing as our benchmark. Based on the comparison of our short-term benchmark with the MAS rates, we found that the rates on the MAS rediscount facility were preferential. Therefore, we determine this program to be countervailable.

To calculate the benefit arising from this program, we followed our short-term loan methodology, which has been applied consistently in our past determinations and which is described in more detail in the *Subsidies Appendix* attached to the notice of *Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order* (49 FR 18006, April 26, 1984).

We compared the amount of interest actually paid during the review to the amount the company would have paid at the benchmark rate. MBS utilized MAS financing on a shipment-by-shipment basis and was, therefore, able to segregate MAS loans according to product and export destination. Therefore, we allocated the total benefit attributable to U.S. sales of the subject merchandise over export sales of the subject merchandise to the United States during the review period. The estimated net bounty or grant under this program is 0.35 percent *ad valorem*.

II. Programs Determined Not to be Used

We determine, based on verified information, that the programs listed below were not used by manufacturers, producers, or exporters in Singapore of industrial belts during the review period. For a full description of these programs, see our *Preliminary Determination*.

A. Tax Incentives Under the EEIA

The EEIA offers tax incentives under the following provisions:

- Part II: Pioneer Industries
- Part IV: Expansion of Established Enterprises
- Part VI: Production of Export
- Part VII: International Trade Incentives
- Part VIII: Foreign Loans for Productive Equipment
- Part IX: Royalties, Fees and Development Contributions
- Part X: Investment Allowances
- Part XI: Warehousing and Servicing Incentives

B. Double Deduction of Export Promotion Expenses under the Income Tax Act (ITA): Sections 14B and 14C

C. Research and Development (R&D) Incentives: Section 19B and 14E of the ITA

D. Research and Development Assistance Scheme (RDAS)

E. Singapore Economic Development Board (EDB)

Comments

Comment 1: Petitioner argues that the Department should not use the three-month rate on commercial bills as the benchmark for the calculation of the benefit from MAS loans because it is not representative of short-term financing in Singapore. Petitioner states that the mere comparability of terms between MAS loans and commercial bills constitutes an insufficient basis for selecting commercial bills as the benchmark. Moreover, commercial bills are no longer a predominant form of short-term financing and they have no reserve requirements, which petitioner argues is preferential.

Respondents argue that the commercial bill rate is the appropriate benchmark because the terms on commercial bills are most comparable to the financing terms on MAS loans. Respondents refer to the commercial bill benchmark used in *Final Negative Countervailing Duty Determinations: Certain Textile Mill Products and Apparel from Singapore*, (50 FR 9840, May 6, 1985) (*Textiles*) and statements made by officials in Singapore quoting commercial bills as the most comparable alternative to MAS financing. Respondents also argue that overdrafts and short-term money market loans should not be included in the benchmark because they are mainly used to finance non-commercial transactions. In addition, respondents maintain that overdrafts are often treated as unsecured long-term loans and are, therefore, an inappropriate comparison to MAS loans.

DOC Position: Four types of short-term financial instruments are available to exporters in Singapore: commercial bills, overdrafts, short-term loans and trust receipts. None of the four types of financing represented a predominant form of short-term financing. Commercial bills, although the alternative most comparable to MAS financing, represented less than six percent of total short-term financing during the review period. Therefore, for our benchmark, we used a weighted average of the three types of short-term financing available exclusively in Singapore dollars, namely, overdrafts, short-term loans and commercial bills. This weighted average best represents the market cost to an exporter of financing short-term cash needs. Trust receipts were not included in our benchmark calculation because we did not have adequate data on this type of financing. In addition, some of the financing in this category may be given in foreign currencies.

We disagree with petitioner that commercial bills should not be included in the benchmark calculation. They represent an alternative form of financing and should, therefore, be included in the weighted average. Petitioner has not explained how reserve requirements make the calculated rates on commercial bills preferential given our reliance on estimated spreads.

We also disagree with respondents' assertion regarding overdrafts. Overdrafts are, by definition, a form of

VOL
54
ISS
73
AP
18
1989
UMI

short-term financing, as are short-term money market loans. As such, we included them in our benchmark calculation.

Comment 2: Petitioner argues that the Department has not verified the use or administration of Parts IX and X of the Economic Expansion Incentive Act (EEIA) and that the Department should determine on the basis of best information available that the program is contingent upon exporting and is a countervailable export program. Petitioner argues that a portion of the Ribstar poly-V belts manufactured by the respondent are industrial belts within the scope of the investigation. Because respondent stated in the questionnaire response that benefits claimed under these sections were for a product outside the scope of this investigation, petitioner argues that total benefits claimed under these sections of the EEIA should be considered as best information available and allocated over the production of industrial belts.

Respondents state that while the parent company, which is located in Japan, manufactures industrial Ribstar poly-V belts, the respondent company manufactures only automotive Ribstar poly-V belts. Therefore, any benefits claimed under Parts IX and X of the EEIA are not within the scope of the investigation. Furthermore, the benefits that were claimed were for tax year 1988 which is outside the period of investigation.

DOC Position. We verified that the Ribstar poly-V belts manufactured by MBS are automotive belts and not industrial belts and that the benefits under Parts IX and X of the EEIA were claimed outside the period of investigation. Furthermore, the benefits claimed under Part X of the EEIA did not pertain to the R&D incentives under investigation.

Comment 3: Petitioner argues that verification exhibits should be released in their entirety based on the intent of the Omnibus Trade and Competitiveness Act of 1988 (the Act of 1988), the Court's determination that computer tapes may be released under an administrative protective order (APO), and prior ITA practice of releasing verification exhibits.

Respondents argue that there is no basis for releasing business proprietary verification exhibits. Respondents state that the section of the Act quoted by petitioner contains no mention of verification exhibits, nor does the legislative history of the 1988 Act. Respondents furthermore state that access to verification exhibits has been limited to specific cases by the courts.

DOC Position: It is our policy not to release a respondent's supporting source documents under an administrative protective order when we have requested this additional information solely to further support respondents' claims. Release of such documents can be damaging to the competitive position of the respondent. If petitioners did not agree with our position, the proper remedy was to appeal the refusal to the release of verification exhibits under APO to the Court of International Trade (CIT) while this investigation was in progress (19 U.S.C. 1677f(c)(2)).

Comment 4: Petitioner asserts that, in its scope of investigation at the preliminary determination, the Department listed only four of the 18 HTS items corresponding to the nine TSUSA numbers. Petitioner requests that the Department list all 18 HTS numbers in its final determination.

DOC Position: The scope of this investigation has not changed since the initiation. The petition included nine TSUSA item numbers and, at the time, four HTS sub-headings that petitioner believed would correspond to the TSUSA numbers when the HTS system would become effective.

The Harmonized Tariff Schedule went into effect on January 1, 1989. Based on a concordance between TSUSA item numbers and HTS sub-headings listed in the January 1989 ITC publication "*The Continuity of Import and Export Trade Statistics After Implementation of the Harmonized Commodity Description and Coding System*", petitioner requested that the Department expand the four HTS sub-headings listed in our preliminary determination to eighteen sub-headings.

We asked for comments from the interested parties in this investigation concerning industrial belts covered by the eighteen HTS sub-headings. We have received no objections in this particular determination.

In our preliminary determination, as now, we note that the written descriptions of the products covered by the investigation is dispositive. The HTS numbers are provided for convenience and customs purposes as to the scope of the product coverage. Accordingly, we do not view this as a broadening of the scope of this investigation.

Critical Circumstances

Petitioner alleges that "critical circumstances" exist within the meaning of section 703(e)(1) of the Act, with respect to imports of industrial belts from Singapore. In determining whether critical circumstances exist, we must examine whether there is a reasonable basis to believe or support that (1) the alleged subsidy is inconsistent with the *Subsidy Code*, and (2) there have been massive imports of the subject merchandise over a relatively short period.

Because we determine that the benefit provided to manufacturers, producers, or exporters of industrial belts in Singapore is *de minimis*, the final determination is negative. Therefore, critical circumstances do not exist.

Verification

In accordance with section 776(b) of the Act, we verified the information used in making our final determination. During verification, we followed standard verification procedures, including meeting with government and company officials, inspecting documents and ledgers, tracing information in the response to source documents, accounting ledgers, and financial statements, and collecting additional information deemed necessary for making our final determinations.

ITC Notification

Since Singapore is not a "country under the Agreement" within the meaning of section 701(b) of the Act, section 303 of the Act applies to these investigations. However, Singapore is a signatory to the General Agreement on Tariffs and Trade. At the time of the preliminary determination, certain products included in the scope of these investigations (*i.e.*, those classified under items 358.0610, 358.0690, 358.1400, 657.2520, 773.3510 and 773.3520 of the *Tariff Schedules of the United States Annotated*) were nondutiable. However, on January 1, 1989, Singapore lost its Generalized System of Preference status. Thus, all of the merchandise covered by this investigation is now dutiable. Consequently, even if our final determination had been affirmative, the U.S. International Trade Commission (ITC) would not have been required to make a final injury determination in this proceeding.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

April 11, 1989.

[FR Doc. 89-9261 Filed 4-17-89; 8:45 am]

BILLING CODE 3510-DS-M

[C-351-602]

Final Affirmative Countervailing Duty Determination; Steel Wheels From Brazil

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of final affirmative countervailing duty determination.

SUMMARY: We determine that certain benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers or exporters in Brazil of steel wheels, as described in the "Scope of Investigation" section of this notice. The estimated net subsidy and duty deposit rates are specified in the "Suspension of Liquidation" section of this notice.

We have notified the U.S. International Trade Commission (ITC) of our determination. If the ITC determines that imports of steel wheels materially injure, or threaten material injury, to a United States industry, we will direct the U.S. Customs Service to resume suspension of liquidation of all entries of steel wheels from Brazil that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of the countervailing duty order, and to require a cash deposit as described in the "Suspension of Liquidation" section of this notice.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Philip Pia or Bernard Carreau, Office of Countervailing Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Final Determination

Based on our investigation, we determine that benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters in Brazil of steel wheels. For purposes of this investigation, we find the following programs to confer subsidies:

- CACEX Preferential Working Capital Financing for Exports
- Income Tax Exemption for Export Earnings
- CIC-OPCRE 6-2-6 Financing
- BEFIEX: IPI Export Credit Premium, and Import Duty and IPI Tax Reductions
- FINEX (Resolution 509) Export Financing
- Upstream Subsidy (steel input)

We determine the estimated net subsidy to be 1.82 percent *ad valorem* for Borlem S.A. and 17.29 percent *ad valorem* for all other manufacturers, producers or exporters in Brazil of steel wheels.

Case History

Since the publication of the preliminary determination (*Steel Wheels From Brazil; Preliminary Affirmative Countervailing Duty Determination and Initiation of Upstream Subsidy Investigation*) (53 FR 43749; October 28, 1988), the following events have occurred. Respondents submitted a supplemental response containing information pertaining to Borlem do Nordeste on December 23, 1988, and a response to our upstream questionnaire on January 6, 1989. We conducted verification in Brazil, from January 25, to February 3, 1989, of the questionnaire responses of the Government of Brazil (GOB), Rockwell-Fumagalli, Borlem, S.A., Borlem do Nordeste (BNE), and Usinas Siderurgicas de Minas Gerais (USIMINAS).

Petitioner requested a public hearing. Petitioner and respondents filed pre-hearing briefs on March 1, 1989. We held a public hearing on March 3, 1989. Petitioner and respondents filed post-hearing briefs on March 27, 1989.

Scope of Investigation

The United States, under the auspices of the Customs Cooperation Council, has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. On January 1, 1989, the United States fully converted to the Harmonized Tariff Schedule (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS item number(s).

The products covered by this investigation are steel wheels (except custom wheels), assembled or unassembled, consisting of both a disc and a rim, designed to be mounted with both tube type and tubeless pneumatic tires, in wheel diameter sizes ranging from 13.0 inches to 16.5 inches, inclusive, and generally for use on passenger automobiles, light trucks and other vehicles. In 1988, such merchandise was classifiable under item 692.3230 of the Tariff Schedules of the United States Annotated. This merchandise is currently classifiable under HTS item number 8708.70.60.

In our preliminary determination, we stated that "until we have sufficient information to make a definitive scope ruling, we tentatively determine that rims or discs, imported separately, are included in the scope of this investigation."

Petitioner argues that rims should be included within the scope of the order to prevent circumvention. The petition described the merchandise covered as wheels from Brazil, which included rims and centers for such wheels so as to avoid possible circumvention through the shipment of wheel components rather than finished wheels. In an October 7, 1988 letter to the department, petitioner restated this position with regard to the rims market by asserting that its "intention was not to include within the scope of the imports subject to investigation rims sold as distinct articles of commerce and, therefore, not in circumvention of an order. . . . Petitioner's concern lies with circumvention." In other submissions, petitioner was inconsistent regarding the reasons for including rims in the scope. We conclude, however, that petitioner's primary concern is circumvention.

We verified that during the period of review the only parts of steel wheels imported from Brazil into the United States were rims. Discs were not imported. These rims were purchased by unrelated custom wheel manufacturers who combined the rims with non-Brazilian discs to make custom wheels at their own facilities. The discs add significant value to the rims.

The rims that are now imported are not of concern to the petitioner. The rims that are currently being imported are used exclusively for the manufacture of custom wheels, and the petitioner has explicitly indicated that it did not wish to include custom wheels in the scope of the order (October 7, 1988 letter). Nor is it likely that imports of these rims would undermine the effectiveness of a countervailing duty or antidumping order on steel wheels. While the steel wheels that are subject to this investigation are purchased by original equipment manufacturers (i.e., automobile manufacturers), the custom wheels that incorporate the rims currently being imported are sold exclusively in the aftermarket (*i.e.*, to automobile owners).

In past cases where petitioners have raised concerns about circumvention of any resulting order, the department has specifically included parts in the scope of an investigation because of

VOL
54
ISS
73
AP
18
1989
UMI

uncertainty as to the authority of the Department to include parts subsequent to the publication of an order where parts are imported to circumvent the order. See, *e.g., Cellular Mobile Telephones from Japan* (50 FR 42577 (1985)). Now, however, section 781 of the Omnibus Trade and Competitiveness Act of 1988 not only clarifies that the Department has such authority but sets forth the criteria for dealing with this type of circumvention. Therefore, notwithstanding pre-1988 Act administrative precedents, it is neither necessary nor appropriate to include rims in the scope of the proceeding at this time. If in the future there is evidence of circumvention of the order on steel wheels by importation of Brazilian rims and discs, the Department will invoke the remedies available under section 781.

Analysis of Programs

For purposes of this final determination, the period for which we are measuring subsidies ("the review period") is calendar year 1987. Based upon our analysis of the petition, the responses to our questionnaire, verification, and written comments filed by petitioner and respondents, we determine the following:

I. Programs Determined To Confer Subsidies

We determine that subsidies are being provided to manufacturers, producers and exporters in Brazil of steel wheels under the following programs.

(1) CACEX Preferential Working Capital Financing for Exports

Under this program, the Department of Foreign Commerce ("CACEX") of the Banco do Brasil provides short-term working capital financing to exporters at preferential rates. The loans have a term of one year or less. During the period of review, Fumagalli made interest payments on CACEX loans, but Borlem did not use this program.

On August 21, 1984, resolution 950 make CACEX working capital financing available through commercial banks at prevailing market rates, with interest due at maturity. It authorized the Banco do Brasil to pay the lending institution an "equalization fee," or rebate, of up to 10 percentage points over the commercial interest rate, which we verified the lending institution passed on to the borrowers. On May 2, 1985, Resolution 1009 increased the equalization fee to 15 percentage points.

Since the interest charged on CACEX export financing under Resolutions 950 and 1009 is at prevailing market rates, this program would not be countervailable absent the equalization fee and the exemption from the IOF (a tax on financial transactions). Therefore, the interest differential for these loans is equal to the equalization fee plus the 1.5 percent IOF. Because this program provides financing at preferential rates only to exporters, we determine that it is countervailable.

We consider the benefit from loans to occur when the borrower makes the interest payments. For CACEX loans on which interest was paid during the period of review, we multiplied the interest differential by the length of the loan and the loan principal. We allocated the result over Fumagalli's total exports. On this basis, we determine the benefit from this program to be zero for Borlem and 1.10 percent *ad valorem* for Fumagalli and all other firms.

(2) Income Tax Exemption for Export Earnings

Under this program, exporters of steel wheels are eligible for an exemption from income tax on the portion of their profits attributable to exports. According to Brazilian tax law, the tax-exempt fraction of profit is calculated as the ratio of export revenue to total revenue. Because this program provides tax exemptions that are limited to exporters, we determine that it is countervailable. Fumagalli used this program in 1987, but Borlem did not.

The nominal corporate tax rate in Brazil is 35 percent. However, Brazilian tax law permits companies to reduce their income taxes by investing up to 26 percent of their tax liability in specified companies and funds. This tax credit effectively reduces the nominal 35 percent corporate tax rate. Because Fumagalli invested in the specified companies and funds, its effective tax rate was lower than the nominal 35 percent rate during the period of review.

We calculated Fumagalli's effective tax rate by dividing its net tax liability by its taxable profit. We calculated the benefit by multiplying the amount of tax-exempt profit by the effective tax rate and allocating the result over Fumagalli's total exports. On this basis, we determine the benefit from this program to be zero for Borlem and 0.39 percent *ad valorem* for Fumagalli and all other firms.

(3) CIC–OPCRE 6–2–6 (CIC–CREGE 14–11) Financing

Under its Circular CIC–CREGE 14–11, later modified by Circular CIC–OPCRE 6–2–6, the Banco do Brasil provides preferential financing to exporters on the condition that they maintain on deposit a minimum level of foreign exchange. The interest rate is based on the cost of funds to banks plus a spread of three percentage points, which is below our benchmark rate. The loans have a term of one year and a variable interest rate, which changes every quarter. Because this program provides loans at preferential rates only to exporters, we determine that it is countervailable.

Fumagalli made payments on a loan under this program during the period of review. The interest payments on this loan were made on the last day of each month, and the full principal was repaid at maturity. Borlem did not participate in this program during the review period.

Based on information gathered during verification from commercial banking sources in Brazil, we have determined that the "taxa ANBID" rate published by *Gazeta Mercantil*, a Brazilian daily financial publication, is a broader measure of the rates available for short-term financing and is a more accurate basis for calculating our benchmark than the rate for the discounting of accounts receivable used in our preliminary determination. Because of the complex calculations necessary to convert the rates on discounts of accounts receivable into an annual benchmark, certain distortions can occur that sometimes lead to a benchmark below the rate of inflation. The "taxa ANBID" is an average monthly lending rate calculated by the National Association of Brazilian Investment Banks (ANBID) and is based on a survey of the monthly rates on short-term loans charged by Brazilian commerical banks. We calculated our annual average benchmark by compounding the "taxa ANBID" rate published for each month during 1987.

To calculate the benefit, we compared the benchmark with the preferential rate and multiplied the differential by the term of the loan and the loan principal. We then divided the result by Fumagalli's total exports. On this basis, we determine the benefit from this program to be zero for Borlem and 0.14 percent *ad valorem* for Fumagalli and all other firms.

Because we verified that, effective September 20, 1988, the interest rate on all CIC–OPCRE 6–2–6 loans was equal to the ANBID rate (our commercial benchmark rate), we determine that these loans are not longer preferential. Therefore, for purposes of the cash deposit of estimated countervailing duties, we determine the benefit from this program to be zero for all firms.

(4) BEFIEX

The Commission for the Granting of Fiscal Benefits to Special Export Programs ("BEFIEX") allows Brazilian exporters, in exchange for export commitments, to take advantage of several types of benefits, such as import duty reductions, an IPI export credit premium, and tax exemptions or tax credits. Because these benefits are provided only to exporters, we determine that this program is countervailable.

(a) *The IPI Export Credit Premium.* This benefit is a cash payment by the Brazilian government to exporters. The amount of the payment is a fixed percentage of the f.o.b. price of the exported merchandise. The payment is made through the bank involved in the export transaction. Fumagalli was eligible for the maximum IPI export credit premium, which was 15 percent during the period of review. Borlem was not eligible to receive this benefit during the period of review.

We calculated the benefit by dividing the amount of IPI credit premiums received by Fumagalli on shipments of the merchandise to the United States by the company's exports of the merchandise to the United States. On this basis, we determine the benefit from this program to be zero for Borlem and 12.47 percent *ad valorem* for Fumagalli and all other firms.

(b) *Import Duty and IPI Tax Reductions on Imported Capital Equipment.* Fumagalli received reductions of customs duties and the IPI tax on imported capital equipment used in the manufacture of the subject merchandise during the review period.

To calculate the benefit, we divided the total amount of the reductions received in 1987 by Fumagalli's total exports in 1987. On this basis, we determine the benefit to be zero for Borlem and 0.43 percent *ad valorem* for Fumagalli and all other firms.

(5) FINEX Export Financing

Resolutions 68 and 509 of the Conselho Nacional do Comercio Exterior (CONCEX) provide that CACEX may draw upon the resources of the Fundo de Financiamento a Exportacao (FINEX) to subsidize short- and long-term loans for both Brazilian exporters (Resolution 68) and foreign importers (Resolution 509) of Brazilian goods. CACEX pays the lending bank an "equalization fee" that makes up the difference between the subsidized interest rate and the prevailing commercial rate. CACEX also provides the lending bank with a "handling fee" equal to two percent of the loan principal in order to encourage foreign bank participation in the program. During the period of review, the interest rates on Resolution 509 dollar loans ranged between 5.25 percent and 8.19 percent per annum, which are below our benchmark rate. Because this program provides loans at preferential rates only to exporters (or their foreign importers), we determine that it is countervailable.

We consider loans to U.S. importers to be equivalent to loans to their corresponding exporters. One of Fumagalli's importers had Resolution 509 FINEX loans on which it made interest payments in 1987. Neither Borlem nor its importers used this program during the period of review. Since Resolution 509 loans to U.S. importers are given in U.S dollars, we chose as a benchmark interest rate the average quarterly interest rate for commercial and industrial short-term dollar loans, as published by the United States Federal Reserve Board. The average rate was 10.47 percent per annum in 1986 and 9.81 percent per annum in 1987.

To calculate the benefit, we multiplied the value of the loan principal on which interest payments were due in 1987 by the differential between the preferential interest rate and our benchmark. Since we were able to tie these loans to exports to the United States, we divided the result by Fumagalli's exports of steel wheels to the United States in 1987. On this basis, we determine the benefit to be zero for Borlem and 1.04 percent *ad valorem* for Fumagalli and all other firms.

II. Upstream Subsidy

Petitioner has alleged that steel wheel producers benefit from an upstream subsidy, as defined in section 771A of the Act, by virtue of domestic subsidies provided to producers of the major raw material input in steel wheels: hot-rolled sheet and coil. We verified that USIMINAS supplied all of the steel used in the merchandise exported to the United States in 1987. We determine that USIMINAS benefited from two domestic subsidies in 1987: government provision of equity and import duty and IPI tax reductions under CDI.

A. Government Provision of Equity of USIMINAS

Siderurgia Brasileira S.A. (SIDERBRAS) is a government-controlled corporation under the jurisdiction of the Ministry of Industry and Commerce. Pursuant to Decree Law No. 6159 of December 6, 1974, SIDERBRAS became the holding company for the federally-owned steel corporations. SIDERBRAS is a majority shareholder of nine Brazilian steel producers, including USIMINAS, and a minority shareholder of one small Brazilian steel producer. From 1977 through 1987, SIDERBRAS made equity infusions in USIMINAS.

We have consistently held that government provision of, or assistance in obtaining, capital does not *per se* confer a subsidy. Government equity purchases or financial backing bestow a countervailable benefit only when provided on terms inconsistent with commercial considerations. Because USIMINAS' shares are not publicly traded, there is no market-determined price for its shares. Therefore, we examined whether USIMINAS was a reasonable investment (a condition we have termed "equityworthy") in order to determine whether the equity infusions were inconsistent with commercial considerations.

A company is a reasonable investment if it shows the ability to generate a reasonable rate of return within a reasonable period of time. For purposes of this determination, we reviewed the company's financial data and other factors on the record. We focused on the rate of return on equity and long-term prospects for the company in question for the period 1980 through 1987. (Petitioner alleged that USIMINAS was unequityworthy based on prior determinations by the Department. We did not investigate equity infusions from 1977 through 1979 because we have previously determined that USIMINAS was equityworthy in those years.) We examined financial ratios, profitability, and other factors, such as market demand projections and current operating results, to evaluate the company's current and future ability to earn a reasonable rate of return on investment.

Based on these factors, as applied to information on the record, we conclude that USIMINAS was unequityworthy between 1980 and 1987 (see also, *Certain Carbon Steel Products from Brazil; Final Affirmative Countervailing Duty Determinations* (49 FR 17988; April 26, 1984) (USIMINAS unequityworthy between 1980 and 1982); *Final Affirmative Countervailing Duty Determination; Certain Agricultural Tillage Tools from Brazil* (50 FR 34525; August 26, 1985) (USIMINAS unequityworthy in 1983); *Certain Carbon Steel Products from Brazil; Final Results of Countervailing Duty Administrative Review* (52 FR 629; January 9, 1987) (USIMINAS unequityworthy in 1984). Accordingly, we determine that the actions of the Government of Brazil in taking an equity position in USIMINAS

VOL 54 ISS 73 AP 18 1989 UMI

in the years 1980 through 1987 were inconsistent with commercial considerations and may confer a subsidy.

To the extent that we find government investment to be commercially unreasonable and the government's rate of return on its investment less than the national average rate of return on investment, we consider the investment to provide a countervailable benefit. Starting in the year such an infusion is made, we examine the "rate of return shortfall," which is the difference between the national average rate of return on equity and the company's rate of return on equity. We continue to examine the shortfall in each year of a 15-year period, the average useful life of capital assets in integrated steel mills according to the Asset Guideline Classes of the U.S. Internal Revenue Service. For example, we would examine the rate of return shortfall for the 1980 equity infusion in each year through 1994. If no shortfall exists for any year under review during the 15-year period, there is no countervailable subsidy for that particular year. If a shortfall does exist for the year under review, we multiply the rate of the shortfall by the amount of the original equity infusion to find the benefit for the review period.

For purposes of this determination, we consider the amounts received from SIDERBRAS as "advances for future capital increase" and "capitalized funds" in a particular year as the amount of the equity infusion in that year. According to generally accepted accounting principles in Brazil, these amounts become part of a firm's capital account at the time of receipt, and they appeared as part of USIMINAS' capital account in its financial statements. That the amounts in these accounts are later transferred to the paid-in capital account with the formal issuance of shares has no impact on the total amount in the capital account. Furthermore, when determining the rate of return on equity, it is standard accounting practice in Brazil to include advances for future capital increase and capitalized funds as equity in that calculation.

Due to inflation, the nominal values of the original equity infusions in USIMINAS have increased substantially. All companies in Brazil must regularly restate the value of certain accounts (including equity) according to a standard factor for monetary correction. The index used for monetary correction is the readjusted value of Brazilian Treasury bills, *Obrigacoes do Tesouro Nacional* ("OTN," formerly ORTN). For each year's equity infusions, we converted the actual cruzeiro (or cruzado, after the February 1986 currency reform) amount received into an OTN equivalent by dividing the amount received by the average value of the OTN in that year. To obtain the 1987 cruzado value of the government's equity infusions since 1980, we multiplied the OTN equivalents by the average cruzado value of the OTN in 1987.

We measured USIMINAS' rate of return by dividing its net loss in 1987 by its total capital and compared the result with the national average rate of return on equity in Brazil in 1987, as reported in a September 1988 special annual edition of *Exame*, a Brazilian business publication. USIMINAS' rate of return was lower than the national average. We then multiplied this rate of return shortfall by the 1987 cruzado value of all equity infusions (back to 1980) that we have found to be inconsistent with commercial considerations.

However, because USIMINAS' net loss was very large during the 1987 review period, the benefit calculated using the rate of return shortfall methodology exceeded the amounts we would have calculated for the review period had we treated the equity infusions as outright grants rather than equity. Under no circumstances do we countervail in any year an amount greater than what we would have countervailed in that year had we treated the government's equity infusions as outright grants. Therefore, we have capped the subsidy for the review period at the level that would have resulted if we had treated the equity infusions as grants.

To determine the grant cap for the review period, we allocated the OTN equivalents of the equity infusions in each year from 1980 through 1987 using a declining balance methodology and the 15-year allocation period. Because there is no nongoverment long-term cruzado borrowing in Brazil, we have used as a discount rate the highest rate the Brazilian government pays on its longest-term OTNs' 8 percent on 5-year OTNs. (The discount rate we normally use in our grant methodology is a rate that incorporates both the "real" and inflation components of an interest rate, and we apply this discount rate to the original amount of the grant. However, by converting the equity amounts to OTNs as a means of determining their value over time, we have accounted for the effects of hyperinflation on the amount of the original equity infusions. Therefore, we have used as our discount rate the interest rate on OTNs, which is a real interest rate, as the basis for allocating the inflation-adjusted OTN values over time.) We then converted the OTN benefit allocated to 1987 into cruzados by multiplying that benefit by the average value of the OTN in 1987. Finally, we divided this cruzado benefit by the value of USIMINAS' total sales in 1987. On this basis, we determine the subsidy to USIMINAS from this program to be 5.82 percent *ad valorem*.

B. Fiscal Benefits by Virtue of a Project Approved by CDI

Under Decree Law 1428, the Industrial Development Council ("CDI") provides for the exemption of up to 100 percent of the customs duties and up to 10 percent of the IPI tax, a value-added tax on domestic sales, on certain imported machinery for specific projects in 14 industries approved by the Brazilian goverment. The recipient must demonstrate that this machinery or equipment is not available from a Brazilian manufacturer.

Decree Law 1726 repealed this program in 1979. However, companies whose projects were approved prior to the repeal continue to receive benefits from this program pending completion of the project. USIMINAS received benefits under this program during 1987. Because this program is limited to specific enterprises of industries, we determine that it is countervailable.

To calculate the benefit, we divided the total amount of import duty and IPI tax reductions in 1987 by USIMINAS' total 1987 sales. On this basis, we determine the subsidy to USIMINAS from this program to be 0.79 percent *ad valorem*.

C. Competitive Benefit

Section 771A(a)(2) provides that the domestic subsidies described above must bestow a competitive benefit on the merchandise. Section 771(A)(b) states:

> • • • a competitive benefit has been bestowed when the price for the input product referred to in subsection (a)(1) for such use is lower than the price that the manufacturer or producer of merchandise which is the subject of a countervailing duty proceeding would otherwise pay for the product in obtaining it from another seller in an arms-length transaction.

To determine the price that steel wheel producers would have paid in an arm's length transaction, we first look to see at what price a steel wheel producer could have bought the input from an unsubsidized seller in Brazil. During the review, the only producers in Brazil of hot-rolled sheet and coil were USIMINAS, Companhia Siderurgica Paulista (COSIPA) and Companhia Siderurgica Nacional (CSN). Although we have not determined in this investigation whether COSIPA and CSN received countervailable subsidies, we determined in a past investigation and administrative review (see the final determination and final results of review on *Certain Carbon Steel Products* (op. cit.)) that both companies benefited from countervailable government provisions of equity. Based on our equity methodology, most of these equity infusions would continue to provide benefits in 1987 to the extent that these companies' rates of return fell below the national average rate of return on equity. Furthermore, a report submitted by the GOB, "Evaluation of the Financial Restructuring of the SIDERBRAS Group: Report to the SIDERBRAS Directors" (February 1989), indicates that both COSIPA and CSN received additional equity infusions from SIDERBRAS through 1988—in fact, more than USIMINAS received. The report also indicates that COSIPA and CSN had worse profitability, liquidity and leverage ratios than USIMINAS in 1987.

Based on this information, we believe it is reasonable to assume that other domestic suppliers of hot-rolled sheet and coil received subsidies during the period of review. Therefore, the prices charged by these companies would not be an appropriate benchmark for determining whether a competitive benefit arises through the steel wheels producers' purchase of this input from USIMINAS.

In the absence of an unsubsidized domestic price, we look to world market prices as a potential benchmark. Generally, we will use the price of one of the world's lowest-cost producers. During the review period, one of the lowest-cost producers of steel was the Republic of Korea (ROK). If the world market price is lower than the price that producers of the merchandise actually paid for the input product, we would conclude that there is no competitive benefit on the merchandise. If the world market price is higher than the price that producers paid for the input product, we would conclude that there is a competitive benefit on the merchandise. The amount of the competitive benefit would depend on the difference between the subsidized price and the world market price.

As the best estimate of the price of Korean steel in Brazil, we used the average monthly c.i.f. price for hot-rolled sheet and coil, with the specifications needed to produce wheels, imported into the United States from the ROK in 1987. We found that the Korean prices were on average over 50 percent higher than domestic Brazilian prices in 1987. Therefore, we conclude that there is a competitive benefit.

D. Significant Effect

For purposes of determining whether the competitive benefit has a significant effect on the cost of producing the merchandise, we multiplied the *ad valorem* subsidy rate on the steel input by the proportion of the total production costs of steel wheels accounted for by the steel input. Multiplying those proportions by the total domestic subsidy for USIMINAS yields a rate of 2.66 percent for Fumagalli and 2.31 percent for Borlem.

In the *Final Affirmative Countervailing Duty Determination; Certain Agricultural Tillage Tools from Brazil* (50 FR 34525; August 26, 1985), we established thresholds regarding the existence of a significant effect. We stated that we would presume no significant effect if the *ad valorem* subsidy rate on the input product multiplied by the proportion of the input product in the cost of manufacturing the merchandise accounted for less than one percent. If the result of this calculation is higher than five percent, we would presume that there is a significant effect. If the result is between one and five percent, we would examine the effect of the input subsidy on the competitiveness of the merchandise. Since in this case the input subsidy allocated to the merchandise yields rates that are between one and five percent for both Fumagalli and Borlem, we have examined the price sensitivity of steel wheels.

A steel wheel is a relatively unsophisticated product made by welding a circular rim to a disc. This process requires standard technology that is available both in Brazil and the United States. The quality of the product made in Brazil is similar, if not identical, to that made in the United States. In fact, the wheels imported into the United States from Brazil are made to standard specifications. These specifications include size, thickness, Society of Automotive Engineer grades of steel, and, in certain instances, the casting process for making the steel used in the wheels. For example, we verified that, in at least one contract, a U.S. importer required that continuous cast steel be used in the wheels.

USIMINAS, which supplied all of the steel used in the wheels exported to the United States during the period of review, has a special line of steel used exclusively for the production of wheels. Fumagalli, which accounted for over 95 percent of the wheels exported to the United States from Brazil during the period of review, is owned entirely by Rockwell International Corp., A U.S. firm. Fumagalli exports over 90 percent of the wheels it produces, mostly to the United States. Rockwell maintains strict quality control over the wheels produced by Fumagalli. In Fumagalli's product manual, every type of wheel produced is matched to specific models of cars produced by the world's major automobile manufacturers.

The only U.S. importers of steel wheels from Brazil are original equipment manufacturers (OEM's) of automobiles. The ITC found in its preliminary determination (*Certain Steel Wheels from Brazil; Investigation No. 701–TA–246 (Preliminary)*) that a wheel producer must be approved by the OEM's purchasing and engineering departments before it can submit a bid. Once the supplier is approved, it achieves the same status as all other approved suppliers. Both Fumagalli and Kelsey-Hayes, the petitioner, are approved suppliers for all the major U.S. automobile manufacturers. The ITC found that an OEM's request for a quotation usually includes a set of specifications and criteria for the wheels.

The ITC also found that steel wheel producers have little bargaining power in the contract negotiations because of the market power of the large automobile manufacturers. The overwhelming majority of the demand for steel wheels stems from the demand for new automobiles. The ITC report quotes the petitioner as saying "• • • because the market for steel wheels is static, from the standpoint that there are no new potential customers for wheels, price competition is severe." (p.A–34).

Although we recognize, as stated in the ITC report, that there are nonprice factors, such as long-standing supplier relationships and reliability in delivery, that may affect the outcome of the bid, we conclude, given the uniformity of the Brazilian and U.S. product, that price is the single most important factor in determining which supplier wins the bid. Therefore, we conclude that subsidies to the input supplier have a significant effect on the competitiveness of Brazilian steel wheels.

In summary, we have determined that: (1) There are domestic subsidies to input suppliers; (2) there is a competitive benefit bestowed on producers of steel wheels; and (3) subsidies to input producers have a significant effect on the cost of manufacturing steel wheels. Therefore, we determine that producers

BEST COPY AVAILABLE

VOL 54 ISS 73 AP 18 1989 UMI

of steel wheels in Brazil benefit from an upstream subsidy.

Since the amount of the differential between the Korean and Brazilian prices is higher than the amount of domestic subsidy on USIMINAS steel, we conclude that there is a full pass-through of the subsidy from USIMINAS to the wheel producers. To determine the amount of the upstream subsidy, we multiplied the total domestic subsidy on the input product by the proportion of the *value* of the merchandise accounted for by the input product. (Although we use the *cost* of the merchandise for purposes of determining whether the input subsidy has a significant effect on the merchandise, we calculate the upstream subsidy, as we do most other subsidies, on an *ad valorem* basis.) We determine the upstream benefit for Borlem to be 1.82 percent *ad valorem* and 1.72 percent *ad valorem* for all other firms.

III. Programs Determined Not To Be Used

We determine that manufacturers, producers and exporters in Brazil of steel wheels did not receive benefits during the review period under the following programs:

(1) Accelerated depreciation for Brazilian-made capital goods;

(2) Financing for the storage of merchandise destined for export ("Resolution 330");

(3) Federal stock (EGF) loans; and

(4) Industrial enterprise (FST) loans.

COMMENTS

Comment 1: The Government of Brazil (GOB) argues that the Department overstated the amount of the benefit attributable to the income tax exemption for export earnings. The Department mistakenly divided the benefit received by Fumagalli by the total exports of Borlem. Furthermore, the Department should allocate the benefits from this program over total sales instead of total exports. Since the program rebates direct taxes, it is a domestic subsidy, which requires the Department to allocate the benefit over total sales. In addition, effective January 1, 1988, the GOB decreed that export earnings are no longer fully exempt from income taxes and are now subject to a 3 percent tax. Therefore, the Department should take into account this program-wide change in calculating the rate of cash deposit of estimated countervailing duties for this program.

Department's Position: We have corrected the clerical error made in our preliminary determination by dividing the benefit to Fumagalli by that firm's total exports. We have considered and rejected in other Brazilian countervailing duty cases the GOB's claim that the income tax exemption is a domestic subsidy. See, *e.g., Certain Carbon Steel Products From Brazil* (op. cit.). The GOB has provided neither new evidence nor new arguments that convince us to reconsider this issue. With respect to program-wide changes in this program, we do not have sufficient information to recalculate the cash deposit rate. Because none of the companies we verified has yet filed income tax statements incorporating this change, we are unable to measure the effect of the change.

Comment 2: The GOB argues that the Department overstated the benefit from CACEX preferential export financing by failing to take into account the length of each loan when calculating the benefit. In addition, the GOB claims that, in calculating the short-term interest rate benchmark, the Department should not include the IOF tax. The IOF functions as an indirect tax, and neither the exemption nor the rebate of an indirect tax is considered a subsidy under the General Agreements on Tariffs and Trade and U.S. law. Inclusion of the IOF in the benchmark improperly countervails an exemption of an indirect tax applicable to exports. In addition, the Department should also take into account a reduction in the equalization rate from 15 to 7.5 percent, effective November 30, 1988, for purposes of calculating the cash deposit rate.

Department's Position: We have corrected the clerical error of failing to take the length of the loans into account. We have considered and rejected in other Brazilian countervailing duty cases the GOB's claim concerning the propriety of including the IOF tax in our benchmark. See, *e.g., Certain Castor Oil Products From Brazil; Final Results of Countervailing Duty Administrative Review* (48 FR 40534, September 8, 1983). The Brazilian government has provided neither new evidence or new arguments that convince us to reconsider this issue. We have not taken into account the reduction in the equalization rate because it is our policy to consider only those program-wide changes that occur prior to our preliminary determination, which was published on October 28, 1988.

Comment 3: The GOB argues that loans issued pursuant to the Banco do Brasil's CIC-CREGE 14–11 circular (later modified by circular CIC–OPCRE 6–2–6) do not constitute a government program and, therefore, cannot confer a subsidy on exports of steel wheels. The Banco do Brasil receives no financial support from the GOB for this program and operates the program in a manner consistent with commercial considerations. Even assuming, *arguendo*, that the program is countervailable, the Department has overstated the benefit by using an incorrect benchmark. The Department has used the discounting of accounts receivable rate in past investigations and administrative reviews because there was no published short-term commercial interest rate information available. In this investigation, the Department should use the "taxa ANBID" rate published in *Gazeta Mercantil*, which it has verified is the general commercial rate for short-term loans. Furthermore, if the Department uses the discounting of accounts receivable as its benchmark, it should adjust its methodology for compounding interest.

Department's Position: We have considered and rejected in other Brazilian countervailing duty cases the GOB' argument concerning whether this program is countervailable. *See, e.g., Final Affirmative Countervailing Duty Determination; Brass Sheet and Strip From Brazil,* (51 FR 40837, November 10, 1986). The Brazilian government has provided neither new evidence nor new arguments that convince us to reconsider this issue. As noted in the discussion in section I(3) of this notice, we have used the "taxa ANBID" rate as our benchmark.

Comment 4: The GOB argues that the Department overstated the benefit attributable to the IPI export credit premium program by dividing the amount of the benefit received on Fumagalli's total exports by the firm's exports to the United States. In addition, the Department verified that Fumagalli will not be eligible for the IPI credit premium on exports made after December 31, 1989. The Department should adjust the deposit rate automatically on January 1, 1990 to reflect this change.

Department's Position: We have corrected our calculation of the benefit from this program by dividing the IPI export credit premiums received on shipments of the subject merchandise to the United States by exports of this merchandise to the United States (see section I(4) of this notice). Regarding Fumagalli's future ineligibility for the IPI export credit premium, it is our policy to take into account only those program-wide changes that occur prior to our preliminary determination. Any program-wide change that is scheduled to occur in 1990 can only be addressed in the context of an administrative review.

Comment 5: The GOB argues that Decree Law 1428, which allows import duty exemptions on imported capital equipment of firms with projects approved by the Conselho de Desenvolvimento Industrial (CDI), is not limited to an industry or group of industries and is therefore, not countervailable.

Department's Position: We disagree. We have found that CDI benefits are provided by the government to specific industries (see section II.B.).

Comment 6: The GOB argues that the Department should adjust the deposit rate to take into account a program-wide change, effective May 18, 1988, whereby the exemption of imported capital equipment from the IPI tax is no longer specifically provided under the BEFIEX and CDI programs and is now generally available.

Department's Position: We disagree. Although we verified that program-wide changes took place, the availability of this exemption is still subject to certain conditions. At this time, we do not have sufficient information to make a determination that this program is not specifically provided and no longer countervailable. For this reason, we are not adjusting the rate of cash deposit of estimated countervailing duties for this program.

Comment 7: The GOB argues that FINEX financing under Resolutions 68 and 509 is not countervailable because the program is consistent with the Arrangement on Guidelines for Officially Support Export Credits, which is not considered an illegal export subsidy under item (k) of the Illustrative List of Export Subsidies annexed to the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade (the Subsidies Code). The Department verified that the lending rate for FINEX financing is LIBOR plus a spread of 0.5 precent, a rate comparable to commercial lending rates for importers in the United States. Furthermore, the Department verified that, effective January 4, 1989, the FINEX program as suspended. This should be taken into account in any calculation of the rate of cash deposit of estimated countervailing duties.

Department's Position: We disagree. Since the FINEX loans in this case are short-term loans, they are not covered by the Arrangement and, hence, do not fall within the second paragraph of item (k). Regarding the preferentiality of FINEX lending rates, the Banco Central do Brasil (BCB) provides all or some portion of a spread (the equalization fee) above an interest rate based on LIBOR. Exporters and importers were unable to demonstrate either the value of the spread or the portion of the spread that was retained by the intermediary bank. Therefore, we have assumed that the full benefit from the equalization fee was passed through to the importer. Since Resolution 509 short-term loans are given in U.S. dollars, we maintain that the appropriate benchmark is the average rate for comparable short-term loans in the United States, as published by the Federal Reserve. We have no documentation regarding an average lending rate based on LIBOR. Concerning the suspension of this program, it is our policy to take into account only those program-wide changes that occur prior to our preliminary determination.

Comment 8: The GOB argues that, in alleging an upstream subsidy, petitioner never made an allegation that the GOB's equity infusions in USIMINAS provided a subsidy during the period of review. On this basis, the GOB contends that the statutory requirements for initiating and upstream subsidy investigation were not met on this issue. The GOB further argues that if petitioner intended to imply, by referring to the section 751 administrative review on *Certain Carbon Steel Products from Brazil; Final Results of Countervailing Duty Administrative Review* (52 FR 829; January 9, 1987), that USIMINAS was unequityworthy for the years 1980 through 1984, then petitioner's implied allegation only provides a basis for investigation equity infusions in those years.

Department's Position: We disagree. In making the upstream subsidy allegation, petitioner cites the administrative review on carbon steel products. Petitioner based the allegation on the amount of the domestic subsidies determined in that review. Although the various domestic subsidies were not specifically identified, a clear reading of the results of that review leaves no doubt that petitioner was alleging the existence of equity infusions in an unequityworthy company. Subsidies from equity infusions from 1980 through 1984 were the single largest component of the total domestic subsidy found in that review. With respect to the investigation of equity infusions since 1984, the Department would be remiss in its administration of the countervailing duty law if it did not examine additional equity infusions in a company it had previously determined to be unequityworthy.

Comment 9: The GOB asserts that the Department's determination that USIMINAS was not equityworthy from 1980 through 1984 in the administrative review of carbon steel products was incorrect and should be reversed. The GOB contends that the methodology employed by the Department in determining the USIMINAS was not equityworthy was erroneous because it: (1) Placed undue reliance on marginal returns on equity in the late 1970s to evaluate long-term future earnings potential; (2) relied on financial ratios that were distorted by the inclusion of expansion project assets not yet in operation; (3) improperly used subsequent operating performance to judge the reasonableness of SIDERBRAS' rate of return expectations at the time the equity was provided; (4) did not address evidence submitted by respondents concerning projections of long-term growth in steel demand in both the domestic Brazilian and international markets; and (5) ignored independent studies by the World Bank and other reputable sources which had favorable views on the prospects of the Stage III project as well as USIMINAS' performance and projected relatively high rates of return in the long-term on the investments made by SIDERBRAS.

The GOB argues that the factors that should be examined in assessing the prospects for future performance include: the long-term market environment, the company's anticipated costs of production, the company's ability to operate efficiently, and the company's ability to operate profitably.

Department's Position: We disagree. We stand by the methodology used in our determination in the administrative review of carbon steel products, which was upheld by the Court of International Trade in *Companhia Siderurgica Paulista, S.A., et al. v. United States,* 700 F. Supp. 38, Slip Op. 88–158, November 9, 1988. Although USIMINAS was not a party to this court proceeding, the methodology used in the administrative review to determine that the GOB's equity infusions in COSIPA, CSN and USIMINAS were countervailable was identical for all three companies.

Comment 10: The GOB argues that the Department incorrectly determined the USIMINAS was not equityworthy from 1980 through 1984. The Department evaluated government investments by SIDERBRAS from the point of view of a private outside investor instead of a private owner-investor. The GOB argues that its motive, as an owner-investor, is to maximize average returns on its past and future investments in USIMINAS, not to maximize marginal returns on investments, as an outside investor would. Therefore, it is unreasonable to expect SIDERBRAS to treat past equity infusions as sunk costs.

VOL 54 ISS 73 AP 18 1989 UMI

The GOB contends that the equity infusions in these years are directly tied to the massive long-term Stage III expansion project undertaken by USIMINAS. The government's decision to invest in Stage III was made in 1975. The decision relied on favorable long-term domestic and international market projections and World Bank appraisals which showed favorable financial returns for the projects. The GOB further contends that if it no longer provided equity, consequently forcing the Stage III project to a halt it would forego the future benefits from the expansion project, and therefore, realize no return on its past investments.

Department's Position: We disagree. Both a rational outside investor and a rational owner-investor make investment decisions at the margin. The relevant question for both types of investors is: What is the marginal rate of return on each cruzeiro/cruzado invested? An investor in USIMINAS does not ignore the potential return from the assets that the company has already acquired. The potential for a favorable return from those assets is an integral part of the investment calculus. However, a rational investor does not let the value of past investments affect present or future investment decisions. The decision to invest is only dependent on the marginal return expected from each additional equity infusion. Therefore, new equity infusions contemplated by investors such as the Brazilian government should not be affected by past investments or sunk costs.

We do not dispute the findings of the long-term market projections or World Bank project reports made in 1975. The GOB designed the Stage III expansion projects as a keystone in its Second National Development Plan (1971–1979). The plan explicitly called for steel investments with the objective of national self-sufficiency by 1979. With an anticipated completion date of 1979, Stage III was designed to supply steel for the Development Plan's large public sector investment program. The decision to sign the contracts for Stage III was based on the national goal of public welfare maximization and not necessarily on commercial considerations.

Although the decision to invest was made in 1975, actual construction began in the late 1970s. By that time, the investment climate had deteriorated, international markets for steel began to decline, and public sector investment dried up. Stage III may still have yielded positive financial returns despite the financial and economic conditions at the time. However, because a sufficient rate of return on equity depends on the performance of the firm as a whole, an investor will invest based on the rate of return for the entire firm, not the rate of return for an individual project such as Stage III.

Current and anticipated future economic conditions and the effects of massive expansion projects on a steel company are just as important as projected long-term markets in an investor's prediction of USIMINAS' long-term viability and, therefore, the decision to invest in the company. Consistent with the desire to maximize overall profits, a rational owner-investor must constantly reevaluate projects such as Stage III in light of other investment opportunities before determining whether those projects should be continued, delayed or abandoned.

Comment 11: The GOB argues that the Department's evaluation of the performance of USIMINAS during the Stage III expansion program was short-sighted in that it incorrectly focused on financial performance instead of current operating performance. The short-term static financial ratios and overall operating performance that the Department relied on are insufficient measures of long-run investment potential and future company performance.

If the Department continues to depend on short-term indicators, it should adjust USIMINAS' overall operating performance by eliminating nonproductive assets (*i.e.*, assets under construction) and related liabilities from the calculation of the financial ratios. When made, these adjustments reveal a healthy current operating performance for USIMINAS during the periods the Department found the company not equityworthy. More importantly, such adjustments show strong profit margins and asset turnover, current operating performance measures which are fundamental determinants in the rate of return on equity.

The GOB contends that the economic constraints existing in the late 1970s and early 1980s, such as government price increases, high real domestic and international interest rates, a temporary cyclical downturn in the steel market, and lower-than-expected government equity infusions were unanticipated transient problems that were insufficient to cause SIDERBRAS to abandon its long-term investment plans. These transient problems and their effects on the companies are relatively unimportant because they do not have a direct bearing on the company's long-term prospects.

The GOB believes that the logical conclusion from the evaluation of equityworthiness is that the only problem faced by the firms was undercapitalization, or lack of equity infusions. Therefore, the GOB believes that SIDERBRAS should have infused more, not less, equity into the companies.

Department's Position: We disagree. The most significant factor in determining the required rate of return on an investment is the degree of risk. The greater the risk of the investment, the higher the expected rate of return. From the point of view of an investor, the purchase of equity is highly risky compared to other types of investments.

In contemplating an equity purchase, an investor will evaluate past and present company performance, anticipated future economic conditions, and overall investment climate. Important determinants in the evaluation include the financial stability of the company (*e.g.*, asset structure, funding sources, and risk of insolvency), past earnings, and the amount of financial leverage in the company's capital structure. Therefore, we disagree with the Brazilian government that present and past performance indicators are relatively unimportant in an investment decision.

Investors will also assess the potential future performance of the company. In this case, the GOB undertook a massive expansion program designed to exploit the projected increase in the demand for steel. In evaluating the equityworthiness of USIMINAS, we do not rely exclusively on the future prospects of the expansion project. We also cannot ignore, just as an investor would not have ignored, the effects of such an expansion on the company's present operations and future viability. An investor purchases equity based on the rate of return of the firm as a whole, not on the financial returns from a specific project.

From an investor's point of view, there is no relevant distinction between financial and operating results. Rather, an investor will look to the rate of return on equity, which is primarily a function of three variables: profit margin (income/sales), asset turnover (sales/assets), and financial leverage (assets/equity).

Evaluation on the basis of current operating results (profit margin and asset turnover), without considering nonoperational assets and accompanying liabilities, may be an appropriate approach for managing or

analyzing profit centers with a company. An investor, however, is concerned with the company's overall performance. An investor must evaluate the effects of the Stage III expansion project on the whole company. Nonperforming assets not only drag down overall operating performance, but the chance that they might never come on-stream creates additional uncertainty for future earnings and therefore increases the risk of the investment.

The rate of return on equity equation shows the fundamental interrelationship between financial performance (financial leverage) and operating performance (profit margin and asset turnover). The decision to continue Stage III in the face of inadequate equity infusions from the Brazilian government led to substantial increases in the company's financial leverage. There is a direct relationship between financial leverage and earnings variability. Therefore, both are also directly related to investment risk.

In the late 1970s and early 1980s the Brazilian steel industry was characterized by Stage III construction delays, marginal or negative earnings, and a mounting economic and financial crisis. The lack of funding in the industry became critical. (The GOB had a history of underfunding steel expansion projects.) By 1982, USIMINAS would have required hundreds of millions of dollars in equity to correct its financial position. Although it is now clear that the company were severely undercapitalized, we cannot base our equityworthiness decision on what the financial standing of the company might have been if this were not the case.

USIMINAS responded to its condition in the late 1970s by contracting variable-rate debt at a time of high real interest rates and using increasing amounts of short-term debt. Not only was USIMINAS undercapitalized, but it mismatched long-term assets with expensive short-term debt.

During this time, an investor would have found that USIMINAS was incapable of covering the additional debt expense with internally-generated funds. The company had a low probability of increasing earnings over the short- and medium- term from domestic sales because of the squeeze between supplier price increases and the government's policy of steel price suppression. Further, it became increasingly evident that there was a long-term decline in the world-wide demand for steel, continuing the depression of steel prices in the international market.

A project such as Stage III can have future positive returns only if the company does not become insolvent. In this case, the continuation of Stage III severely jeopardized USIMINAS' financial standing. Even if we disregard profit margins and asset turnover, we cannot disregard the adverse effects of increased financial leverage on the company's equity standing. The additional risk in the highly leveraged company would have dissuaded any private investor from purchasing equity in USIMINAS during the periods we consider it not to be equityworthy.

Comment 12: The GOB argues that its investments in USIMINAS in 1987 were not on terms "inconsistent with commercial considerations." The investments were part of the SIDERBRAS Restructuring Plan, by which USIMINAS transferred some of its debt to SIDERBRAS. This transfer was reflected as a reduction in long-term and short-term debt and an equal increase in the equity held by SIDERBRAS. The Restructuring Plan also provided for the recapitalization of SIDERBRAS; operational improvements and investments to improve operating efficiency and reduce costs; a commitment to support a realistic pricing policy to allow USIMINAS to recover its costs; and a commitment that SIDERBRAS not undertake investments unless adequate funding is available. The effect of these measures has been to greatly improve the ability of USIMINAS to meet its debt service obligations and earn a reasonable rate of return. A study by independent financial experts has projected substantial returns on equity over the next ten years for USIMINAS. Thus, when the GOB invested additional equity in USIMINAS under the Restructuring Plan, it had a reasonable expectation of a very high real return on its investment.

Department's Position: We disagree. From the perspective of a rational private investor, USIMINAS was no more attractive as a potential investment in 1987 than it was in any of the earlier years in which we determined it to be unequityworthy. Its financial ratios since 1984 indicated no appreciable improvement and, in many areas, had deteriorated. The company had become even more severely leveraged and, in those years in which it did not have a loss, did not demonstrate the ability to generate more than minimal profits.

While the GOB's decision to convert some of USIMINAS' debt to equity clearly addressed one of the basic problems facing USIMINAS, there were still considerable risks associated with any further investment in USIMINAS. The debt conversion was only one component of the Restructuring Plan, and its success was dependent on other contingencies, such as a proper pricing policy. The suppression of steel prices throughout the 1980s as part of the GOB's policies to counter inflation, and the GOB's failure to provide scheduled equity infusions due to budgetary constraints, led to results considerably different from the attractive rates of return projected for USIMINAS in the studies conducted in relation to earlier investment plans.

In this respect, there is a clear distinction between a reasonable private investor's expectations and those of a government owner-investor. In light of the past, a private investor would have to consider the possibility that future macroeconomic concerns of the GOB could jeopardize any investment in an ailing, if recovering, company, whereas the GOB at any time could decide to renege on its commitments to the improvement of USIMINAS' financial health in favor of national economic and social obligations. In doing so, the GOB might again choose to sacrifice the interests of USIMINAS to some more important public welfare goal.

The GOB refers to a study submitted by independent financial experts to SIDERBRAS in February 1989 evaluating the results of the Restructuring Plan through 1988. This study projects substantial rates of return on equity for USIMINAS as a result of the Restructuring Plan. While the projections of this study may prove accurate, they were not contemporaneous with the Restructuring Plan, and we cannot consider the results of this study to be the basis on which the GOB made its investment decisions in 1987. The GOB provided us with no studies contemporaneous with its investment decision.

Comment 13: The BOG claims that the amounts for "advances for future capital increase" that appear in the "Statement of Changes in Financial Position" are end-of-year amounts that in certain years include interest and monetary correction accrued during the year. Therefore, the GOB argues that the Department should use the OTN rate at the end of the year when converting these amounts into OTN equivalents.

Department's Position: We disagree. Advances for future capital increase are received at various points during the year. It is not apparent from the "Statement of Changes in Financial Position," nor could we verify, that in some years these amounts included interest and monetary correction. We have assumed that the amounts of the

VOL 54 ISS 73 AP 18 1989 UMI

advances that we used for calculating the value of the equity infusions are the nominal amounts received during the year. Therefore, we used the average OTN rate for the year when converting these amounts into OTN equivalents.

Comment 14: Respondents argue that it is inappropriate to include investments made during the year of review when calculating the benefit from equity infusions. Respondents claim that it is improper to assume that the investor would expect a return on equity for investments made during the year equal to the rate of return on investments for a full year. Therefore, respondents argue that the Department should either exclude such equity infusions or calculate a prorated return based on the number of months since the equity infusion was made.

Respondents further argue that, when calculating USIMINAS' loss as a percentage of its total capital, the Department should add back any losses deducted from capital. To do otherwise would overstate the percentage of the loss.

Department's Position: We disagree. Adjusting the rate of return calculation to exclude or prorate equity infusions during the year would either reduce the rate of return on equity in profitable years or increase the rate of loss on equity in unprofitable years. The methodology proposed by respondents runs counter to standard accounting practices in Brazil. By using USIMINAS' total capital (including all equity received and losses incurred), we calculated a negative rate of return for USIMINAS in 1987 that was identical to that reported in the September 1988 edition of *Exame*.

Comment 15: The GOB argues that the Department should change its policy of using as its benchmark a national average rate of return and use instead an average rate of return applicable to heavy industry, thus recognizing the structural differences and increased capital requirements of heavy industries.

Department's Position: We disagree. A national average rate of return is a more accurate reflection of the return that a reasonable investor could expect from a prudent investment than an industry-specific rate. A national average rate of return reflecting the different rates of return and levels of risk in the whole economy is a better benchmark with which to compare rates of return for particular investments. Only by comparing the expected returns and risks across the whole economy can the investor decide where to invest his money most effectively. In contrast, an industry-specific benchmark rate would not serve as a reasonable basis for comparison because it does not take into account the variety of investment options available to an investor.

Furthermore, the use of an industry-specific average rate of return would be especially inappropriate in this case because a large portion of the steel industry in Brazil is controlled by the government. For this reason, the use of the steel sector rate of return would not provide an objective standard. It is far more reasonable to use the national average rate of return because it includes the rates of return for government-owned firms and private firms as well as for profitable and unprofitable firms.

Comment 16: Respondents argue that the Department should use 1988 as the review period for the upstream subsidy portion of this investigation. Calendar year 1988 is the most recently completed fiscal year prior to the date of the upstream subsidy questionnaire response. Information from 1988 provides the most accurate basis for determining the existence of an upstream subsidy.

Petitioner contends that the Department cannot measure upstream subsidies for a different year than that used for all other subsidies.

Department's Position: We agree with petitioner. We announced in our initiation notice on August 24, 1988 that the period of review was calendar year 1987. We must use the same period for measuring all subsidies because to do otherwise might distort the average benefit we attempt to capture in our "snapshot" view of the firm. Furthermore, we cannot use a review period that did not conclude until after our preliminary determination.

Comment 17: Fumagalli contends that, because the government controls the price of steel, the Department should treat the alleged below-market prices of steel as a direct subsidy, not as an upstream subsidy. Fumagalli notes the Department's practice in a number of cases involving products from Mexico (*e.g., Anhydrous and Aqua Ammonia from Mexico* (48 FR 28522) and *Oil Country Tubular Goods from Mexico* (49 FR 47054)). In those cases, where the Department examined the effect of the Mexican government's price control on natural gas, the Department found that low-priced natural gas was available to a wide variety of users and not limited to a particular industry or group of industries. Since the Brazilian government controls the price of steel, and steel is available to a wide variety of users, the provision of steel at government-regulated prices to wheel producers is analogous to government controls on natural gas prices in Mexico. Therefore, the Department should analyze both situations in the same way.

Department's Position: The cases that Fumagalli refers to deal with the alleged preferential pricing of inputs, which is a direct subsidy, not an upstream subsidy. The statute includes a special provision for upstream subsidies, as well as a specific three-pronged test for determining whether an upstream subsidy exists. We do not believe that the existence of price controls precludes us from invoking the the upstream subsidy provision (see our response to Comments 18 and 20).

Comment 18: Fumagalli argues that the specificity analysis that applies to any domestic subsidy also applies to upstream subsidies. Thus, an upstream subsidy is only countervailable if the benefit of that subsidy on downstream products is limited "to a specific enterprise or industry, or group of enterprises or industries."

Fumagalli cites *Certain Steel Products from the Federal Republic of Germany* (47 FR 26321), where the petitioner alleged that German steel producers benefited from subsidies provided by the German government to coal producers. In its preliminary determination in that case, the Department found there was no benefit because low-priced coal was not limited to the steel industry but was, in fact, available to a wide variety of users in the FRG.

Fumagalli contends that the legislative history of the Trade and Tariff Act of 1984 makes clear that the upstream subsidy provision did not change basic Department practice regarding subsidies. Congress intended that the specificity test be used to determine whether the low-priced input was made available only to a specific industry or group of industries. In fact, in a letter to Congress, the former Secretary of Commerce indicated that the Department intended the upstream subsidy provision to apply "where an input is provided to a particular industry or group of industries, . . . "

Petitioner argues that it is clear in the statute and in the legislative history that the specificity test applies only at the upstream level (*i.e.*, on the input product). The statute clearly states that the Department is to look at the competitive benefit from the upstream subsidy on the merchandise under investigation. To determine competitive benefit, the Department must compare the price of the input product from the subsidized producer with a benchmark price. In situations where prices of the input product are artificially depressed in the country under investigation, the statute authorizes the Department to use other sources for the benchmark price, presumably including prices outside the country. This provision would make no sense if there were a specificity requirement at the downstream level.

Department's Position: We agree with the petitioner that a second-tier specificity test is not required in the analysis of upstream subsidies. If Congress had intended to include a separate specificity test, it would have included the same specificity language in the upstream subsidy provision that is included in the definition of domestic subsidy, as provided for in section 771(5)(B) of the Act. Domestic subsidies given directly to the input producer (in this case, the steel producer) must be specifically provided, and domestic subsidies given directly to the downstream producer (in this case, the wheel producers) must be specifically provided, but subsidized inputs purchased by downstream producers need not be specifically provided in order to be countervailable.

The House Conference Report describes an upstream subsidy as a subsidy paid by a government on an input product used to manufacture the merchandise under investigation. The report states, "The potential for an upstream subsidy exists only when a sector-specific benefit meeting all the other criteria of being a subsidy is provided *to the input producer*." (emphasis added). H.R. Rep. No. 98–1156, 98th Cong., 2nd Sess. 171 (1984). The report makes no mention of a sector-specific requirement for the downstream purchaser of the input product.

Furthermore, the Report indicates that the House Bill included a requirement that the upstream subsidy result in a "price for the intermediate product lower than the generally available price of that product in that country. * * *," but the Conferees agree to "* * * substitute for generally available price determination a determination that the upstream subsidy in the judgment of the administering authority bestows a competitive benefit on the merchandise * * *". This clarifies that Congress considered and rejected the second-tier specificity requirement.

The upstream subsidy provision was intended to codify and strengthen existing practice. See S. Rep. No. 98–485, 98th Cong. 2nd Sess. 33 (1984). Although we found in the preliminary determination on *Certain Steel Products from the Federal Republic of Germany* that subsidies to the coal industry did not benefit the steel industry because the coal was not specifically provided to the steel industry, we abandoned this analysis in our final determination (47 FR 39345, September 7, 1982). In the final determination, we found that there was no benefit not because the coal was not specifically provided, but because the price of German coal was higher than world market prices. This approach is very similar to the analysis we use to determine the existence of a competitive benefit.

Thus, despite an early flirtation with the idea of a second-tier specificity test, both Congress and the Department in the end rejected this approach in favor of the competitive benefit test.

Comment 19: The GOB argues that, since wheel producers were able to import steel at prices less than the prices paid to USIMINAS, they derived no competitive benefit from any alleged upstream subsidy. Fumagalli provided information showing that hot-rolled coil was available in January 1989 from the Republic of Korea for less than what the wheel producers paid for steel in Brazil. Furthermore, since wheel producers can obtain full reimbursement for any duties paid on imported steel through Brazil's duty drawback system (provided for in Decree-Law NR 37/66 and Decree 68,904/71), the Department should take duty drawback into account when calculating the benchmark price.

Department's Position: Fumagalli cites a price from 1989, and our period of investigation is 1987. We found that Korean prices were on average over 50 percent higher than USIMINAS' prices in 1987. Since the world market benchmark price is higher than the Brazilian price, thus making importation economically impractical, the issue of using an import price adjusted for duty drawback is moot.

Comment 20: Fumagalli argues that the existence of price controls on domestically-sold Brazilian steel makes it impossible for a Brazilian steel producer to pass through the benefit of any subsidies it receives to the downstream purchaser. In an environment where prices are determined by an intervening and superseding cause, such as government price controls, prices will not vary, regardless of the level of subsidization of any individual producer. There is no evidence that the government of Brazil sets prices for any reason other than to control inflation. Thus, absent a causal relationship between the price of steel to wheel exporters and any subsidies received by steel producers, no competitive benefit can be bestowed.

Petitioner contends that controls on the selling price of steel guarantee the pass-through of any upstream subsidy to the downstream producer. Some of the difference between the controlled price of steel and the market price is accounted for by subsidies to the steel producer. Thus, government subsidies offset differences between the two prices.

Department's Position: We disagree that the existence of price controls renders the pass-through of benefits impossible. Price controls in and of themselves are not dispositive of whether the input was sold at a subsidized price. For example, if there were unsubsidized sellers of the input product subject to the same price controls as subsidized sellers, we would determine that there is no competitive benefits because the downstream producer could have bought the input at the same price from an unsubsidized seller. Conversely, if all sellers of the input product are subsidized and all are subject to the same price controls, we cannot determine whether, or to what extent, prices in the domestic market reflect the subsidies received. In such cases, we resort to world market prices. If the world market price is higher than the domestic price of the subsidized sellers, as in this case, we conclude that the subsidy is built into the price of the input product even if the price is controlled.

Comment 21: Fumagalli contends that, in determining whether the competitive benefit has a significant effect on the merchandise, the Department should calculate the cost of steel as a percentage of the U.S. selling price of the merchandise rather than as a percentage of the cost of production of the merchandise. Fumagalli contends that this is the most accurate measure of the effect of an upstream subsidy on the competitiveness of the merchandise because it captures the degree of underselling of the merchandise in the U.S. market vis-a-vis merchandise sold by competing U.S. firms.

Department's Position: We disagree. Section 771A(a)(3) of the Act clearly states that the Department must examine whether the subsidy on the input product has a significant effect on the "cost of manufacturing or producing the merchandise."

Comment 22: Fumagalli contends that, for purposes of its upstream subsidy analysis, the Department should include general and administrative expenses in its calculation of the cost of manufacturing or producing the merchandise. According to the verification report, the Department calculated the cost of hot-rolled sheet and coil as a percentage of manufacturing costs by erroneously applying its standard practice in antidumping proceedings, in which the

VOL 54 ISS 73 AP 18 1989 UMI

cost of manufacture is interpreted as the cost of production minus general and administrative expenses.

Department's Position: There is no explicit direction in the statute or the legislative history as to how to calculate the cost of manufacturing or producing the merchanise in an upstream subsidy investigation. In this case, we measured the significant effect of the upstream subsidy on the cost of the merchandise based on the cost of manufacture. We have applied our standard practice used in antidumping proceedings of calculating the cost of manufacture by deducting general and administrative expenses from the cost of production. We note that using the cost of production, including general and administrative expenses, would not change the results of our significant effect analysis in this case.

Verification

In accordance with section 776(b) of the Act, we verified the information used in making our final determination. We followed standard verification procedures, including meeting with government and company officials, inspecting documents and ledgers, tracing information in the response to source documents, accounting ledgers and financial statements, and collecting additional information that we deemed necessary for making our final determination.

Suspension of Liquidation

In accordance with our preliminary affirmative countervailing duty determination, published on October 28, 1988, we directed the U.S. Customs Service to suspend liquidation on the products under investigation and to require a cash deposit or bond equal to the duty deposit rate. This final countervailing duty determination was extended, pursuant to section 703(h) of the Act, because of the upstream subsidy investigation. Under Article 5, paragraph 3 of the Agreement on Interpretation and Application of Articles VI, XVI, and XXIII of the General Agreement on Tariffs and Trade (the Subsidies Code), provisional measures cannot be imposed for more than 120 days without final affirmative determination of injury. Therefore, we instructed the U.S. Customs Service to discontinue the suspension of liquidation on the subject merchandise entered on or after February 27, 1989, but to continue the suspension of liquidation of all entries or withdrawals from warehouse, for consumption, of the subject merchanise entered between October 28, 1988, and February 26, 1989. We will reinstate suspension of liquidation under section 703(d) of the Act, if the ITC issues a final affirmative injury determination, and require duty deposits on all entries of the subject merchandise in the amounts indicated below:

Manufacturer/producer/exporter	Estimated net subsidy	Duty deposit rate
Borlem, S.A.	1.82	1.82
All others	17.29	17.15

ITC notification

In accordance with section 705(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If the ITC determines that material injury, or the threat of material injury, does not exist, this proceeding will be terminated and all estimated duties deposited or securities posted as a result of the suspension of liquidation will be refunded or cancelled. If, however, the ITC determines that such injury does exist, we will issue a countervailing duty order, directing Customs officers to assess countervailing duties on all entries of steel wheels from Brazil entered, or withdrawn from warehouse, for consumption, as described in the "Suspension of Liquidation" section of this notice.

This determination is published pursuant to section 705(d) of the Act (19 U.S.C. 1671d(d)).

Date: April 7, 1989.

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[C-557-804]

Initiation of Countervailing Duty Investigation; Certain Steel Wire Nails From Malaysia

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: On the basis of a petition filed in proper form with the U.S. Department of Commerce, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in Malaysia of certain steel wire nails (steel nails), as described in the "Scope of Investigation" section of this notice, receive benefits which constitute bounties or grants within the meaning of the countervailing duty law. If this investigation proceeds normally, we will make our preliminary determination on or before June 15, 1989.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Roy Malmrose, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 377-5414.

SUPPLEMENTARY INFORMATION:

The Petition

On March 22, 1989, we received a petition in proper form filed by members of the Nail Committee of the American Wire Producers Association, on behalf of the U.S. industry producing steel nails. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.12), the petition alleges that manufacturers, producers, or exporters in Malaysia of steel nails receive bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended ("the Act").

Malaysia is not a "country under the Agreement" within the meaning of section 701(b) of the Act, and the merchandise being investigated is dutiable. Therefore, sections 303 (a)(1) and (b) of the Act apply to this investigation. Accordingly, petitioner is not required to allege that, and the U.S. International Trade Commission is not required to determine whether, imports of the subject merchandise materially injure, or threaten material injury to, a U.S. industry.

Initiation of Investigation

Under section 702(c) of the Act, we must determine, within 20 days after a petition is filed, whether the petition sets forth the allegations necessary for the initiation of a countervailing duty investigation, and whether it contains information reasonably available to the petitioner supporting the allegations. We have examined the petition on steel nails from Malaysia and have found that it meets the requirements of section 702(b) of the Act. Therefore, we are initiating a countervailing duty investigation to determine whether manufacturers, producers, or exporters in Malaysia of steel nails, as described in the "Scope of Investigation" section of this notice, receive benefits which constitute bounties or grants within the meaning of the Act. If our investigation proceeds normally, we will make our preliminary determination on or before June 15, 1989.

Scope of Investigation

The United States has developed a system of tariff classification based on the international harmonized system of customs nomenclature. On January 1, 1989, the U.S. tariff schedules were fully converted to the *Harmonized Tariff Schedule* (HTS), as provided for in section 1201 *et seq.* of the Omnibus Trade and Competitiveness Act of 1988. All merchandise entered, or withdrawn from warehouse, for consumption on or after that date is now classified solely according to the appropriate HTS sub-headings. The HTS sub-headings are provided for convenience and Customs purposes. The written description remains dispositive.

The products covered by this investigation are certain steel wire nails from Malaysia. These nails are: steel wire nails of one-piece construction as currently provided for in HTS items 7317.00.5505, 7317.00.5510, 7317.00.5520, 7317.00.5530, 7317.00.5540, 7317.00.5550, 7317.00.5560, 7317.00.5570, 7317.00.5580, 7317.00.5590 and 7317.00.6560; steel wire nails of two-piece construction, as currently provided for in HTS item 7317.00.7500; and steel wire nails with lead heads, as currently provided for in HTS item 7317.00.7500.

Allegation of Bounties or Grants

The petition lists certain practices by the Government of Malaysia which allegedly confer bounties or grants on manufacturers, producers, or exporters in Malaysia of steel nails. We are initiating an investigation of the following programs:

- Export Tax Incentives

—Abatement of Taxable Income Based on the Ratio of Export Sales to Total Sales
—Abatement of Five Percent of the Value of Indigenous Materials Used in Exports
—Double Deduction for Export Credit Insurance Payments
—Double Deduction for Export Promotion Expenses
—Industrial Building Allowance
—Residual Benefits From the Allowance of a Percentage of Net Taxable Income Based on the FOB Value of Export Sales Under Section 29 of the Investment Incentives Act (IIA) of 1968

- Export Credit Refinancing
- Official Export Insurance Program Administered by the Malaysian Credit Export Insurance Behard (MECIB)
- Pioneer Status Under the IIA of 1968
- Investment Tax Allowance for Under Chapter 2 of the PIA of 1986
- Long-Term Loans From the Development Bank of Malaysia for *Bumiputras* (people of native Malaysian descent)
- Double Deduction for Operational Expenses
- Other Tax Incentives

—Abatement of Five Percent of the Adjusted Income for a Period of Five Years for Manufacturing Companies Located in Designated "Promoted Industrial Areas"
—Reinvestment Allowance

Although not specifically alleged by petitioners, we are also investigating whether the manufacturers and exporters of steel nails in Malaysia receive countervailable benefits under the following programs, which we have found to be either countervailable or not used in previous Malaysian investigations:

- Abatement of Taxable Income of Five Percent for Trading and Agricultural Companies Exporting Malaysian-made Products
- Pioneer Status under the PIA of 1986
- Other Medium- and Long-Term Government Financing from:

—The Industrial Development Bank of Malaysia (IDBM)
—The Borneo Development Corporation (BDC)
—The Sabar Development Bank (SDB)

We are not initiating an investigation of the following allegations made by the petitioner:

- Abatement of Taxable Income Based on a Percentage of the Value-Added of Exported Products

This program was determined not to exist in *Final Affirmative Countervailing Duty Determination: Carbon Steel Wire from Malaysia* (53 FR 13303, April 22, 1988) (*Wire Rod II*).

- Upstream subsidy allegation

Petitioners allege that an upstream subsidy is conferred upon producers and exporters of steel nails in Malaysia, based, in part, on the Department's previous affirmative determination in *Wire Rod II*.

Under section 701(e) of the Act, whenever the Department has reasonable grounds to believe or suspect that an upstream subsidy is being paid or bestowed, the Department must investigate whether an upstream subsidy has in fact been paid or bestowed. The standard established in section 355.12 of the Commerce Regulations (19 CFR 355.12(b)(8)) states that petitioner must provide the following factual information regarding an alleged upstream subsidy:

(i) Domestic subsidies described in section 771(5) of the Act that the government of the affected country provides to the upstream supplier;

(ii) The competitive benefit the subsidies bestow on the merchandise; and

(iii) The significant effect the subsidies have on the cost of producing the merchandise.

Petitioners cite the Department's final determination in *Wire Rod II* to support the allegation that the input to nails is subsidized. Petitioners also provide information regarding significant effect. However, petitioners have not provided any supporting information which indicates that a competitive benefit is bestowed on the producers of steel nails.

Petitioners state that the Department's previous finding in *Wire Rod II* and the fact that the Malaysian steel nails producers underseli their U.S. counterparts demonstrates the bestowal of a competitive benefit. However, this argument is insufficient for purposes of demonstrating the bestowal of a competitive benefit.

Instead, petitioners must provide evidence which indicates that the price for wire rod paid by the Malaysian nail producers is lower than an arm's length unsubsidized price. We therefore conclude that petitioners have not provided the Department with a reasonable basis to believe or suspect that producers and exporters of steel nails in Malaysia benefit from an upstream subsidy.

This notice is published pursuant to section 702(c)(2) of the Act.

Timothy N. Bergan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

VOL 54 ISS 73 AP 18 1989 UMI

Comments must comply with subsections 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Nubmer: 89–106. *Applicant:* University of California, Department of Chemistry, La Jolla, CA 92093. *Instrument:* Stopped-Flow Spectrophotometer, Model SF–51. *Manufacturer:* Hi-Tech Scientific Ltd., United Kingdom. *Intended use:* The instrument will be used for the study of the transient phase kinetics of the reduction of dihydrofolate by NADPH and the heterolytic cleavage of hydrogen peroxide by cytochrome c perodidase. The instrument will also be used for educational purposes in the course Graduate Research, Chem 299. *Application Received by Commissioner of Customs:* March 16, 1989.

Docket Number: 89–108. *Applicant:* University of Montana, Flathead Lake Bio. Station, 311 Bio. Station Lane, Polson, MT 59860. *Instrument:* Precision Dissolved Oxygen Meter and Accessories, Model 781b. *Manufacturer:* Strathkelvin Instruments, United Kingdom. *Intended use:* The instrument will be used for the study of microbes and aquatic insects to determine the metabolic activity of specific aquatic organisms. In addition, instrument will be used for instruction purposes in the courses Lake Ecology and River Ecology. *Application Received by Commissioner of Customs:* March 17, 1989.

Docket Number: 89–109. *Applicant:* University of Cincinnati, Chemistry Department, Mail Location 172, Cincinnati, OH 45221–0172. *Instrument:* Vibrating-Tube Densimeter and Accessories, Model 03–D. *Manufacturer:* SODEV, Inc., Canada. *Intended use:* The instrument will be used to measure the densities of solutions of various concentrations in studies to develop a better understanding of the aggregation of surfactants in aqueous solutions. In addition, the instrument will be used for educational purposes in a two-quarter undergraduate laboratory course for senior-year chemistry students. *Application Received by Commissioner of Customs:* March 17, 1989.

Docket Number: 89–110. *Applicant:* Haverford, College, Haverford, PA 19041–1328. *Instrument:* Stopped-flow Spectrophotometer, Model SF–51. *Manufacturer:* Hi-Tech Scientific Ltd., United Kingdom. *Intended use:* The instrument will be used in studies of the coordiantion environment of transition metals (such as iron, cobalt, nickel, manganese, etc.) as found both in biological macromolecules (such as enzymes and other proteins) and in synthetic inorganic compounds. In addition, the instrument will be used for educational purposes in the courses Chemistry 301a and 302b—Laboratory in Chemical Structure and Reactivity. Both of these courses are designed to foster familiarity with and confidence in modern chemical laboratory techniques as applied to the conduct of chemical and biochemical research. *Application Received by Commissioner of Customs:* March 20, 1989.

Docket Number: 89–111. *Applicant:* South Dakota School of Mines and Technology, 501 E. St. Joseph, Rapid City, SD 57701. *Instrument:* ICP Mass Spectrometer, Model PlasmaQuad 2. *Manufacturer:* VG Istopes Ltd., United Kingdom. *Intended use:* The instrument will be used for studies of the ultra-trace element characteristics of geological materials including minute glasses and crystals. Experiments will be conducted to define processes in magmatic and hydrothermal systems in the earth's crust. The instrument will also be used for educational purposes in the course Atomic Absorption,—Inductive Coupled Argon Spectroscopy and Inductive Coupled Plasma Mass Spectrometry. *Application Received by Commissioner of Customs:* March 20, 1989.

Docket Number: 89–112. *Applicant:* University of Hawaii at Manoa, Hawaii Institute of Geophysics, 2525 Correa Road, HIG 114, Honolulu, HI 96822. *Instrument:* Rotating Anode X-ray Generator. Manufacturer: Rigaku, Japan. *Intended use:* The instrument will be used in studies of earth materials of geophysical and geochemical importance (silicates, oxides, metals and alloys) to determine atomic crystal structure, molar volumes, equation of state (P-V-T), of Earth's mantle phases. In addition, the instrument will be used for educational purposes in several geophysical courses. *Application Received by Commissioner of Customs:* March 20, 1989.

Docket Number: 89–114. *Applicant:* South Dakota State University, Chemistry Department, Box 2202, Brookings, SD 57007–0896. *Instrument:* Mass Spectrometer, Model MS 25. *Manufacturer:* Kratos Analytical Inc., United Kingdom. *Intended use:* The instrument will be used in studies of organic molecules. Experiments will consist of low-resolution mass measurement, high-resolution mass measurement, fast-atom bombardment mass spectrometry, gas chromatography-mass spectrometry, high performance liquid-chromatography mass spectrometry, pyrolysis mass spectrometry, and metastable-analysis mass spectrometry. In addition, the instrument will be used in undergraduate and graduate thesis research requirement courses: CH 591, CH 790, CH 890. *Application Received by Commisisoner of Customs:* March 21, 1989.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–M

Pennsylvania State University, et al.; Consolidated Decision on Applications for Duty-free Entry of Scientific Instruments

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 2841, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 88–086R.

Applicant: Pennsylvania State University, University Park, PA 16802.

Instrument: Mass Spectrometer, Model M25SR.

Manufacturer: Kratos Scientific Instruments, United Kingdom.

Intended use: See notice at 53 FR 4867, February 18, 1988.

Reasons for this Decision: The foreign instrument provides a scan speed to 0.1 second per decade.

Advice Submitted by: The National Institutes of Health, December 20, 1988.

Docket Number: 88–215R.

Applicant: University of Dallas, Irving, TX 75062–4799.

Instrument: Rapid Kinetics Accessory, Model SFA–11.

Manufacturer: Hi-Tech Scientific, Ltd., United Kingdom.

Intended use: See notice at 53 FR 43464, October 27, 1988.

Reasons for this Decision: The foreign article directly delivers mixed reagent solutions through a removable chamber to an observation cell configuration standard to many spectrometric instruments.

Advice Submitted by: The National Institutes of Health, December 20, 1988.

Docket Number: 88–275.

Applicant: Vanderbilt University, Nashville, TN 37232.

Instrument: Conductance Catheter (Signal Condition Processor), Model SIGMA–5.

Manufacturer: Stichting LEYCOM, The Netherlands.

Intended use: See notice at 53 FR 39494, October 7, 1988.

Reasons for this Decision: The foreign instrument continuously measures ventricular (heart) volume by analyzing five segmented signals from an impedance catheter.

Advice Submitted by: The National Institutes of Health, December 20, 1988.

Docket Number: 88–276.

Applicant: Albert Einstein College of Medicine of Yeshiva University, Bronx, NY 10461.

Instrument: Mass Spectrometer, MAT 90.

Manufacturer: Finnigan, West Germany.

Intended use: See notice at 53 FR 39494, October 7, 1988.

Reasons for this Decision: The foreign instrument provides: (1) Continuous flow FAB, (2) resolution to 50 000, (3) mass range to 17 500, and (4) scan speed to 0.1 second per decade.

Advice Submitted by: The National Institutes of Health, December 20, 1988.

Docket Number: 88–282.

Applicant: Vanderbilt University, School of Medicine, Nashville, TN 32732.

Instrument: Cytogenetic Scanning Analyzer System, Model Cytoscan CS2.

Manufacturer: Image Recognition Systems, United Kingdom.

Intended use: See notice at 53 FR 43462, October 27, 1988.

Reasons for this Decision: The foreign instrument accurately locates metaphase chromosomes and provides a 1024 element CCD imaging array.

Advice Submitted by: The National Institutes of Health, December 20, 1988.

Docket Number: 88–283.

Applicant: Kansas State University, Manhattan, KS 66506.

Instrument: Rapid Kinetics Accessory, Model SFA–11.

Manufacturer: Hi-Tech Scientific, United Kingdom.

Intended use: See notice at 53 FR 43462, October 27, 1988.

Reasons for this Decision: The foreign article directly delivers mixed reagent solutions through a removable chamber to an observation cell configuration standard to many spectrometric instruments.

Advice Submitted by: The National Institutes of Health, December 20, 1988.

Docket Number: 88–291. Cornell University, Ithaca, NY 14853–1301.

Instrument: Preparative Quench and Stopped-Flow Spectrofluorometer, Model PQ/SF–53.

Manufacturer: Hi-Tech Scientific, United Kingdom.

Intended use: See notice at 53 FR 43463, October 27, 1988.

Reasons for this Decision: The foreign instrument provides preparative quench and stopped flow spectrofluorometry using four syringes with two independent drive rams.

Advice Submitted by: The National Institutes of Health, December 20, 1988.

Docket Number: 88–299.

Applicant: National Institute of Standards and Technology, Gaithersburg, MD 20899.

Instrument: Electron Back-Scatter Pattern Imaging and Analysis System, Model EBSP 8400.

Manufacturer: Custom Camera Design, United Kingdom.

Intended use: See notice at 53 FR 43464, October 27, 1988.

Reasons for this Decision: The foreign instrument can display and record back-scattered electron diffraction patterns with a spatial resolution of 0.3 μm.

Advice Submitted by: The National Institutes of Health, January 26, 1989.

Docket Number: 88–302.

Applicant: National Institute of Standards and Technology, Gaithersburg, MD 20899.

Instrument: Two Monochromator Bending Devices.

Manufacturer: Grenoble Modular Instruments, France.

Intended use: See notice at 53 FR 43464, October 27, 1988.

Reasons for this Decision: The foreign instrument can focus monochromatic neutrons to improve signal by a factor of three.

Advice Submitted by: The National Institutes of Health, January 26, 1989.

Comments: None received. *Decision:* Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States. The National Institutes of Health advises that: (1) The capabilities of each of the foreign instruments described above are pertinent to each applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to any of the foreign instruments.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510–DS–M

National Institute of Standards and Technology

Visiting Committee on Advanced Technology; Meeting

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of partially closed meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App., notice is hereby given that the National Institute of Standards and Technology Visiting Committee on Advanced Technology will meet Tuesday, May 2, 1989, from 10:00 a.m. to 5:00 p.m. and Wednesday, May 3, 1989, from 8:30 a.m. to 1:30 p.m. The Visiting Committee on Advanced Technology is composed of nine members appointed by the Director of the National Institute of Standards and Technology who are eminent in such fields as business, research, new product development, engineering, labor, education, management consulting, environment, and international relations. The purpose of this meeting is to review and make recommendations regarding general policy for the Institute, its organization, its budget, and its programs within the framework of applicable national policies as set forth by the President and the Congress. The discussion on NIST Budget scheduled to begin at 4:20 p.m. and ending 5:00 p.m. on May 2, 1989, will be closed.

DATES: The meeting will convene May 2, 1989, at 10:00 a.m. and adjourn at 1:30 p.m. on May 3, 1989. A closed session is scheduled on May 2, 1989, beginning at 4:20 p.m. and adjourning at 5:00 p.m.

ADDRESS: The meeting will be held in Conference Room 1103, Radio Building, National Institute of Standards and Technology, Boulder, Colorado.

FOR FURTHER INFORMATION CONTACT: Dale Hall, Visiting Committee Executive Director, National Institute of Standards and Technology, Gaithersburg, Maryland 20899, telephone number (301) 975–2158.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the General Counsel, formally determined on April 10, 1989, that the portion of this meeting which involves examination and discussion of the 1991 budget proposal may be closed pursuant to section 10(d) of the Federal Advisory Committee Act, 5 U.S.C. App., as amended by section 5(c) of the Government in the Sunshine Act, Pub. L. 94–409. One portion of the meeting, which involves discussion of future NIST budget requests, may be

VOL 54 ISS 73 AP 18 1989 UMI

closed to the public. In accordance with section 552(b)(9)(B) of Title 5, United States Code, since that portion of the meeting is likely to divulge matters that may be likely to significantly frustrate implementation of proposed agency action. All other portions of the meeting will be open to the public, and the Chairperson will entertain comments or questions at an appropriate time during the meeting. Any person wishing to attend the meeting should inform Dale Hall at the address shown above.

Raymond G. Kammer,

Acting Director.

Date: April 11, 1989.

[FR Doc. 89-9146 Filed 4-17-89; 8:45 am]

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

Western Pacific Precious Corals

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of a draft environmental assessment and request for comments.

SUMMARY: The Southwest Region of the National Marine Fisheries Service has prepared an environmental assessment (EA) of a proposed action to issue an experimental fishing permit (EFP) to allow the harvest of 10,000 kilograms (kg) of precious corals in the exclusive economic zone (EEZ) seaward of Hawaii using tangle net gear. The purpose of this notice is to solicit public comments on the EA, which summarizes management of coral under the Fishery Management Plan for the Precious Coral Fisheries of the Western Pacific Region (FMP) and the effects the experimental fishery might have on precious coral stocks and associated resources.

DATE: Comments on the draft EA are due by May 8, 1989.

ADDRESSES: Send comments to E.C. Fullerton, Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

FOR FURTHER INFORMATION CONTACT: A copy of the EA may be obtained from Doyle Gates, Pacific Island Coordinator, Southwest Region, NMFS, 2570 Dole St., Room 106, Honolulu, Hawaii 96822-2396 (808-955-8831); or James Morgan, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731 (213-514-6667).

SUPPLEMENTARY INFORMATION: On February 9, 1989, the Southwest Regional Director, NMFS, received an application for an experimental fishing permit to harvest precious corals in the western Pacific. A notice of receipt of the application was filed with the Federal Register on February 15, 1989, and published February 21, 1989 (54 FR 7462). The applicant proposes to harvest 10,000 kg of precious corals using tangle gear from exploratory areas in the EEZ seaward of Hawaii in a two-year period. As part of its review of the permit application under 50 CFR Part 680 of the rules implementing the FMP, the NMFS has prepared an EA on the proposed fishing operation for public review. The EA describes the expected impacts of fishing if the permit is granted. Under the proposed alternative in the EA, a permit would be issued to allow the requested level of harvest, but conditions would be imposed to ensure adequate monitoring of the harvest operation and complete data collection.

The application was reviewed by the Western Pacific Fishery Management Council (Council) at its 64th regular meeting in Honolulu, Hawaii, on February 14-15, 1989. The Council recommended that the permit be issued with the provision that the Regional Director be authorized to place an observer on the applicant's vessel as necessary to ensure monitoring of the operation and collection of data. The Council's recommendation will be considered when developing conditions to include in the permit.

Comments received on the EA and the application will help determine if the application for the permit should be approved, and if approved, what additional conditions should be included in the permit.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 12, 1989.

Richard H. Schaefer,

Director of Office of Fisheries, Conservation and Management, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Office of the Secretary

DoD Advisory Group on Electron Devices; Advisory Committee Meeting

SUMMARY: Working Group B (Microelectronics) of the DoD Advisory Group on Electron Devices (AGED) announces a closed session meeting.

DATE: The meeting will be held at 0900, Wednesday, 10 May 1989.

ADDRESS: The meeting will be held at Palisades Institute for Research Services, Inc., 2011 Crystal Drive, Suite 307, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Becky Terry, AGED Secretariat, 2011 Crystal Drive, Arlington, Virginia 22202.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group B meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. The Microelectronics area includes such programs as integrated circuits, charge coupled devices and memories. The review will include classified program details throughout.

In accordance with section 10(d) of Pub. L. No. 92-463, as amended, (5 U.S.C. App. II 10(d) (1982)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly, this meeting will be closed to the public.

Alternate OSD Federal Register Liaison Officer, Department of Defense.

L.M. Bynum,

DATE: The meeting will be held at 0900, Tuesday, 16 May 1989.

ADDRESS: The meeting will be held at Palisades Institute for Research Services, Inc., 2011 Crystal Drive, Suite 307, Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: David Slater, AGED Secretariat, 201 Varick Street, New York, 10014.

SUPPLEMENTARY INFORMATION: The mission of the Advisory Group is to provide the Under Secretary of Defense for Acquisition, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The AGED meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The agenda for this meeting will include programs on Radiation Hardened Devices, Microwave Tubes, Displays and Lasers. The review will include details of classified defense programs throughout.

In accordance with section 10(d) of Pub. L. No. 92-463, as amended, (5 U.S.C. App. II 10(d) (1982)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly, this meeting will be closed to the public.

April 12, 1989.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Defense Science Board Task Force on Defense Industrial Cooperation With Pacific Rim Nations

ACTION: Change in date of Advisory Committee meeting notice.

SUMMARY: The meeting of the Defense Science Board Task Force on Defense Industrial Cooperation With Pacific Rim Nations scheduled for May 1, 1989 as published in the Federal Register (Vol. 54, No. 9, Page 1428, Friday, January 13, 1989, FR Doc. 89-887) will be held on May 16, 1989.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

April 12, 1989.

[FR Doc. 89-9245 Filed 4-17-89; 8:45 am]

BILLING CODE 3810-01-M

Defense Science Board Task Force on Follow on Forces Attack (FOFA); Meetings

AGENCY: Office of the Secretary, DoD.

ACTION: Notice of Advisory Committee Meetings.

SUMMARY: The Defense Science Board Task Force on Follow on Forces Attack (FOFA) will meet in closed session on May 3 and May 19, 1989 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will continue to review, in detail, classified material associated with conventional military capabilities in NATO to include special targeting requirements.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that these DSB Task Force meetings, concern matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly these meetings will be closed to the public.

April 12, 1989.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Defense Science Board Task Force on Low Observable Technology, Air Force Subgroup; Meeting

AGENCY: Office of the Secretary, DOD.

ACTION: Notice of Advisory Committee meetings.

SUMMARY: The Defense Science Board Task Force on Low Observable Technology, Air Force Subgroup will meet in closed sessions on May 8-9, June 13-14, and September 14-15, 1989 at the Pentagon, Arlington, Virginia..

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will provide the Air Force with scientific advice on its activities in this area.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that these DSB Task Force meetings, concern matters listed in 5 U.S.C. 552b(c) (1) (1982), and that accordingly these meetings will be closed to the public.

April 12, 1989.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Department of the Army

Intent to Prepare a Draft Environmental Impact Statement for Proposed Flood-Control Measures on Guadalupe River, Santa Clara County, CA

AGENCY: U.S. Army Corps of Engineers (San Francisco District), Department of Defense.

ACTION: Notice of intent to prepare a draft environmental impact statement.

1. *Proposed Action.* The Corps of Engineers (Corps) has received an application for a Department of the Army permit from the Santa Clara Valley Water District (Water District) to construct flood-control facilities along Guadalupe River between Interstate Highway 280 (I-280) and Blossm Hill Road, a distance of 5.5 miles. The permit application will be processed by the Regulatory Branch of the San Francisco District, Corps of Engineers pursuant to section 10 of the River and Harbor Act of 1899 (33 U.S.C. 403) and section 404 of the Clean Water Act of 1977, as amended (33 U.S.C. 1344).

The purpose of the proposed project is to reduce overbank flooding from Guadalupe River, thereby lessen the flood hazard and damage to residences and businesses in the City of San Jose.

In accordance with the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq*), the Corps has determined that the proposed action may have a significant impact on the quality of the human environment and therefore requires the preparation of an Environmental Impact Statement (EIS). A combined EIS/Eir (Environmental Impact Report) will be prepared with the Corps as the Federal lead agency and the Water District as the lead agency for the EIR.

2. *Flood-Control Alternatives.* Four conceptual measures have been identified by the Water District in its planning process.

a. *No Action Plan.* Under this plan, which is equivalent to permit denial by the Corps, no action would be taken by the Water District to reduce flooding from Guadalupe River.

b. *Upstream Storage Plan.* This alternative consists of construction of dams and reservoirs upstream of the flood-prone area.

c. *Offstream Storage Plan.* This plan calls for construction of offstream storage facilities to store floodflows until the water can be released safely.

d. *Channel Modification Plan.* The channel modification alternative consists of three basic design concepts,

VOL 54 ISS 73 AP 18 1989 UMI

namely, (1) Bypass channel, (2) Lined channel, and (3) Widened channel.

The Water District has developed a Channel Modification Plan, which it has designated as the preliminary selected plan for the permit application. The proposed channel modification plan consists of the following measures from downstream to upstream: Bypass channel with gabion sideslopes between I–280 and Willow Glen Way; Partial East Bank widened chanel from Willow Glen Way to southbound Almaden Expressway; West Bank Levee from southbound to northbound Almaden Expressway; East Bank Widened Channel from 1500 feet upstream northbound Almaden Expressway to Bryan Avenue; West Bank Widened Channel from Bryan Avenue to Cross Creek; East Bank Widened Channel from Cross Creek to Branham Lane; and West Bank Widened Channel from Branham Lane to Blossom Hill Road.

3. *Scoping Process.* Pursuant to the National Environmental Policy Act, as amended, agency planning for Federal or federally permitted projects must include a "scoping" process. Scoping primarily involves determining the scope of issues to be addressed, and identifying the significant issues for in-depth analysis in the draft EIS. The scoping process includes public participation to integrate information regarding public needs and concerns into the environmental document.

The Water District has established a public involvement program and sponsored public meetings and workshops to receive comments on the preliminary selected plan. Comments already received will be utilized in preparation of the draft EIS. A scoping meeting has been scheduled for March 29, 1989 at 7:30 p.m. at Terrel Elementary School, 3925 Pearl Avenue, San Jose. Government agencies, public and private interest groups are also invited to further participate in the scoping process by submitting comments on issues pertaining to the proposed project.

a. Significant Issues. The following significant issues have already been identified as significant and they will be analyzed in the draft EIS:

(1) Water quality
(2) Hydrology
(3) Fish and wildlife resources
(4) Wetland and aquatic habitat
(5) Riparian Habitat
(6) Rare and endangered species
(7) Cultural resources
(8) Growth inducement
(9) Aesthetic quality
(10) Recreational opportunities

b. Environmental Requirements. Environmental review and other consultation requirements applicable to the proposed action include:

(1) National Environmental Policy Act, as amended
(2) Clean Water Act, as amended
(3) Clean Air Act, as amended
(4) National Historic Preservation Act, as amended
(5) Fish and Wildlife Coordination Act
(6) Endangered Species Act, as amended
(7) Coastal Zone Management Act; and
(8) Council on Environmental Quality Memorandum—Analysis of Impacts on Prime and Unique Agricultural Lands.

4. *Availability of EIS.* The draft EIS will be available for public review in December 1989.

5. *Points of Contact.* Questions regarding the scoping process or preparation of the draft EIS may be directed to Lars M. Forsman, Regulatory Branch (Telephone 415–974–0421). Questions about processing of the permit application may be directed to Frank Kelleher, Regulatory Branch (Telephone 415–974–0424).

John O. Roach, II

Army Liaison Officer with the Federal Register.

BILLING CODE 3710–FS–M

Armed Forces Institute of Pathology Scientific Advisory Board; Meeting

In order to comply with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Armed Forces Institute of Pathology's Scientific Advisory Board, May 31 and June 1, 1989, at 0630 hours in the Director's Conference Room, Armed Forces Institute of Pathology, Washington, DC 20306–6000. This meeting will be open to the public.

The proposed agenda will include professional discussion of the mission of the Armed Forces Institute of Pathology relating to consultation, education and research. The Executive Secretary from whom substantive program information may be obtained is Colonel Lloyd A. Schlaeppi, Executive Officer, Armed Forces Institute of Pathology, Washington, DC 20306–6000, telephone (202) 576–2900.

For the Director:

Lloyd A. Schlaeppi,

Colonel, MS, USA, Executive Officer.

[FR Doc. 89–9174 Filed 4–17–89; 8:45 am]

BILLING CODE 3710–08–M

Corps of Engineers, Department of the Army

Coastal Engineering Research Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following committee meeting:

Name of Committee: Coastal Engineering Research Board (CERB).

Date of Meeting: May 9–11, 1989.

Place: Wilmington Hilton, Wilmington, North Carolina.

Time: 8:00 a.m. to 5:00 p.m. on May 9; 8:30 a.m. to 4:45 p.m. on May 10; 8:30 a.m. to 11:45 a.m. on May 11.

Theme: Shoreline Erosion and Restoration.

Proposed Agenda: The morning session on May 9 will consist of a review of CERB business, South Atlantic Division Research Needs, a presentation by a local congressman; a presentation on the management of North Carolina's ocean hazard areas; and an overview of Wilmington District coastal projects and field trip.

The afternoon of May 9 will be devoted to a bus trip and tour of Carolina Beach, Fort Fisher, and the North Carolina Aquarium.

The session on May 10 will consist of several presentations entitled: Introduction to Theme of Shoreline Erosion and Restoration; Beach Preservation Technology '89; Numerical Modeling/Coastal Processes; Physical Modeling/Coastal Processes; Monitoring/Kings Bay Navigation Channel and Adjacent Shorelines; Helicopter LIDAR Bathymeter; Low Cost Shore Protection/Section 54; Shore Damage Reduction Manual; and Beach Nourishment Using Dredged Material/Section 933 Authority. The session will also consist of two panel discussions. One panel will discuss Shore Protection Structures including Seawalls—Special Edition of the Journal of Coastal Research and Offshore Breakwaters, and the other panel will discuss Beachfills including Corps of Engineers Beachfill Projects—Past/Future; State of Florida's Beachfill Program; Wilmington District Beachfill Design Procedures; and Beachfill Research and Development.

On May 11 there will be a discussion of the theme and recommendations by members of the Board.

This meeting is open to the public; participation by the public is scheduled for 9:45 a.m. on May 11.

The entire meeting is open to the public subject to the following:

1. Since seating capacity of the meeting room is limited, advance notice of intent to attend, although not required, is requested in order to assure adequate arrangements for those wishing to attend.

2. Oral participation by public attendees is encouraged during the time scheduled on the agenda; written statements may be submitted prior to the meeting or up to 30 days after the meeting.

Inquiries and notice of intent to attend the meeting may be addressed to Lieutenant Colonel Jack R. Stephens, Acting Executive Secretary, Coastal Engineering Research Board, U.S. Army Engineer Waterways Experiment Station, P.O. Box 631, Vicksburg, Mississippi 39181–0631.

Jack R. Stephens,

Lieutenant Colonel, Corps of Engineers, Acting Executive Secretary.

[FR Doc. 89–9214 Filed 4–17–89; 8:45 am]

BILLING CODE 3710–09–M

Intent To Prepare Draft Environmental Impact Statement (DEIS) for Proposed Flood Control Project; Las Vegas Wash and Tributaries; Clark County, NV

AGENCY: U.S. Army Corps of Engineers, Department of Defense.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: This project would include construction of a number of detention and conveyance structures and improvements along Tropicana and Flamingo washes. The proposed plan for flood control would reduce the peak discharge of a 100-year flood so that the resulting downstream discharges could be carried through the urban communities within existing rights of way, flood control facilities, and other existing constraints. Other tributaries, including Las Vegas Range Wash, Lower Las Vegas Wash, Las Vegas Creek, and Duck Creek, which were covered in previous environmental reports, will be dropped from further study at this time. Those tributaries will be assessed in one or more additional studies. A time schedule for the additional tributaries studies has not yet been developed.

Alternatives: The No-Action alternative and variations of the Clark County Regional Flood Control District's Flood Control Master Plan (FCMP) will be considered in the Tropicana and Flamingo Washes study area. The following alternatives will be considered during the feasibility study: (a) Lined channels, (b) unlined channels, (c) floodways, (d) detention basins, (e) debris basins, (f) diversion dikes, (g) storm drains, and (h) bridges and culverts. The sizes and exact locations of these facilities are not known at this time.

Scoping Process: A public meeting will be held on May 1, 1989 to assess public needs and desires relative to protection formulation. The public meeting will be held in Las Vegas. Participation in the public meeting by Federal, State, and local agencies, and other interested private organizations and parties is encouraged. Significant issues to be addressed in these public meetings include: potential impacts to biological resources (including endangered and threatened species), cultural resources, land use, water quality, and air quality.

Time and Locations of Scoping Meeting: A scoping meeting will be held according to the following schedule:

Area, Location, and Time: The public scoping meeting for the Flamingo Wash and Tropicana Wash Feasibility Study will be held at the Clark High School Cafeteria, 4291 Pennwood Avenue, Las Vegas, Nevada 89102 on Monday, May 1, 1989 between 7:00–9:30 p.m.

Availability of the DEIS: The Draft EIS is anticipated to be circulated for public review in Fall 1989.

ADDRESS: Comments and questions regarding the project may be addressed to U.S. Army Corps of Engineers, Los Angeles District, ATTN: Mr. Ronald MacDonald, CESPL–PD–RQ, P.O. Box 2711, Los Angeles, California 90053–2325, (213) 894–3661.

Date: March 28, 1989.

Tadahiko Ono,

Colonel, Corps of Engineers, District Engineer.

[FR Doc. 89–9173 Filed 4–17–89; 8:45 am]

BILLING CODE 3710–KF–M

Joint Chiefs of Staff

National Defense University Transition Planning Committee; Meeting

AGENCY: The Joint Staff, Office of the Chairman of the Joint Chiefs of Staff, DOD.

ACTION: Notice of meeting of the National Defense University Transition Planning Committee (Long Committee).

SUMMARY: The Chairman, Joint Chiefs of Staff has scheduled a meeting of the Long Committee.

DATES: The meeting will be held on Apirl 25 and 26, 1989. Due to issues raised by reviewing authorities as part of the substantiation process for the need for the Long Committee, and the necessary charter establishment notice and filing requirements, the 15-day notice of meeting could not be accomplished.

ADDRESS: The meeting will be held at the Center for Naval Analysis, 4401 Ford Road, Alexandria, Virginia.

FOR FURTHER INFORMATION CONTACT: Colonel Tom Berta, Executive Assistant, Long Committee, J–7, Joint Doctrine and Education Division, Washington, DC 20318–7000. To reserve space, interested persons should phone: 202–694–6469.

SUPPLEMENTARY INFORMATION: The Committee will be examining the desirability and feasibility of establishing a National Center for Strategic Studies. The meeting is open to the public, but the limited space available for observers will be allocated on a first-come, first-served basis.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

April 12, 1989.

BILLING CODE 3810–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER89–309–000, et al.]

Detroit Edison Company, et al.; Electric rate, Small Power Production, and Interlocking Directorate Filings

April 10, 1989.

Take notice that the following filings have been made with the Commission:

1. Detroit Edison Co.

[Docket No. ER89–309–000]

Take notice that the Detroit Edison Company (Detroit Edison) on March 31, 1989, tendered for filing its Certificate of Concurrence with the filing by Northern Indiana Public Service Company of Amendment No. 3 dated March 31, 1989 to the Operating Agreement dated May 1, 1979 among Consumers Power Company, the Detroit Edison Company and Northern Indiana Public Service Company. The Operating Agreement is designed as Detroit Edison Rate Schedule FERC No. 26.

Detroit Edison states that Amendment No. 3 modifies the provisions of the current Rate Schedule by deleting Service Schedule D (Conservation Energy) and increasing rates establis: ed for Emergency Service, Short-Term Capacity and Energy and Interchange

VOL 54 ISS 73 AP 18 1989 UMI

Power, as set forth in Service Schedules A, B and C respectively.

The new rates for Emergency Service are established at levels currently in effect for similar service offered by neighboring utilities to remove incentives for the scheduling of emergency service in non-emergency situations. Current provisions for the return of equivalent energy and third party emergency service are deleted.

Amendment No. 3 also deletes provisions for the supply of Short-Term Capacity and Energy on an hourly basis and provides for Short-Term Capacity and Energy to be supplied on a daily basis from third parties. The Amendment also permits rates established for Short-Term Capacity and Energy and Non-Displacement Energy, when generated on the system of the supplying party, to be set in a zone of reasonableness between an upper limit established at cost-justified levels and the 110% of out-of-pocket cost as a lower limit, as competitive conditions dictate.

Further, Amendment No. 3 establishes a maximum demand charge for Non-Displacement Energy transactions. This rate is stated in hourly form based on 5 peak days per week with 16 peak hours per day. The total demand charge in any one day may not exceed the product of one-fifth of the maximum weekly Short-Term Capacity and Energy rate and the greatest hourly kilowatt reservation on that day.

Economy Energy charges have been modified to provide that compensation for such energy, when obtained from or delivered to third parties, shall be the greater of 15% of gross savings, less the cost of transmission losses, or the sum of an hourly demand charge and an energy charge of one mill per kilowatthour. As with the demand charge for Non-Displacement Energy transactions, the total demand charge in any one day may not exceed the product of one-fifth of the maximum weekly Short-Term Capacity and Energy rate and the greatest hourly kilowatt reservation on that day.

Comment date: April 24, 1989, in accordance with Standard Paragraph E at the end of this notice.

2. Iowa Public Service Co.

[Docket No. ER89-308-000]

Take notice that Iowa Public Service Company (IPS) on March 30, 1989, submitted in response to a request from Commission Staff, a revised tariff sheet and additional support materials to the proposed Full Requirements Wholesale—Service Schedule No. 2 Original Issue Sheets Nos. 5, 6 and 6A, and executed Full Requirements Power Agreements filed on May 31, 1988, to permit the following Iowa municipalities to receive services pursuant to the filed rates: Auburn, Denver, Estherville, Hudson, Livermore, Pocahontas, Rockford, and Sergeant Bluff.

IPS requests a waiver of the Commission's regulations and allow the Agreements to become effective as of their respective dates. The earliest operative date is May 1, 1987.

These amendments have been served on all the affected municipalities and the Iowa Utilities Board.

Comment date: April 24, 1989, in accordance with Standard Paragraph E at the end of this notice.

3. Southwestern Electric Power Co.

[Docket No. ER89-282-000]

Take notice that on March 31, 1989, Southwestern Electric Power Company (SWEPCO) tendered for filing a revised final return on common equity ("Final ROE") to be used in redetermining or "truing-up" cost-of-service formula rates for wholesale service in 1988 to Northeast Texas Electric Cooperative, Inc., the City of Bentonville, Arkansas, the City of Hope, Arkansas, the Oklahoma Municipal Power Authority, Rayburn Country Electric Cooperative, Inc., Cajun Electric Power Cooperative, Inc. and TEX-LA Electric Cooperative of Texas, Inc. SWEPCO provides service to these customers under contracts which provide for periodic changes in rates and charges determined in accordance with cost-of-service formulas, including a formulaic determination of the return on common equity. The revised Final ROE reflects a minor adjustment to the original filing on March 1, 1989 in this proceeding.

Copies of the filing were served upon the affected wholesale customers, the Public Utility Commission of Texas, the Oklahoma Corporation Commission, the Louisiana Public Service Commission and the Arkansas Public Service Commission.

Comment date: April 24, 1989, in accordance with Standard Paragraph E at the end of this notice.

4. Tampa Electric Co.

[Docket No. ER89-304-000]

Take notice that on March 30, 1989, Tampa Electric Company (Tampa Electric) tendered for filing a Letter of Commitment providing for the sale by Tampa Electric to the Utilities Commission, City of New Smyrna Beach, Florida (New Smyrna Beach) of capacity and energy from Tampa Electric's coal-fired resources. Tampa Electric states that the Letter of Commitment is submitted as a supplement to Service Schedule D (long-term interchange service) under the existing agreement for interchange service between Tampa Electric and New Smyrna Beach, designated as Tampa Electric Rate Schedule FERC No. 13.

Tampa Electric proposes an effective date of June 1, 1989 for the Letter of Commitment.

Copies of the filing have been served on New Smyrna Beach and the Florida Public Service Commission.

Comment date: April 24, 1989, in accordance with Standard Paragraph E at the end of this notice.

5. Maine Public Service Co.

[Docket No. ER89-305-000]

Take notice that on March 30, 1989, Maine Public Service Company (Maine Public) tendered for filing a proposed initial rate schedule pertaining to a Purchase Agreement (Agreement) between Maine Public and Boston Edison Company (Boston Edison) for the sale of capacity and energy to Boston Edison. Under this Agreement, Maine Public will sell its full entitlement to capacity and energy from Wyman Unit No. 4 to Boston Edison for the seven month period beginning April 1, 1989 and ending October 31, 1989 and that it be cancelled on October 31, 1989, in accord with the terms of the Agreement.

Comment date: April 24, 1989, in accordance with Standard Paragraph E at the end of this notice.

6. Consumers Power Co.

[Docket No. ER89-310-000]

Take notice that Consumers Power Company (Consumers) on March 31, 1989 tendered for filing its Certificate of Concurrence with Northern Indiana Public Service Company's (Northern Indiana) filing of Amendment No. 3 dated March 31, 1989 to the Operating Agreement dated May 1, 1979 among Consumers, the Detroit Edison Company (Detroit) and Northern Indiana. The Commission has designated the Operating Agreement as Consumer's Rate Schedule FERC No. 45.

Amendment No. 3 deals with service provided by Northern Indiana as well as with service provided by the Michigan companies. Amendment No. 3 changes rates for emergency service (Service Schedule A), short-term service (Service Schedule B) and interchange power (Service Schedule C), replacing the current fixed rates with flexible rates having a cost-based upper limit when either of the parties to the Operating Agreement generate the power being sold. It also provides for rates applicable to power being supplied from

third parties. A floor is set for emergency energy pricing in line with the floor accepted for filing in Docket No. ER88-504. Also, a cost-based floor is established for economy energy sales. Finally, "Service Schedule D—Fuel Conservation Energy" is cancelled by Amendment No. 3.

Comment date: April 24, 1989, in accordance with Standard Paragraph E at the end of this notice.

7. Virginia Turbo Power Systems-II, L.P.

[Docket No. QF89-205-000]

On March 24, 1989 Virginia Turbo Power Systems-II, L.P. (Applicant), of P.O. Box 1396, Houston, Texas, 77251, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Unionville, Orange County, Virginia. The facility will consist of a combustion turbine-generator, a heat recovery steam generator, a condensing-extraction steam turbine, a gas to water heat exchanger, a steam to water heat exchanger and a hot water storage tank. Thermal energy from the facility will be sold to Battlefield Farms, Inc. for use in heating an existing 11.8-acre greenhouse located adjacent to the cogeneration facility. The total net electric power production capacity of the facility will be 140 MW. The primary energy source will be natural gas. Installation is scheduled to commence during the fourth quarter of 1989.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

8. Virginia Turbo Power System-I, L.P.

[Docket No. QF89-204-000]

On March 24, 1989 Virginia Turbo Power Systems-I, L.P. (Applicant), of P.O. Box 1396, Houston, Texas, 77251, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to ¶ 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Stevensburg, Culpeper County, Virginia. The facility will consist of a combustion turbine-generator, a heat recovery steam generator, a condensing-extraction steam turbine generator, a gas to water heat exchanger and a hot water storage tank. Thermal energy from the facility will be sold to Van Wingerden of Culpeper, Inc. for use in heating an existing 12.0-acre greenhouse located adjacent to the cogeneration facility. The total net electric power production capacity of the facility will be 140 MW. The primary energy source will be natural gas. Installation is scheduled to commence during the fourth quarter of 1989.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commissions Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. QF88-166-002 et al.]

Pawtucket Power Associates, Inc., et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

April 12, 1989.

Take notice that the following filings have been made with the Commission:

1. Pawtucket Power Associates, Inc.

[Docket No. QF88-166-002]

On April 4, 1989, Pawtucket Power Associates, Inc. (Applicant), c/o Energy Management, Inc., 8 Newbury Street, Fifth floor, Boston, Massachusetts 02116 submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The toping-cycle cogeneration facility will be located in Pawtucket, Rhode Island. The facility will consist of one combustion turbine generator, one heat recovery steam generator and one extraction/condensing steam turbine generator. Themal energy recovered from the facility will be used by Colfax, Inc. for manufacturing of food products. The primary energy source will be natural gas. The facility is now expected to be on-line in November 1990.

The recertification is requested due to a change in the electric power production capacity from 53,536 kilowatts to 61,520 kilowatts, and a change of the applicant's mailing address.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

2. Frontier Energy Associates, L.P.

[Docket No. QF85-640-001]

On March 29, 1989, Frontier Energy Associates, L.P. (Applicant), of 201 South Union Street, P.O. Box 497, Olean, New York 14760, submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Jefferson County, Pennsylvania. The facility will consist of three dual fuel reciprocating engines, three heat recovery steam generators and a steam turbine generator unit. Heat recovered from the facility in the form of hot water will be used for greenhouse space heating. The maximum net electric power production capacity will be 16.178 MW. The primary energy source will be natural gas. Installation will begin in mid 1989.

The original application was filed by Frontier Energy Associates, and was granted on December 17, 1985 (33 FERC ¶ 62,385). The instant recertification is requested due to changes in the ownership of the facility, changes to the configuration of the facility and increases in the electric and steam outputs of the facility.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs:

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of

VOL 54 ISS 73 AP 18 1989 UMI

Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Project No. 8862-001 Alabama]

Coffeeville Hydroelectric Partners; Availability of Environmental Assessment

April 12, 1989.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 [Order No. 486, 52 FR 47897], the Office of Hydropower Licensing has reviewed the application for major license for the proposed Coffeeville Lock & Dam Water Power Project located on the Tombigbee River in Clarke and Choctaw Counties, Alabama, and has prepared an Environmental Assessment (EA) for the proposed project. In the EA, the Commission's staff has analyzed the potential environmental impacts of the proposed project and has concluded that approval of the proposed project, with appropriate mitigative measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Branch, Room 1000, of the Commission's offices at 825 North Capitol Street NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CP89-1178-000 et al.]

Paiute Pipeline Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Paiute Pipeline Co.

[Docket No. CP89-1178-000]

April 12, 1989.

Take notice that on April 10, 1989, Paiute Pipeline Company (Paiute), P.O. Box 94197, Las Vegas, Nevada 89193-4197, filed in Docket No. CP89-1178-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to provide an interruptible transportation service for Natural Gas Clearinghouse Inc. (NGC), a natural gas marketer, under Paiute's blanket certificate issued in Docket No. CP87-309-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Paiute states that pursuant to a transportation service agreement dated November 14, 1988, under its Rate Schedule IT-1, the transportation service will be provided for a primary term up to and including October 31, 1991, and month-to-month thereafter, subject to termination at the expiration of the primary term or upon the first day of any calendar month thereafter by either party upon thirty days written notice. Paiute proposes to transport up to 115,000 MMBtu equivalent of natural gas per peak day for NGC from the point of receipt at the interconnection between the facilities of Paiute and Northwest Pipeline Corporation at the Idaho-Nevada border. Paiute states that it would transport and redeliver the gas to NGC at delivery points which are identified in the transportation service agreement and that no new facilities will need to be constructed to provide the subject transportation service. Paiute estimates that it will transport for NGC approximately 11,499 MMBtu equivalent of natural gas on an average day and approximately 4,197,660 MMBtu equivalent of natural gas on an annual basis.

Paiute advises that service under the 120-day automatic provisions of §§ 284.223(a) of the Commission's regulations commenced on January 25, 1989, as reported in Docket No. ST89-2405-000.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

2. United Gas Pipe Line Co.

[Docket No. CP89-1153-000]

April 12, 1989.

Take notice that on April 5, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-1153-000 a request, pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205), for authorization to provide interruptible transportation service on behalf of OXY USA, Inc. (OXY), a producer of natural gas, under United's blanket certificate issued in Docket No. CP88-6-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open for public inspection.

Pursuant to an interruptible gas transportation agreement dated January 6, 1989, United proposes to transport up to 1,020 MMBtu of natural gas per day for OXY from an existing point of receipt located in Claiborne Parish, Louisiana to an existing point of delivery located in Iberia Parish, Louisiana. OXY has informed United that it expects to have the full 1,020 MMBtu transported on an average day and, based thereon, estimates that the annual transportation quantity would be 375,950 MMBtu. United advises that the transportation service commenced on March 1, 1989, as reported in Docket No. ST89-2768-000, pursuant to § 284.223(a) of the Commission's Regulations.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

3. El Paso Natural Gas Co.

[Docket No. CP89-1122-000]

April 13, 1989.

Take notice that on March 31, 1989, El Paso Natural Gas Company (El Paso), Post Office Box 1492, El Paso, Texas, 79978, filed an application in abbreviated form pursuant to section 7(b) of the Natural Gas Act, and sections 157.5, *et seq.*, and 157.7(a) of the Commission's Regulations, for permission and approval to abandon certain transportation and delivery service authorized by the Commission's order issued February 12, 1980, in Docket No. CP79-251 to be rendered by El Paso for the account of Western Gas Interstate Company (WGI), all as more fully set forth in the application on file with the Commission and open to public inspection.

The Commission's order in Docket No. CP79-251 granted permanent certificate authority for, *inter alia*, the transportation and delivery by El Paso of up to 2,300 Mcf of natural gas per day, on a best efforts basis, for the account of WGI and the delivery of such gas to Southern Union Company (Southern Union) at certain existing delivery points on El Paso's interstate transmission pipeline system in the States of Texas and New Mexico. Such service was to be provided in accordance with the provisions of a Gas Transportation Agreement dated January 31, 1979, (Transportation Agreement) between El Paso and WGI, which comprises special Rate Schedule T-17 to El Paso's FERC Gas Tariff, Third Revised Volume No. 2.

In accordance with the Transportation Agreement, El Paso agreed to accept, at an existing point of receipt located in San Juan County, New Mexico, up to 2,500 Mcf per day of natural gas acquired by WGI and to deliver equivalent quantities of natural gas, less shrinkage, if any, to Southern Union for the account of WGI at certain existing points of delivery located in Curry County, New Mexico, or Hutchinson County, Texas. In order to assist WGI in making such quantities of natural gas available to Southern Union, El Paso agreed to receive, gather, process, dehydrate, as required, and to transport and deliver such natural gas for the account of WGI on a best efforts basis. The primary term of the Transportation Agreement extended for a period of five (5) years from the date of initial deliveries and from year to year thereafter, subject to termination by either El Paso or WGI upon due notice to either party.

Ordering Paragraph (F) of the Commission's order issued February 12, 1980, in Docket No. CP79-251, required the Transportation service to commence within one (1) year from the date of the order. Deliveries did not commence within the one (1) year period specificed in the order or at any time thereafter. Therefore, the certificate authorization issued to El Paso in Docket No. CP79-251 has expired. Accordingly, El Paso and WGI have entered into a Letter Agreement dated February 16, 1989, terminating the Transportation Agreement, which would end the agreement designated special Rate Schedule T-17.

Comment date: May 4, 1989, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary

BILLING CODE 6717-01-M

[Docket Nos. CP89-1165-000, et al.]

Panhandle Eastern Pipe Line Co., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. Panhandle Eastern Pipe Line

[Docket No. CP89-1165-000]

April 11, 1989.

Take notice that on April 7, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251, filed in Docket No. CP89-1165-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP86-585-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Panhandle proposes to transport natural gas on a firm basis for Northern Indiana Fuel & Light Co., Inc. (NIFL). Panhandle explains that service commenced March 1, 1989, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-2840. Panhandle explains that the peak day quantity would be 2,405 Dt., the average daily quantity would be 2,405 Dt., and that the annual quantity would be 877,825 dekatherms. Panhandle explains that it would receive natural gas for NIFL's account at various receipt points in the states of Texas, Oklahoma, Kansas, Colorado, Wyoming, and Illinois. Panhandle states that it would redeliver the gas to NIFL in Allen County, Indiana.

Comment date: May 25, 1989 in accordance with Standard Paragraph G at the end of the notice.

2. United Gas Pipeline Co.

Docket No. CP89-1152-000]

April 11, 1989.

Take notice that on April 5, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-885-000 a request pursuant to Section 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of American Central gas Companies (American Central), a marketer of natural gas, under United's blanket certificate issued in Docket No. CP88-6-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United proposes to transport on an interruptible basis up to 185,400 MMBtu equivalent of natural gas on a peak day, 185,400 MMBtu equivalent on an average day, and 67,671,000 MMBtu equivalent on an annual basis. It is stated that United would receive the gas

VOL 54 ISS 73 AP 18 1989 UMI

for American Central's account at existing points on United's system in Louisiana, Texas, and Mississippi, and would deliver equivalent volumes at existing points on UnRed's system in Louisiana, Texas, Mississippi and Alabama. It is asserted that the transportation service would be effected utilizing existing facilities and would not require any construction of additional facilities. It is explained that the transportation service commenced February 13, 1989, as reported in Docket No. ST89-2780.

Comment date: May 25, 1989, in accordance with Standard Paragraph G at the end of this notice

3. United Gas Pipe Line Co.

[Docket No. CP89-1158-000]

April 11, 1989.

Take notice that on April 5, 1989, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-1148-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to provide an interruptible transportation service on behalf of Williams Gas Marketing (Williams), a marketer of natural gas, under its blanket certificate issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United states that it proposes to transport natural gas on behalf of Williams from a point of receipt located in Vermilion Parish, Louisiana to various points of delivery located in Louisiana and Texas.

United further states that the maximum daily, average daily and annual quantities that it would transport on behalf of Williams would be 51,500 MMBtu equivalent, 51,500 MMBtu equivalent and 18,797,500 MMBtu equivalent of natural gas, respectively.

United indicates that in Docket No. ST89-2772, filed with the Commission on March 21, 1989, it reported that transportation service for Williams had begun under the 120-day automatic authorization provisions of § 284.223(a).

Comment date: May 25, 1989, in accordance with Standard Paragraph G at the end of this notice.

Valley Gas Transmission, Inc.

[Docket No. CP89-1162-000]

April 11, 1989.

Take notice that on April 6, 1989, Valley Gas Transmission, Inc. (Valley), 1301 McKinney, Suite 700, Houston, Texas 77010, filed in Docket No. CP89-1162-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to provide transportation service on behalf of Tennessee Exchange Corporation (Tennessee), under Valley's blanket certificate issued in Docket No. CP86-171-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Valley sequests authorization to transport, on an interruptible basis, up to a maximum of 3,000 MMBtu of natural gas per day for Valley from a receipt point located in Louisiana to a delivery point located in Louisiana. Valley anticipates transporting, on an average day 1,300 MMBtu and an annual volume of 1,900,000 MMBtu.

Valley states that the transportation of natural gas for Tennessee commenced February 1, 1989, as reported in Docket No. ST89-2731-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations and the blanket certificate issued to Valley in Docket No. CP86-171-000.

Comment date: May 25, 1989, in accordance with Standard Paragraph G at the end of this notice

5. Tennessee Gas Pipeline Co.

[Docket No. CP89-1158-000]

April 12, 1989.

Take notice that on April 6, 1989, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89-1158-000 a request pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service for Chevron USA, Inc. (Chevron), a producer, under the blanket certificate issued in Docket No. CP87-115-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Tennessee states that pursuant to a transportation agreement dated February 21, 1989, under its Rate Schedule IT, it proposes to transport up to 60,000 dekatherms (dt) per day equivalent of natural gas for Chevron. Tennessee states that it would transport the gas from receipt points located offshore Louisiana and offshore Texas, and deliver such gas to various delivery points off Tennessee's system located in the state of Louisiana.

Tennessee advises that service under § 284.223(a) commenced February 25, 1989, as reported in Docket No. ST89-2774 (filed March 22, 1989). Tennessee further advises that it would transport 60,000 dt on an average day and 21,900,000 dt annually.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

6. Panhandle Eastern Pipe Line Company

[Docket No. CP89-1161-000]

April 12, 1989.

Take notice that on April 6, 1989, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251-1642, filed in Docket No. CP89-1161-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide a firm transportation service for Midland Cogeneration Venture, Limited Partnership (MCV), an end user, under the blanket certificate issued in Docket No. CP86-585-000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Panhandle states that pursuant to a transportation agreement dated October 1, 1988, under its Rate Schedule PT, it proposes to transport up to 25,000 dekatherms (dt) per day equivalent of natural gas for MCV. Panhandle states that it would transport the gas from receipt points in Texas, Oklahoma, Kansas, Colorado, Wyoming and Illinois, and deliver such gas, less fuel used and unaccounted for line loss, to Michigan Gas Storage in Oakland County, Michigan.

Panhandle advises that service under § 284.223(a) commenced March 1, 1989, as reported in Docket No. ST89-2837. Panhandle further advises that it would transport 35,000 dt on an average day and 12,775,500 dt annually.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

7. Transcontinental Gas Pipe Line Corp.

[Docket No. CP89-1097-000, CP89-1098-000, CP89-1099-000, CP89-1100-000, CP89-1101-000, CP89-1102-000, CP89-1103-000, CP89-1104-000, CP89-1107-000, CP89-1110-000, and CP89-1154-000]*

Take notice that on March 29, 1989 and on April 5, 1989, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket Nos. CP89-1097-000, *et al.*, applications pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon firm sales entitlement to eleven customers, all as more fully set forth in the applications on file with the Commission and open to public inspection.[1]

Transco states that pursuant to § 284.10 of the Commission's Regulations, the customers, as noted in the Appendix, converted firm sales entitlements under their respective Service Agreements to firm transportation under Transco's Rate Schedule FT. Transco states that it now requests to abandon firm sales entitlement to each customer associated with the reductions in firm sales service to be effective as of the dates noted on the Appendix. Transco states that pursuant to § 284.10(f)(2), the exercise of contract conversion rights by a firm sales customer under § 284.10(d) constitutes consent by that customer to the abandonment of sales service to the extent of the conversion.

Comment date: May 3, 1989, in accordance with Standard Paragraph F at the end of this notice.

[1] See attached appendix for details of each application, including customer name, rate schedule, revised sales entitlement, etc.

* The above proceedings are not consolidated.

8. United Gas Pipe Line Co.

[Docket No. CP89-1143-000]

April 12, 1989.

Take notice that on April 5, 1989, United Gas Pipe Line Company, P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-1143-000, a request pursuant to §§ 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to provide an interruptible transportation service on behalf of Bocce Energy Corporation (Bocce), a marketer of natural gas, under its blanket certificate issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United states that pursuant to an Interruptible Gas Transportation Agreement dated February 9, 1989, it would transport a maximum daily quantity of 20,600 MMBtu for Bocce. United further states that it would receive the natural gas at various existing receipt points on its system in Louisiana and Texas and would redeliver the natural gas in Louisiana and Mississippi. United indicates that the estimated average daily and annual quantities would be 20,600 MMBtu and 7,519,000 MMBtu, respectively.

United states that it commenced the transportation of natural gas for Bocce on March 1, 1989, as reported in Docket No. ST89-2736-000, for a 120-day period pursuant to § 284.223(a) of the Commission's Regulations (18 CFR 284.223(a)).

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

9. West Texas Gathering Co.

[Docket No. CP89-1120-000]

April 12, 1989.

Take notice that on March 31, 1989, West Texas Gathering Company (West Texas), 550 West Lake Boulevard, Suite 170, Houston, Texas 77079, filed in Docket No. CP89-1120-000 an application pursuant to section 7(c) of the Natural Gas Act and § 284.221 of the Commission's Regulations for a blanket certificate of public convenience and necessity authorizing the transportation of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

West Texas states the authorization requested in this blanket open-access transportation certificate is being filed concurrently with, and as an integrated part of, a comprehensive open-access plan designed by West Texas to provide for (1) completion at the earliest practicable date of West Texas' transition to full open-access transporter status; and (2) adoption of the rate recovery procedure prescribed by Order No.

West Texas indicates it filed, on February 15, 1989, tariff sheets to set forth rates, terms and conditions for open-access transportation under section 311 of the Natural Gas Policy Act of 1978. West Texas states that the filing was accepted subject to conditions in an order issued on March 17, 1989, in Docket No. RP89-67-000. West Texas states that it would comply with the conditions in paragraph (c) of § 284.221 of the Commission's Regulations, which paragraph refers to Subpart A of Part 284 of the Commission's Regulations.

Comment date: May 3, 1989, in accordance with Standard Paragraph F at the end of this notice.

10. Texas Gas Transmission Corp.

[Docket No. CP89-1119-000]

April 12, 1989.

Take notice that on March 31, 1989, Texas Gas Transmission Corporation (Texas Gas), P.O. Box 1160, Owensboro, Kentucky 42302, filed in Docket No. CP89-1119-000, an application for a certificate of public convenience and necessity pursuant to sections 7(b) and

BEST COPY AVAILABLE

VOL 54 ISS 73 AP 18 1989 UMI

7(c) of the Natural Gas Act (NGA) to implement a Gas Inventory Charge (GIC) mechanism applicable to sales customers purchasing service pursuant to Rate Schedules G, CD, CDL and proposed Rate Schedules CDN and GN, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Texas Gas states that the GIC proposal as outlined in the application establishes a charge which would be assessed to particular customers not purchasing at certain threshold levels to recover the cost to Texas Gas of contracting for and maintaining supply reserves and deliverability sufficient to stand ready to serve that customer's daily contract demand and annual requirement levels, which Texas Gas indicates in recent years have, generally, been substantially in excess of the level of individual customers' actual purchases.

Texas Gas states that the GIC unit charge would be derived, as explained in the application, by applying the then effective Commission interest rate times 125 percent of the weighted average cost of gas purchased from all field suppliers included each year in Texas Gas' November quarterly purchased gas adjustment filing.

Texas Gas states that the unit charge would be assessed against deficiencies in purchases by those sales customers who fail to purchase quantities in an amount at least equal to that customer's assigned "Seasonal Quantity Level." It is indicated that each customer's Seasonal Quantity Level would be established for each gas year and be derived from seasonal threshold levels which represent individualized load factors expressed as a percentage of each customer's applicable daily contract demand. Texas Gas states also that customers shall have the right annually to adjust their Seasonal Quantity Level.

Texas Gas explains that the GIC represents the cost incurred by Texas Gas of holding gas in inventory to meet the customer's regulatory right to call for a specified quantity of supply at any time. Its purpose, as explained by Texas Gas, is to (1) provide customers the opportunity to make an informed economic choice in selecting the supply option or options which meet their supply portfolio planning requirement, and (2) to avoid the billing of retrospective take-or-pay costs in current sales rates by providing sales customers the incentive to nominate carefully and prudently their intended sales demands, requiring payment on a current basis for excessive nominated requirements.

Texas Gas also is requesting permission to automatically abandon its sales service obligation to the extent any existing sales customer chooses to convert all or a portion of its sales service entitlement in favor of firm transportation, pursuant to Order No. 500.

Comment date: May 3, 1989, in accordance with Standard Paragraph F at the end of this notice.

11. United Gas Pipe Line Co.

[Docket No. CP89-1149-000]

April 12, 1989.

Take notice that on April 5, 1989, United Gas Pipeline Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP89-1149-000 a request pursuant to §§ 157.205 and 284.223 (18 CFR 157.205 and 284.223) of the Commission's Regulations under the Natural Gas Act for authority to provide interruptible transportation service for Texaco, Inc. (Texaco), a producer of natural gas, under United's blanket transportation certificate which was issued by Commission order on January 15, 1988, in Docket No. CP88-6-000, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United indicates that it will receive the gas from Texaco at various existing delivery points in Panola, Rusk, Harrison, Smith Gregg and Cherokee Counties, Texas, and deliver the gas for the account of Texaco at various interconnections in Panola, Smith, Upshur, Gregg, Rusk Harrison and Shelby Counties, Texas. United will transport the gas pursuant to its Rate Schedule ITS.

United proposes to transport up to 51,500 MMBtu of gas per peak and average day and approximately 18,797,500 MMBtu of gas annually. United indicates that the transportation service commenced under the 120-day automatic authorization of § 284.223(a) of the Commission's Regulations on March 2, 1989, pursuant to a transportation agreement dated May 11, 1988, as amended January 25, 1989, United notified the Commission of the commencement of the transportation service in Docket No. ST89-2766-000 on March 21, 1989.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

12. Tennessee Gas Pipeline Co.

[Docket No. CP89-1159-000]

April 12, 1989.

Take notice that on April 6, 1989, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP89-1159-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to transport natural gas for Chevron USA, Inc. (Chevron), a producer, pursuant to Tennessee's blanket certificate issued in Docket No. CP87-115-000 and section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Specifically, Tennessee requests authority to transport up to 25,000 dt equivalent of natural gas per day for Chevron on an interruptible basis pursuant to a transportation agreement dated February 17, 1989, between Tennessee and Chevron. Tennessee states that the transportation agreement provides for Tennessee to receive the gas at specified points located offshore Louisiana for redelivery to various delivery points located at interconnections with the facilities of Columbia Gulf Transmission Company, Transcontinental Gas Pipe Line Corporation, United Gas Pipe Line Company, Southern Natural Gas Company, ANR Pipeline Company, and Monterey Pipeline Company.

Tennessee indicates it would provide the service for a primary term of two years from the date of execution of the agreement to be continued on a month-to-month basis thereafter. Tennessee indicates, however, that either party may terminate this agreement at any time upon at least thirty days prior written notice to the other party. Tennessee states that it would charge the rates and abide by the conditions provided by its Rate Schedule IT.

It is indicated that the estimated maximum daily volume and average day volume would be 25,000 dt equivalent of natural gas and that the annual volume would be 9,125,000 dt equivalent of natural gas. Tennessee states that it commenced a 120-day transportation service for Chevron on March 1, 1989, as reported in Docket No. ST89-2775-000. It is indicated that Tennessee would use existing facilities to implement the service.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

13. Northern Natural Gas Co., Division of Enron Corp.

[Docket No. CP89-1155-000]

April 12, 1989.

Take notice that on April 5, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, Houston, Texas 77002, filed in Docket No. CP89-1155-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon partially firm sales service to Midwest Gas, a division of Iowa Public Service Company (Midwest Gas) (formerly Iowa Public Service Company).

Midwest Gas, it is said, has elected to convert 22,000 Mcf per day of firm sales entitlements to firm transportation. It is stated that the contract demand conversion option made available to Midwest Gas is consistent with Order Nos. 436 and 500 guidelines and the Stipulation and Agreement in Docket No. RP85-206-000. Northern seeks approval to permanently abandon that portion of its certificated sales obligation to Midwest Gas which was converted to firm transportation service.

Pursuant to 18 CFR 284.10(d)(2) the exercise of the customer's option to convert constitutes consent to the proposed abandonment.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

14. Northern Natural Gas Co., Division of Enron Corp.

[Docket No. CP89-1129-000]

April 12, 1989.

Take notice that on March 31, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, Houston, Texas 77002, filed in Docket No. CP89-1129-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 284.223) for authorization to perform an interruptible transportation service for Citizens Gas Supply Corp. (Citizens), a marketer, under Northern's blanket certificate issued in Docket No. CP86-435-000, pursuant to section 7(c) of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern states that pursuant to an interruptible transportation service agreement dated February 21, 1989, it proposes to receive up to 60 billion Btu per day from specified points located onshore and offshore Texas and Louisiana and redeliver the gas at specified points located onshore Texas and Louisiana and offshore Texas, Mississippi, and Louisiana. Northern states that the peak day volumes, average day volumes, and annual volumes would be 60 billion Btu, 45 billion Btu, and 21,900 billion Btu, respectively. It is stated that on February 21, 1989, Northern commenced a 120-day transportation service for Citizens under § 284.223(a) as reported in Docket No. ST89-2806-000.

Northern also states that no facilities need be constructed to implement the service. It is indicated that Northern would provide the service for a primary term expiring one year from the date of initial transportation and would continue the service on a month to month basis unless terminated by either party upon thirty days prior written notice to the other party. Northern proposes to charge the rates and abide by the terms and conditions of its Rate Schedule IT-1.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

15. Northern Natural Gas Co., Division of Enron Corp.

[Docket No. CP89-1160-000]

April 12, 1989.

Take notice that on April 6, 1989, Northern Natural Gas Company, Division of Enron Corp. (Northern), 1400 Smith Street, Houston, Texas 77002, filed in Docket No. CP89-1160-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon partially firm sales service to Iowa Electric Light and Power Company (Iowa Electric).

Iowa Electric, it is said, has elected to convert 18,750 Mcf per day of firm sales entitlements to firm transportation. It is stated that the contract demand conversion option made available to Iowa Electric is consistent with Order Nos. 436 and 500 guidelines and the Stipulation and Agreement in Docket No. RP85-206-000. Northern seeks approval to permanently abandon that portion of its certificated sales obligation to Iowa Electric which was converted to firm transportation service.

Pursuant to 18 CFR 284.10(d)(2) the exercise of the customer's option to convert constitutes consent to the proposed abandonment.

Comment date: May 3, 1989, in accordance with Standard Paragraph F at the end of this notice.

16. United Gas Pipe Line Co.

[Docket No. CP89-1150-000]

April 12, 1989.

Take notice that on April 5, 1989, United Gas Pipeline Company (United), P.O. Box 1478, Houston, Texas 77251, filed in Docket No. CP89-1150-000 a request pursuant to §§ 157.205 and 284.223 of the Commission's Regulations under the Natural Gas Act for authorization to transport natural gas under the blanket certificate issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

United proposes to transport natural gas on an interruptible basis for Texaco Gas Marketing, Inc., (Texaco). United explains that service commenced February 27, 1989, under § 284.223(a) of the Commission's Regulations, as reported in Docket No. ST89-2770. United explains that the peak day quantity would be 103,000 MMBtu, the average daily quantity would be 103,000 MMBtu, and that the annual quantity would be 37,595,000 MMBtu. United explains that it would receive natural gas for Texaco's account at various receipt points in the state of Louisiana and Offshore Louisiana. United states that it would redeliver the gas at existing interconnections in the state of Louisiana.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

17. CNG Transmission Corp.

[Docket No. CP89-1127-000]

April 12, 1989.

Take notice that on March 31, 1989, CNG Transmission Corporation (CNG), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP89-1127-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas to Columbia Gas of Ohio (Columbia of Ohio) and the use of facilities constructed under Natural Gas Policy Act of 1978 section 311 authorization, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

CNG proposes to sell up to 1,500 dt equivalent of natural gas per day and 60,000 dt equivalent on an annual basis to Columbia of Ohio for resale to customers in the community of Lithopolis, Ohio. It is stated that the sale would be made pursuant to the terms of CNG's Rate Schedule SCQ and a contract between CNG and Columbia of Ohio dated May 16, 1988. It is asserted that the rate charged would be the rate specified in Rate Schedule SCQ of CNG's currently effective FERC Gas Tariff, Volume No. 1. It is explained that the term of the state would commence on the date of initial deliveries and

VOL 54 ISS 73 AP 18 1989 UMI

would continue until December 31, 1988, and thereafter until terminated by either party with 12 months notice.

It is stated that the deliveries would be made at an existing interconnection between CNG and Columbia of Ohio located in Franklin County, Ohio, which was constructed in August 1988 under Section 311 authorization, enabling CNG to transport gas for Columbia of Ohio. CNG requests section 7(c) authorization for the delivery point in order to make jurisdictional sales. It is explained that the sale would benefit CNG by increasing throughput on its system and would benefit Columbia of Ohio by expanding its retail market.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

18. United Gas Pipe Line Co.

[Docket No. CP89-1145-000]

April 12, 1989.

Take notice that on April 5, 1989, United Gas Pipe Line Company (United), P.O. Box 1478 Houston, Texas 77251-1478, filed in Docket No. CP89-1145-000 a request pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of Catamount Natural Gas, Inc., (Catamount), a natural gas marketer, under its blanket authorization issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United would perform the proposed interruptible transportation service for Catamount, pursuant to an interruptible transportation service agreement dated December 15, 1988 (Contract No. TI-21-2012). The transportation agreement is effective for a primary term of one month from the date of first delivery thereunder or such date that the parties mutually agree to terminate the agreement, and shall continue month to month thereafter unless terminated by thirty days written notice by either party. United proposes to transport up to a maximum of 51,500 MMBtu of natural gas on an average and peak day; and on an annual basis 18,797,500 MMBtu of natural gas for Catamount. United proposes to receive the subject gas at the existing interconnection between United and facilities at Eugene Block 32, Offshore, Louisiana, and the existing interconnection between United and Sea Robin Pipeline Company near Erath, Vermilion Parish, Louisiana. It is stated that the points of delivery are located in Ascension Parish and St. Mary Parish, Louisiana. United avers that no new facilities are required to provide the proposed service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self-implementing provision of § 284.223(a)(1) of the Commission's Regulations. United commenced such self-implementing service on March 11, 1989, as reported in Docket No. ST89-2738-000.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

19. United Gas Pipe Line

[Docket No. CP89-1151-000]

April 12, 1989.

Take notice that on April 5, 1989, United Gas Pipe Line Company, (United) P.O. Box 1478, Houston, Texas, 77251-1478 filed in Docket No. CP89-1151-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to transport natural gas on behalf of American Central Gas Companies (American Central), under its blanket authorization issued in Docket No. CP88-6-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

United would perform the proposed interruptible transportation service for American Central, a marketer of natural gas, pursuant to a interruptible gas transportation service agreement dated November 9, 1988, as amended on February 20, 1989 (Contract No. TI-21-1971). The term of the transportation agreement is for a primary term of one month from the first delivery of gas and shall continue in effect for successive one month terms thereafter until terminated. United proposes to transport on a peak day up to 185,400 MMBtu; on an average day up to 185,400 MMBtu; and on an annual basis 67,671,000 MMBtu for American Central. United proposes to receive the subject gas from various exiting points of receipt on its system for delivery to American Central at existing points in Alabama, Mississippi, Texas and Louisiana. The proposed rate to be charged its pursuant to United's Rate Schedule ITS. United indicates that it would be using existing facilities to provide the proposed transportation service.

It is explained that the proposed service is currently being performed pursuant to the 120-day self implementing provision of § 284.223(a)(1) of the Commission's Regulations. United commenced such self-implementing service on February 28, 1989, as reported in Docket No. ST88-2764-000.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

20. Southern Natural Gas Co.

[Docket No. CP89-1163-000]

April 12, 1989.

Take notice that on February 21, 1989, Southern Natural Gas Company (Southern), Post Office Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP89-1163-000 a request pursuant to § 157.205 of the Commission's Regulations for authorization to transport natural gas on behalf of Texaco, Inc. (Texaco), a producer of natural gas, under Southern's blanket certificate issued in Docket No. CP88-316-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Southern proposes to transport, on an interruptible basis, up to 50,000 MMBtu equivalent of natural gas on a peak day, 25,000 MMBtu equivalent on an average day, and 9,125,000 MMBtu equivalent on an annual basis for Texaco. It is stated that Southern would receive the gas at an existing point on Southern's system on Matagorda Island, offshore Texas, and would deliver equivalent volumes at existing points on Southern's system near the terminus of the Matagorda Offshore Pipeline System in Refugio County, Texas. It is asserted that Southern would utilize existing facilities and that no construction of additional facilities would be required. It is explained that the transportation service commenced February 24, 1989, under the automatic authorization provisions of § 284.223 of the Commission's Regulations, as reported in Docket No. ST89-2700.

Comment date: May 30, 1989, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs:

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP89-124-000]

CNG Transmission Corp.; Proposed Changes in FERC Gas Tariff

April 12, 1989.

Take notice that CNG Transmission Corporation ("CNG"), on March 31, 1989, pursuant to Section 4 of the Natural Gas Act and the Commission's Order No. 500, as amended, filed the following revised tariff sheets to Original Volume No. 1 of its FERC Gas Tariff:

Original Sheet Nos. 161A, 161B and 161C
First Revised Sheet Nos. 34, 99, 161 and 162
Third Revised Sheet Nos. 51, 52, 58, 60, 85 and 86
Fourth Revised Sheet No. 32
Seventh Revised Sheet No. 31

The proposed effective date of the revised tariff sheets is May 1, 1989.

The purpose of the filing is to modify CNG's tariff to permit the passthrough of take-or-pay-related costs from CNG's producer suppliers. CNG is proposing tariff sheets that will permit the passthrough of 75 percent of its producer-related take-or-pay costs—broadly defined to include take-and-pay and take-or-pay buyout, buydown and contract reformation costs, both cash and non-cash—that it has paid or incurred or is obligated to pay or incur under settlements entered into with producers through March 31, 1989. Twenty-five percent of the take-or-pay costs would be recovered through direct bills to CNG's sales customers and 50 percent of all such costs would be recovered through a surcharge to the commodity component of CNG's sales, transportation and storage injection rates. CNG, for purposes of this filing, utilizes the deficiency method set out in Order No., 500 to allocate take-or-pay costs among customers.

The filing seeks to collect 75 percent of the current take-or-pay principal cash balance from producers of $7.3 million and 75 percent of the non-cash consideration of approximately $1.0 million, plus applicable interest.

Copies of the filing were served upon CNG's customers as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a protest or motion to intervene with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR § 385.214 and 385.211). All motions or protests should be filed on or before April 18, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

By the Commission

Lois D. Cashell,

Secretary.

[Docket Nos. RP89-50-000, CP88-179-013, et al., and CP89-555-000 (Unconsolidated)]

Florida Gas Transmission Co.; Informal Conference

April 11, 1989.

Take notice that an informal conference will be convened in the above-captioned proceedings on May 3, 1989, at 10:00 a.m. at the offices of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. The conference is being convened at the request of Florida Gas Transmission Company in order to discuss the daily and annual contract quantity nominations made by customers as part of the capacity allocation process in these proceedings.

Any party, as defined by 18 CFR 385.102(c), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

BILLING CODE 6717-01-M

[Docket No. RP89-130-001]

Transwestern Pipeline Co.; Proposed Changes in FERC Gas Tariff

April 12, 1989.

Take notice that Transwestern Pipeline Company (Transwestern) on April 7, 1989 tenders for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following sheets:

Substitute 34th Revised Sheet No. 6
Substitute 35th Revised Sheet No. 6

Transwestern states that these tariff sheets reflect revisions to two tariff sheets originally filed on March 31, 1989 in Docket No. RP89-130-000. Subsequent to the March 31, 1989 filing, Transwestern discovered that the above tariff sheets reflect the correct proposed surcharges but do not reflect the currently effective transportation rates approved effective February 1, 1989, by order issued January 31, 1989, in Transwestern's rate case, Docket No. RP89-48-000, and should be substituted

VOL
54
ISS
73
AP
18
1989
UMI

for those filed on March 31, 1989, in Docket No. RP89-130-000.

Transwestern requests that the Federal Energy Regulatory Commission grant any and all waivers of its rules, regulations and orders as may be necessary, so as to permit Substitute 35th Revised Sheet No. 9 to become effective April 1, 1989 and Substitute 34th Revised Sheet No. 6 to become effective February 1, 1989, as originally proposed in the March 31, 1989 filing in Docket No. RP89-130-000.

Copies of the Filing were served on Transwestern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20428, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before April 19, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-51730; FRL-3557-9]

Toxic and Hazardous Substances; Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). This notice announces receipt of 44 such PMNs and provides a summary of each.

DATES: Close of Review Periods:

P 89-440, 89-441—May 30, 1989.

P 89-447, 89-448, 89-449—May 31, 1989.

P 89-450—June 3, 1989.

P 89-451—May 31, 1989.

P 89-452—May 31, 1989.

P 89-452, 89-453—June 3, 1989.

P 89-454—May 31, 1989.

P 89-455, 89-456—June 3, 1989.

P 89-457, 89-458, 89-459—June 4, 1989.

P 89-461, 89-462, 89-463—June 5, 1989.

P 89-464, 89-465, 89-466, 89-467, 89-468—June 6, 1989.

P 89-469—June 7, 1989.

P 89-470—May 28, 1989.

P 89-471, 89-472, 89-473, 89-474, 89-475, 89-476—June 7, 1989.

P 89-477, 89-478, 89-479, 89-480, 89-481, 89-482, 89-483, 89-484, 89-485, 89-486, 89-487, 89-488—June 10, 1989.

P 89-488—June 11, 1989.

Written comments by:

P 89-440, 89-441—April 30, 1989.

P 89-447, 89-448, 89-449—May 1, 1989.

P 89-450—May 4, 1989.

P 89-451—May 1, 1989.

P 89-452, 89-453—May 4, 1989.

P 89-454—May 1, 1989.

P 89-455, 89-456—May 4, 1989.

P 89-457, 89-458, 89-459—May 5, 1989.

P 89-461, 89-462, 89-463—May 6, 1989.

P 89-464, 89-465, 89-466, 89-467, 89-468—May 7, 1989.

P 89-469—May 8, 1989.

P 89-470—April 28, 1989.

P 89-471, 89-472, 89-473, 89-474, 89-475, 89-476—May 8, 1989.

P 89-477, 89-478, 89-479, 89-480, 89-481, 89-482, 89-483, 89-484, 89-485, 89-486, 89-487, 89-488—May 11, 1989.

P 89-488—May 12, 1989.

ADDRESS: Written comments identified by the document control number "[OPTS-51730]" and the specific PMN number should be sent to: Document Control Office (TS-790), Office of Toxic Substances, Environmental Protection Agency, 401 M Street, SW., Room 201 East Tower, Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. EB-44, 401 M Street, SW., Washington, DC 20460, (202) 554-1404, TTD (202) 554-0551.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the nonconfidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete nonconfidential document is available in the Public Reading Room NE-G004 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

P 89-440

Manufacturer. Mazer Chemicals Div. of PPG Chemicals.

Chemical. (S) Ethanol, 2-[2-hydroxypropyl]amine.

Use/Production. (S) Adjust ph of synthetic cutting and lubricants and coolants. Prod. range: 30,000-50,000 kg/yr.

P 89-441

Manufacturer. Mazer Chemicals Div. of PPG Chemicals.

Chemical. (S) Ethanol, 2-[Bis-2-hydroxypropyl]amine.

Use/Production. (S) Adjust ph of synthetic cutting and grinding lubricants and coolants. Prod. range: 15,000-30,000 kg/yr.

P 89-447

Manufacturer. E.I. Du Pont De Nemours & Co., Inc.

Chemical. (G) Styrene acrylic peroxide copolymer.

Use/Production. (G) Destructive use. Prod. range: Confidential.

P 89-448

Manufacturer. Confidential.

Chemical. (G) Cyclic phosphate.

Use/Production. (G) Additive flame retardant. Prod. range: Confidential.

P 89-449

Manufacturer. E.I. Du Pont & De Nemours & Co., Inc.

Chemical. (G) Polyvinyl alcohol.

Use/Production. (G) Disposable nonwoven products. Prod. range: Confidential.

Toxicity Data. Skin irritation: negligible species (Rabbit). Mutagenicity: negative. Skin sensitization: negative species (Guinea pig).

P 89-450

Manufacturer. E.I. Du Pont & De Nemours & Co., Inc.

Chemical. (G) Vinyl acetate copolymer.

Use/Production. (G) Intermediate. Prod. range: Confidential.

P 89-451

Manufacturer. Confidential.

Chemical. (G) Silicone-imide black copolymer.

Use/Production. (G) Electronics, separation membrane coatings. Prod. range: Confidential.

P 89-452

Manufacturer. Confidential.

Chemical. (G) Silicone-imide black copolymer.

Use/Production. (G) Electronics, separation membrane coatings. Prod. range: Confidential.

Toxicity Data. Mutagenicity: negative.

P 89-453

Manufacturer. Confidential.

Chemical. (G) Silicone-imide black copolymer.

Use/Production. (G) Electronics, separation membrane coating. Prod. range: Confidential.

P 89-454

Importer. Polysar Inc.

Chemical. (G) Amine substituted cycloaliphate epoxide.

Use/Import. (G) Open, nondispersive uses. Import range: Confidential.

P 89-455

Manufacturer. Eastman Chemicals Division.

Chemical. (S) Reaction mixture resulting from the treatment of p-diisopropylbenzene with air.

Use/Production. (S) Chemical reactant. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 3,200 mg/kg species (Rat). Eye irritation: slight species (Rabbit). Skin irritation: moderate species (Rabbit). Mutagenicity: negative. Skin sensitization: negative species (Guinea pig).

P 89-456

Manufacturer. The Dow Chemical Company.

Chemical. (G) Unsaturated organic substituted diketone.

Use/Production. (S) Intermediate for polymer manufacture. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 2,000 mg/kg species (Rat). Eye irritation: moderate species (Rabbit). Skin irritation: negligible species (Rabbit).

P 89-457

Manufacturer. Reichhold Chemicals, Inc.

Chemical. (G) Unsaturated polyester resin.

Use/Production. (S) Automotive body patch resin. Prod. range: Confidential.

P 89-458

Manufacturer. Amoco Petroleum Additive Company.

Chemical. (G) Dithiophosphoric acid ester.

Use/Production. (S) Chemical intermediate. Prod. range: Confidential.

Toxicity Data. Acute dermal toxicity: LD50 > 2 g/kg species (Rabbit). Inhalation toxicity: LC50 > 0.198 mg/1 species (Rat). Eye irritation: strong species (Rabbit). Skin irritation: moderate species (Rabbit).

P 89-459

Manufacturer. Amoco Petroleum Additive Company.

Chemical. (G) Metallo dithiophosphate.

Use/Production. (S) Additive in motor oil. Prod range: Confidential.

Toxicity Data. Acute dermal toxicity: LD50 > 2 g/kg species (Rabbit). Inhalation toxicity: LC50 > 1 mg/1 species (Rat). Skin irritation: strong species (Rabbit).

P 89-461

Manufacturer. Confidential.

Chemical. (G) Brominated alkylated aniline.

Use/Production. (G) Chemical intermediate. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 3,204 mg/kg species (Rat). Acute dermal toxicity: LD50 10,300 mg/kg species (Rabbit). Eye irritation: none species (Rabbit). Skin irritation: negligible species (Rabbit). Mutagenicity: negative.

P 89-462

Manufacturer. Confidential.

Chemical. (G) Naphthoic phenyl ester.

Use/Production. (G) Intermediates for photochemicals. Prod. range: Confidential.

P 89-463

Manufactuer. Confidential.

Chemical. (G) Polymer of polyalkylene glycol; alkyl diol; and monocyclic dicarboxylic acid, dialkyl ester.

Use/Production. (S) Chemical intermediate. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 5,000 mg/kg species (Rat). Static acute toxicity: LC50 680 mg/1 time 96 mg/1 species (Fathead minnow). Eye irritation: slight species (Rabbit). Skin irritation: negligible species (Rabbit).

P 89-464

Manufacturer. The Dow Chemical Company.

Chemical. (G) Toluene diisocyanate prepolymer.

Use/Production. (G) Raw material polyurethane foam. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 4,000 mg/kg species (Rat). Inhalation toxicity: LC50 13.9 ppm species (Rat).

P 89-465

Manufacturer. The Dow Chemical Company.

Chemical. (G) Toluene dissocyanate prepolymer.

Use/Production. (G) Raw material polyurethane foam. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 4,000 mg/kg species (Rat). Inhalation toxicity: LC50 13.9 ppm species (Rat).

P 89-466

Manufacturer. The Dow Chemical Company.

Chemical. (G) Thermoplastic polyurethane resin.

Use/Production. (S) Extrusion of plastic articles. Prod. range: Confidential.

P 89-467

Manufacturer. The Dow Chemical Company.

Chemical. (G) Thermoplastic polyurethane resin.

Use/Production. (S) Extrusion of plastic articles. Prod. range: Confidential.

P 89-468

Importer. Confidential.

Chemical. (G) Aliphatic polycarboxylic acid metal salt.

Use/Import. (G) Continued use bleaching agent. Import range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 5.0 g/kg species (Rat). Acute dermal toxicity: LD50 > 2.0 g/kg species (Rabbit). Static acute toxicity: LC50 > 1,800 mg/l time 96h species (Rainbow trout). Eye irritation: none species (Rabbit). Mutagenicity: negative. Skin sensitization: negative species (Guinea pig).

P 89-469

Manufacturer. Eastman Kodak Company.

Chemical. (S) 1-(2-Chloroethyl)-4-(1,1-dimethylethyl)benzene.

Use/Production. (G) Chemical intermediate. Prod. range: 2,000-10,000 kg/yr.

Toxicity Data. Acute oral toxicity: LD50 > 5,000 mg/kg species (Rat). Acute dermal toxicity: LD50 > 20 ml/kg species (Rat). Eye irritation: slight species (Rabbit). Skin irritation: moderate species (Guinea pig). Skin sensitization: negative species (Guinea pig).

P 89-470

Manufacturer. Confidential.

Chemical. (G) Copper phthalocyanine derivative.

Use/Production. (G) Additive for printing inks. Prod. range: Confidential.

P 89-471

Manufacturer. Eastman Kodak Company.

Chemical. (G) Substituted hydrazinopyrazole.

Use/Production. (G) Chemical intermediate. Prod. range: 10,000-24,000 kg/yr.

Toxicity Data. Acute oral toxicity: LD50>2,000 mg/kg species (Rat). Acute dermal toxicity: LD50>2,000 mg/kg species (Rat). Eye irritation: slight species (Rabbit). Skin irritation: slight species (Rabbit). Skin sensitization: negative species (Guinea pig).

P 89-472

Manufacturer. Eastman Kodak Company.

Chemical. (G) Substituted thiazinohydrazine.

Use/Production. (G) Chemical intermediate. Prod. range: 10,000-24,000 kg/yr.

Toxicity Data. Acute oral toxicity: LD50 1015 mg/kg species (Rat). Acute dermal toxicity: LD50>2,000 mg/kg species (Rat). Eye irritation: slight species (Rabbit). Skin irritation: slight species (Rabbit). Skin sensitization: negative species (Guinea pig).

P 89-473

Importer. SICAP Ink Systems Corporation.

Chemical. (G) Amine polymer.

Use/Import. (G) Chemical intermediate. Import range: 10,000-24,000 kg/yr.

Toxicity Data. Acute oral toxicity: LD50 > 2,000 mg/kg species(Rat). Acute dermal toxicity: LD50 > 2,000 mg/kg species(Rat). Eye irritation: slight species (Rabbit). Skin irritation: slight species (Guinea pig). Skin sensitization: negative species(Guinea pig).

P 89-474

Manufacturer. Confidential.

Chemical. (G) Amino-functional siloxane.

Use/Production. (G) Intermediate in the manufacture of aminofunctional siloxane. Prod. range: Confidential.

P-89-475

Manufacturer. Confidential.

Chemical. (G) Aminofuncitonal siloxane.

Use/Production. (G) Intermediate in the manufacture of aminofunctional siloxane. Prod. range: Confidential.

P-89-476

Manufacturer. Confidential.

Chemical. (G) Aminofunctional siloxane.

Use/Production. (G) Intermediate in the manufacture of aminofunctional siloxane. Prod. range: Confidential.

P-89-477

Manufacturer. Stockhausen Inc.

Chemical. (S) N,N,N,-trimethyl-3-([1-oxo-2-propenyl]amino)-1-propanaminium chloride, homopolymer.

Use/Production. (S) Flocculant for inorganic, organic and biological materials. Prod. range: Confidential.

P-89-478

Manufacturer. Confidential.

Chemical. (G) Fatty acid polyamine condensate.

Use/Production. (G) Dispersive use: petroleum production additive. Prod. range: Confidential.

P-89-479

Manufacturer. The Dow Chemical Company.

Chemical. (G) Semicrystalline polyamide.

Use/Production. (S) Electric and electronic industries, automotive and appliance industries, film, fiber. Prod. range: Confidential.

P-89-480

Manufacturer. The Dow Chemical Company.

Chemical. (G) Semicrystalline polyamide.

Use/Production. (S) Electric and electronic industries, automotive and appliance industries, film, fiber. Prod. range: Confidential.

P-89-481

Manufacturer. The Dow Chemical Company.

Chemical. (G) Semicrystalline polyamide.

Use/Production. (S) Electric and electronic industries, automotive and appliance industries, film, fiber. Prod. range: Confidential.

P-89-482

Manufacturer. The Dow Chemical Company.

Chemical. (G) Semicrystalline polyamide.

Use/Production. (S) Electric and electronic industries, automotive and appliance industries, film, fiber. Prod. range: Confidential.

P-89-483

Importer. Confidential.

Chemical. (G) Hydroxyalkylamine.

Use/Import. (G) Catalyst. Import range: Confidential.

P-89-484

Manufacturer. Confidential.

Chemical. (S) Isophoronediisocyanate; 2-hydroxyethyl acrylate carbonic acid polymer accession.

Use/Production. (S) Coating binder for industrial use. Prod. range: 2,000-10,000 kg/yr.

P-89-485

Manufacturer. Eastman Chemicals Div. of Eastman Kodak.

Chemical. (S) Alkenes, C2-C3 hydroformylation products, C3-C12 fraction; obtained by hydroformylation of ethyleneand propylene, removal of propionaldehyde and butyraldehydes and further distillation to obtain a fraction rich in C3-C12 oxygenated hydrocarbons.

Use/Production. (S) Solvent for the wood treating industry. Prod. range: Confidential.

P-89-486

Manufacturer. Eastman Chemicals Div. of Eastman Kodak.

Chemical. (S) Alkenes, C2-C3 hydroformylation products, C6-C24 fraction; obtained by hydroformylation of ethylene and propylene, removal of propionaldehyde and butyraldehydes and further distillation to obtain a fraction rich in C6-C24 oxygenated hydrocarbons.

Use/Production. (S) Solvent for the wood treating industry. Prod. range: Confidential.

Toxicity Data. Acute oral toxicity: LD50 > 5 g/kg species(Rat). Acute dermal toxicity: LD50 8.12 ml/kg species(Rat). Eye irritation: moderate species(Rabbit). Skin irritation: strong species(Rabbit). Skin sensitization: negative species (Guinea pig).

P-89-487

Importer. Basf Corporation Engineering Plastics.

Chemical. (G) Polyarylethersulfone.

Use/Import. (G) Molding resin. Import range: Confidential.

P-89-488

Manufacturer. Confidential.

Chemical. (G) Medium oil alkyd.

Use/Production. (S) Intermediate, paint resin. Prod. range: Confidential.

P-89-489

Manufacturer. Confidential.

Chemical. (G) Polyesternide resin.

Use/Production. (S) Polymer used in spray applied paint. Prod. range: Confidential.

Dated: April 10, 1989.

Steven Newburg-Rinn,

Acting Director, Information Management Division, Office of Toxic Substances.

BILLING CODE 6560-50-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection submitted to OMB for review and approval under the Paperwork Reduction Act.

SUMMARY: The submission is summarized as follows:

Type of Review: Renewal without any change.

Title: Recordkeeping and Confirmation Requirements for Securities Transactions.

Form Number: None.

OMB Number: 3064-0028.

Expiration Date of Current OMB Clearance: June 30, 1989.

Frequency of Response: On the occasion of transactions; usually quarterly for customer statements.

Respondents: Insured state nonmember banks effecting securities transactions for their customers.

Number of Recordkeepers: 7,117.

Average Number of Hours Per Recordkeeper: 16.6.

Total Annual Recordkeeping Hours: 118,142.

OMB Reviewer: Gary Waxman, (202) 395-7340, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Washington, DC 20503.

FDIC Contact: John Keiper, (202) 898-3810, Assistant Executive Secretary, Room 6096, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

Comments: Comments on this collection of information are welcome and should be submitted on or before June 19, 1989.

ADDRESSES: A copy of the submission may be obtained by calling or writing the FDIC contact listed. Comments regarding the submission should be addressed to the OMB reviewer listed. The FDIC would be interested in receiving a copy of the comments.

SUPPLEMENTARY INFORMATION: The FDIC is requesting OMB approval to extend the clearance of the information collection requirements contained in FDIC regulation 12 CFR 344 pertaining to recordkeeping and confirmation for securities transactions effected by FDIC-supervised banks. The purpose of the requirements is to ensure that purchasers of securities in transactions effected by insured state nonmember banks are provided with adequate information concerning the transactions. The requirements are also designed to ensure that insured state nonmember banks maintain adequate records and controls with respect to the securities transactions they effect.

Dated: April 12, 1989.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224-002153-008

Title: City of Long Beach Terminal Agreement

Parties: City of Long Beach, C. Brewer Terminals, Inc.

Synopsis: The Agreement provides for a reduction in area covered by the Permit for Pier J and reduces compensation accordingly. The Agreement restates and extends the Agreement for 10 years ending March 31, 1998.

By Order of the Federal Maritime Commission.

Dated: April 13, 1989.

Joseph C. Polking,

Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 89C-0096]

IOLAB Corp.; Filing of Color Additive Petition

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that IOLAB Corp. has filed a petition proposing that the color additive regulations be amended to provide for the safe use of D&C Violet No. 2 for coloring polymethylmethacrylate intraocular lens haptics.

FOR FURTHER INFORMATION CONTACT: Mary W. Lipien, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 706(d)(1), 74 Stat. 402-403 (21 U.S.C. 376(d)(1))), notice is given that a petition (CAP 9C0216) has been filed by IOLAB Corp., 500 Iolab Dr., Claremont, CA 91711 proposing that the color additive regulations be amended in Part 74—Listing of Color Additives Subject to Certification (21 CFR Part 74) to provide for the safe use of D&C Violet No. 2 for coloring polymethylmethacrylate intraocular lens haptics.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: April 6, 1989.

Richard J. Ronk,
Acting Director, Center for Food Safety and Applied Nutrition.

[Docket No. 89M-0043]

Meadox Medicals, Inc.; Premarket Approval of Stryker® Dacron® Ligament Prosthesis

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Meadox Medicals, Inc., Oakland, NJ, for premarket approval, under the Medical Device Amendments of 1976, of the Stryker® Dacron® Ligament Prosthesis. After reviewing the recommendation of the Orthopedic and Rehabilitation Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of December 30, 1988, of the approval of the application.

DATE: Petitions for administrative review by May 18, 1989.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Michael J. Blackwell, Center for Devices and Radiological Health (HFZ-410), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7156.

SUPPLEMENTARY INFORMATION: On August 5, 1985, Meadox Medicals, Inc., Oakland, NJ 07436, submitted to CDRH an application for premarket approval of the Stryker® Dacron® Ligament Prosthesis. The device is a prosthetic ligament fabricated from a combination of texturized and untexturized Dacron® yarns. The device consists of a knitted velour tube with a reinforcing core made up of four woven tapes. The device is placed intra-articularly by tibial and femoral attachments through bone tunnels. The device is indicated for use only as an intra-articular permanent replacement for the anterior cruciate ligament (ACL) of the knee for skeletally mature patients who have had at least one failed autogenous intra-articular reconstruction of their ACL.

On January 22, 1988, the Orthopedic and Rehabilitation Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On December 30, 1988, CDRH approved the application by a letter to the applicant from the Acting Director of the Office of Device Evaluation CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Michael J. Blackwell (HFZ-410), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) to the act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 1033(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before May 18, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 515(d), 520(h), 90 Stat. 554-555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Dated: April 7, 1989.

Walter E. Gundaker,
Acting Deputy Director, Center for Devices and Radiological Health.

BILLING CODE 4160-01-M

[Docket No. 88M-0089]

Siemens-Pacesetter®, Inc.; Premarket Approval of the Sensolog Model 703 Pulse Generator (Models 703K, 703S and 703T) and the P700 Programmer)

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing its approval of the application by Siemens-Pacesetter®, Inc., Sylmar, CA, for premarket approval, under the Medical Device Amendments of 1976, of the Sensolog Model 703 Pulse Generator (Models 703K, 703S, and 703T) and the P700 Programmer. After reviewing the recommendation of the Circulatory System Devices Panel, FDA's Center for Devices and Radiological Health (CDRH) notified the applicant, by letter of February 28, 1989, of the approval of the application.

DATE: Petitions for administrative review by May 18, 1989.

ADDRESS: Written requests for copies of the summary of safety and effectiveness data and petitions for administrative review to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Donald F. Dahms, Center for Devices and Radiological Health (HFZ-450), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-3171.

SUPPLEMENTARY INFORMATION: On February 5, 1988, Siemens-Pacesetter®, Inc., Sylmar, CA 91342, submitted to CDRH an application for premarket approval of the Sensolog Model 703 Pulse Generator (Models 703K, 703S, and 703T) and the P700 Programmer.

The Sensolog Model 703 Pulse Generator is intended for use in patients who require permanent atrial or ventricular pacing and in whom an increase in pacing rate concurrent with physical activity is desired. Indications and applications for atrial use are sinus arrest, S-A block, sinus bradycardia, and bradycardia-tachycardia syndrome. Indications and applications for ventricular use are sinus node arrest and/or bradycardia, with or without AV conduction disorder; intermittent or complete AV conduction disorder with normal sinus function; and bradycardia-tachycardia syndrome or other manifestations of the sick sinus syndrome resulting in symptomatic bradycardia.

The P700 Programmer is intended to be utilized to noninvasively interrogate and program the Sensolog pacemaker. In addition, it may be utilized to program and/or interrogate other currently available programmable Siemens-Elema pulse generators.

On February 6, 1989, the Circulatory System Devices Panel, an FDA advisory committee, reviewed and recommended approval of the application. On February 28, 1989, CDRH approved the application by a letter to the applicant from the Acting Director of the Office of Device Evaluation, CDRH.

A summary of the safety and effectiveness data on which CDRH based its approval is on file in the Dockets Management Branch (address above) and is available from that office upon written request. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

A copy of all approved labeling is available for public inspection at CDRH—contact Donald F. Dahms, (HFZ-450), address above.

Opportunity for Administrative Review

Section 515(d)(3) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the Act (21 U.S.C. 360e(g)), for administrative review of CDRH's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and CDRH's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is a genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issue to be reviwed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before May 18, 1989, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic act (secs. 515(d), 520(h), 90 Stat. 554-555, 571 (21 U.S.C. 360e(d), 360j(h))) and under authority delegated to the Commission of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Devices and Radiological Health (21 CFR 5.53).

Advisory Committees; Meetings

AGENCY: Food and Drug Administration.
ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

Meetings: The following advisory committee meetings are announced:

Cardiovascular and Renal Drugs Advisory Committee

Date, time, and place. May 4 and 5, 1989, 9 a.m., National Institutes of Health, Clinical Center, Bldg. 10, Jack Masur Auditorium, 9000 Rockville Pike, Bethesda, MD.

Type of meeting and contact person. Open public hearing, May 4, 1989, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5:30 p.m.; open committee discussion, May 5, 1989, 9 a.m. to 5:30 p.m.; Joan C. Standaert, Center for Drug Evaluation and Research (HFD-110), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4730 or 419-259-6211.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of marketed and investigational human drugs for use in treatment of cardiovascular disorders and diseases and makes recommendations regarding the appropriate clinical development of such products.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before April 20, 1989, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss Cardura (dozazosin mesylate), new drug application (NDA) 19-668, Pfizer Laboratories, for hypertension; Adenocard (adenosine), NDA 19-937, Medco, for paroxsysmal supraventricular tachycardia (SVT); and Capoten (captopril), NDA 18-343, Squibb Corp., for dosing and labeling revisions.

Ear, Nose, and Throat Devices Panel

Date, time, and place. May 8, 1989, 8:30 a.m., Conference Rm. G, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open public hearing, 8:30 a.m. to 9:30 a.m., unless public participation does not last that long; open committee discussion, 9:30 a.m. to 5 p.m.; David A. Segerson, Center for Devices and Radiological Health (HFZ-470), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-8185 (voice/TDD).

A sign language interpreter is available for the hearing-impaired upon request. Those desiring this assistance should notify Carlton M. Coleman, 301-443-3310 (voice) or 301-443-1818 (TDD), no later than April 24, 1989.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before April 24, 1989, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss a premarket approval application for the Symbion Ineraid Cochlear Implant System.

Microbiology Devices Panel

Date, time, and place. May 8, 1989, 10 a.m., Rm. 800, Hubert H. Humphrey Bldg., 200 Independence Ave. SW., Washington, DC.

Type of meeting and contact person. Open public hearing, 10 a.m. to 11 a.m., unless public participation does not last that long; open committee discussion, 11 a.m. to 5 p.m.; Joseph L. Hackett, Center for Devices and Radiological Health (HFZ-440), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7550.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before May 1, 1989, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss a premarket approval application for the detection of specific IgM antibody to hepatitis A virus.

Blood Products Advisory Committee

Date, time, and place. May 10 and 11, 1989, 8 a.m., Conference Rms. D and E, Parklawn Bldg., 5600 Fishers Lane, Rockville, MD.

Type of meeting and contact person. Open public hearing, May 10, 1989, 8 a.m. to 10 a.m. (invitation to public to respond to March 15, 1989, memorandum on autologous donations), unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; open committee discussion, May 11, 1989, 8 a.m. to 11:30 a.m.; Linda A. Smallwood, Division of Blood and Blood Products (HFB-400), Center for Biologics Evaluation and Research, Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20892, 301-496-4396.

General function of the committee. The committee reviews and evaluates available data on the safety, effectiveness, and appropriate use of blood products intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Interested persons requesting to present data, information, or views, orally or in writing, on issues pending before the committee should communicate with the committee contact person.

Open committee discussion. On the morning of May 10, 1989, the committee will discuss: recovered plasma standards, the recommendation for change in hemoglobin values, and label indications for use of desmopressin acetate (DDAVP); and in the afternoon the committee will hear updates on coagulation and monoclonal products, and will discuss the proposed unified HIV memorandum. On May 11, 1989, the committee will discuss the status of erythropoietin and the recommendation for a change in the medical device classification of cell separators.

Clinical Chemistry and Clinical Toxicology Devices Panel

Date, time, and place. May 15, 1989, 9 a.m., Rm. 503-529A, Hubert H. Humphrey Bldg., 200 Independence Ave. SW., Washington, DC.

Type of meeting and contact person. Open public hearing, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; Kaiser J. Aziz, Center for Devices and Radiological Health (HFZ-440), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7550.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before May 1, 1989, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss a premarket approval application for the measurement of cyclosporine by high performance liquid chromatography (HPLC).

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (Subpart C of 21 CFR Part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR Part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

Details on the agenda, questions to be addressed by the committee, and a current list of committee members are available from the contact person before and after the meeting. Transcripts of the open portion of the meeting will be available from the Freedom of Information Office (HFI-35), Food and Drug Administration, Rm. 12A-16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, between the hours and 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting will be available from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

This notice is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), and FDA's regulations (21 CFR Part 14) on advisory committees.

Dated: April 13, 1989.
Alan L. Hoeting,
Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

Public Health Service

National Toxicology Program; Availability of Technical Report on Toxicology and Carcigenesis Studies of Crocidolite Asbestos

The HHS' National Toxicology Program announces the availability of the NTP Technical Report on the toxiciology and carcinogenesis studies of crocidolite asbestos.

Toxicology and carcinogenesis studies of crocidolite asbestos were conducted by administering the chemical to male and female F344/N rats at a concentration of 1% in feed for the lifetime of the animals.

Under the conditions of these feed studies, crocidolite asbestos was not overtly toxic and did not cause a carcinogenic response when ingested at a concentration of 1% in the diet by male and female F344/N rats for their lilfetime.

Copies of *Toxicology and Carcinogenesis Studies of Crocidolite Asbestos in F344/N Rats (Feed Studies)* (TR 280) are available without charge from the NTP Public Information Office, MD B2-04, P.O. Box 12233, Research Triangle Park, NC 27709 or telephone (919) 541-3991; FTS: 629-3991.

Dated: April 12, 1989.
David P. Rall,
Director.

BILLING CODE 4140-01-M

National Toxicology Program; Availability of Technical Report on Toxicology and Carcinogenesis Studies of Erythromycin Stearate

The HHS' National Toxicology Program announces the availability of the NTP Technical Report on the toxicology and carcinogenesis studies of erythromycin stearate, a broad-spectrum macrolide antibiotic.

Toxicology and carcinogenesis studies of a erythromycin sterate were conducted by feeding diets containing 0, 5,000, or 10,000 ppm of this chemical to groups of 50 F344/N rats of each sex for 103 weeks. Diets containing 0, 2,500, or 5,000 ppm were fed to groups of 50 mice of each sex for 103 weeks.

VOL 54 ISS 73 AP 18 1989 UMI

Under the conditions of these 2-year studies, there was no evidence of carcinogenic activity * of erythromycin stearate for male or female F344/N rats administered erythromycin stearate in the diet at 5,000 or 10,000 ppm. There was no evidence of carcinogenic activity of erythromycin stearate for male or female $B6C3F_1$ mice administered erythromycin stearate in the diet at 2,500 or 5,000 ppm. Dose-related increases in the incidences of granulomas of the liver were observed in male and female rats.

The study scientist for this bioassay is Dr. J.E. French. Questions or comments about the contents of this Technical Report should be directed to Dr. French at P.O. Box 12233, Research Triangle Park, NC 27709 or telephone (919) 541-7790; FTS: 629-7790.

Copies of *Toxicology and Carcinogenesis Studies of Erythromycin Stearate in F344/N Rats and $B6C3F_1$ Mice (Feed Studies)* (TR 338) are available without charge from the NTP Public Information Office, MD B2-04, P.O. Box 12233, Research Triangle Park, NC 27709 or telephone (919) 541-3991; FTS: 629-3991.

Dated: April 12, 1989.

David P. Rall,

Director.

[FR Doc. 89-9167 Filed 4-17-89; 8:45 am]

BILLING CODE 4140-01-M

*The NTP uses five categories of evidence of carcinogenic activity to summarize the strength of evidence of carcinogenicity observed in each animal study: Two categories for positive results ("clear evidence" and "some evidence"); one category for uncertain findings ("equivocal evidence"); one category for no observable effects ("no evidence"); and one category for experiments that cannot be evaluated because of major flaws ("inadequate study").

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. N-89-1969; FR-2652]

Section 8 Moderate Rehabilitation Program for Single Room Occupancy Dwellings for Homeless Individuals; Revised Notice of Fund Availability

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Revised notice of fund availability.

SUMMARY: On January 9, 1989, HUD published a Notice of Fund Availability for fiscal year 1989 for the Section 8 Moderate Rehabilitation Program for Single Room Occupancy (SRO) Dwellings for Homeless Individuals under section 441 of the Stewart B. McKinney Homeless Assistance Act [54 FR 758]. Among other things, the Notice set an application submission deadline of April 10, 1989, and limited potential eligible applicants to public housing agencies (PHAs) that are currently administering a Moderate Rehabilitation Program under 24 CFR Part 882.

This Notice announces an extension of the time for submitting applications from April 10, 1989 to May 17, 1989. It also opens the application process to all PHAs, not just those presently administering a Moderate Rehabilitation Program.

DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: Lawrence Goldberger, Director, Office of Elderly and Assisted Housing, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 755-5720. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Information Collection Requirements

The information collection requirements contained in this Notice have been submitted to the Office Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980 and have been assigned OMB control number 2502-0367. Public reporting burden for each of these collections of information is estimated to include the time for reviewing the instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Information on the estimated public reporting burden is provided under the Preamble heading, *Other Matters*. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Department of Housing and Urban Development, Rules Docket Clerk, 451 Seventh Street SW., Washington, DC 20410; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20530.

This Notice

On January 9, 1989, the Department published in the **Federal Register** (54 FR 758) a Notice of Fund Availability. The Notice announced the availability of funding for fiscal year 1989 for the Section 8 Moderate Rehabilitation Program for Single Room Occupancy (SRO) Dwellings for Homeless Individuals, as authorized by section 441 of the Stewart B. McKinney Homeless Assistance Act (Pub. L. 100-77, approved July 22, 1987).

Section III.A. of the Notice required the submission of applications by April 10, 1989. It also limited eligible applicants to PHAs that are currently administering a Moderate Rehabilitation Program under 24 CFR Part 882.

Today's Notice makes the following two changes to the January 9 Notice:

—It extends the application submission deadline from April 10, 1989 to May 17, 1989; and

—It permits all PHAs to submit applications, not just those that are presently administering a Section 8 Moderate Rehabilitation Program. Accordingly, the first sentence of section III.A.(1) is amended to remove the phrase "that are currently administering a Moderate Rehabilitation Program under 24 CFR Part 882". Also, section III.C.(6) is amended to add the following sentence: "If a PHA has not administered a Section 8 Moderate Rehabilitation Program, the PHA must demonstrate that it: (a) Has the ability to operate a rehabilitation program, or (b) will contract with a qualified agency or entity which will assist the PHA in operating a rehabilitation program, or (c) will develop the capability to operate a rehabilitation program."

Section 441 of the McKinney Act provides that funding will be provided to applicants:

> that best demonstrate a need for the assistance * * * and the ability to undertake and carry out a program to be assisted * * *.

In the first funding round under section 441 [see 52 FR 38380, published on October 15, 1987], the Department chose to limit PHA participation to those with on-going Section 8 Moderate Rehabilitation Programs because of the overriding need to make assistance available for the homeless on an emergency basis. For the current (second) funding round, the Department has determined not to limit the competition to PHAs with experience in the Section 8 Moderate Rehabilitation Program and that other PHAs may be able to carry out highly successful SRO programs under section 441.

The extension of the deadline for application submission is designed to ensure that any PHAs that this Notice has made newly eligible have adequate opportunity to prepare and submit an application. The extension also reflects HUD's desire to ensure that the applications ultimately selected for funding are of the highest quality. Any PHA that has already submitted an application in response to the January 9 Notice may amend the application, but the complete application must be received by May 17, 1989. (To the extent feasible, HUD intends to review the applications received by the April 10 deadline for completeness and to notify PHAs of missing information.)

Finally, it should be noted that the changes announced in this Notice only modify the description of what PHAs are eligible to submit applications and the time for application submission. All other provisions of the January 9 Notice remain in effect for the fiscal year 1989 funding round.

Other Matters

Environment

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of General Counsel, Department of Housing and Urban Development, Room 10276, 451 Seventh Street SW., Washington, DC 20410.

Information Collection Requirements

The collection of information requirements contained in this Notice have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980 and have been assigned OMB control number 2502-0367. Information on these requirements is provided as follows:

TABULATION OF ANNUAL REPORTING BURDEN NOTICE OF FUND AVAILABILITY—SECTION 8 MODERATE REHABILITATION PROGRAM FOR SINGLE ROOM OCCUPANCY DWELLINGS FOR HOMELESS INDIVIDUALS

Description of information collection	Section of 24 CFR affected	Number of respondents	Number of responses per respondents	Total annual responses	Hours per response	Total hours

BILLING CODE 4210-27-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ID-943-09-4214-12; I-1639]

Partial Termination of Classification for Multiple Use Management; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Classification termination.

SUMMARY: This action partially terminates a classification order which segregated 531,160 acres from disposal under various land laws. The classification is no longer needed because the Resource Management Plan prepared for the area provides the necessary protection of the resources this classification sought to protect. In addition, many of the disposal laws for which the lands were segregated have since been repealed by the Federal Land Policy and Management Act of 1976. This action will open 402,138 acres of public lands specified to the agricultural land laws. These lands with the exception of 760 acres closed to the mining laws, have been and continue to be open to the mining and mineral leasing laws and to all other public land laws. This action will also open an additional 760 acres to the mining laws.

EFFECTIVE DATE: April 18, 1989.

FOR FURTHER INFORMATION CONTACT: William E. Ireland, BLM, Idaho State Office, 3380 Americana Terrace, Boise, Idaho 83706, 208-334-1597.

1. Pursuant to authority delegated to me by BLM Manual, section 1203-Delegation of Authority (48 FR 85), I hereby terminate the Bureau of Land Management Multiple-Use Classification Order dated November 9, 1987, and published in the **Federal Register** November 16, 1967, Vol. 32, No. 222, Pages 15767-15768, insofar as if affected the lands described below:

Boise Meridian

T. 11 N., R. 30 E.,
All public lands outside the National Forest boundary.

The areas described aggregate approximately 401,376 acres in Lemhi County.

2. The Multiple Use Classification cited in paragraph one, which segregated certain recreation sites from the mining and agricultural land laws, is hereby terminated insofar as it affects the sites described below:

Boise Meridian

Little Morgan Creek

T. 15 N., R. 21 E.,
Sec. 1, SW¼NW¼, W½SW¼;
Sec. 2, SE¼NE¼, E½SE¼;
Sec. 11, NE¼NE¼.

Baldy Ridge

T. 19 N., R. 23 E.,
Sec. 19, NE¼SE¼.

Ezra Creek

T. 16 N., R. 21 E.,
Sec. 31, NE¼SW¼.

William Creek

T. 20 N., R. 21 E.,
Sec. 10, S½NW¼, SW¼;
Sec. 11, SW¼NW¼.

Smokey Cubs

T. 16 N., R. 27 E.,
Sec. 19, lot 3.
T. 16 N., R. 28 E.,
Sec. 24, SW¼NE¼, N½SE¼.

The areas decribed aggregate 780 acres in Lemhi County.

3. The following-described recreation sites remain segregated from the mining and agricultural land laws by virtue of the November 9, 1967, Classification Order:

Cow Creek

T. 16 N., 21 E.,
Sec. 8, lots 4 and 5.

Cronks Canyon

T. 16 N., R. 21 E.,
Sec. 8, lot 8;
Sec. 17, lot 1.

Ezra Creek

T. 17 N., R. 21 E.,
Sec. 9, lots 1 and 4.

McKim Creek

T. 17 N., R 21 E.,
Sec. 17, lot 10.

Ringle Creek

T. 16 N., R. 21 E.,
Sec. 33, lots 1, 4 and 5.

Williams Creek

T. 20 N., R. 21 E.,
Sec. 10, N½NW¼;
Sec. 11, lot 9.

Twelve Mite Site

T. 20 N., R. 21 E.,
Sec. 35, lot 1.

Boyle Creek

T. 23 N., R. 21 E.,
Sec. 12, lot 6.
T. 23 N., R. 22 E.,
Sec. 7, lots 4 and 5;
Sec. 18, lot 1.

Bolander's Ranch

T. 23 N., R. 22 E.,
Sec. 19, lots 4 and 6.

Agency Creek

T. 19 N., R. 24 E.,
Sec. 25, SE¼NW¼.

Smokey Cubs Site

T. 16 N., R. 26 E.,
Sec. 24, SE¼NE¼.
T. 16 N., R. 27 E.,
Sec. 19, lot 2.

The areas described aggregate 757.41 acres in Lemhi County.

4. The segregative effect on the lands described in paragraphs one and two will terminate upon publication of this notice in the Federal Register as provided by the regulations in 43 CFR 2091.7–1(b)(3).

5. At 9:00 a.m. on May 9, 1989, the lands described in paragraph one and two shall be open to the agricultural land laws, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable laws. All valid applications received at or prior to 9:00 a.m. on May 9, 1989, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. The lands described in paragraphs one and two, with the exception of 760 acres closed to the mining laws, have been and continue to be open to the mining and mineral leasing laws and to all other public land laws.

6. At 9:00 a.m. on May 9, 1989, the lands described in paragraph two shall be open to location and entry under the United States mining laws. Appropriation of land described under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights sinced Congress has provided for such determinations in local courts.

Dated: April 7, 1989.

Delmar D. Vail,

State Director.

BILLING CODE 4310-GG-M

[ID-943-09-4214-12; I-1542]

Termination of Classification for Multiple Use Management; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Classification termination.

SUMMARY: This action terminates a classification order which originally segregated approximately, 1,175,680 acres from disposal under various land laws. The lands are located in the Shoshone District and within the Monument Resource Area. The classification was partially terminated in August of 1982 and May of 1984. The remaining classification is no longer needed because the Resource Management Plan prepared for the area provides the necessary protection of the resources this classification sought to protect. In addition, many of the disposal laws for which the lands were segregated have since been repealed by the Federal Land Policy and Management Act of 1976. This action will open approximately 873,304 acres of public lands specified to the agricultural land laws. These lands, with the exception of 160 acres closed to the mining laws, have been and continue to be open to the mining and mineral leasing laws and to all other public land laws. This action will also open an additional 160 acres to the mining laws.

EFFECTIVE DATE: April 18, 1989.

T. 8 S., R. 30 E.,
Sec. 31, in Power County north of Snake River.

The areas described aggregate approximately 673,144 acres of public land in Blaine, Lincoln, Minidoka, and Power Counties.

2. The Multiple Use Classification cited in paragraph one, which segregated certain recreation sites from the mining and agricultural land laws, is hereby terminated insofar as it affects the sites described below:

Boise Meridian

Lincoln County, Narrows Site

T. 3 S., R. 20 E.,
Sec. 12, SW¼SW¼;
Sec. 13, NW¼NW¼;
Sec. 14, NE¼NE¼.

Power County, Gifford Springs Site

T. 9 S., R. 28 E.,
Sec. 17, SE¼NE¼.

The areas described aggregate 160 acres of public land in Lincoln and Power Counties.

3. The segregative effect on the lands described in paragraphs one and two will terminate upon publication of this notice in the Federal Register as provided by the regulations in 43 CFR 2091.7–1(b)(3).

4. At 9:00 a.m. on May 12, 1989, the lands described in paragraphs one and two shall be open to the agricultural land laws, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable laws. All valid applications received at or prior to 9:00 a.m. on May 12, 1989, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing. The lands described in paragraphs one and two, with the exception of 160 acres closed to the mining laws, have been and continue to be open to the mining and mineral leasing laws and to all other public land laws.

5. At 9:00 a.m. on May 12, 1989, the lands described in paragraph two shall be open to location and entry under the United States mining laws. These lands have been and will continue to be open to the mineral leasing laws and all other public land laws. Appropriation of land described under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Delmar D. Vail,
State Director.
Dated: April 7, 1989.

BILLING CODE 4310-GG-M

[CA-940-09-4212-13; CACA 19657]

California; Realty Action; Exchange of Public and Private Lands in Lassen and Modoc Counties and Order Providing for Opening of Public Land

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of issuance of land exchange conveyance documents and opening order.

ADDRESS: Inquiries concerning the land should be addressed to: Chief, Branch of Adjudication and Records, Bureau of Land Management, 2800 Cottage Way (Room E–2841), Sacramento, California 95825.

SUMMARY: The purpose of the exchange was to acquire non-federal lands that provide significant water sources for livestock grazing, wildlife habitat, fisheries management, and recreational uses. The exchange benefits the general public and local agricultural economy, and provides for improved management of the Federal and private lands. The public interest has been well served by making the exchange. The lands acquired in this exchange will be opened to operation of the public land laws and to full operation of the United States mining and mineral leasing laws.

FOR FURTHER INFORMATION CONTACT: Peter Humm, Susanville District Office, (916) 257–5361 or Dianna Storey, California State Office, (916) 978–4820.

1. The United States issued two (2) land exchange conveyance documents to the John Hancock Mutual Life Insurance Company, a Massachusetts corporation, on December 6 and 14, 1968, pursuant to the authority of Section 206 of the Act of October 21, 1976 (43 U.S.C. 1716), for the following described public lands:

Mount Diablo Meridian, California

T. 35 N., R. 12 E.,
Sec. 9, lots 1 to 4, inclusive;
Sec. 10, lots 2, 3, and 4;
Sec. 11, lots 1, 2, and 3;
Sec. 12, lots 1 to 4, inclusive;
Sec. 13, all;
Sec. 14, W½;
Sec. 15, all.
T. 36 N., R. 12 E.,
Sec. 14, NW¼;
Sec. 15, SE¼NE¼, W½E½, and W½;
Sec. 22, W½NE¼, SE¼NE¼, W½, and SE¼;
Sec. 25, all;
Sec. 27, E½ and E½NW¼;
Sec. 31, SE¼NE¼ and E½SE¼;
Sec. 32, NW¼NW¼ and S½;
Sec. 33, SW¼NW¼ and W½SW¼;
Sec. 35, all.
T. 41 N., R. 12 E.,
Sec. 12, W½SW¼;
Sec. 13, W½NW¼;
Sec. 22, SW¼NW¼;
Sec. 24, SW¼NW¼ and W½SW¼.
T. 35 N., R. 13 E.,
Sec. 7, lots 1 and 2;
Sec. 8, lots 1 to 4, inclusive;
Sec. 9, lots 1 to 4, inclusive;
Sec. 10, lots 2, 3, and 4;
Sec. 15, W½NE¼, SE¼NE¼, W½, and SE¼;
Sec. 17, W½ and SE¼;
Sec. 18, all.
T. 36 N., R. 13 E.,
Sec. 30, lots 3 and 4, and E½SW¼;
Sec. 31, lots 3 and 4, and E½SW¼;
Sec. 32, S½;
Sec. 33, SW¼SW¼.

The areas described aggregate 6,321.97 acres in Lassen and Modoc counties.

2. In exchange for the lands described in paragraph 1, on December 6, 1968, the United States accepted title to the following described private lands from the said John Hancock Mutual Life Insurance Company:

Lassen County

Parcel No. 1

Mount Diablo Meridian, California

T. 37 N., R. 12 E.,
Sec. 1, S½S½;
Sec. 2, SE¼SE¼;
Sec. 11, N½ and N½SE¼.

Excepting Therefrom that portion which lies within that certain map entitled, "Moon Valley Ranch Unit No. 2", filed February 20, 1969, in the office of the County Recorder, Lassen County, California, in Book 6 of Maps, at Page 86.

Sec. 12, NW¼NW¼, NE¼NE¼, S½N½, and S½.

Excepting From The SE¼SW¼ and S½SE¼ all that portion lying Southerly of the Northerly Right-of-Way line of Ash Valley Road as shown on those certain maps entitled "Moon Valley Ranch Unit No. 1", filed July 12, 1968 in the office of the Lassen County Recorder, in Book 6 of Maps at page 67 and "Record of Survey No. 6–02–87 for John Hancock Mutual Life Insurance Co.", filed on February 27, 1987 in the office of the Lassen County Recorder in Book 25 of Maps at page 76.

Sec. 13, E½W½, lying Westerly of the center line of Ash Valley Road and Williams Road, as said roads are shown on that certain map entitled "Record of Survey No. 6–02–87 for John Hancock Mutual Life Insurance Co.", filed on February 27, 1987 in the office of the Lassen County Recorder in Book 25 of Maps at page 76.

VOL 54 ISS 73 AP 18 1989 UMI

Parcel No. 2

Mount Diablo Meridian, California

T. 37 N., R. 13 E.,
Sec. 3, SW¼NW¼ and W½SE¼ lying Westerly of the Westerly right of way line of U.S. Highway 395, as said Westerly line is described in the Deeds from Glenn C. Talbott, et ux to the State of California, recorded October 10, 1939 in Book 38 of Deeds, at page 98 and recorded February 13, 1940 in Book 38 of Deeds at page 292.

Excepting therefrom all right, title and interest, including any reversionary interest, in and to all oil, oil rights, mineral rights, natural gas rights and other hydrocarbons by whatsoever name known, together with all geothermal steam and steam power that may be within or under said land as described in the deed to Eastwood Minerals and Energy Company, a California corporation, recorded September 23, 1974, in Book 283, page 37 of Official Records, which deed provides as follows:

"*Together with* the perpetual right of drilling, mining, exploring and operating therefor, and storing in and removing the same from said land, or any other land, including the right to whipstock or directionally drill and mine from lands, other than those hereinafter described, oil or gas wells, tunnels and shafts into, through or across the subsurface of the land hereinafter described and to bottom such whipstocked or directionally drilled wells, tunnels and shafts under and beneath or beyond the exterior limits thereof, and to redrill, retunnel, equip, maintain, repair, deepen and operate any such wells or mines, with the right to drill, mine, store, explore and operate through or on, and utilize all or any portion of the surface and subsurface and of the land hereinafter described."

Parcel No. 3

Mount Diablo Meridian, California

T. 37 N., R. 13 E.,
Sec. 4, lots 1 and 2, S½NE¼, SE¼, E½SW¼, and SE¼NW¼;
Sec. 6, lot 7;
Sec. 7, lots 1 to 4, inclusive, and E½W½;
Sec. 8, N½NE¼ and NE¼NW¼.

Parcel No. 4

Mount Diablo Meridian, California

T. 38 N., R. 12 E.,
Sec. 13, SW¼SE¼;
Sec. 24, NW¼NE¼;
Sec. 26, NE¼NW¼;
Sec. 34, SW¼SW¼.

Parcel No. 5

Mount Diablo Meridian, California

T. 38 N., 13 E.,
Sec. 5, SE¼SW¼;
Sec. 8, W½NW¼ and NE¼NW¼;
Sec. 17, N½SE¼, SW¼NE¼, and SE¼NW¼.

Excepting therefrom that portion conveyed by Carrie Craft Tagney, et al, to the Nevada-California-Oregon Railway, a corporation, recorded October 24, 1930, in Book 26 of Deeds, at page 370.

Sec. 19, lot 4, SE¼NW¼, and E½SW¼;
Sec. 20, SE¼NW¼, NE¼SW¼, and N½SE¼;
Sec. 33, SW¼ and W½SE¼.

Parcel No. 6

Mount Diablo Meridian, California

T. 39 N., R. 12 E.,
Sec. 26, S½SE¼ and S½N½SE¼;
Sec. 28, S½SW¼ and S½N½SW¼.
Sec. 36, All.

Excepting from Parcels 1, 3, 4, 5 and 6, all right, title and interest, including any reversionary interest, in and to all oil, oil rights, mineral rights, natural gas rights and other hydrocarbons by whatsoever name known, together with all geothermal steam and steam power that may be within or under said land as described in the deed to Eastwood Minerals and Energy Company, a California corporation, recorded September 23, 1974, in Book 283, page 37 of Official Records, which deed provides as follows:

"*Together with* the perpetual right of drilling, mining, exploring and operating therefor, and storing in and removing the same from said land, or any other land, including the right to whipstock or directionally drill and mine from lands, other than those hereinafter described, oil or gas well tunnels and shafts into, through or across the subsurface of the land hereinafter described and to bottom such whipstocked or directionally drilled wells, tunnels and shafts under and beneath or beyond the exterior limits thereof, and to redrill, retunnel, equip, maintain, repair, deepen and operate any such well, or mines, with the right to drill, mine, store, explore and operate through or on, and utilize all or any portion of the surface and subsurface of the land hereinafter described."

Modoc County

Parcel No. 1

Mount Diablo Meridian, California

T. 40 N., R. 13 E.,
Sec. 12, SW¼NE¼, E½SW¼, W½SW¼ and SE¼SE¼.

Except an undivided one-half interest in and to all mineral rights, as reserved by Allen Wall, et ux, in the Deed recorded January 21, 1955 in Book 127, Page 54, Official Records of Modoc County.

Sec. 13, NE¼ and E½NW¼.

Except an undivided one-half interest in and to all mineral rights, as reserved by Allen Wall, et ux, in the Deed recorded January 21, 1955 in Book 127, Page 54, Official Records of Modoc County.

Parcel No. 2

Mount Diablo Meridian, California

T. 40 N., R. 13 E.,
Sec. 11, S½NE¼ and SE¼;
Sec. 12, SE¼NE¼, NE¼SE¼, W½SW¼ and S½NW¼;
Sec. 13, W½NW¼;
Sec. 14, N½NE¼.

Parcel No. 3

T. 41 N., R. 12 E.,
Sec. 25, a portion of the E½NW¼, W½NE¼ and NW¼SE¼ as described in a Trustees Deed to John Hancock Mutual Life Insurance Co., a Massachusetts Co. and more particularly described as follows:

Beginning at the Northeast corner of the W½NE¼ of said section 25; thence along the Northerly line of said section 25 South 89° 24' 42" West 1324.23 feet to the North quarter corner of said section 25; thence continuing along the Northerly line of said section 25, South 89° 39' 02" West 941.97 feet to the Easterly line of State Highway 395 as described in a Deed to the State of California, recorded April 30, 1957 in Book 148, Page 263, Modoc County Official Records; thence Southeasterly along the Easterly line of said State Highway to the Easterly line of the NW¼SE¼ of said Section 25; thence North 0° 16' 36" East 474.83 feet along the Easterly line of said NW¼SE¼ of said Section 25 to the Northeast corner thereof; thence North 0° 27' 51" East along the Easterly line of the W½NE¼ of said Section 25 a distance of 2,701.05 feet to the point of beginning.

Excepting therefrom all oil, oil rights, mineral rights, natural gas rights, and other hydrocarbon by whatsoever name known together with in all geothermal steam and steam power that may be within or under said land, together with the right of entry, for the exploration and development of same as conveyed to Eastwood Minerals and Energy Company, a California corporation, by Deed, recorded july 25, 1974 in Book 229 page 125, Modoc County Official Records.

The areas described aggregate 5,242.61 acres in Lassen and Modoc Counties.

3. The appraised value of the public lands is $1,010,000; the private lands is $970,000. A payment in the amount of $40,000 was made to the United States to equalize values between the public and private lands.

4. At 10 a.m. on May 18, 1989, the lands described in paragraph 2 above shall be open to operation of the public land laws generally, subject to valid existing rights and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on May 18, 1989, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

5. At 10 a.m. on May 18, 1989, the lands described in paragraph 2 above shall be open to location under the United States mining laws. Appropriation of any of the lands described in this order under the general mining laws prior to the date and time of opening is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. section 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

6. At 10 a.m. on May 18, 1989, the lands described in paragraph 2 above shall be open to applications and offers under the mineral leasing laws.

Robert C. Nauert,
Chief, Branch of Adjudication and Records.

National Park Service

Concession Contract Negotiations; Waterton Inter-Nation Shoreline Cruise Co., Ltd.

AGENCY: National Park Service, Interior.

ACTION: Public notice.

SUMMARY: Public notice is hereby given that the National Park Service proposes to negotiate a concession contract with Waterton Inter-Nation Shoreline Cruise Company, Ltd., authorizing them to continue to provide boat cruise and boat transportation services for the public at Glacier National Park, Montana, for a period of five (5) years from January 1, 1989, through December 31, 1993.

EFFECTIVE DATE: June 19, 1989.

ADDRESS: Interested parties should contact the Regional Director, Rocky Mountain Region, National Park Service, 12795 West Alameda Parkway, P.O. Box 25287, Lakewood, Colorado 80225, for information as to the requirements of the proposed contract.

SUPPLEMENTARY INFORMATION: This contract renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expired by limitation of time on August 31, 1988, and therefore pursuant to the provisions of section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. section 20), is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be received on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Jack Neckels,
Deputy Regional Director, Rocky Mountain Region.

Date: March 22, 1989.

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-21,108]

Houze Glass Corp.; Point Marion, PA; Negative Determination on Reconsideration

On February 9, 1989 the Department issued an Affirmative Determination Regarding Application for Reconsideration of the denial notice in the subject case.

Workers at Houze Glass produce decorated mugs and glassware. They do not produce the ceramic or glass blanks.

The American Flint Glass Workers Local #547 with support from the company stated that the Department used the wrong aggregate import data and submitted additional customer information for use in determining whether the contributed importantly test was met. It was also claimed that the conditions that led to the approval of eligibility in 1986 under TA-W-16,543 still exist under the current petition.

In order for a worker group to be certified eligible to apply for adjustment assistance it must meet all three criteria of the Group Eligibility Requirements of the Trade Act including the "contributed importantly" test. The "contributed importantly" test is generally demonstrated by means of a customer survey. The Department's denial was based on the fact that the "contributed importantly" test was not met. The Department's survey of Houze Glass' customers showed that the respondents either did not purchase imported decorated glass or ceramic ware or they decreased their imports during the survey period.

Reconsideration findings show that the customer mix has changed since the last certification primarily because Houze Glass divested its retail segment from its business. The large national retail accounts have been replaced by smaller advertising specialty and promotion accounts. Other findings on reconsideration show that the respondents from the advertising segment either did not import decorated mugs or glassware or had decreasing import purchases during the survey period. Accordingly, the reduced business of Houze Glass is the result of management's decision to divest itself of the retail segment and specialize in the advertising specialty and promotion segment.

Conclusion

After reconsideration, I affirm the original notice of negative determination regarding eligibility to apply for adjustment assistance to workers and former workers at Houze Glass Corporation, Point Marion, Pennsylvania.

Signed at Washington, DC, this 11th day of April 1989.

Robert O. Deslongchamps,
Director, Office of Legislation and Actuarial Services, UIS.

BILLING CODE 4510-30-M

Occupational Safety and Health Administration

Maryland State Standards; Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On July 5, 1973, notice was published in the Federal Register (38 FR 17834) of the approval of the Maryland State plan and the adoption of Subpart O to Part 1952 containing the decision.

The Maryland State Plan provides for the adoption of all Federal standards as State standards after comments and public hearing. Section 1952.210 of Subpart O sets forth the State's schedule for the adoption of Federal standards. By letter dated February 22, 1989, from Commissioner Henry Koellein, Jr., Maryland Division of Labor and Industry, to Linda R. Anku, Regional Administrator, and incorporated as part of the plan, the State submitted State standards identical to: 29 CFR 1910.177, amendments and revisions to Servicing of Multi-Piece and Single Piece Rim

BEST COPY AVAILABLE

VOL 54 ISS 73 AP 18 1989 UMI

Wheels, as published in the Federal Register of September 8, 1988 (53 FR 34737). This standard is contained in COMAR 09.12.31. The Maryland Occupational Safety and Health Standard was promulgated after public hearings on October 19, 1988. This standard was effective on February 20, 1989.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standard, it has been determined that the State standard is identical to the Federal standard and, accordingly, is approved.

3. *Location of the Supplement for Inspection and Copying.* A copy of the standard supplement, along with the approved plan, may be inspected and copied at the following locations during normal business hours: Office of the Regional Administrator, U.S. Department of Labor—OSHA, 3535 Market Street, Suite 2100, Philadelphia, Pennsylvania 19104; Office of the Commissioner, Maryland Division of Labor and Industry, 501 St. Paul Place, Baltimore, Maryland 21202; and the Office of State Programs, U.S. Department of Labor—OSHA, Room N-3700, Third Street and Constitution Avenue, NW., Washington, DC 20210.

4. *Public Participation*—Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Maryland State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

a. The standard is identical to the Federal standards which were promulgated in accordance with Federal law including meeting requirements for public participation.

b. The standard was adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective April 18, 1989.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Philadelphia, Pennsylvania, this 13th day of March 1989.

Linda R. Auku,

Regional Administrator.

BILLING CODE 4510-29-M

Nevada State Standards; Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereafter called Regional Administrator), under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereafter called the Assistant Secretary) (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On January 4, 1974, notice was published in the Federal Register (39 FR 1008) of the approval of the Nevada plan and the adoption of Subpart W to Part 1952 of Title 29 containing the decision. The Nevada plan provides for the adoption of Federal standards as State standards by reference.

By letters dated December 28, 1988, from Nancy C. Barnhart to Frank Strasheim and incorporated as part of the plan, the State submitted State standard revisions identical to 29 CFR 1910.1001, and 29 CFR 1926.58, Occupational Exposure to Asbestos, Tremolite, Anthophyllite, and Actinolite in General Industry and Construction (September 14, 1988, 53 FR 35610) and 29 CFR 1910.20 Access to Employee Exposure and Medical Records (September 29, 1988, 53 FR 38140).

These standards are contained in the Division of Occupational Safety and Health Standards for General Industry and Construction Standards. The subject standards, 29 CFR 1910.1001, and 29 CFR 1926.58, Occupational Exposure to Asbestos, Tremolite, Anthophyllite, and Actinolite, and 29 CFR 1910.20, Employee Exposure and Medical Records were adopted by reference on October 14, 1988 and November 11, 1988 respectively, pursuant to Nevada State law, section 618.295.

2. Decision

Having reviewed the State submission in comparison with the Federal standards, it has been determined that the standards are identical to the Federal standards and accordingly are approved.

3. Location of Supplement for Inspection and Copying

A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, 71 Stevenson Street, Room 415, San Francisco, CA 94105; and Director, Division of Occupational Safety and Health, 1370 South Curry Street, Carson City, Nevada 89710; and Directorate of Federal Compliance and State Programs, Room N3700, 200 Constitution Avenue, NW., Washington, DC 20210.

4. Public Participation

Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Nevada State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

1. The standards are identical to the Federal Standards which were promulgated in accordance with Federal law including meeting requirements for public participation.

2. The standards were adopted in accordance with procedural requirements of State law and further participation would be unnecessary.

This decision is effective April 18, 1989.

(Section 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at San Francisco, California, this 13th day of March, 1989.

Frank Strasheim,

Regional Administrator.

[FR Doc. 89-9236 Filed 4-17-89; 8:45 am]

BILLING CODE 4510-29-M

Oregon State Standards; Approval

1. Background

Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereafter called Regional Administrator) under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4) will review and approval standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On December 28, 1972, notice was published in the Federal Register (37 FR 28628) of the approval of the Oregon plan and the adoption of Subpart D to Part 1952 containing the decision. The Oregon plan provides for the adoption of Federal standards by reference.

In response to Federal standards changes, the State has submitted by letter dated January 11, 1989, from John A. Pompei, Administrator, to James W. Lake, Regional Administrator, and incorporated as part of the plan, a State Definition and Requirements for a Nationally Recognized Testing Laboratory Standard comparable to 29 CFR 1910.7, as published in the Federal Register (53 FR 12120) dated April 12, 1988, and amended May 11, 1988 (53 FR 16838).

The State's rules pertaining to Nationally Recognized Testing Laboratories, contained in OAR 437-02-005/ were adopted by reference and became effective on November 10, 1988, pursuant to ORS 654.025(2), ORS 656.726(3), and ORS 183.335, as ordered and transmitted under Oregon APD Administrative Order 17-1988. At the same time the State also adopted by reference 29 CFR 1910.1, 1910.2, 1910.3, 1910.4, 1910.5, and 1910.6 for clarification purposes and due to the reference to them by other sections of 29 CFR 1910. As ordered and transmitted under Oregon APD Administrative Order 23-1988, Oregon also amended on December 30, 1988, effective January 1, 1989, the following previously approved State rules in 16 divisions to be identical to the Federal counterparts by updating definitions relating to testing laboratories:

OAR 437-41-005/1910.35(h)
OAR 437-61-005/1910.155(c)(3)(i)
OAR 437-66-055/1910.251(b)
OAR 437-79-245/1910.265(d)(2)(iv)(c)
OAR 437-88-210/1910.28(g)(3)
OAR 437-88-235/1910.28(i)(1)
OAR 437-89-490/1910.181(j)(4)(i)
OAR 437-123-005/1910.106(a)(35)
OAR 437-125-005/1910.110(a)(14)
OAR 437-125-305/1910.110(f)(5)(iv)
OAR 437-143-005/1910.103(a)(1)(ii)
OAR 437-45-2551/1910.109(d)(2)(iii)(a)
OAR 437-63-230/1910.178(a)(7)
OAR 437-67-005/1910.399(a)(1)
OAR 437-88-205/1910.205/1910.28(f)(2)
OAR 437-88-230/1910.28(h)(2)
OAR 437-89-360/1910.180(i)(4)(i)
OAR 437-119-005/1910.107(a)(8)
OAR 437-124-005/1910.108(a)(3)
OAR 437-125-125/1910.110(c)(5)(i)(g)
OAR 437-126-010/1910.111(b)(1)(ii)
OAR 437-317-025/1910.266(c)(4)(iii)-(iv)

On October 3, 1988, the State mailed the proposed November 10 amendment of rules to those on the Department of Insurance and Finance mailing list, established pursuant to OAR 436-01-000 and to those on the Department's distribution list as their interest appeared. On December 14, 1988, the State mailed the proposed December 30 amendment of rules to those on its lists. No written comments or requests for a public hearing were received.

As noted at OAR 437-02-007, by adopting these rules, Oregon does not establish its own program to accredit testing laboratories but will accept the Federal OSHA laboratory accreditation program as valid for compliance with its rules.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standard, it has been determined that the State standard and amendments are identical to the Federal standard and amendments.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6003 Federal Office Building, 909 First Avenue, Seattle, Washington 97174; Department of Insurance and Finance, Labor and Industries Building, Salem, Oregon 97310; and the Office of State Programs, Occupational Safety and Health Administration, Room N-3476, 200 Constitution Avenue NW., Washington DC 20210.

4. *Public participation.* Under 29 CFR 1953.2(c) the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplement to the Oregon State Plan as a proposed change and making the Regional Administrator's approval effective upon publication of the following reasons:

1. The standard is identical to the Federal standard which was promulgated in accordance with Federal law including meeting requirements for public participation.

2. The standard was adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective April 18, 1989.

(Section 18, Pub. L. 91-596, Stat. (29 U.S.C. 667))

Signed at Seattle, Washington this 22nd day of February, 1989.

James W. Lake,

Regional Administrator.

[FR Doc. 89-9239 Filed 4-17-89; 8:45 am]

BILLING CODE 4510-29-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-317 and 50-318]

Baltimore Gas and Electric Co.; Withdrawal of Applications for Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has granted the March 29, 1989 request of the Baltimore Gas and Electric Company (the licensee) for withdrawal of Change No. 2a of the licensee's request for amendments, dated October 17, 1986 and modified on November 25, 1987, to Facility Operating License Nos. DPR-53 and DPR-69, issued to the Baltimore Gas and Electric Company (BG&E, the licensee) for operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, located in Calvert County, Maryland.

The proposed amendments would change the Units 1 and 2 Technical Specifications (TS) as follows:

1. Modify the steam generator tube inservice inspection interval of TS 4.4.5.3.a by extending it from 12-24 months to a new interval of at least once per refueling interval, where a refueling interval would be defined as 24 months. In addition, the provisions of TS 4.0.2.a would now be applicable, thus permitting a maximum allowable interval extension of 25% (6 months) beyond the normally required 24-month period.

2. Delete the interval reduction to 20 months currently required by TS 4.4.5.3.b for C-3 results during third sample inspections.

3. Eliminate the interval extension to 40 months permitted by TS 4.4.5.3.a, for C-1 results in two consecutive steam generator tube inspections.

The Commission issued a "Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for Prior Hearing" which was published in the Federal Register (52 FR 10179) on March 30, 1987. No requests for hearing were filed regarding this Notice.

By letter dated March 29, 1989, the licensee withdrew its applications for the proposed amendments.

For further details with respect to this action, see (1) the application for amendment dated October 17, 1986, (2) the application supplemental information letter dated November 25, 1987, and (3) the licensee's letter of March 29, 1989, withdrawing the applications for amendments which are available for public inspection at the Commission's Public Document Room,

VOL 54 ISS 73 AP 18 1989 UMI

2120 L Street, NW., Washington, DC, and at the Calvert County Library, Prince Frederick, Maryland.

Dated at Rockville, Maryland, this 10th day of April 1989.

For the Nuclear Regulatory Commission.

Scott Alexander McNeil,

Project Manager, Project Directorate I-2, Division of Reactor Projects I/II.

[FR Doc. 89-8201 Filed 4-17-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-286]

Power Authority of the State of New York; Withdrawal of Applications for Amendment to Facility Operating License

The United States Nuclear Regulatory Commission (the Commission) has granted the request of the Power Authority of the State of New York (the licensee) to withdraw its March 6, 1987 and October 13, 1987 (the part related to containment temperature) amendment applications for the Indian Point Nuclear Generating Unit No. 3 (IP-3), located in Westchester County, New York. The proposed amendments would have revised the Technical Specifications to include a provision related to a containment ambient temperature of 130 °F. The basis for the licensee's request for withdrawal is that a reanalysis is being performed of the containment integrity and a revised submittal will be provided.

The Commission issued a Notice of Consideration of Issuance of the Amendments in the **Federal Register** on April 22, 1987 (52 FR 13346) and March 9, 1988 (53 FR 7509). By letter dated March 6, 1989, the licensee requested, pursuant to 10 CFR 2.107, permission to withdraw its applications for the proposed amendments. The Commission has considered that licensee's March 6, 1989 request and determined that permission to withdraw the applications for amendment should be granted.

For further details with respect to this action, see (1) the applications for amendments dated March 6, 1987 and October 13, 1987; (2) the licensee's letter dated March 6, 1989, requesting withdrawal of the application for license amendment; and (3) our letter dated March 31, 1989. All of the above documents are available for public inspection at the Commission's Public Document Room, 2120 L Street, NW., Washington, DC and at the White Plains Public Library, 100 Martine Avenue, White Plains, New York 10610.

Dated at Rockville, Maryland, this 31st day of March 1989.

Joseph D. Neighbors,

Senior Project Manager, Project Directorate I-3, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 89-8202 Filed 4-17-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-361]

Southern California Edison Co., et al., Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 70 to Facility Operating License No. NPF-10 issued to Southern California Edison Company, San Diego Gas and Electric Company, The City of Riverside, California and The City of Anaheim, California (the licensees), which revised the Technical Specifications for operation of the San Onofre Nuclear Generating Station, Unit 2, located in San Diego County, California.

The amendment was effective as of the date of issuance.

This amendment revised Technical Specifications 3/4.4.8.1, "Pressure/Temperature Limits;" 3.4.1.4.1, "Cold Shutdown-Loops Filled;" 3.4.1.2, "Hot Shutdown;" 3.4.8.3.1, "Overpressure Protection System, RCS Temperature less than or equal to 235°F;" and 3.4.8.3.2, "Overpressure Protection System, RCS Temperature greater than 235°F." These changes revised the pressure/temperature and low temperature overpressure protection limits for operation through 8 effective full power years. The amendment was issued in response to an application for an amendment designated as PCN-278.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendments and Opportunity for Hearing in connection with this action was published in the **Federal Register** on February 24, 1989 (54 FR 8039). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined that an environmental impact statement will not be prepared and that issuance of the amendment will have no significant adverse effect on the quality of the human environment.

For further details with respect to the action see (1) the application for amendment dated November 7, 1988, and subsequent submittals dated December 29, 1988 and February 23, 1989, (2) Amendment No. 70 to License No. NPF-10, (3) the Commission's related Safety Evaluation and (4) the Commission's Environmental Assessment. All of these items are available for public inspection at the Commission's Public Document Room, 2120 L Street NW., Washington, DC 20555, and at the General Library, University of California, P.O. Box 19557, Irvine, California 92713. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects III, IV, V and Special Projects.

Dated at Rockville, Maryland this 11th day of April, 1989.

For the Nuclear Regulatory Commission.

D. E. Hickman,

Project Manager, Project Directorate V, Division of Reactor Projects-III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 89-8203 Filed 4-17-89; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 030-03196; License No. 37-13651-01; EA 88-236]

St. Agnes Medical Center; Order Imposing Civil Monetary Penalty

I

St. Agnes Medical Center, Philadelphia, Pennsylvania 19145 (the "licensee") is the holder of License No. 37-13651-01 (the "license") issued by the Nuclear Regulatory Commission (the "Commission" or "NRC") which authorizes the medical use of byproduct material by the license. The license was issued on May 14, 1970, was most recently renewed on December 9, 1986, and is due to expire on November 30, 1991.

II

An NRC Safety inspection of the licensee's activities under the license was conducted on August 10 and November 2, 1988. During the inspection, the NRC staff determined that the licensee had not conducted its activities in full compliance with NRC requirements. A written Notice of Violation and Proposed Imposition of Civil Penalty (Notice) was served upon the licensee by letter dated February 2, 1989. The Notice states the nature of the violations, the provisions of the Nuclear Regulatory Commission's requirements that the licensee had violated, and the civil penalty amount for each of the violations. A response, dated February 23, 1989, to the Notice was received from the licensee. In its response, the licensee did not deny the violations, but requested mitigation or waiver of the civil penalty.

III

Upon consideration of the answer received, the statement of facts, explanations, and argument for remission or mitigation of the proposed civil penalty contained therein, and as set forth in the Appendix to this Order, the Deputy Executive Director for Materials Safety, Safeguards and Operations Support has determined that the penalty proposed for the violations designated in the Notice of Violation and Proposed Imposition of Civil Penalty should be imposed.

IV

In view of the foregoing and pursuant to section 234 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2282, Pub. L. 99-235), and 10 CFR 2.205, *It is hereby ordered that:*

The licensee pay a civil penalty in the amount of Two Thousand Five Hundred Dollars ($2,500) within thirty days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States and mailed to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555.

V

The licensee may, within thirty days of the date of this order, request a hearing. A request for a hearing shall be clearly marked as a "Request for Hearing" and shall be addressed to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555, with a copy to the Assistant General Counsel for Enforcement, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555 and the Regional Administrator, USNRC Region 1, 471 Allendale Road, King of Prussia, Pennsylvania 19406.

If a hearing is requested, the Commission will issue an Order designating the time and place of the hearing. If the licensee fails to request a hearing within thirty days of this Order, the provisions of this Order shall be effective without further proceedings. If payment has not been made by that time, the matter may be referred to the Attorney General for collection.

In the event the licensee requests a hearing as provided above, the issue to be considered at such hearing shall be:

(a) Whether the licensee was in violation of the Commission's requirements as set forth in the Notice of Violation and Proposed Imposition of Civil Penalty referenced in Section II above, and

(b) Whether, on the basis of the violations, this Order should be sustained.

Dated at Rockville, Maryland this 10th day of April 1989.

For the Nuclear Regulatory Commission.

Hugh L. Thompson, Jr.,

Deputy Executive Director for Material Safety, Safeguards and Operations Support.

Appendix

Evaluation and Conclusion

On February 2, 1989, a Notice of Violation and Proposed Imposition of Civil Penalty was issued for violations of a license issued to St. Agnes Medical Center. The licensee responded to the Notice on February 23, 1989, did not deny the violations, but requested waiver or mitigation of the Civil Penalty. The NRC's evaluation and conclusion regarding the licensee's response are as follows:

I. Restatement of Violations

A. 10 CFR 35.50(b)(1) requires that licensees check each dose calibrator for constancy at the beginning of each day of use.

Condition 15 of License No. 37-13651-01 requires that the licensee possess and use licensed radioactive material in accordance with the statements, representations, and procedures contained in the radioactive material license application dated December 31, 1985, and in letters dated September 19, 1986, October 31, 1986, and October 24, 1988.

Item 17.C of the application dated December 31, 1985, requires that areas in which licensed radioactive material, other than where any quantities less than 200 mircrocuries are used, be surveyed weekly.

Contrary to the above, between July 17 and July 30, 1988, areas in which licensed radioactive material, in quantities greater than 200 microcuries were used, were not surveyed.

This is a repeat violation.

B. 10 CFR 35.70(a) requires that licensees survey with a radiation detection survey instrument at least once a week all areas where radiopharmaceuticals or radiopharmaceutical waste is stored.

10 CFR 35.70(e) requires that licensees survey for removable contamination once each week all areas where radiopharmaceuticals are routinely prepared for use. administered, or stored.

Condition 15 of License No. 37-13651-01 requires that the licensee possess and use licensed radioactive material in accordance with the statements, representations, and procedures contained in the radioactive material license application dated December 31, 1985, and in letters dated September 19, 1986, October 31, 1986, and October 24, 1988.

Item 17.C of the application dated December 31, 1985, requires that areas in which licensed radioactive material, other than where any quantities less than 200 mircrocuries are used, be surveyed weekly.

Contrary to the above, between July 18 and July 29, 1988, the radiopharmaceutical preparation, use, and administration areas were not surveyed.

This is a repeat violation.

C. 10 CFR 35.70(b) requires that licensees survey with a radiation detection survey instrument at least once a week all areas where radiopharmaceuticals or radiopharmaceutical waste is stored.

10 CFR 35.70(e) requires that licensees survey for removable contamination once each week all areas where radiopharmaceuticals are routinely prepared for use. administered, or stored.

Condition 15 of License No. 37-13651-01 requires that the licensee possess and use licensed radioactive material in accordance with the statements, representations, and procedures contained in the radioactive material license application dated December 31, 1985, and in letters dated September 19, 1986, October 31, 1986, and October 24, 1988.

Item 17.C of the application dated December 31, 1985, requires that areas in which licensed radioactive material, other than where any quantities less than 200 mircrocuries are used, be surveyed weekly.

Contrary to the above, between July 17 and July 30, 1988, areas in which licensed radioactive material, in quantities greater than 200 microcuries were used, were not surveyed.

This is a repeat violation.

D. Condition 15 of License No. 37-13651-01 requires that the licensee possess and use licensed radioactive material in accordance with the statements, representations, and procedures contained in the radioactive material license application dated December 31, 1985, and in letters dated September 19, 1986, October 31, 1986, and October 24, 1988.

1. Item 14 of the application dated December 31, 1985, requires that each incoming package containing

In the event the licensee requests a hearing as provided above, the issue to be considered at such hearing shall be:

(a) Whether the licensee was in violation of the Commission's requirements as set forth in the Notice of Violation and Proposed Imposition of Civil Penalty referenced in Section II above, and

(b) Whether, on the basis of the violations, this Order should be sustained.

Dated at Rockville, Maryland this 10th day of April 1989.

For the Nuclear Regulatory Commission.

Hugh L. Thompson, Jr.,

Deputy Executive Director for Material Safety, Safeguards and Operations Support.

Appendix

Evaluation and Conclusion

On February 2, 1989, a Notice of Violation and Proposed Imposition of Civil Penalty was issued for violations of a license issued to St. Agnes Medical Center. The licensee responded to the Notice on February 23, 1989, did not deny the violations, but requested waiver or mitigation of the Civil Penalty. The NRC's evaluation and conclusion regarding the licensee's response are as follows:

I. Restatement of Violations

A. 10 CFR 35.50(b)(1) requires that licensees check each dose calibrator for constancy at the beginning of each day of use.

Condition 15 of License No. 37-13651-01 requires that the licensee possess and use licensed radioactive material in accordance with the statements, representations, and procedures contained in the radioactive material license application dated December 31, 1985, and in letters dated September 19, 1986, October 31, 1986, and October 24, 1988.

Item 10 of the application dated December 31, 1985, Section I, page 3 requires that the dose calibrator be tested for constancy on each day that the instrument is used for the assay of radiopharmaceuticals.

Contrary to the above, on August 2 and 3, 1988, the dose calibrator was used for the assay of radiopharmaceuticals which were subsequently administered to patients, and the dose calibrator was not tested for constancy at the beginning of each day.

B. 10 CFR 35.70(a) requires that licensees survey with a radiation detection survey instrument at the end of each day of use all areas where radiopharmaceuticals are routinely prepared for use or administered.

VOL 54 ISS 73 AP 18 1989 UMI

radioactive material be surveyed as soon as practicable after receipt.

Contrary to the above, between July 18 and July 29, 1988, incoming packages containing radioactive material were not surveyed as soon as practicable after receipt.

This is a repeat violation.

2. Item 10 of the application dated December 31, 1985, section IV, requires that a test for instrument linearity be performed quarterly. If a deviation of greater than ±5 percent is found between the instrument reading and the decay corrected value at any point on the range of administered values, the instrument will be repaired.

Contrary to the above, on August 8–10, 1988, the results of a linearity test of the dose calibrator indicated a deviation of greater than ± 5 percent between the instrument reading and the decay corrected value at certain points on the range of administered values. The instrument was not repaired and the licensee continued to use the instrument to assay patient doses until mid-September, 1988.

These violations have been categorized in the aggregate as a Severity Level III Problem. (Supplement VI)

Cumulative Penalty—$2,500 (assessed equally among the violations)

II. Summary of Licensee Response

The licensee, in its response, did not deny the occurrence of the violations. However, the licensee requests that the NRC waive or mitigate the $2,500 civil penalty because the problems were first identified and corrected by them, were not willful, and current performance is consistent with license conditions.

The licensee sets forth additional circumstances it feels are relevant to support mitigation of the civil penalty, including: (1) The technologist involved in the violations is no longer employed by the licensee; (2) there was a lack of communication between the licensee and its consultant; and (3) the Radiology Administrator position was vacant at the time of the violations.

III. NRC Evaluation of Licensee Response

The licensee's identification and correction of a violation may provide a basis for at least partial mitigation of the civil penalty. However, these considerations were offset by the fact that certain of the violations were identified in previous NRC inspections in 1984 and again in 1987 and the corrective actions taken to prevent recurrence were not effective. In addition, the licensee submitted no information regarding the corrective actions taken or planned to permit an evaluation of their adequacy. Further, while the existence of a willful violation may result in an increase in the severity level and consequent escalation of a civil penalty, the fact that a violation was not willful does not form a basis for mitigation. Finally, since compliance with all license conditions and regulatory requirements is expected at all times, the licensee's current compliance with regulatory requirements is not a basis for mitigation of the civil penalty.

The repetitive nature of certain of the violations, as identified above, is reflective of a programmatic problem in the licensee's management and control of its licensed activities. Therefore, even though the technologist involved in the violations is no longer employed by the licensee, that fact does not warrant mitigation of the civil penalty. Furthermore, rather than providing a basis for mitigation, the communication problem between the licensee and its consultant and the vacancy in the Radiology Administrator's position is merely additional evidence that the licensee failed to maintain an adequate program to ensure that licensed activities were carried out in conformance with license conditions and regulatory requirements.

IV. NRC Conclusion

The licensee did not provide a sufficient basis for mitigation of the amount of the civil penalty. Therefore, the NRC concludes the proposed civil penalty in the amount of § 2,500 should be imposed.

BILLING CODE 7590-01-M

[Docket Nos. 50-259, 50-260 and 50-296]

Tennessee Valley Authority; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR-33, DPR-52 and DPR-68 issued to Tennessee Valley Authority (TVA or the licensee), for the operation of the Browns Ferry Nuclear Plant located in Limestone County, Alabama.

In accordance with the licensee's application for amendment dated February 14, 1989, the amendment would temporarily revise the limiting conditions for operation (LCO) requirements 3.7.E.1 and 3.7.E.3. The changes to these LCOs involve annotating these sections to note that the Control Room Emergency Ventilation System (CREVS) is considered to be inoperable because it does not meet its design basis for zero unfiltered inleakage of outside air. The proposed temporary changes to the technical specifications would permit power operation and the subsequent defueling, refueling, and subcritical functional testing until the start-up of Unit 2 from its next refueling cycle The licensee will provide a permanent resolution to this condition and implement it during this interval.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By May 18, 1989, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license, and any person whose interest may be affected by the proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and petitions for leave to intervene must be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board Panel will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which the petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions should be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisficies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washigton, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by toll-free telephone call to Western Union at 1-800-325-6000 (in Missouri 1-800-342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Suzanne C. Black: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, E11 B33, Knoxville, Tennessee 37902.

Nontimely filings of the petition for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

If a request for hearing is received, the Commission's staff may issue the amendment after it completes its technical review and prior to the completion of any required hearing if it publishes a further notice for public comment of its proposed finding of no significant hazards consideration in accordance with 10 CFR 50.91 and 50.92.

For further details with respect to this action, see the application for amendment dated February 14, 1989, which is available for public inspection at the Commission's Public Document Room, Gelman Building, 2120 L Street, Washington, DC, 20555, and at the Athens Public Library, South Street, Athens, Alabama 35611.

Dated at Rockville, Maryland, this 12th day of April 1989.

For the Nuclear Regulatory Commission.

Suzanne C. Black,

Assistant Director for Projects, TVA Projects Division, Office of Nuclear Reactor Regulation.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by the Office of Management and Budget

Agency Clearance Officer: Kenneth A. Fogash, (202) 272-2142

Upon Written Request Copy Available From: Securities and Exchange Commission, Office of Consumer Affairs, 450 Fifth Street NW., Washington, DC 20549

New

Leverage Buyout Employment Effects Questionnaire

File No. 270-327

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for clearance a leverage buyout employment effects questionnaire. The questionnaire requests information on levels of employment and wages at facilities acquired from corporations that have undergone leveraged buyouts.

The estimated average burden hours to comply with these requests is two hours for each of the approximately 150 respondents.

The estimated average burden hours are made solely for purposes of the Paperwork Reduction Act, and are not derived from a comprehensive or even representative survey or study.

Direct general comments to Gary Waxman at the address below. Direct any comments concerning the accuracy of the estimated average burden hours for compliance with SEC rules and forms to Kenneth A. Fogash, Deputy Executive Director, 450 Fifth Street NW., Washington, DC 20549-6009, and Gary Waxman, Clearance Officer, Office of Management and Budget, Paperwork Reduction Act Project (3235-0416A), Room 3208 New Executive Office Building, Washington, DC 20503.

Jonathan G. Katz,

Secretary.

April 12, 1989.

[Release No. 34-26705; File No. SR-DTC-89-5]

Self-Regulatory Organizations; Depository Trust Co.; Filing and Immediate Effectiveness of Proposed Rule Change Modifying Put Option Processing Procedures

Pursuant to section 19(b) of the Securities Exchange Act of 1934 ("Act"), notice is hereby given that on March 2, 1989, the Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") a proposed rule change. The proposal modifies DTC's processing procedures in situations where a partial redemption of

VOL 54 ISS 73 AP 18 1989 UMI

an issue occurs at the same time a DTC participant exercises a put option on securities in the issue. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposal will clarify DTC's procedures to improve the coordination of its processing of a concurrent put option expiration and partial redemption. When the expiration of a put option [1] occurs concurrently with the processing of a call, DTC will, in giving participants put option information, alert participants to the concurrent processing of a call lottery.[2] In the event that notification of a call is received so late that the lottery cannot be completed prior to the second business day before the expiration date for the put exercise, DTC will not process the lottery, due to the likelihood that one or more participants with positions may be driven short (*i.e.*, will end up owing securities to DTC) and the very limited time available to make a decision whether to exercise the put. Rather, DTC will allocate the called bonds against tender instructions it has received. The circumstances under which this approach may be followed are: (1) That the put payment date and the redemption date are the same, and (2) that the proceeds (*i.e.*, principal and interest) to be paid under the put or the call are identical in total and in each part (*i.e.*, the same amount of principal payable and the same amount of interest payable). If either of these conditions is *not* present, however, DTC will process the lottery (because there would be a difference in the economic effect of the put and the call).

[1] Many municipal bonds and other DTC-eligible securities contain put option provisions either in the indenture, or as a dealer-issued enhancement, where by the holder may redeem the bond prior to maturity date. Depending upon the provision in the indenture, the put option may be exercised as frequently as daily, periodically, or once before the bond's maturity date. A participant with a bond deposited at DTC may exercise the put through DTC. Upon instruction of the participant, DTC will tender the bond to the tender agent. When DTC receives payment from the tender agent, DTC allocates that payment to the tendering participant.

[2] Bond issuers on their agents sometimes call for the return of bonds to the issuer prior to maturity. The call may be for a full redemption (*i.e.* the return of the entire issue) or a partial redemption (*i.e.* the return of a portion of the issue). An issuer that makes a partial call will run a random lottery of all outstanding certificates to determine which certificates, or portions thereof, it will redeem. DTC, as a depository for many of these issues, holds for its participants a significant percentage of most called securities issues. Once DTC receives notice of a partial call, DTC must run its own lottery to allocate, among participants with deposits in the called securities issue, called certificates registered in DTC's nominee name. DTC then redeems the called bonds on the day of redemption on behalf of the participants.

In its filing, DTC explains that in most instances in which a DTC-eligible issue contains a put option provision and is subject to a redemption call, the put expiration date and the redemption date are far enough apart to avoid confusion. Occasionally, however, the two events occur on the same day, potentially causing several problems. First, a concurrent put and redemption can make it difficult for a DTC participant (or its customer) to know its exact securities position. This interferes in the process of making an informed decision on whether or not it will have enough securities to exercise the put option. Second, a participant may have part of a position that it has already tendered under the put option called in the lottery on the redemption, resulting in a short position in the participant's account. Finally, DTC, in extreme cases, may not have in inventory a sufficient quantity of uncalled securities to satisfy put option tender instructions after it has processed the call. This could occur if a large number of participants submit put option tender instructions just prior to the processing of the call lottery. DTC believes that the proposed rule change will decrease the chance of occurrence of these problems.

The foregoing change has become effective, pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views, and arguments concerning the submission within 21 days after date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Reference should be made to File No. SR–DTC–89–5.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC. Copies of the filing (SR–DTC–89–5) and of any subsequent amendments also will be available for inspection and copying at DTC's principal office.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 10, 1989.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–26654; File No. SR–GSCC–89–1]

Self-Regulatory Organizations; Government Securities Clearing Corp.; Filing and Immediate Effectiveness of Proposed Rule Change Regarding Trade Comparison Operations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 9, 1989, GSCC filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by GSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would modify GSCC's Rules and Procedures.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, GSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. GSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) The purpose of the proposed rule change is to permit implementation of certain enhancements to the comparison system:

(i) In the present comparison system, both parties to a trade are required to submit matching data on the same day for the trade to compare. The proposed rule change would provide for the addition of a "pending file" that would permit data on uncompared trades to pend in the comparison system until compared or deleted; deletion of the data generally will occur during the processing cycle before settlement day. This "pending" feature would enable Members' forward settling and when-issued trades ultimately to be compared even if the parties to the trades do not submit matching trade data on the same day. It is contemplated that, when the netting system is implemented, the compared trade file will be the source of trade data input into the netting system.

(ii) The proposed rule change would provide an "as-of" feature that will enable Members to submit for comparison trade data on or after the settlement date for the underlying transactions. This feature would afford a Member the ability to confirm settled trades, and would provide an improved audit trail for such trades.

(b) The proposed rule change will promote the prompt and accurate clearance of securities transactions for which GSCC is responsible and is, therefore, consistent with the requirements of the 1934 Act, as amended, and the rules and regulations thereunder applicable to self-regulatory organizations.

B. Self-Regulatory Organization's Statement on Burden on Competition

GSCC does not believe that the proposed rule will have an impact on, or impose a burden on, competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments on the proposed rule change have not yet been solicited or received. Members will be notified of the rule change and comments will be solicited by an Important Notice. GSCC will notify the Securities and Exchange Commission of any written comments received by GSCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3)A of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b–4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the GSCC–89–1 and should be submitted by May 9, 1989.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 21, 1989.

Jonathan G. Katz,

Secretary.

[FR Doc. 89–9235 Filed 4–17–89; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–26713; File No. SR–OCC–88–02]

Self-Regulatory Organizations; Options Clearing Corporation; Order Approving Proposed Rule Change Providing for the Issuance, Clearance, and Settlement of Index Participations

I. Introduction

On March 3, 1988, the Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("SEC" or "Commission") a proposed rule change (File No. SR–OCC–88–02) under section 19(b) of the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder.[2] The proposal would enable OCC to issue, clear, and settle a new product known as Index Participations ("IPs") whose value is determined by reference to the value of an underlying stock index. The Commission published notice of the proposal in the **Federal Register** on April 4, 1988.[3] OCC amended the proposed rule change on June 3, 1988,[4] December 19, 1988,[5] January 27, 1989, and March 16, 1989.[6] The Commission received four comment letters opposing the proposed rule change.[7] For the reasons discussed below, the Commission has determined to approve the proposed rule change.[8]

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Securities Exchange Act Release No. 25529 (March 28, 1988), 53 FR 10860. As originally proposed, the rules referred to IPs as Cash Index Participations ("CIPs"). CIPs initially were proposed by, and would be listed and traded on, the Philadelphia Stock Exchange, Inc. ("Phlx"). *See* Securities Exchange Act Release No. 25495 (March 23, 1988), 53 FR 10311, providing notice of proposed rule change by Phlx that would enable Phlx to list and trade CIPs based on two stock market indexes.

[4] Securities Exchange Act Release No. 25867 (June 29, 1988), 53 FR 25560. Because the American Stock Exchange, Inc. ("Amex") proposed to list and trade Equity Index Participations ("EIPs") pursuant to rules then similar to those proposed by Phlx for CIPs [*see* Securities Exchange Act Release No. 25664 (May 5, 1988), 53 FR 16605], the amendment, among other things, changed the name of the product in OCC's proposed rules from CIPs to IPs so that the rules may apply generally to IPs. Subsequently, the Chicago Board Options Exchange, Inc. ("CBOE") submitted proposed rule changes to list for trading Value of Index Participations ("VIPs") [*see* Securities Exchange Act Release No. 25799 (June 13, 1988), 53 FR 22754].

[5] *See* Securities Exchange Act Release No. 26366 (December 22, 1988), 53 FR 52901. This amendment conforms OCC's proposed IP rules to the proposed rules, as amended, filed by the exchanges.

[6] Because these amendments contain no new concepts but merely modify rules previously proposed by OCC, the amendments have not been published for comment in the **Federal Register**. The amendments make OCC's proposed rules more precise and respond to various comments on the proposed rules that OCC had received.

[7] *See* letter from Thomas R. Donovan, President, Chicago Board of Trade, to Jonathan G. Katz, Secretary, SEC, dated April 26, 1988; letter from Philip L. Stern, Freeman, Freeman & Salzman, P.C., on behalf of the Chicago Mercantile Exchange ("CME"), to Jonathan G. Katz, Secretary, SEC, dated April 29, 1988; letter from Philip L. Stern, Freeman, Freeman & Salzman, P.C., on behalf of the CME, to Jonathan G. Katz, Secretary, SEC, dated August 2, 1988; and letter from Jerrold E. Salzman, Freeman, Freeman & Salzman, P.C., on behalf of the CME, to Jonathan G. Katz, Secretary, SEC, dated January 11, 1988. These commentators opposed the OCC filing for the same reasons set forth in comment letters opposing the parallel exchange rule filings. Accordingly, these comments are discussed in Securities Exchange Act Release No. 26709 (April 11, 1989), ("Exchange approval order"): *See* note 37, *infra*.

[8] The Commission also has approved the related exchange rule filings (SR–Phlx–88–07, SR–Amex–88–10, and SR–CBOE–88–09) enabling the exchanges to list and trade a variety of IP products. *See* Exchange approval order, *id.*

VOL 54 ISS 73 AP 18 1989 UMI

II. Description of the Proposal

The proposal amends OCC By-Laws and Rules to provide for the issuance, clearance, and settlement of IPs. An IP is a product whose value is determined by reference to the value of an underlying stock index.[9] IPs were designed to place the holder of an IP in an economic position substantially equivalent to that of a purchaser of a portfolio or basket of stocks comprising the underlying index. A holder of an IP would be entitled to receive, and the writer of an IP would be obligated to pay, a quarterly dividend equivalent. The dividend equivalent would equal the regular cash dividends accrued over the quarter which the owner of a basket of stocks described above would be entitled to receive; it would not include stock dividends or extraordinary cash dividends. An IP would exist until the holder or writer extinguishes the IP by entering into an offsetting writing or purchasing transaction, or exercises a "cash-out privilege" that is available, depending on the IP, on a daily, quarterly or semi-annual basis.

The cash-out privilege provides for a payment in cash based upon the current value of the component stocks of the underlying index at the time specified by each exchange during which the privilege is available.[10] For example, Phlx's proposed IP rules provide that the cash-out privilege would be available to holders of IPs on any business day. Pursuant to the proposed Phlx rules, however, exercise of the cash-out privilege would entitle an exercising holder to an "aggregate cash-out value" [11] computed in a different manner depending on the day of exercise. If the CIP holder exercises on the business day before an IP dividend equivalent day, the aggregate cash-out value would be based on the opening values of the stocks in the underlying index on the IP dividend equivalent day. If the CIP holder exercises on any other business day, the aggregate cash-out value would be based on the closing index value on the business day following the exercise, reduced by one-half of one percent.

For CBOE VIPs, each writer as well as each holder would be entitled to a cash-out privilege on a semi-annual basis. These IPs therefore are referred to in OCC's proposed rules as "two-way IPs." The writer's cash-out privilege would entitle the writer to extinguish the short position and pay the cash-out value. Holders of two-way IPs would have a corresponding obligation, upon assignment of a writer's exercise notice, to extinguish long IP positions in exchange for payment of the cash-out value.

On the Amex, EIP holders would be entitled to exercise either the cash-out privilege or a delivery privilege on a quarterly basis. EIP holders could receive either the cash-out value or, under certain circumstances, physical delivery of shares of the component stocks of the S&P 500 Index or the Major Market Index. EIPs for which the delivery privilege has been exercised are referred to as "physical IPs" in OCC Rules. Specifically, the holder of one or more delivery units[12] that has not chosen to exercise the cash-out privilege has the right to obtain on each delivery time, which coincides with the quarterly cash-out time, the physical delivery of a proportionate number of shares of each stock comprising the underlying index, subject to certain conditions. A delivery fee established by the Amex would be charged to the EIP holder taking physical delivery of the component stocks.

Exercise notices requesting physical delivery of one or more delivery units will be assigned first, on a random basis, to those short EIP positions that have notified OCC of a desire to make physical delivery ("physical assignment volunteers"). If the number of delivery units for which holders have requested physical delivery exceeds the number of units made available for delivery by persons with short EIP positions, an Amex-designated "delivery facilitator" would assume responsibility for delivering the physical shares for such excess number of units.[13]

In proposing rules that would provide for the issuance, clearance, and settlement of IPs, OCC has, where appropriate, paralleled its existing rules and procedures. The proposal consists of a new Chapter XIX to OCC Rules applicable to IPs; amendments to Chapter VI dealing with margin; amendments to Chapter X to provide for a clearing fund contribution for IPs; revisions to the close-out provisions in Chapter XI; and conforming changes to Rules 207, 401, and 402 dealing with records and trade reporting. In addition, the proposal amends a number of OCC By-Laws and adds a new Article XVIII dealing exclusively with IPs.

A. Processing of IPs

OCS would process IP transactions in accordance with procedures that are substantially similar to OCC's well-established system for processing equity and non-equity option ("NEO") transactions. As discussed in more detail below, OCC would receive compared trade data from the exchanges, issue and (in the case of closing transactions) cancel the appropriate contracts. OCC would make appropriate book entries to clearing members' accounts representing the long and short positions in each account.[14] IP transactions would settle through OCC's existing systems on a next-day basis in same-day funds.[15] OCC would collect margin on short IP positions. As discussed below, CIPs, VIPs, and certain EIPs are cash-settled. Therefore, OCC would process exercises and assignments according to procedures similar to those for NEO securities. On the other hand, certain EIPs provide the holder the right to physical delivery of the securities that comprise the index.

[9] The Phlx has designated two indexes for CIP trading: the Blue Chip Index, a price-weighted index composed of 25 highly capitalized listed common stock issues representing primarily industrial corporations which is designed to reflect the performance of the Dow Jones Industrial Average ("DJIA"), and the Standard & Poors 500 ("S&P" 500) Index. The Amex EIPs will be based on the Major Market Index ("XMI") and the S&P 500 Index. CBOE VIPs will be based on the capitalization-weighted CBOE 30 and CBOE 250 indexes developed and maintained by the Exchange, and the S&P 500 Index. All IPs covering the same index group and having identical contract terms constitute a "class of IPs."

[10] The days on which the cash-out privilege is available for IPs traded on each Exchange are stated in interpretations added to OCC's Rules. Generally, the cash-out time for each quarterly or semi-annual period, depending on the IP, will be determined and made public by each Exchange before the beginning of such period. Amex has determined that its cash-out time will coincide with "dividend equivalent day"—the third Friday of March, June, September and December. *See* Rule 1903, Interpretations and policies .02, .03 and .04.

[11] Aggregate cash-out value is equal to the settlement index value times the index multiplier times the minimum trading unit. The Exchanges have determined that the minimum unit of trading in IPs shall be 100 IPs, unless otherwise designated by the Exchange. OCC By-Laws, Article XVIII, Section 1.

[12] The term "delivery unit" regarding any class of physical IPs means the unit, consisting of the minimum number of trading units of such IPs specified by the Exchange, for which the delivery privilege may be exercised. the Amex has established the delivery unit as 500 minimum trading units for the S&P 500 Index and 250 minimum trading units for the XMI. OCC By-Laws, Article XVIII, section 1. *See* Securities Exchange Act Release Nos. 26243 (November 2, 1988), 53 FR 45407, and 26355 (December 13, 1988), 53 FR 51181, for a detailed discussion of the physical delivery aspect of Amex's proposal.

[13] The delivery facilitator would be an OCC clearing member that is a member organization of the exchange. OCC By-Laws, Article XVIII, Section 1. Initially, the Amex contemplates designating only one facilitator per EIP class and notes that the facilitator may be the specialist unit for that class of EIPs. *See* Securities Exchange Act Release No. 26355 (December 13, 1988), 53 FR 51181.

[14] IPs would be uncertificated securities.

[15] The proposed IP rules provide that OCC reserves the right to pay clearing members by issuance of an uncertified check for the net settlement amount.

Settlement of exercises and assignments regarding these physical IPs would be effected through designated stock clearing corporations.

For example, OCC's proposed system for processing exercises and assignments of the IP cash-out privilege generally parallels the system for processing exercises and assignments of NEO and equity securities. Specifically, clearing members exercising the cash-out privilege would tender exercise notices to OCC between 10:00 a.m. and 8:00 p.m. (Eastern Time) [16] on any day such exercises are permitted. In accordance with its existing procedures, OCC would accept all properly tendered exercise notices on the date of tender ("T") and would assign, pursuant to its procedures for random selection,[17] exercise notices in connection with the cash-out privilege submitted by exercising IP holders (or writers, in the case of two-day IPs) to clearing members with short positions (or long positions, in the case of two-way IPs) in that class of IP.

OCC would calculate the aggregate cash-out value[18] for each class of IPs on T+2 ("exercise settlement date") and would net the exercise settlement amounts to be paid by the clearing member against the exercise settlement amounts to be paid to the clearing member to obtain a single net settlement amount for IP exercises and assignments for each account of each clearing member. Prior to 8:00 a.m. on exercise settlement date, OCC would issue a report to clearing members advising them of their cash delivery and receive obligations. OCC would be authorized to draft clearing members' bank accounts at or before 10:00 a.m., and would be obligated to credit clearing members' bank accounts at or before 11:00 a.m., as appropriate, is satisfaction of net settlement amounts.

With respect to a feature of Amex EIPs, however, a holder could exercise the delivery privilege, instead of the cash-out privilege, by tendering an exercise notice to OCC between 10:00 a.m. and 8:00 p.m. on any day such exercises are permitted. Additionally, an EIP writing clearing member desiring to become, or acting on behalf of an EIP writer that desires to become, a physical assignment volunteer would tender to OCC a physical assignment volunteer notice between 10:00 a.m. and 8:00 p.m. on any day which exercises are permitted regarding such IPs. Again, OCC would accept all properly tendered exercise notices and would accept properly tendered physical assignment volunteer notices to the extent they equal or are exceeded by the number of delivery units to which physical delivery exercise notices have been accepted by OCC. If the number of delivery units for which physical assignment volunteer notices were submitted was smaller than the number of physical delivery exercise notices tendered to OCC, OCC would randomly assign a sufficient number of exercise notices in connection with the delivery privilege to non-volunteering physical IP writers to make up the imbalance. These writers would be required to pay to OCC the aggregate cash-out value on T+2. OCC then would notify the delivery facilitator,[19] before the opening of trading on the next business day, of the amount of the imbalance and it would buy the necessary shares to make up the baskets of deliverable stock in the opening transactions on the relevant markets.[20]

Delivery privilege exercises and assignment of delivery privilege exercises to physical assignment volunteers would be settled through the facilities of designated clearing corporations. Following the close of trading on the business day following the day on which delivery privilege exercise notices have been accepted by OCC, OCC would report the net amount of deliverable stock to be received or delivered to the designated clearing corporation of each clearing member. Clearing members making delivery would pay to OCC, and OCC would pay to the clearing member entitled to receive delivery, the entire "aggregate delivery value" [21] of each delivery unit on the morning of the sixth business day following the day on which a delivery privilege exercise notice is properly tendered to OCC ("T+6" or "exercise settlement date"). Under this method, each clearing member entitled to receive delivery would then pay its designated clearing corporation the appropriate price for each component stock on T+6.[22]

OCC has designed a new rule to deal with a feature unique to IPs—the dividend equivalent. Proposed Rule 1902 provides that the exchange notify OCC on each day prior to an IP dividend equivalent day the amount of the dividend equivalent to be received by IP holders and paid by IP writers on dividend equivalent day. The amount of the dividend equivalent is determined by the exchange on which the IP is traded based upon the regular cash dividends paid on stocks comprising the underlying index through the quarterly period. OCC, in turn, would notify clearing members prior to 8:00 a.m. on dividend equivalent day of their obligation to pay to OCC or to receive from OCC the net IP dividend equivalent.[23] The procedures for payments of dividend equivalents would conform to other settlement procedure provisions in OCC Rules, as discussed above.

B. Margin

As the issuer of IPs, OCC guarantees the performance of clearing member IP writers and holders. To collateralize this guarantee in the event a clearing member defaults, OCC requires writing clearing members to, among other things, deposit margin with OCC.[24]

[16] All times referred to herein are Eastern Time.

[17] *See* Securities Exchange Act Release No. 21899 (March 27, 1985), 50 FR 13444, approving OCC's revised random assignment procedures.

[18] Aggregate cash-out value is equal to the settlement index value (based on the opening trades of the index's component stocks on T+1) as reported by the exchange or the reporting service designated by the exchange, times the index multiplier times the minimum trading unit. If the settlement index value is not reported to OCC in a timely manner, OCC would be authorized to suspend settlement regarding that class of IPs and to fix a new exercise settlement date. The settlement index value as initially reported would be presumed to be accurate and would be final for purposes of calculating the aggregate cash-out value.

[19] In the event that the agreement of a delivery facilitator to act as such, or the delivery facilitator's status as an OCC clearing member is terminated or suspended prior to the opening of trading on the trading day following the day on which an IP is exercised for delivery of stock, OCC would have the right to pay the cash-out value in lieu of stock to the extent that the exercise was assigned to the delivery facilitator rather than a volunteer writer.

[20] The delivery facilitator would buy at the opening because the aggregate cash-out value paid by non-volunteering physical IP writers would be based on the value of the underlying index calculated using opening values.

[21] Aggregate delivery regarding a delivery unit of IPs refers to the value of such delivery unit, equal to the aggregate cash-value times the delivery unit.

[22] Settlement at stock clearing corporations generally is by payment of certified check in clearinghouse (*i.e.*, next-day) funds.

[23] OCC would be obligated to pay clearing members that are entitled to dividend equivalents even if OCC does not receive a payment from a clearing member that owes OCC dividend equivalents. OCC would use the defaulting clearing member's margin deposits and clearing fund contribution to pay the amount of the dividend equivalent to the clearing member entitled to receive it. If a defaulting clearing member's margin deposit and clearing fund contribution are inadequate, OCC would assess pro rata all clearing members' clearing fund contributions to the NEO clearing fund.

[24] OCC's margin requirements apply only to OCC clearing members and should not be confused with the minimum margin that must be maintained in customer accounts as set by the exchanges in accordance with Regulation T of the Federal Reserve Board ("FRB").

VOL 54 ISS 73 APR 18 1989 UMI

OCC generally would calculate clearing member margin requirements for short IP positions in a manner similar to that used for OCC's NEO margin system.[25] The NEO margin system has two components—premium margin, which can be a requirement or a credit, and additional margin. The term "premium margin" used in respect of IPs means the number of minimum trading units times the current highest asked price (or, in the case of exercised or assigned IP positions, times the aggregate current index value). "Additional margin" is calculated by determining assumed maximum one-day price movements in the underlying assets and projecting the effect of such movements on the liquidating value of the position on the basis of options pricing models.

Because IPs do not have an exercise price or expiration date, the "series" concept for option contracts would not apply. OCC would not differentiate among IPs based on the same underlying index, and a class group, *i.e.*, IPs based on the same underlying index, would include only one class of IPs. The proposal also would extend the product group concept to IPs, so that a class group consisting of a class of IPs may be margined on a combined basis with other class groups of IPs or index options, where OCC has determined that their respective underlying indexes exhibit sufficient price correlation to warrant such margin treatment. For example, a class group consisting of the XMI EIP could be combined with a class group consisting of the S&P 500 EIP, CIP and VIP for margin calculations because they both belong to the broad-based indexes product group.[26] Moreover, these class groups could be combined with index options such as the XMI option traded on the Amex, and the S&P 100 and S&P 500 index options traded on the CBOE, because these, too, belong to the broad-based indexes product group.[27]

When writers assigned exercises of the cash-out privilege pay OCC the aggregate cash-out value on exercise settlement date on T+2, OCC would release margin held in respect of those positions. OCC would continue to require margin from clearing members with the obligation to deliver stock until exercise settlement day for physical delivery on T+6. The delivery facilitator, however, would be required only to post additional margin (*i.e.*, margin to cover OCC's exposure to an adverse market move during the day on which it was required to buy deliverable stock), and not premium margin because the assigned writers would be obligated to OCC for that amount, and that obligation would be secured by the margin deposits of those writers.[28] Because IPs would be margined under OCC's NEO margin system, the proposal provides that each clearing member's contribution to the NEO clearing fund would be calculated on the basis of margin requirements for IPs as well as NEOs.[29]

The proposal also would extend OCC's Pledge Program to IPs thereby allowing clearing members to obtain financing by pledging long IPs as collateral to support loans from banks or other clearing members. Additionally, IPs would be eligible to be pledged from segregated (customer) accounts. In this regard, Phlx and Amex requested an interpretation from the FRB [30] that IPs be treated as equity securities for purposes of the relevant provisions of Regulation T.[31] Thus, the exchanges proposed that IPs be margined like common stock.[32] Accordingly, the FRB staff issued a letter not objecting to the commencement of IPs trading employing the proposed initial and maintenance margin for IPs.[33] Therefore, long IP positions in a customer account that constitute customer margin securities would be able to be pledged to secure obligations of the carrying broker to the same extent as common stock.[34] Amendment No. 3 makes explicit that IPs could be transferred into and out of pledge accounts only in multiples of minimum trading units.

C. Suspension of an IP Clearing Member

The proposal would amend existing OCC Rules dealing with suspension of a clearing member to incorporate references to IPs. Because failure to pay a dividend equivalent or to meet settlement obligations with respect to IPs is necessarily a failure to meet a daily money obligation to OCC, OCC's proposed rules would provide for the application of its existing suspension rules and the disposition of settlement obligations through the Liquidating Settlement Account.[35] OCC would close out short IP positions [36] of a suspended clearing member, like uncovered short option positions, in the most orderly manner practicable. Any dividend equivalents that may be owed regarding short IP positions of a suspended clearing member would be withdrawn from the Liquidating Settlement Account. Proposed rule 1908 expressly would state that the suspension of a clearing member in the course of cash-out privilege exercise settlement would not affect the settlement procedures applicable to other clearing members.

Proposed Rule 1906 would provide close-out procedures in the event a clearing member that is obligated to deliver stock fails to perform, or a clearing member that is entitled to receive deliverable stock is suspended before its designated clearing corporation becomes obligated to make settlement for the deliverable stock. In the former case, OCC would direct clearing members entitled to receive deliverable stock, *i.e.*, the clearing member matched against the non-performing clearing member in the stock trades reported to the stock clearing corporations, to buy in the stock for the account and liability of OCC, and settle the buy-in as quickly as possible after it occurred. In the latter case, OCC would direct delivering clearing members to sell out the deliverable stock and pay the proceeds of the sale to OCC.

The proposal also would amend OCC's By-Laws. Among other things, a new Article dealing with IPs provides definitions applicable to IPs, most of which parallel the definitions used regarding index options. The proposed Article also would set out the general rights and obligations of IP holders and writers. Additionally, in this Article OCC would reserve the right, on 30 days' notice, to exercise the cash-out privilege on behalf of all holders of a class of IPs, and thereby close out the market in that class, under certain extraordinary circumstances, *e.g.*, when there is a lack of regular trading activity in such class.

The proposal also would amend various OCC By-Laws to accommodate IPs. Among these changes, Article I would define "cleared security" to include IPs and would clarify that the terms "exercise" and "Exercising Clearing Member" can refer to exercise of the cash-out privilege in connection with IP transactions.

III. OCC's Rationale for the Proposed Rule Change

OCC believes the proposed rule change is consistent with the purposes and requirements of Section 17A of the Act because it would provide for the prompt and accurate clearance and settlement of transactions in IPs. OCC states in its filing that the proposed rule applies to IPs rules and procedures substantially similar to those that have been used in the clearance and settlement of transactions in equity and non-equity options. Moreover, OCC believes that the proposed rule change provides for the safeguarding of securities and funds in OCC's custody or control or for which OCC is responsible, in that it would apply to IPs a system of safeguards which is substantially the same as the system OCC currently uses for options.

IV. Discussion

For the reasons discussed below, the Commission is approving OCC's proposal. The Commission believes that OCC's proposal is consistent with Section 17A of the Act and OCC's obligation to promote the prompt and accurate clearance and settlement of securities transactions and to safeguard securities and funds in OCC's custody and control.[37]

Since the October 1987 market-break, a number of studies have recommended creating a market basket product.[38] These studies suggest that such a product could, among other things, ameliorate the volatility and steep price declines experienced during and since October 1987. These studies also focus on clearance and settlement of equities, options and futures, and the need to develop safe and efficient clearance and settlement systems both within and between markets. The latter focus is the subject of this filing and order.[39]

The Commission is satisfied that the proposed system for processing IP transactions is substantially similar to OCC's well-established system for processing NEO transactions. The Commission believes that use of that system is well designed to promote the prompt and accurate clearance and settlement of transactions in IPs consistent with section 17A(b)(3) of the Act. With certain exceptions for physical IPs and IP dividend equivalent payments that will be discussed below (as well as the characteristics pertaining to the potential perpetual existence of IPs), the proposed system is identical to OCC's system for processing NEO transactions. For example, exchanges will use existing systems to report opening and closing trades in IPs to OCC. Additionally, OCC will maintain records and process opening and closing transactions,[40] will process exercise notices in connection with the cash-out privilege, and will assign those exercises to OCC clearing members with IP positions on the other side of the market in accordance with existing procedures. Finally, OCC will effect net settlement each day with its clearing members for all IP and option transactions, including amounts owed in connection with dividend equivalents, pursuant to its well-established settlement procedures.

At least one market break report [41] noted that efforts to monitor clearing firm risk more effectively are critical to reducing risk and increasing confidence in the markets. In connection with this, the report emphasized the need for market participants to have access on a timely basis to information concerning the specific size and nature of their payment obligations so that they can make appropriate arrangements to fulfill them. In this regard, the Commission is concerned that clearing members know their IP dividend equivalent payment obligation in sufficient time to collect the payment from their customers or to arrange financing to meet that obligation. The Commission notes that although many of the indexes underlying IPs are well-established and widely disseminated, there are no arrangements for separately quoting the value of the dividend equivalent at this time. The Commission recognizes that the formulas for calculating the different index values will be set out in exchange rules and, therefore, a clearing member could compute the amount due with respect to each IP trading unit from published reports of dividends paid before dividend equivalent day. Nevertheless, the Commission urges OCC, in the months after IP trading commences, to monitor the ability of clearing members to meet their dividend equivalent obligations and to discuss with clearing members and the exchanges whether there is a need for earlier dissemination of IP dividend equivalent values.[42]

The Commission agrees with OCC that is is appropriate to include IPs in OCC's existing NEO margin system for OCC clearing members. Like NEOs, IPs generally are cash-settled.[43] In

---

[25] OCC's NEO margin system employs a portfolio evaluation methodology using options price theory to project the cost of liquidating a portfolio of positions in the event of an assumed "worst case" change in the price of the underlying interests. *See* Securities Exchange Act Release No. 23167 (April 22, 1986), 51 FR 16127, in which the Commission approved OCC's NEO margin system.

[26] A haircut would be applied to additional margin credits to account for the lack of perfect correlation between class groups.

[27] OCC would not provide margin credit for unsegregated long physical IP positions in a clearing member's customer's account as to which the delivery privilege has been exercised, on and after the second business day after tender of the exercise notice, because OCC would not be able to control the long value of the position on and after that day.

[28] In effect, the delivery facilitator would receive a margin credit equal to the sum of the aggregate cash-out values paid to OCC in connection with assignments of physical delivery exercises, because OCC would be holding that amount pending settlement with the delivery facilitator on exercise settlement day.

[29] Delivery facilitators would not be required to contribute to OCC's NEO clearing fund on account of their facilitating activities unless they otherwise carry IP or NEO positions.

[30] *See* letters to Laura Homer, Securities Credit Officer, FRB, from Richard T. Chase, Executive Vice President, Phlx, dated February 3, 1989, and from Gordon L. Nash, Senior Executive Vice President, Legal and Regulatory Affairs, Amex, dated March 8, 1989.

[31] *See* 12 C.F.R. 220.5(c) and 220.18 (a), (c), and (f) (1988).

[32] *See* Exchange approval order at 86-88.

[33] *See* letter from Laura Homer, Securities Credit Officer, FRB, to Richard Ketchum, Director, Division of Market Regulation, SEC, dated March 20, 1989.

[34] OCC's proposed rules require the clearing member to represent that all IPs pledged from customer accounts constitute margin securities. *See* OCC Rule 611.

[35] *See* OCC Rule 1104. The Liquidating Settlement Account is a special account created upon the suspension of an OCC clearing member. The account consists of the suspended clearing member's assets on deposit with OCC, including margin deposits, securities held in bulk, and that member's OCc clearing fund contributions. OCC closes out a suspended clearing member's outstanding obligations to OCC through transactions in this account.

[36] Currently, there are no "covered short IP positions" and the provisions of the rules that address these positions would have no effect. OCC has filed a separate rule change that would set out the requirements for IP escrow receipts. *See* Securities Exchange Act Release No. 26435 (January 10, 1989), 54 FR 1832. The Commission currently is reviewing this proposal.

[37] Several commentators expressed the belief that IPs are stock index futures, not securities. That issue is discussed in detail in the order approving the exchanges' proposal to trade IPs and, therefore, is not addressed in this order. This order incorporates the exchanges' approval order rationale for concluding that IPs are securities. *See* note 7, *supra*.

[38] *See, e.g.*, N. Katzenbach, *An Overview of Program Trading and Its Impact on Current Market Practices* (December 21, 1987) and Division of Market Regulation, *The October 1987 Market Break* (February 1988) ("Staff Report"). *See also* Report of the Presidential Task Force on Market Mechanisms (January 1988) and the Interim Report of the Working Group on Financial Markets (May 1988) ("Working Group Report") for other recommendations arising out of the October 1987 market break.

[39] *See* Exchange approval order, *supra*, note 7, for a discussion of the benefits of a market basket product.

[40] Unlike NEOs where OCC collects the premium from IP purchasers and requires writers to post as margin the premium plus an additional margin amount, OCC would collect from IP purchasers the aggregate index value and IP writers would be required to post (in the form of cash or other adequate collateral) the highest asked price or, for exercised or assigned IPs, the aggregate index value, plus an additional margin amount.

[41] *See* Working Group Report, *supra*, note 37.

[42] Based on experience regarding the actual settlement of IP dividend equivalent obligations, the Commission will review whether the exchanges should make available, on a routine basis, information regarding estimated or accrued dividend equivalents.

[43] Physical IPs, which are settled by delivery of the component stocks in the underlying index, are discussed below.

VOL 54 ISS 73 AP 18 1989 UMI

approving the NEO margin system,[44] the Commission determined that it provided a refined methodology for calculating margin, resulting in increased protection to OCC against adverse price movements in underlying assets. Additionally, recognizing that no margin system is designed to protect against the most extreme market moves, the Staff Report issued in connection with the October market break generally concluded that OCC's NEO margin system is a reliable method of risk measurement. Nevertheless, the Commission expects OCC to review and reassess periodically the NEO margin system and to make modifications, where appropriate, to deal safely with more volatile markets.[45]

The proposal also extends OCC's Pledge Program to proprietary and market maker IP positions. Thus, clearing members will be able to pledge IP positions maintained in proprietary and market maker accounts to lenders.[46] Additionally, because the FRB has determined that IPs may be treated as margin securities under Regulation T, the proposal would extend OCC's Pledge Program to IP positions in customer accounts.[47] The Commission supports this extension of the Pledge Program because it provides clearing members the ability to obtain additional financing through the pledge of customer IP positions maintained in margin accounts. Moreover, the Commission believes that use of OCC facilities to conduct this pledge activity should provide greater certainty to banks financing clearing member, broker-dealer, and customer IP positions.

The Commission notes that, unlike OCC rules dealing with NEOs, the proposed IP rules provide OCC the authority to exercise the cash-out privilege for an entire class of IPs on thirty days' notice to IP holders and writers in certain limited, extraordinary circumstances. For example, such circumstances would include, but are not limited to, a lack of regular trading activity in a class of IPs or the impending termination of business on the part of OCC or the exchange on which that class of IPs is traded. The Commission agrees with OCC that it should have the ability to terminate a class of IPs under extraordinary circumstances because, unlike options which expire at a pre-established time, IPs are of unlimited duration. The Commission recognizes that in certain circumstances OCC may want to act expeditiously to close out a class of IPs. Nevertheless, the Commission notes that OCC's By-Laws authorize OCC to exercise the cash-out privilege on a *minimum* of thirty days' notice. The Commission believes this period provides sufficient notice to allow market participants to make any needed adjustments to other related securities or futures positions. Nevertheless, given the extraordinary nature of a mandatory cash-out, the Commission expects OCC to make every effort to provide more than thirty days' notice where possible.

The Amex EIP provides holders exercising the delivery privilege the ability to obtain the basket of securities underlying either the XMI or the S&P 500 Index, thus creating a mechanism for the delivery of a standardized portfolio of equity securities. An EIP holder exercising the delivery privilege could obtain shares in as many as 500 companies. To otherwise establish such a portfolio would require the purchase of 500 different securities.

OCC will process exercises of the delivery privilege in a manner similar to that used for individual equity options with some modifications to reflect the unique characteristics of EIPs. For example, OCC will report EIP matched trade information to the designated clearing corporation reflecting the right of the exercising clearing member to receive shares in each of the component stocks underlying the EIP index and the obligation of either the delivery facilitator or a volunteering writing clearing member, as contra party to the exercising clearing member, to deliver an equal amount of shares in each of the component stocks. Because matched EIP trades will be processed in the designated clearing corporation's continuous net settlement ("CNS") system,[48] the designated clearing corporation will step between the exercising clearing member and the contra party and, in place of OCC, will guarantee those deliveries. Thus, clearing members will be able to net deliver and receive obligations in connection with physical EIP exercises with other activity in the underlying component stocks. Nevertheless, because the designated clearing corporations' CNS systems require clearing members to pay market value for securities delivered to them and pays to delivering clearing members the market value of securities they deliver (in satisfaction of their CNS delivery obligations), OCC must provide funds to the clearing member who will receive securities from the designated clearing corporation (*i.e.*, the exercising clearing member) so that the exercising clearing member can pay the designated clearing corporation and the designted clearing corporation can pay the delivering clearing member (*i.e.*, either the delivery facilitator or a volunteering EIP writer). Because the clearing member exercising the EIP physical delivery privilege previously paid the full value of the index for the right to receive the components stocks, OCC and the designated clearing corporations have converted a free delivery obligation into a delivery against payment or receipt against payment obligation.

The Commission believes it is appropriate to settle exercises of physical EIPs in this manner because it is consistent with one-account settlement.[49] The conversion of a free delivery obligation into a delivery against payment obligation, however, raises two concerns about cash flows. The proposed process for settling EIP delivery privilege exercises requires coordinated funds flow among many parties. The Commission notes that, in such a system, there is a risk of default by persons holding funds pending completion of the delivery process.[50]

[44] *See, supra*, note 25.

[45] OCC recently completed a review of its margin system. *See* OCC, The Backup System: A Special Study by the Margin Committee Subcommittee (August 31, 1988). The subcommittee's report contains a number of recommendations concerning OCC's margin policies and practices. The Commission understands that OCC's Board of Directors is considering those recommendations and will implement many in the near future.

[46] OCC's Pledge Program is a convenient mechanism for processing pledge loans to clearing members because OCC will recognize the pledgee's interest in pledge positions. *See* Securities Exchange Act Release Nos. 24171 (March 4, 1987), 52 FR 7724; 22278 (July 30, 1985), 50 FR 31804; 20994 (May 25, 1984), 49 FR 23132; and 19086 (July 19, 1983), 48 FR 33080.

[47] Long option positions, although they can be paired with short options to reduce margin requirements, currently have no loan value for purposes of Regulation T.

[48] CNS uses the system price (usually the previous days' reported closing price) to price members' payment obligations. Delivery and receive obligations are adjusted on a daily basis by a mark-to-the-market. Thus, by paying a mark-to-the-market, a clearing member with a right to receive can use that long position to offset a delivery obligation that will arise tomorrow. In CNS, every right to receive carries the obligation to pay, and every obligation to deliver carries the right to receive the system price.

[49] Section 17A requires the Commission to facilitate the development of a national clearance and settlement system. One feature of such a system is one-account settlement, *i.e.*, the ability to clear and settle through one entity all securities trades, regardless of the location of the other party to the trade or the market in which the trade is executed.

[50] For example, generally only broker-dealers hold memberships in OCC and designated clearing corporations, *e.g.*, National Securities Clearing Corporation ("NSCC"). Therefore, a large institution that maintains EIP positions must rely on the creditworthiness of a broker-dealer in converting its

Continued

The Commission acknowledges OCC's representations[51] that discussions are underway with the designated clearing corporations to develop a more simple process for settling exercises of physical EIPs. Nevertheless, the Commission believes it is imperative, within the months after IP trading commences, for OCC and the designated clearing corporations to design a system through which OCC can pay directly to the designated clearing corporation cash that would otherwise be paid to the exercising clearing member (perhaps using the margin deposits posted by the assigned EIP holders) on behalf of the exercising clearing member, which would entitle the exercising clearing member to receive securities, subject to daily marks-to-the-market, without payment on delivery.[52]

On the basis of the foregoing, the Commission finds that OCC's proposed rule change is consistent with the Act and, in particular, with section 17A of the Act.

Accordingly, *It Is Therefore Ordered*, under section 19(b)(2) of the Act, that the proposal [File No. SR-OCC-88-02] be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 11, 1989.

Jonathan G. Katz,

Secretary.

[FR Doc. 89-9221 Filed 4-17-89; 8:45 am]

BILLING CODE 8010-01-M

EIP positions to a portfolio of the underlying securities. If the broker-dealer clearing member fails while processing EIP exercises on behalf of the institutional customer and losses exceed Securities Investor Protection Corporation ("SIPC") insurance limits, that institution may suffer financial loss. Instead of having an identifiable interest in the underlying securities or the EIPs, the institution may share pro rata with all other customers in the pool of customer property maintained by the broker-dealer.

[51] Telephone conversation between Judith Poppalardo, Attorney, SEC, and James R. McDaniel, Schiff Hardin & Waite, on February 3, 1989.

[52] Such a system exists today at at least one designated clearing corporation albeit for different purposes. *See* Securities Exchange Act Release No. 25107 (October 1, 1987), 52 FR 36939 (approving a recent NSCC rule change that would allow an NSCC-Depository Trust Company ("DTC") member to instruct NSCC to charge the member's settlement account for 130% of the value of securities the member anticipated borrowing, but, in fact, did not receive. NSCC would segregate these funds in a fully paid-for account. This protects an NSCC-DTC member who makes a security delivery in anticipation of borrowing stock from being out of compliance with Rule 15c3-3 under the Act [the customer protection rule], if the stock is not borrowed).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-26714; File No. SR-Phlx-88-16]

Self-Regulatory Organizations; Proposed Rule Change by Philadelphia Stock Exchange, Inc.; Relating To Disqualification of Specialists From Receiving New Allocations Following Removal of Listings

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice hereby is given that on March 23, 1989, the Philadelphia Stock Exchange, Inc. ("PHLX" or "Exchange") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Amex. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The PHLX, pursuant to Rule 19b-4 under the Act, hereby submits as a proposed rule change supplementary material to its Rule 506, which Rule delineates the application process for an equity book or options class in connection with an allocation or reallocation by the PHLX Allocation, Evaluation and Securities Committee. The proposed supplementary material provision would prohibit a specialist from applying for any new listings for up to a year after a security was taken away from the specialist in: (1) A reallocation proceeding, or (2) a disciplinary proceeding. The text of the proposed commentary is as follows (new text is italicized):

Rule 506. (a) through (e) No change.

* * * Supplementary Material.

.01 A specialist may not apply for any new listings for a six (6) month period after a stock or option was taken away from the specialist in: (i) an involuntary reallocation proceeding; or (ii) a disciplinary proceeding. Such specialist is also prohibited from applying for any new listings for a second six month period unless the Exchange is satisfied that adequate corrective actions have been undertaken by the specialist.

II. Self-Regulatory Organization's Statement Regarding the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for the Proposed Rule Change

Although the proposed restriction is presented as supplementary material to PHLX Rule 506, its effect and intent would be to complement the provisions of PHLX Rules 511 and 515. Rule 511(C) allows the Exchange to reallocate an equity book or options class if the specialist unit is found to have performed below minimum standards. Rule 515 and the supplementary material thereto delineate the format for specialist evaluations by the Exchange. These rules do not specifically restrict a specialist unit's ability to receive new allocations following the reassignment of a book or class due to a reallocation or disciplinary action.

It would be inappropriate for a specialist unit to obtain a new listing during a period of time immediately subsequent to its loss of a listing. The PHLX Allocation Committee would probably not award new books during such period. It would strengthen the PHLX allocations rules, however, to specifically codify that result. It would also provide specialists notice of definite repercussions for substandard performance with respect to their specialist responsibilities or being subject to serious disciplinary findings.

It should be noted that the proposed rule change would not constitute a permanent bar to obtaining new listings. Rather, the prohibition would be merely long enough to grant a specialist sufficient time to remedy the deficiencies which lead to the reallocation of its listing(s). In this regard, it should be further noted that a second six (6) month prohibition would only be imposed if the Exchange is not satisfied that adequate corrective actions have been undertaken by the specialist which gave rise initially to specialist books being removed from the unit initially.

The proposed rule change is consistent with Section 6(b) of the Act in that it will enhance the PHLX's ability to ensure the fair allocation of securities to specialist units and to prevent the allocation of securities to specialist units whose performance is below acceptable standards. Further, it is

VOL 54 ISS 73 AP 18 1989 UMI

consistent with investor protection, the public interest and the maintenance of fair and orderly markets to impose temporary allocation restrictions on specialists who have had a security reallocated due to substandard performance and/or disciplinary actions.

B. Self-Regulatory Organization's Statement on Burden on Competition

The PHLX does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the PHLX consents, the Commission will: (A) By order approve such proposed rule change, or, (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Stret NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned, self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 9, 1989.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 11, 1989.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC-16906; (812-7123)]

EuroPacific Growth Fund; Notice of Application

April 10, 1989.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 (the "1940 Act").

Applicant: EuroPacific Growth Fund.

Relevant 1940 Act Sections: Exemption requested under Section 6(c) from the provisions of sections 2(a)(32), 2(a)(35), 22(c) and 22(d) and Rule 22c-1 thereunder.

Summary of Application: Applicant seeks an order amending a prior order (Investment Company Act Release No. 14195, October 15, 1984) ("Prior Order") which permits the assessment and waiver of a contingent deferred sales load ("CDSL"). The amended order would permit the waiver of the CDSL in certain additional situations, and would provide a credit for any CDSL paid in connection with the redemption of any shares followed by a reinvestment effected within 30 days of such redemption.

Filing Dates: The application was filed on September 12, 1988, and amended on February 13 and March 15, 1989.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on May 5, 1989. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personnally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for attorneys, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549; Applicant, c/o Michael J. Downer, Esq. Capitol Research and Management Company, 333 South Hope Street, Los Angeles, CA 90071.

FOR FURTHER INFORMATION CONTACT: Paul J. Heaney, Financial Analyst, (202) 272-3420, or Brion R. Thompson, Branch Chief, (202) 272-3016 (Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application; the complete application is available for a fee from the SEC's Public Reference Branch in person, or the SEC's commercial copier, (800) 231-3282 (in Maryland, (301) 258-4300).

Applicant's Representations

1. Applicant is registered under the 1940 Act as an open-end, diversified management investment company. Applicant's shares are offered to the public through broker-dealers that have dealer agreements with American Funds Distributors, Inc., Applicant's pricipal underwriter. Applicant offers its shares for sale at net asset value plus a traditional sales charge on transactions involving less than $1,000,000. For purchases of $1,000,000 or more, Applicant imposes no front-end sales charge, thereby enabling such purchasers to have the proceeds of their purchase payments fully invested at the time the investments are made.

2. The Prior Order, which was issued on behalf of Applicant and other funds in the American Funds Group of Funds ("American Funds") permits the imposition of a CDSL on certain redemptions of shares with an initial price of $1,000,000 or more. The amount of the CDSL payable upon redemption is equal to 1% of the lesser of the net asset value of Applicant's shares at the time of purchase or the net asset value of the shares at the time of redemption. The maximum amount of any CDSL or any combination of CDSL and sales load payable at the time Applicant's shares are purchased, does not exceed the maximum sales charge that could have been imposed at the time the shares were purchased under Article III, section 26(d) of the Rules of Fair Practice promulgated by the National Association of Securities Dealers. No amount is charged to shareholders or to the Applicant that is intended as payment of interest or any similar charge related to a CDSL.

3. In addition, no CDSL is imposed when the investor redeems on: (1) Amounts derived from increases in the value of the account above the total cost of shares being redeemed due to increases in the net asset value per share of Applicant; (2) shares acquired through reinvestment of dividend income and capital gains distributions; or (3) shares held for more than 12 months. In determining whether a CDSL is payable, it is assumed that shares held the longest are the first to be redeemed.

4. Applicant currently waives the CDSL on: (i) An exchange of shares offered by Applicant for shares of the Other Funds in the American Funds Group, and (ii) redemptions in connection with distributions from retirement plans qualified under the Internal Revenue Code ("Code") section 401(a) when such redemptions are necessary to make distributions to plan participants.

5. Applicant proposes to amend the Prior Order to permit additional waivers of the CDSL on redemptions in connection with (i) Distributions from a Custodial Account under Code Section 403(b)(7) ("403(b) plan") or an IRA due to death, disability or attainment of age 59½, (ii) a tax-free return of an excess contribution to an IRA, (iii) distributions by other employee benefit plans to pay benefits, and (iv) distributions from a retirement plan qualified under Code section 401(a) due to death. Applicant also proposes to amend the Prior Order to provide a credit for any CDSL paid in connection with a redemption of shares followed by a reinvestment of the proceeds of the redemption effected within 30 days of the redemption.

6. The Applicant's Board of Trustees will consider, among other items, the amount of revenue generated by the CDSL and paid to Applicant's distributor during their annual review of the Applicant's distribution plan adopted under Rule 12b-1 under the 1940 Act.

Applicant's Legal Analysis

1. Applicant asserts that the requested waiver of the CDSL for retirement plan distributions is justified on basic considerations of fairness. In each situation in which the CDSL would be waived, the redeeming shareholder is a member of a class of sharholders favored under the tax laws and in fairness such redeeming shareholder should not be penalized by a sales charge. Also, the requested waiver benefits remaining shareholders by encouraging retriement plan investments. These large investments considerably increase the Applicant's asset base and average account size, thereby reducing Applicant's operating expenses.

2. Applicant further asserts that the proposed waiver of the CDSL on redemptions in connection with the IRAs, 403(b) plans and other employee benefit plans reflects the Code's granting of favorable tax treatment to accumulations under such plans and imposing additional taxes on early retirement plan distributions. Similarly, waiving the charge on redemptions for distributions from retirement plans qualified under Code section 401(a) due to death is appropriate for policy reasons, as it is consistent with the Code's waiver of the early distribution penalty for distributions due to the participant's death.

3. Applicant submits that the proposed credit of the CDSL for redemptions and subsequent reinvestments within 30 days also serves shareholder interests. Consistent with the provisions of Rule 22d-1, Applicant permits redeemed shareholders to reinvest the proceeds of the redemption within 30 days without paying an initial sales charge, thereby allowing investors to avoid the sales load if they erroneously redeemed or had second thoughts about the redemption.

Applicant's Conditions

If the request to amend the Prior Order is granted, Applicant agrees to the following conditions:

1. Applicant will comply with the provisions of Rule 12b-1 under the 1940 Act both currently and as that rule may be modified by the SEC in the future.

2. Applicant will comply with the provisions of Rule 22d-1 under the 1940 Act.

3. Applicant will comply with the provisions of proposed Rule 6c-10 under the 1940 Act as currently stated and as it is adopted.

4. Applicant agrees that the exemptive relief requested does not cover any person, or any affiliated person of such person (or any affiliated person of such affiliated person) who holds Applicant out to the public, or who, directly or indirectly, causes Applicant to be held out to the public as being "No Load" or uses, or who, directly or indirectly, causes the use of terminology that, given the context and presentation, is likely to convey to investors the impression that no charges for sales or promotional expenses are imposed on shares issued by Applicant.

For the SEC, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF STATE

[PUBLIC NOTICE CM-8/1279]

National Committee of the U.S. Organization for the International Radio Consultative Committee; Meeting

The Department of State announces that the National Committee of the U.S. Organization for the International Radio Consultative Committee (CCIR) will meet on April 26, 1989 at the Department of State, 2201 C Street NW., Washington, DC. The meeting is planned for all day, convening in Room 1205 at 9:30 in the morning and Room 1912 at 1:30 in the afternoon. An escort will be at the main entrance to the building (22nd and C Streets) during the periods 9:15-9:35 a.m. and 1:15-1:35 p.m. to facilitate entry.

The purpose of the United States Organization is to assist and advise the Department on matters concerning participation in the international CCIR activities. It is charged with promoting the best interests of the United States, providing advice on matters of policy and positions in preparation for Study Group meetings, and recommending the disposition of proposed U.S. contributions to the international CCIR which are submitted to the Committee for consideration. The National Committee constitutes a steering body, and as such has purview of the work of the national study groups and other activities.

The main purposes of the meeting will be to:

1. Report on preparations for the CCIR Final Study Group Meetings to be held in the Fall of 1989;

2. Identification of major upcoming CCIR issues;

3. Consideration of future activities; (the following items will be taken up after 1:30 p.m.)

4. Report on preparations for the CCIR Extraordinary Study Group 11 Meeting on high definition television (HDTV) to be held May 10-16, 1989 in Geneva;

5. Other business and next meeting.

Members of the general public may attend the meeting and join in discussions subject to instructions of the Chairman. Admittance of public members is limited to available seating. All persons wishing to attend the meeting must contact the office of Richard Shrum, Department of State, Washington, DC; phone (202) 647-2592, telefax (202) 647-5957. Entrance to the State Department building is controlled, and attendees must use the C Street entrance.

VOL 54 ISS 73 APR 18 1989 UMI

Date: April 7, 1989.
Richard E. Shrum,
Chairman, U.S. CCIR National Committee.

BILLING CODE 4710-07-M

DEPARTMENT OF TRANSPORTATION

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended April 7, 1989

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 *et seq.*). The due date for answers, conforming application, or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket No. 46230

Date filed: April 4, 1989.
Due date for answers, conforming applications, or motion to modify scope: May 1, 1989.
Description: Application of Air Alliance Inc. pursuant to section 402 of the Act and Subpart Q of the Regulations applies for a foreign (a) scheduled air transportation of persons, property, and mail between Boston, Massachusetts and Montreal, Canada, and (b) charter air transportation of persons, property, and mail between points in Canada and points in the United States.

Docket No. 46234

Date filed: April 4, 1989.
Due date for answers, conforming applications, or motion to modify scope: May 2, 1989.
Description: Application of Eagle Air, Ltd., pursuant to section 402 of the Act and Subpart Q of the Regulations applies for a foreign air carrier permit to engage in charter foreign air transportation of property and mail between a point or points in The Turks and Caicos Islands and a point or points in the United States of North America, with blind sector traffic rights.

Docket No. 46236

Date filed: April 4, 1989.
Due date for answers, conforming applications, or motion to modify scope: May 2, 1989.
Description: Application of Continental Airlines, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations, requests a certificate of public convenience and necessity which will authorize Continental to provide scheduled foreign air transportation of persons, property and mail between Honolulu, Hawaii, on the one hand, and Nagoya, Japan, on the other hand.

Docket No. 45637

Date filed: March 27, 1989.
Description: Amendment to the Application of Continental Airlines, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations to request a certificate of public convenience and necessity authorizing foreign air transportation of persons, property and mail as follows; Between the terminal point Los Angeles, California, and the coterminal points San Jose Del Cabo (Los Cabos), La Paz, Loreto, and Huatulco, Mexico.

Docket No. 45783

Date filed: March 27, 1989.
Description: Amendment to the Application of Continental Airlines, Inc. pursuant to section 401 of the Act and Subpart Q of the Regulations to add the following new subparagraph to Paragraph 3; (5) Between the terminal point San Diego, California and the terminal point Mexico City/Toluca, Mexico.

Phyllis T. Kaylor,
Chief, Documentary Services Division.

BILLING CODE 4910-62-M

Maritime Administration

Eligibility of Vessels To Carry Preference Cargoes Under the Food Security Act of 1985; Policy Determination

Notice is hereby given that the Maritime Administration (MARAD) has determined, as a matter of policy, that the 3-year rule, given in section 901(b)(1) of the Merchant Marine Act, 1936, as amended (Act), applies to cargoes specified in section 901b. Accordingly, the Chief Counsel's advisory letter of July 11, 1988 is hereby withdrawn. This determination maintains the historical *status quo*, thus providing an opportunity for the Congress, if desired, to address the ambiguity created by the absence of the 3-year wait requirement in section 910k. The background and basis for this determination follow.

On July 11, 1988, the MARAD Chief Counsel responded to a written request for interpretive advice regarding certain eligibility criteria for U.S.-flag vessels to transport agricultural preference cargoes under amendments to the Act, contained in the Food Security Act of 1985 ("the Food Security Act"). The Chief counsel's July 11, 1988 letter advised that vessels newly documented under U.S. registry that meet the national security and age criteria specified in section 901k of the Act, as eligible to carry the incremental 25 percent of agricultural preference cargo under provisions of the Food Security Act (contained in section 901b(a)(1) of the Act), and that such vessels are not subject to the 3-year waiting period after U.S. documentation imposed on a eligibility of "privately owned United States-flag commercial vessels" built or rebuilt outside the United States or documented under any foreign registry pursuant to section 901(b)(1) of the Act.

On December 21, 1988, MARAD was petitioned by a U.S.-flag operator (Petitioner) engaged in the carriage of preference cargoes. Petitioner requested MARAD to withdraw the July 11, 1988 Chief Counsel advisory letter, pending reconsideration. On January 4, 1989, Petitioner was notified that MARAD would reconsider the advisory letter and notice was concurrently published in the **Federal Register** (54 FR 223), inviting public comment. In addition to a supplemental submission from Petitioner, 28 timely comments were received, 10 in support of the Chief Counsel's position and 18 in accord with Petitioner's view that the advisory letter was erroneous and should be withdrawn. Both legal arguments and policy issues concerning the Chief Counsel's advice were raised in several of these submissions.

MARAD undertook review and analysis of all submissions including later filed comments. The record indicates that the constructions of the pertinent sections of the Act by both the Petitioner and the Chief Counsel are reasonable legal interpretations. It is further noted that the language of section 901b(c)(1), when considered in conjunction with section 901k, leaves room for honest difference of opinion concerning the applicability of the 3-year rule, as the record indicates. Therefore, MARAD will maintain the *status quo* by interpreting the statute to require the 3-year waiting period, reflecting traditional interpretation and recognizing the repeated failures of recent legislative initiative to remove it entirely.

MARAD has a broad charter under the Act, which includes the policy aspects of statutory implementation. Given more than one reasonable interpretation of the statutory provisions at issue and the lack of any clear statement in the legislative history on point, MARAD must look to the policy considerations involved. To the extent that the inapplicability of the 3-year rule to the carriage of the incremental 25 percent would result in the addition to the U.S.-flag fleet of vessels that can satisfy the age and national-security utility criteria of section 910k, it would be consistent with much of the policy mandate in section 101(d) of the Act. However, it is inconsistent with the clause "constructed in the United States" in that section. Furthermore, because of the potentially adverse impact of such reflagging on existing U.S.-flag vessels the result could be no net increase in the cargo carrying capacity of the U.S.-flag fleet.

In addition, based on filings in the reconsideration Docket No. P-002, MARAD is cognizant that three members of Congress who were intimately involved in the process of developing the agriculture/maritime compromise in the Food Security Act have submitted comments stating their firm recollection that section 901k was intended to supplement, rather than supplant, the 3-year rule for vessels eligible to carry the incremental cargoes. Given these considerations, MARAD's policy mandate requires the Chief Counsel's advisory letter of July 11, 1988 be withdrawn.

Sec. 204(b) Merchant Marine Act of 1936, as amended (46 U.S.C. 1114(b)); 49 CFR 1.66.

Dated: April 13, 1989.

James E. Saari,
Secretary.

BILLING CODE 4910-81-M

Research and Special Programs Administration

Office of Hazardous Materials Transportation; Applications for Exemptions

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of applicants for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Transportation has received the applications described herein. Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

DATES: Comments must be received on or before May 18, 1989.

ADDRESS COMMENTS TO: Dockets Branch, Research and Special Programs, Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Branch, Room 8426, Nassif Building, 400 7th Street, SW., Washington, DC.

NEW EXEMPTIONS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10145-N	Automatic Sprinkler Corporation of America, Cleveland, OH.	49 CFR 173.304(a)(2), 173.34(d)	To manufacture, mark and sell DOT Specification cylinders equipped with a fusible safety relief device to be used as a fire extinguisher and charged with a nonflammable liquefied compressed gas. (Mode 1)
10146-N	L'Air Liquide Sassenage, FR	49 CFR 173.315(a)	To manufacture, mark, and sell a non-DOT specification insulated portable tank with vacuum plus gas helium shield designed and constructed in accordance with Section VIII of the ASME code for transportation of Helium, refrigerated liquid, classed as a nonflammable gas. (Modes 1, 3)
10147-N	E F I Corporation San Jose, CA	49 CFR 173.302(a)(1), 173.304(a)(1), 175.5.	To manufacture, mark and sell a non-DOT specification filament—wound reinforced plastic—fiberglass high pressure cylinder having an aluminum liner for shipment of certain non-flammable and flammable compressed gases. (Modes 1, 2, 3, 4, 5)
10148-N	Pro-Tech-Tube Inc. Kansas City, MO	49 CFR 173.387(b)(2)(iii)	To authorize shipment of a viable microorganism classed as an etiologic agent in an inner container surrounded with an absorbent material impregnated with a germicidal pesticidal substance overpacked in a metal tube. (Modes 1, 2, 3, 4, 5)
10149-N	Union Carbide Industrial Gases, Inc. Danbury, CT.	49 CFR 173.31(c)(13)(iv)	To authorize use of DOT Specification 113A60W cryogenic liquid cars which have not had the frangible discs located in or on the external casing or jacket replaced on an annual basis. (Mode 2)
10150-N	Morton Thiokol, Inc. Brigham City, UT	49 CFR 173.91(a)(2)	To authorize shipment of Special Fireworks, Class B explosives in non-DOT specification wooden boxes constructed in accordance with M I L-B-2427, Type II, Grade A. (Modes 1, 3)
10151-N	Sigri Corporation Somerville, NJ	49 CFR 173.119, 173.302, 173.304, 173.326, 173.34.	To manufacture, mark and sell a non-DOT specification full removable head salvage cylinder of 45 gallon capacity for over packing damaged or leaking packages of pressurized and non-pressurized hazardous materials. (Mode 1)
10152-N	Asahi Seisakusho Co., Ltd Saitama-Japan.	49 CFR 173.301(h), 173.302(a)(1), 173.305(a), 34(a)(1).	To authorize manufacture marking and sale of a non-DOT cylinder similar to the 3T cylinder for transporting high pressure air, oxygen, helium oxygen and helium mixture (50% oxygen maximum) classed as nonflammable gases. (Modes 1, 2, 3, 4)
10153-N	American Cyanamid Company Wayne, N.J.	49 CFR 173.377(h)	To authorize shipment of organic phosphate compound mixture, dry, classed as a poison B in flexible intermediate bulk containers containing 1102.3 pounds of product. (Mode 1)

VOL 54 ISS 73 AP 18 1989 UMI

NEW EXEMPTIONS—Continued

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
10154–N	Olin Corporation East Alton, IL	49 CFR 172.300, 173.10(c)(g), 173.107(c), (g).	To authorize shipment, in bulk, of scrap small arms primers and flash tubes which are contained in a velostat bag placed in 2 polyethylene bags placed in a 1½ gallon round cardboard container covered with No. 2 fuel oil with up to 3 of the 1½ gallon containers in a wooden box. (Mode 1)
10155–N	Walpole, Inc. Mt. Holly NJ	49 CFR 173.182, 173.217, 173.245b, 173.365, 173.366, 173.368.	To manufacture mark and sell a non-DOT specification collapsible, flexible, woven polypropylene bulk bag with a capacity of approximately 2,000 lbs. for use in transporting various solid oxidizers, corrosive materials, and class B poisons. (Modes 1, 2, 3)
10156–N	Van Leer Containers, Inc. Chicago, IL	49 CFR Part 173, Subpart F	To manufacture, mark and sell a non-DOT specification 30 litre capacity non-reusable composite container consisting of a blow molded polyethylene inner container with a steel overpack for transportation of various corrosive liquids. (Modes 1, 2, 3, 4)
10157–N	Now Technologies, Inc. Bloomington, MN.	49 CFR 173.268, 173.272	To manufacture, mark, and sell a non-DOT high desity polyethylene bottle with an inner teflon pouch liner and a capacity not to exceed 10 liters packed up to 6 in a fiberboard box for shipment of nitric acid, not over 72%, classed as an oxidizer; and sulfuric acid, classed as a corrosive material. (Mode 1)

This notice of receipt of applications for new exemptions is published in accordance with Part 107 of the Hazardous Materials Transportations Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on April 10, 1989.

J. Suzanne Hedgepeth,

Chief, Exemptions Branch, Office of Hazardous Materials Transportation.

BILLING CODE 4910–60–M

Office of Hazardous Materials Transportation; Applications for Renewal or Modification of Exemptions or Applications to Become a Party to an Exemption

AGENCY: Research and Special Programs Administration, DOT.

ACTION: List of applications for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Transportation has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of applications have been shown in earlier **Federal Register** publications, they are not repeated here. Except as otherwise noted, renewal applications are for extension of the exemption terms only. Where changes are requested (e.g. to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) they are described in footnotes to the application number. Application numbers with the suffix "X" denote renewal; application numbers with the suffix "P" denote party to. These applications have been separated from the new applications for exemptions to facilitate processing.

DATES: Comments must be received on or before May 3, 1989.

ADDRESS COMMENTS TO: Dockets Branch, Research and Special Programs, Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION: Copies of the applications are available for inspection in the Dockets Branch, Room 8426, Nassif Building, 400 7th Street SW., Washington, DC.

Application No.	Applicant	Renewal of exemption

Sunshine Act Meetings

Federal Register
Vol. 54, No. 73
Tuesday, April 18, 1989

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL RESERVE SYSTEM BOARD OF GOVERNORS

TIME AND DATE: 11:00 a.m., Monday, April 24, 1989.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Date: April 14, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 89–9428 Filed 4–14–89; 3:39 pm]

BILLING CODE 6210–01–M

NUCLEAR REGULATORY COMMISSION

DATE: Weeks of April 17, 24, May 1, and 8, 1989.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Open and closed.

MATTERS TO BE CONSIDERED:

Week of April 17

Monday, April 17

10:00 a.m.
Discussion of Shoreham Full Power Operating License (Public Meeting).
2:00 p.m.
Discussion/Possible Vote on Peach Bottom Restart (Public Meeting).

Thursday, April 20

2:00 p.m.
Briefing on Status of TMI–2 Cleanup Activities (Public Meeting).
3:30 p.m.
Affirmation/Discussion and Vote (Public Meeting) [if needed].

Week of April 24—Tentative

Tuesday, April 25

10:00 a.m.
Briefing on the Status of Generic Issues (Public Meeting).

Thursday, April 27

10:00 a.m.
Periodic Briefing by Advisory Committee on Nuclear Waste (ACNW) (Public Meeting).
3:30 p.m.
Affirmative/Discussion and Vote (Public Meeting) (if needed).

Week of May 1—Tentative

Tuesday, May 2

10:00 a.m.
Briefing on Severe Accident Research Plan (Public Meeting).
2:00 p.m.
Briefing on Results of Maintenance Team Inspections (Public Meeting).

Wednesday, May 3

10:00 a.m.
Briefing on the Status of NUREG–1150 (Public Meeting).
2:00 p.m.
Periodic Briefing by Advisory Committee on Reactor Safeguards (ACRS) (Public Meeting).
3:30 p.m.
Affirmation/Discussion and Vote (Public Meeting) (if needed).

Week of May 8—Tentative

Wednesday, May 10

10:00 a.m.
Annual Briefing on the State of the Nuclear Industry (Public Meeting).
2:00 p.m.
Briefing on Status of Operator Licensing Activities in the Area of Requalification Exams (Public Meeting).
3:30 p.m.
Affirmative/Discussion and Vote (Public Meeting) (if needed).

Note.—Affirmation sessions are initially scheduled and announced to the public on a time-reserved basis. Supplementary notice is provided in accordance with the Sunshine Act as specific items are identified and added to the meeting agenda. If there is no specific subject listed for affirmation, this means that no item has as yet been identified as requiring any Commission vote on this date.

TO VERIFY THE STATUS OF MEETINGS CALL (RECORDING): (301) 492–0292.

CONTACT PERSON FOR MORE INFORMATION: William Hill (301) 492–1661.

William M. Hill, Jr.,
Office of the Secretary.
April 13, 1989.

Corrections

Federal Register
Vol. 54, No. 73
Tuesday, April 18, 1989

This section of the FEDERAL REGISTER contains editorial corrections of previously published Presidential, Rule, Proposed Rule, and Notice documents. These corrections are prepared by the Office of the Federal Register. Agency prepared corrections are issued as signed documents and appear in the appropriate document categories elsewhere in the issue.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 89-029]

U.S. Veterinary Biological Product and Establishment Licenses Issued, Suspended, Revoked, or Terminated

Correction

In notice document 89-6356 appearing on page 11255 in the issue of Friday, March 17, 1989, make the following corrections in the table:

1. Under "Establishment", in the second, third, and seventh entries, "SmithKline" was misspelled.

2. Under "Product',' in the sixth entry, in the first line, "Bron-Chiseptica-Escherichia" should read "Bronchiseptica-Escherichia".

3. Also under "Product", in the seventh entry, in the second line, "Icterohaemorrhagiae" was misspelled.

4. Under "Establishment license No.", the seventh entry was omitted and should read "189".

BILLING CODE 1505-01-D

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 228

[FRL-3539-2]

Ocean Dumping; Site Designation; Gulf of Mexico; Pensacola, FL

Correction

In rule document 89-6303 beginning on page 11189 in the issue of Friday, March 17, 1989, make the following correction:

On page 11189, in the first column, under SUMMARY, in the second paragraph, in the last line, "> 10%" should read "< 10%".

List of Libraries That Have Announced Availability of Federal Register and Code of Federal Regulations

VOL
54
ISS
73
AP
18
1989
UMI

LIST OF LIBRARIES THAT HAVE ANNOUNCED AVAILABILITY OF FEDERAL REGISTER AND CODE OF FEDERAL REGULATIONS

In order to better serve the public the Office of the Federal Register is publishing a list of libraries where the *Federal Register* and *Code of Federal Regulations* are available for examination free of charge. This list contains only those Government depository libraries and other libraries that specifically have chosen to be included. A complete listing of *Government Depository Libraries* is available without charge from The Library, U.S. Government Printing Office, 5236 Eisenhower Avenue, Alexandria, VA 22304.

The Office of the Federal Register's list will be updated annually unless public interest requires more frequent publication. Any library that maintains these publications, makes them available to the public, and wishes to be included on future lists should write to the Director of the Federal Register, National Archives and Records Administration, Washington, DC 20408, or phone (202) 523-5227 giving the name and address of the library. (*FR only. †CFR only.)

Environmental Protection Agency

40 CFR Part 763
Toxic and Hazardous Substances Control; Asbestos; Notice and Final Rule

VOL 54 ISS 73 AP 18 1989 UMI

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-62073; FRL-3557-5]

Asbestos; Requirement to Submit Information to EPA

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This **Federal Register** notice explains how, when, and where former and current manufacturers and processors of certain asbestos products are to submit information identifying their products to EPA.

EFFECTIVE DATE: The information collection requirements contained in this notice have not been approved by the Office of Management and Budget (OMB) and are not effective until OMB has approved them. EPA will publish a notice in the future establishing an effective date for the information collection requirements.

ADDRESS: Send all submissions, identified by the docket control number (OPTS-62073), in triplicate to:

ATLIS Federal Services Inc., ATTN: EPA/AIA Clearinghouse, 6011 Executive Blvd., Rockville, MD 20852.

For information regarding submissions containing confidential business information, see unit II.B. of this notice.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Room EB-44, 401 M St. SW., Washington, DC 20460, (202) 382-3790, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION:

I. Background

On October 31, 1988, the President signed into law the Asbestos Information Act of 1988, Pub. L. 100-577 (the Act), which requires manufacturers and processors of certain asbestos-containing materials to submit information to EPA within 90 days of enactment, that is, by January 29, 1989.

Section 3 of the Act requires EPA, within 30 days of enactment, to publish a notice in the **Federal Register** that explains how, when, and where the information specified in section 2 is to be submitted. Although EPA did not issue a notice with the time period specified in the Act, this notice now explains how, when, and where the information specified in section 2 is to be submitted.

Section 3 also requires EPA to receive and organize the information submitted and, within 180 days of enactment of the Act, to publish the information. EPA may not review the information for accuracy or analyze the information to determine whether it is reasonably necessary to identify or distinguish the particular asbestos or asbestos-containing material.

II. Provisions

A. Reporting Requirements

The information required by section 2 of the Act is to be submitted to the address specified in the **ADDRESS** section above. The information may be submitted prior to the effective date if the submitter chooses to do so. To facilitate EPA's organization of this information, the submission should also include a summary of the information required by section 2 of the Act. The information in the summary should be presented in the order listed below:

1. The name and address of the manufacturer or processor of the asbestos or asbestos-containing material and the name and address of any applicable corporate predecessor who manufactured or processed such material.

2. Years of manufacture of the asbestos or asbestos-containing material.

3. Types or classes of products.

4. To the extent available, other identifying characteristics reasonably necessary to identify or distinguish the asbestos or asbestos-containing material.

5. [*Optional*] Protocols for samples of the asbestos and asbestos-containing material.

B. Conclusion

Since section 2 of the Act specifically prohibits EPA from reviewing or analyzing the necessity or accuracy of the information submitted, the Agency is not attempting to interpret the scope of that section. This notice, therefore, is limited to notifying persons subject to reporting of the manner, place, and time of reporting.

III. Other Regulatory Requirements

Paperwork Reduction Act

The information collection requirement in this notice has been submitted for approval to the Office of Management and Budget (OMB), 44 U.S.C. 3501 *et seq.* This requirement is not effective until OMB approves it and a notice to that effect is published in the **Federal Register.**

The public reporting burden to prepare a summary of the information required by section 2 of the Act is estimated to average 1.5 hours. This estimate does not account for the burden involved in reporting the information required by section 2, because that requirement results directly from the Act itself. The paperwork burden imposed by EPA is limited to a request for a summary of the information required by section 2 and is reflected in the estimate above. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M St. SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA."

Dated April 6, 1989.

William K. Reilly,

Administrator.

40 CFR Part 763

[OPTS-62067A; FRL-3557-4]

Asbestos-Containing Materials in Schools; State Requests for Waivers From Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final decision on requested waivers.

SUMMARY: EPA is issuing a final decision which approves the requests of Connecticut and Rhode Island for a waiver from the requirements of 40 CFR Part 763, Subpart E, Asbestos-Containing Materials in Schools.

ADDRESSES: Copies of the complete waiver applications submitted by the States and public comments on the requests are available from the TSCA Public Docket Office. Copies of the waiver applications are also on file and may be reviewed at the EPA Region I office in Boston, Massachusetts.

TSCA Public Docket Office (TS-793), TSCA Docket Officer, Room NE-G004, 401 M Street, SW., Washington, DC 20460.

EPA, Region I (APT-2311), John F. Kennedy Federal Building, Boston, MA 02203.

FOR FURTHER INFORMATION CONTACT: Michael M. Stahl, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Room EB-44, 401 M Street, SW., Washington, DC 20460, Telephone: (202) 554-1404, TDD: (202) 554-0551.

SUPPLEMENTARY INFORMATION: This notice is issued under the authority of Title II of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2641, *et seq.* TSCA Title II was enacted as part of the Asbestos Hazard Emergency Response Act 1986 (AHERA), Pub. L. 99-519. AHERA is the abbreviation commonly used to refer to the statutory authority for EPA's rules affecting asbestos in schools and will be used in this notice. EPA issued a final rule in the **Federal Register** of October 30, 1987 (52 FR 41846), the Asbestos-Containing Materials in Schools Rule (the Schools Rule, 40 CFR Part 763, Subpart E), which requires all Local Educational Agencies (LEAs) to identify asbestos-containing building materials (ACBM) in their school buildings and to take appropriate actions to control the release of asbestos fibers.

Under section 203 of AHERA, EPA may, upon request by a State Governor and after notice and comment and opportunity for a public hearing in the State, waive in whole or in part the requirements of the Schools Rule, if the State has established and is implementing or intends to implement an ongoing program of asbestos inspection and management which is at least as stringent as the requirements of the rule. Section 763.98 (40 CFR 763.98) sets forth the procedures to implement this statutory provision. The School Rule requires that specific information be included in the waiver request submitted to EPA, establishes a process for reviewing waiver requests, and sets forth procedures for oversight and recission of waivers granted to States. The Agency encourages States to establish and manage their own school regulatory programs under the AHERA waiver provision.

EPA issued a notice in the **Federal Register** of October 3, 1988 (53 FR 38838), which announced the receipt of waiver requests from the States of Connecticut, Rhode Island, Illinois, and New Jersey, and solicited comments from the public. The notice also discussed the key program elements of each State program, listed differences between each State program and the AHERA requirements, and provided EPA's preliminary response to the four States on the differences identified.

Four comments were received during the 60-day comment period. The States of Illinois and Rhode Island submitted comments on their respective waiver requests by responding to the major differences discussed in the October 3, 1988, **Federal Register.** Two other comments addressed the New Jersey program: One comment was supportive, and the other expressed concerns regarding the program's stringency. No request for a public hearing was received on any of the four waiver requests. Consequently, no hearings were held.

EPA is required to issue a notice in the **Federal Register** announcing its decision to grant or deny a request for a waiver within 30 days after the close of the comment period. The comment period for this docket closed December 3, 1988. The 30-day review period may be extended if mutually agreed upon by EPA and the State. EPA will not publish final decisions on the New Jersey and Illinois waiver requests at this time. The State of New Jersey is in the process of completing its proposed asbestos regulations. EPA has agreed with the State to extend the 30-day review of its application. At present, EPA and the State of Illinois are continuing discussions on that State's waiver request. However, EPA and the State have agreed that the exclusion provisions of AHERA (40 CFR 763.99) offer the appropriate relief for the approximately 1,300 previous inspections conducted by the State, if these inspections were conducted in a manner acceptable under AHERA. EPA will issue a notice in the **Federal Register** giving its reasons for granting or denying each State's application when a final decision is made. The remainder of this notice deals only with the waiver requests from Connecticut and Rhode Island. EPA, in letters dated December 16, 1988, agreed with both Connecticut and Rhode Island to extend the 30-day review of their applications. This allowed the States time to provide additional information requested by EPA to assure that the States would incorporate certain AHERA requirements into their asbestos inspection and management programs.

During the 60-day comment period the State of Rhode Island submitted comments on its waiver request by responding to the major differences discussed in the October 3, 1988, **Federal Register;** the Rhode Island submission is discussed more fully in Unit II of this notice.

The remainder of this notice is divided into three units. The first two units discuss, respectively, the Connecticut and Rhode Island programs and set forth the reasons and rationale for EPA's decision on each State's waiver request. Each of these units is further sub-divided into three sections. Section A discusses key elements of the State's program at the time the waiver request was submitted. Section B enumerates the differences between the State's program and the AHERA requirements as discussed in the October 3, 1988, **Federal Register** notice and the response to those differences which EPA subsequently received from the State. Section C gives EPA's final approval of the waiver request based on the State's response. The third unit of this notice discusses statutory requirements of the Paperwork Reduction Act.

I. The Connecticut Program

A. Program Elements

In June 1985, sections 10-292a and 10-292b of the Connecticut General Statutes, as amended by Public Act 86-65, became effective. The statute mandated that each public LEA in Connecticut inspect its school facilities for asbestos-containing materials (ACM) and develop asbestos management plans for each facility. LEAs responsible for Connecticut public schools

BEST COPY AVAILABLE

VOL 54 ISS 73 AP 18 1989 UMI

constructed prior to January 1, 1979, submitted Asbestos Management Plans to the State Department of Education (CTDOE) prior to January 1, 1987. The State Department of Health Services (CTDHS) reviewed the plans and made recommendations regarding approval to DOE. Forms provided by CTDOE were used for inspection reports. CTDHS developed a detailed asbestos decision protocol for the identification and assessment of ACM, including recommended response actions, and an asbestos management program and remediation options guidelines to be used by public LEAs. Regulations promulgated pursuant to this statute require:

1. Inspection of all public schools constructed prior to January 1, 1979, for the identification of friable and nonfriable ACM.

2. Inspections to be conducted by a qualified inspector, defined as an individual who has attended an EPA-sponsored program or its equivalent and has demonstrated to the Department of Health Services an ability to sample and identify ACM.

3. An asbestos management plan to be developed and prepared by a qualified individual when asbestos is identified. This individual must have attended an EPA-sponsored course in asbestos management or its equivalent as determined by CTDHS.

4. The asbestos management plan addresses monitoring of ACM, education of building staff, procedures to minimize asbestos fiber release, annual reviews, and a time schedule for implementing actions specified in the plan.

5. Annual updates of the management plan.

6. Periodic visual inspections every 2 months.

7. Each LEA to have a designated person to oversee the LEA's asbestos program.

8. Each school to keep a copy of the asbestos management plan in its administrative office.

B. Resolution of Differences Between State and AHERA

Requirements

In the October 3, 1988, **Federal Register** notice, EPA gave its preliminary response to differences identified between Connecticut and AHERA requirements. EPA's responses were divided into two groups: those which need to be addressed by the State before May 9, 1989, and those which need to be addressed prior to the statutory date specific to the particular requirement. In a letter dated January 10, 1989, to Mr. John Coroso, Director, Division of Management and Budget, Connecticut Department of Education, who was designated by the Governor of Connecticut as the person with legal authority to carry out the requirements related to the waiver request, EPA indicated those items from the October 3, 1988, notice requiring official assurance that AHERA requirements will be incorporated into the State's asbestos inspection and management program. The letter also listed those items for which satisfactory assurances were already received in the State's original waiver request signed by the Governor. The remaining assurances were subsequently received in an official letter dated January 20, 1989, from Mr. Coroso to EPA. These four assurances which follow were contained in the State's original waiver request:

1. All public school buildings which are covered under the EPA rules but not under the State regulations (i.e., schools constructed after January 1, 1979) must be inspected and have management plans developed.

CTDOE Response: In order to comply with this more stringent Federal requirement, CTDOE will require that these public school facilities be inspected for the presence of asbestos according to established Connecticut regulations, decision protocols and remediation options. Asbestos management plans will be submitted for these facilities.

2. LEAs will provide yearly notification regarding asbestos activities to workers and building occupants or their legal guardians and that management plans will be made available for public inspection.

CTDOE Response: Section 763.84(c) of the AHERA regulations requires the LEA to ensure that workers, students, parents, teachers and other building occupants are notified about the availability and locations of asbestos management plans on an annual basis. To comply with this more stringent Federal requirement, CTDOE will require LEAs to annually inform workers and building occupants, or their legal guardians, about inspections, response actions and post-response action activities, including periodic reinspection and surveillance activities that are planned or in progress.

3. All custodial and maintenance employees will be trained as required by EPA rules.

CTDOE Response: Section 763.92 of the AHERA regulations requires the LEA to ensure that its maintenance and custodial staff who work in a building that contains ACM receive training of at least 2 hours. The section also requires the LEA to ensure that its maintenance and custodial staff, who conduct any activities that result in the disturbance of ACM, receive an additional 14 hours of training. To comply with this more stringent Federal requirement, CTDOE will require LEAs to train their maintenance and custodial staff in, at least, the following areas:

(a) Information regarding asbestos and its various uses and forms.

(b) Information on the health effects associated with asbestos exposure.

(c) Locations of ACM identified throughout each school building in which they work.

(d) Recognition of damage, deterioration and delamination of ACM.

(e) Name and telephone number of the Asbestos Program Coordinator designated to carry out general local education agency responsibilities and the availability and location of the management plan.

The additional 14 hours of training for staff conducting activities which may result in the disturbance of ACM will include:

(a) Descriptions of the proper methods of handling ACM.

(b) Information on the use of respiratory protection as contained in the EPA/NIOSH Guide to Respiratory Protection for the Asbestos Abatement Industry, September 1987 (EPA 560/OPTS-86-001) and other personal protection measures.

(c) The provisions of AHERA §§ 763.91 and 763.92, Appendices A, B, C, D, of Subpart E of Part 763, EPA regulations contained in 40 CFR Part 763, Subpart G, and in 40 CFR Part 61, Subpart M, and OSHA regulations contained in 29 CFR 1926.58.

(d) Hands-on training in the use of respiratory protection, other personal protection measures, and good work practices.

4. Warning labels will be posted in routine maintenance areas where ACBM is located.

CTDOE Response: Section 763.95 of the AHERA regulations requires the LEA to attach a warning label immediately adjacent to any friable and nonfriable ACM and suspected materials assumed to be ACM located in routine maintenances areas (such as boiler rooms) at each school building. This warning label should read, in print which is readily visible because of large size or bright color, as follows: CAUTION: ASBESTOS, HAZARDOUS, DO NOT DISTURB WITHOUT PROPER TRAINING AND EQUIPMENT.

To comply with this more stringent Federal requirement, the CTDOE will require public LEAs to attach warning labels to:

(a) Friable ACM that was responded to by a means other than removal.

(b) ACM for which no response action was carried out.

(c) All labels shall be prominently displayed in readily visible locations and shall remain posted until the ACM that is labeled is removed.

Remaining assurances were subsequently received in an official letter dated January 20, 1989, from Mr. Coroso to EPA. Following is a list of those items noted in EPA's January 10, 1989, letter; after each item or group of items is a summary of the CTDOE response.

For the first five items EPA required that the State incorporate requirements into its program for public schools by May 9, 1989:

1. Until the Connecticut accreditation programs are approved by EPA, only properly accredited asbestos professionals who have received accreditation from an EPA-approved program will be used by LEAs for inspections, management plan development, abatement project design, and implementation.

2. Management plans will be developed for schools found not to contain asbestos and the plans will be submitted to the State.

3. The recordkeeping requirements of the EPA rules will be implemented by LEAs.

4. Provisions will be made for bringing schools, built after 1979 (which were not covered by State regulation), into the system of asbestos inspection and management; buildings brought into the school system after the initial inspection will be subject to the AHERA requirements.

5. The State will require, either administratively or through new regulations, that LEAs use the EPA criteria governing clearance sampling and use of transmission electron microscopy to determine the adequacy and completeness of response actions.

CTDOE Response: In its letter of January 20, 1989, the State assured EPA that it would incorporate all five of these requirements into its program for public schools by May 9, 1989.

EPA required that in responding to Items 6 and 7 the State describe specific action it proposes to take to ensure conformance with AHERA, and provide a time schedule for incorporating each action into the State's program.

6. Implement a plan which provides for reinspection of public schools at least every 3 years.

CTDOE Response: Public LEAs will be notified by February 15, 1989, of this requirement [letter is available in Docket]. The State will require asbestos management plans to be submitted as a result of the reinspections. The plans will be scheduled for submission 3 years after the approval of the initial plans. The State provided for the docket a listing of public school districts, school facility addresses, date of asbestos management plan approval, and reinspection due date.

7. Upgrade the Connecticut enforcement program by implementing a routine inspection program to insure that LEAs are complying with the State's requirements.

CTDOE Response: Beginning on January 1, 1990, at least 100 public school facilities will be inspected annually by CTDOE or CTDHS. These compliance inspections will include a review of the following:

a. That an asbestos management plan is on file as required by § 763.94 of AHERA regulations.

b. That warning labels are attached as required by § 763.95 of AHERA regulations.

c. That an operations and maintenance program is implemented as described in § 763.91 of AHERA regulations.

A report of all annual compliance reviews will be kept on file with CTDOE.

Any public school district found not to be in compliance with the provisions of Connecticut General Statute section 19a–3332d *et seq.* will be reported to the CTDHS, which may enforce compliance through Connecticut General Statute section 19a–332d and corresponding regulations. This section of the Connecticut statute allows for penalties of up to $5,000, or up to 1-year imprisonment or both, for violations related to standards for asbestos abatement.

8. Bulk sampling schemes will be upgraded to AHERA standards for all future reinspections.

CTDOE Response: Bulk sampling schemes will be so upgraded.

9. If the State identifies any deficiencies in the types of materials inspected during previous inspections, these deficiencies will be resolved during the next scheduled reinspection.

CTDOE Response: Identified deficiencies will be so resolved.

With one exception, the above assurances from Connecticut respond to all of the items contained in EPA's October 3, 1988, **Federal Register** notice. The exception regarded the need for a determination by the State before May 9, 1989, whether or not past inspections were done in "substantial compliance" with current EPA regulations.

Upon further review, the Agency has decided that determination of substantial compliance with respect to past inspections under 40 CFR 763.99 (Exclusions) is not a condition for a waiver under 40 CFR 763.98. Under 40 CFR 763.99(a)(4), the substantial compliance decision is included in the management plan. Whether a State lead agency has properly made this "substantial compliance" decision arises during enforcement of the regulations against a school which claims it does not have to conduct an AHERA inspection. It is, therefore, an issue to be decided among those State offices with responsibility for deciding and advising on enforcement matters. In addition, during any oversight of State programs under 40 CFR 763.98(h), EPA may examine State compliance with 40 CFR 763.99(a)(4) in making these substantial compliance decisions. As noted in item 9 above, however, deficiencies other than those affecting the substantial compliance decision may be resolved during the next scheduled reinspection.

C. EPA'S Decision on Connecticut's Request for Waiver

EPA has received formal assurances from the Governor and from the lead agency (CTDOE) having the legal authority to carry out the requirements relating to the waiver request that Connecticut will incorporate into its asbestos inspection and management program by the statutory dates all of the applicable requirements contained in EPA's October 3, 1988, **Federal Register** notice. Accordingly, EPA grants the State of Connecticut request for waiver from the requirements of 40 CFR Part 763, Subpart E. This waiver is applicable to public schools only. EPA retains AHERA jurisdiction for private schools in Connecticut. This waiver is subject to rescission under 40 CFR 763.98(j) based on periodic EPA oversight evaluation and conference with the State in accordance with 40 CFR 763.98(h) and 763.98(i), effective May 9, 1989. Federal jurisdiction shall be in effect in the period between the date of publication of this notice and May 9. This will assure that the State has sufficient time to prepare to assume its new responsibilities. It will also assure the public that no gap in authority occurs, and gives the public sufficient notice of the transfer of duties from EPA to the State of Connecticut.

II. The Rhode Island Program

A. Program Elements

In July 1985, Chapter 23–24.5 of the General Laws of Rhode Island became

VOL 54 ISS 73 AP 18 1989 UMI

effective. The statute required that the Rhode Island Department of Health (RIDOH) undertake inspections of high priority group buildings, which included public and private school buildings. All Rhode Island public and private schools were inspected by RIDOH personnel by September 1987. RIDOH used a numerical algorithm to rate the hazard posed by a particular type of ACM in a given area. The ratings assigned to each area were intended to be used as a basis for allocating State abatement funds. RIDOH did not establish recommended or required abatement actions based on the numerical ratings. Pursuant to the statutory authority, RIDOH promulgated regulations (January 1986 and August 1986) which require:

1. The submission of an asbestos abatement plan by the building owner if the RIDOH inspection identifies material containing equal to or greater than 1 percent asbestos. Upon RIDOH notice, the building owner has 120 days to submit the asbestos abatement plan.

2. The asbestos abatement plan includes: bulk and air sampling information; blueprints or floor plans; an operations and maintenance program which addresses the monitoring of ACM; the education of maintenance staff; actions to minimize fiber release and the potential of human exposure to asbestos; and a description of abatement actions.

B. Resolution of Differences Between State and AHERA

Requirements

In the October 3, 1988, **Federal Register** notice, EPA gave its preliminary response to differences identified between Rhode Island and AHERA requirements. EPA's responses were divided into two groups: those which need to be addressed by the State before May 9, 1989, and those which need to be addressed prior to the statutory date specific to the particular requirement. In a letter dated January 17, 1989, to Mr. James E. Hickey, CIH, Chief, Division of Occupational and Radiological Health, Rhode Island Department of Health, who was designated by the Governor of Rhode Island as the person with legal authority to carry out the requirements related to the waiver request, EPA indicated those items from the October 3, 1988, notice requiring official assurance that AHERA requirements will be incorporated into the State's asbestos inspection and management program. The required assurances were subsequently received in an official letter dated January 25, 1987, from Mr. Hickey to EPA. Following is a list of those items noted in EPA's January 17, 1989 letter. Following each item is a summary of the RIDOH response.

1. Until Rhode Island accreditation programs are approved by EPA, only properly accredited asbestos professionals who have received accreditation from an EPA-approved program will be used by LEAs for inspections, management plan development, abatement project design, and implementation.

RIDOH Response: EPA has previously (May 27, 1988) approved Rhode Island's Asbestos Contractor, Site Supervisor and Worker accreditation programs under the EPA Model Contractor Accreditation Plan (52 FR 15875). The State's current regulations for consultant certification are identical to those contained in the EPA Model Plan. In addition, the State resubmitted a request for EPA approval of this accreditation program for inspectors, management planners, and abatement project designers on November 25, 1988, and is awaiting action on this request. Under current State regulations, RIDOH cannot certify a consultant who has not received training from a program approved under the EPA Model Plan and will only accept LEA management/abatement plans from State-certified consultants.

2. In addition to the current yearly notifications LEAs already provide regarding asbestos activities to workers and building occupants, the State of Rhode Island will require that LEAs also provide notice to parents or legal guardians.

RIDOH Response: LEAs will be notified by letter that the notification requirements of State regulations also include appropriate annual notifications to parents or legal guardians.

3. LEAs will make management plans available for public inspection.

RIDOH Response: Access to abatement/management plans is guaranteed by section 23-24.5-11(a) of the General Laws (asbestos program enabling legislation). However, RIDOH will request that LEAs include a notice of availability in the annual notifications referenced in Item 2 above.

4. Recordkeeping requirements of the EPA rules will be implemented by LEAs.

RIDOH Response: LEAs will be informed in writing of the requirements of maintaining all AHERA-mandated records. AHERA recordkeeping requirements are addressed, at least in part, by current RIDOH regulations. RIDOH will review the remaining requirements with State legal counsel to determine if this administrative notification to LEAs must also be supplemented by additional amendments to State regulations.

5. Schools which have no ACM will submit management plans and follow notification requirements.

RIDOH Response: RIDOH will advise LEAs with schools previously identified as "containing no asbestos" that they are subject to the requirements of the initial AHERA inspection and plan submittal process outlined in 40 CFR 763.93. These LEAs will also be advised of the annual notification requirements referenced in items 1 and 2 above.

6. All LEA custodial and maintenance employees will be trained as required by EPA rules, including a 2-hour awareness training.

RIDOH Response: The 14-hour training for maintenance and custodial employees mandated by 40 CFR 763.92(a)(2) has been addressed by modifying the Competent Person training requirements in the State's regulations. LEAs will be advised in writing that the training for maintenance and custodial employees mandated by the State's regulations must include at least the 2 hours mandated by 40 CFR 763.92(a)(1).

7. LEAs will meet the requirement to have a designated person in charge of the LEA asbestos program.

RIDOH Response: This is an essential element of all AHERA management plans and RIDOH will also remind each LEA in writing of this requirement.

For the following Items 8, 9, and 10, EPA required that the State provide specific actions it proposes to take to ensure conformance with AHERA; and provide a time schedule for incorporating each action into the State's program.

8. Asbestos abatement clearance air sampling will be done in accordance with EPA requirements.

RIDOH Response: Rhode Island will propose appropriate amendments to its regulations for all buildings subject to the AHERA rules. The timeframe for regulation amendments can vary from 1 to 6 months. Rhode Island's Administrative Procedures Act provides for both "emergency" and routine promulgation of regulations. RIDOH will review these items with State legal counsel to determine the appropriate rulemaking option. In any case, RIDOH does not foresee any complications which would put the implementation date of these amendments later than July 1989. The school districts will be informed of the applicability of the regulations, and RIDOH assures that these regulations will be in force by the effective date of the waiver.

9. Provisions for phasing in transmission electron microscopy (TEM) requirements for asbestos abatement clearance sampling will be done in accordance with EPA requirements.

RIDOH *Response:* RIDOH's response is identical to that contained in Item 8 above.

10. Past management plans will be updated to conform with the provisions for assessing ACM.

RIDOH Response: All of the reports of inspections previously conducted by RIDOH have already been sent to each LEA. These reports should have provided enough information for the LEA to perform an assessment of each area in accordance with 40 CFR 763.88. However, some of this information is several years old and the physical condition of the ACM may have changed to the point that an assessment based solely on this information could be totally inaccurate. Consequently, RIDOH will advise the LEAs that these areas should be formally assessed only after additional review by LEA personnel with AHERA training and/or AHERA-certified consultants hired by the LEA. The majority of the LEAs in Rhode Island have filed deferral requests in accordance with TSCA section 205. Consequently, it is RIDOH's understanding that these assessments must be completed and appropriate management plans submitted to RIDOH on or before May 9, 1989. Unless contrary information is received from EPA, RIDOH will so advise the LEAs.

For Items 11 and 12, EPA required that the stated AHERA requirements be in place on or before the date required by law.

11. If Rhode Island identifies deficiencies in the types of materials inspected during previous inspections, these deficiencies will be resolved during the next scheduled reinspection.

RIDOH Response: The majority of Rhode Island's initial inspections were done between January 1986 and July 1987, with essentially all inspections of buildings subject to AHERA completed by December 1987. As noted in item 10 above, the results of these inspections will be reviewed by the LEAs prior to submittal of their management plans. All of the buildings previously inspected by RIDOH will be subject to the 3-year reinspection requirement between January 1989 and December 1990. Consequently, all deficiencies should also be resolved by the end of this reinspection period.

12. All LEAs which have buildings with ACM must be required to implement a program of periodic surveillance every 6 months or the State must provide sufficient justification to show that its current program is "as stringent" as AHERA.

RIDOH Response: State regulations require that management/abatement plans include a schedule for periodic monitoring and documentation of the results of surveillance. Management plan reviewers evaluate proposed surveillance intervals to determine if they are appropriate under the circumstances. Items which are considered include the type, condition, accessibility and potential for significant damage of the ACM, traffic and/or activity levels, as well as present and proposed use(s) of the area. RIDOH review criteria recognize that some areas (e.g., main corridors, gymasiums, veritcal risers, and stairwells) will usually require surveillance at intervals more frequent than every 6 months. Conversely, RIDOH does not believe that low-activity areas which are otherwise secured and/or unused (e.g., crawl spaces) need to be entered every 6 months solely for the purpose of such surveillance, particularly when the management plan also includes procedures which limit access to these areas to individuals with proper training and equipment. RIDOH requires that this surveillance be performed by an individual certified as a "competent person." The above criteria have been in place since RIDOH promulgated detailed abatement/management plan submittal requirements in January 1986.

With one exception, the above assurances from Rhode Island respond to all of the items contained in EPA's October 3, 1988, **Federal Register** notice. The exception regarded the need for a determination by the State before May 9, 1989, whether or not past inspections were done in "substantial compliance" with current EPA regulations.

Upon further review, the Agency has decided that determination of substantial compliance with respect to past inspections under 40 CFR 763.99 (Exclusions) is not a condition for a waiver under 40 CFR 763.98. Under 40 CFR 763.99(a)(4), the substantial compliance decision is included in the management plan. Whether a State lead agency has properly made this "substantial compliance" decision arises during enforcement of the regulations against a school which claims it does not have to conduct an AHERA inspection. It is, therefore, an issue to be decided among those State offices with responsibility for deciding and advising on enforcement matters. In addition, during any oversight of State programs under 40 CFR 763.98(h), EPA may examine State compliance with 40 CFR 763.99(a)(4) in making these substantial compliance decisions. As noted in item 11 above, however, deficiencies other than those affecting the substantial compliance decision may be resolved during the next scheduled reinspection.

C. EPA's Decision of Rhode Island's Request for Waiver

EPA has received formal assurances from the lead Rhode Island agency (RIDOH) having the legal authority to carry out the requirements relating to the waiver request that Rhode Island will incorporate into its asbestos inspection and management program, by the statutory dates, all of the applicable requirements contained in EPA's October 3, 1988, **Federal Register** notice. Accordingly, EPA grants the State of Rhode Island a waiver from the requirements of 40 CFR Part 763, Subpart E, effective May 9, 1989. Federal jurisdiction shall be in effect in the period between the date of publication of this notice and that date. This will assure that the State has sufficient time to prepare to assume its new responsibilities. It will also assure the public that no gap in authority occurs, and gives the public sufficient notice of the transfer of duties from EPA to the State of Rhode Island. As requested, this waiver is applicable to all schools covered by AHERA in the State. This waiver is subject to rescission under 40 CFR 763.98(j) based on periodic EPA oversight evaluation and conference with the State in accordance with 40 CFR 763.98(h) and 763.98(i).

III. Other Statutory Requirements

Paperwork Reduction Act

The reporting and recordkeeping provisions relating to State waivers from the requirements of the Asbestos-Containing Materials in Schools Rule (40 CFR Part 763) have been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act and have been assigned OMB control number 2070-0091

Dated: April 7, 1989.

Part IV

Department of the Treasury

Customs Service

19 CFR Part 101

Field Organization; Houston-Galveston District, Texas, et al; Final Rule

VOL 54 ISS 73 AP 18 1989 UMI

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 101

[T.D. 89-47]

Customs Service Field Organization; Houston-Galveston District, Texas, et al.

AGENCY: U.S. Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This document amends the Customs Regulations governing the Customs field organization by changing the boundaries of the Houston-Galveston, Laredo, Dallas/Fort Worth, and Port Arthur Districts, which lie within the Southwest Region. The purpose of the changes is to place all of the Texas interior ports within the Dallas/Fort Worth District; to move supervision of the port of San Antonio, Texas, and the user-fee airport at Midland, Texas, from the Laredo District to the Dallas/Fort Worth District; and to make minor alterations to the Port Arthur and Houston-Galveston Districts for simplification of administrative functions. As a result of these changes, ports with similar types of operations will be situated in the same districts. The public and importers will thereby be better served and Customs personnel and resources more efficiently used.

EFFECTIVE DATE: May 18, 1989.

FOR FURTHER INFORMATION CONTACT: Linda Walfish, Office of Workforce Effectiveness and Development, Office of Inspection and Control, U.S. Customs Service (202) 566-9425.

SUPPLEMENTARY INFORMATION:

Background

As part of a continuing program to obtain more efficient use of its personnel, facilities and resources, and to provide better service to carriers, importers and the public, Customs is amending § 101.3, Customs Regulations (19 CFR 101.3), by realigning the boundaries of several districts in the Southwest Region. This will place all of the current Texas interior ports of entry within the Dallas/Fort Worth District. It will move supervision of the port of San Antonio, Texas, and the user-fee airport at Midland, Texas, from the Laredo District to the Dallas/Fort Worth District. San Antonio, an inland port/airport operation, is functionally similar to the Dallas/Fort Worth operation and is more easily accessible to the Dallas/Fort Worth District than it is to the Laredo District due to better air transportation. The user-fee operations at Midland have more in common with Dallas/Fort Worth's ports than with Laredo's. User fee airports are those which, while not qualifying for designation as an international or landing rights airport, have been approved by the Commissioner to receive the services of Customs officers for processing aircraft entering the U.S. With this change, Laredo will have supervision of functionally similar border ports. These ports are sufficiently large and spread out over such a large geographical area as to require the full attention of the district director. Other alterations in boundaries are minor and for the purpose of simplification of administrative functions.

The revised district boundaries are as follows:

Houston-Galveston District

That part of the State of Texas south of 32 degrees north latitude, east of 97 degrees west longitude, and west of the Neches River except Jefferson County; and the territory included in the port limits of Corpus Christi, Texas. Ports would include: Houston-Galveston, Corpus Christi, Port Lavaca-Point Comfort, and Freeport (all in Texas).

Note: The only changes are to transfer to the Port Arthur District a narrow strip east of the Neches River running along 32 degrees north latitude and to transfer from the Port Arthur District a small portion of Chambers County. This simplifies the boundaries of both districts.

Laredo District

That part of the State of Texas east of the Pecos River, south of 31 degrees north latitude and west of 99 degrees west longitude and that part of the State of Texas south of 28 degrees 30 minutes north latitude and west of 97 degrees west longitude, except the territory within the port limits of Corpus Christi, Texas. Ports would include: Laredo, Brownsville, Del Rio, Eagle Pass, Hidelgo, Progresso, Rio Grande City, and Roma (all inTexas).

Dallas/Fort Worth District

The State of Oklahoma; that part of the State of Texas north of 32 degrees north latitude; that part of the State of Texas which is north of 28 degrees 30 minutes north latitude and between 97 and 99 degrees west longitude; and that part of the State of Texas which is north of 31 degrees north latitude and between the Pecos River and 99 degrees west longitude. Ports would include: Dallas/Fort Worth, San Antonio, Amarillo, Austin and Lubbock, all in Texas; and Oklahoma City and Tulsa in Oklahoma.

Port Arthur District

That part of the State of Texas south of 32 degrees north latitude and east of the Neches River; and the territory included in Jefferson County. Ports would include the consolidated port of Beaumont, Orange, Port Arthur and Sabine, Texas.

Note: The only changes are to raise the northern boundary to 32 degrees and to include all of Chambers County in the Houston-Galveston District. This simplifies boundaries for both districts. No ports are affected.

Comments

Notice of the proposed amendment was published in the **Federal Register** on November 18, 1988 (53 FR 46623). Comments on the proposed realignment of the boundaries were sought from members of the public. No comments have been received in response to the Notice.

Authority

This amendment is effected under the authority vested in the President by § 1 of the Act of August 1, 1914, 38 Stat. 623, as amended (19 U.S.C. 2), and delegated to the Secretary of the Treasury by E.O. No. 10289, September 17, 1951 (3 CFR 1949-1953 Comp. Ch II) and pursuant to authority provided by Treasury Department Order No. 101-5, dated February 17, 1987 (52 FR 6282).

Executive Order 12291 and Regulatory Flexibility Act

Because this document relates to agency organization it is not subject to E.O. 12291. Accordingly, a regulatory impact analysis and the review prescribed by that E.O. are not required. For the same reason, this document is not subject to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Drafting Information

The principal author of this document was Peter T. Lynch, Regulations and Disclosure Law Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 101

Customs duties and inspection, Exports, Imports, Organizations and functions (Government agencies).

PART 101—[AMENDED]

1. The authority citation for Part 101 continues to read as follows:

Authority: 5 U.S.C. 301; 19 U.S.C. 2, 66, 1202 (General Note 8, Harmonized Tariff Schedule of the United States), 1623, 1624.

§ 101.3 [Amended]

2. The list of Customs regions, districts and ports of entry in § 101.3(b) is amended in the following manner:

a. In the South West Region under the column headed "Area", directly opposite "Houston-Galveston, Texas" the description would be revised to read as follows: "That part of the State of Texas south of 32 degrees north latitude, east of 97 degrees west longitude, and west of the Neches River except Jefferson County; and the territory included in the port limits of Corpus Christi, Texas."

b. In the South West Region under the column headed "Area", directly opposite "Laredo, Texas" the description is revised to read as follows: "That part of the State of Texas east of the Pecos River, south of 31 degrees north latitude and west of 99 degrees west longitude and that part of the State of Texas south of 28 degrees 30 minutes north latitude and west of 97 degrees west longitude, except the territory within the port limits of Corpous Christi, Texas." Under the column headed "Ports of entry", the listing of San Antonio is deleted.

c. In the South West Region under the column headed "Area", directly opposite "Dallas/Fort Worth, Texas" the description is revised to read as follows: "The State of Oklahoma; that part of the State of Texas north of 32 degrees north latitude; that part of the State of Texas which is north of 28 degrees 30 minutes north latitude and between 97 and 99 degrees west longitude; and that part of the State of Texas which is north of 31 degrees north latitude and between the Pecos River and 99 degrees west longitude." Under the column headed "Ports of entry", San Antonio is added.

d. In the South West Region under the column headed "Area", directly opposite "Port Arthur, Texas" the description is revised to read as follows: "That part of the State of Texas south of 32 degrees north latitude and east of the Neches River; and the territory included in Jefferson County."

William von Raab,

Commissioner of Customs.

Approved: April 11, 1989.

Salvatore R. Martoche,

Assistant Secretary of the Treasury.

DEPARTMENT OF TRANSPORTATION

Urban Mass Transportation Administration

Summary of Legal Opinion and Decision in Administrative Complaint Issued by the Urban Mass Transportation Administration Regarding Private Enterprise Participation Requirements

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Notice.

SUMMARY: Consistent with an audit recommendation by the United States General Accounting Office, the Urban Mass Transportation Administration (UMTA) publishes from time to time its legal opinions and administrative decisions to help make UMTA recipients, private transit operators, and other interested parties better informed of UMTA's interpretation of the laws and regulations which affect UMTA's programs. This notice reports one such decision, wherein it has been determined that when an UMTA grant recipient bids to provide mass transportation service to another party, it should bid on the basis of its fully allocated costs.

FOR FURTHER INFORMATION CONTACT: Ms. Rita Daguillard, Attorney-Advisor, Urban Mass Transportation Administration, Office of the Chief Counsel, 400 7th Street, SW., Room 9316, Washington, DC 20590, (202) 366–1936.

SUPPLEMENTARY INFORMATION: The United States General Accounting Office (GAO) in its audit report entitled "UMTA Needs Better Assurance that Grantees Comply with Selected Federal Requirements," dated February 19, 1985, found that grant recipients often were not aware of UMTA's interpretations and decisions and, as a result, were not complying with legal and regulatory requirements.

UMTA has decided that one way to better inform the public of its legal opinions and administrative decisions is to publish summaries of them from time to time in the **Federal Register**. The following interpretation of the private enterprise participation requirements is provided to assist our grantees in complying with UMTA's requirements as well as to assist interested parties in enforcing these requirements.

Private Enterprise Participation Requirements

Urban Mass Transportation Act of 1964, as amended [UMT ACT], sections 3(e) and 8(e)

Decision Summary

Yellow Cab Co. v. JAUNT, Inc., 6/30/1988

Yellow Cab Co. (Yellow) alleged that JAUNT, Inc. (JAUNT), a public recipient of UMTA funds, had not complied with provisions in the UMT Act and implementing guidance concerning participation of private enterprise in the provision of UMTA assisted mass transportation when it bid on bus service in response to a request to bid from the University of Virginia to shuttle university employees between two branches of its hospitals. UMTA found that local decisionmakers erred in their interpretation and application of UMTA's guidance.

More specifically, UMTA held that: (1) In a contract situation, any rebidding for existing service is considered new or restructured service and is thus subject to the UMTA private sector guidance. (2) When a recipient of UMTA funds bids on service requested by third parties, the recipient must bid its fully allocated costs if the provision of that service will involve the use of UMTA assistance. (3) Only the bids of public agencies and non-profit agencies must reflect fully allocated costs. UMTA does not intend that a private operator fully allocate its costs or bid this figure in a procurement. The price bid by the private operator is the figure against which a recipient's or a non-profit agency's fully allocated cost is compared.

Issued on: April 13, 1989.

Alfred A. DelliBovi,

Administrator.

Aid to Families With Dependent Children; Job Opportunities and Basic Skills Training (JOBS) Program, Child Care and Supportive Services, and Conforming Changes to Existing Regulations

AGENCY: Family Support Administration (FSA), HHS.

ACTION: Proposed rule.

SUMMARY: This proposed rule implements title II of the Family Support Act of 1988 (the Statute), Pub. L. 100-485, which creates the Job Opportunities and Basic Skills Training (JOBS) Program for recipients of Aid to Families with Dependent Children (AFDC). The JOBS program is designed to assist recipients to become self-sufficient by providing needed employment-related activities and support services.

This proposed rule also implements sections 301 and 302 of the Statute. Section 301 guarantees child care and other supportive services for JOBS participants, recipients in other approved educational and training activities, and those who are working. Section 302 guarantees child care for twelve months for certain individuals who have lost AFDC eligibility due to increased earnings, increased hours of work, or loss of the earned income disregard.

DATES: Interested persons and agencies are invited to submit written comments concerning these regulations no later than June 19, 1989.

ADDRESSES: Comments should be submitted in writing to the Assistant Secretary for Family Support, Attention: Mark Ragan, OFA/WRTG, Fifth Floor 370 L'Enfant Promenade, SW., Washington, DC 20447, or delivered to the Family Support Administration, Office of Family Assistance, Fifth Floor, 370 L'Enfant Promenade, SW., Washington, DC 20447 between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during the same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Mark Ragan, Family Support Administration, Office of Family Assistance, Fifth Floor, 370 L'Enfant Promenade, SW., Washington, DC 20447, telephone (202) 252-5137.

SUPPLEMENTARY INFORMATION:

Background

Studies indicate that the average length of time an AFDC family receives assistance is about 2 years. Included in that average are many families who remain on assistance for a protracted period of time. Often, the parent (or parents) in these families lacks the necessary skills or basic education to find employment and become self-sufficient. In many cases, the parent began to receive assistance as a teenager, never finished high school, and has never developed the skills needed to find and keep employment.

Current Federal law and implementing regulations provide for a number of work and training programs for AFDC recipients—the Work Incentive (WIN) program, the Work Incentive Demonstration (WIN Demo) program, the community work experience program (CWEP), the job search program, and the work supplementation program. However, since most of these work programs are optional, and State support for the programs have varied, implementation of work and training programs has been uneven among the States. A number of studies of possible factors fostering welfare dependence cite the need for reliable and affordable child care in order to obtain and maintain employment. Lack of other support services, such as transportation, has also been mentioned as hindering employment.

On October 13, 1988, the President signed the Family Support Act (the Statute), Pub. L. 100-485. Title II of the Statute establishes the Job Opportunities and Basic Skills Training (JOBS) program under title IV-F of the Social Security Act (the Act). The purpose of JOBS is to assure that needy families with children obtain the education, training, and employment that will help them avoid long-term welfare dependence. Title III provides child care and other services in support of employment and education and training activities.

Because the Statute affects programs administered by a number of Departments, we have actively sought suggestions and comments from the Departments of Education, Interior, and Labor. We have also considered letters received in the mail and comments at numerous meetings held with representatives of State IV-A agencies, Indian Tribes, welfare rights organizations, and other interested parties.

Discussion of the Proposed Regulations

This discussion is divided into three parts. The first addresses all aspects of the JOBS program; the second addresses provisions regarding child care and certain other supportive services; and the third part describes changes to the existing regulations in the title IV-A program. The changes are effective July 1, 1989, or a subsequent date, as determined by each State, but must be implemented by October 1, 1990, unless otherwise specified.

Provisions contained in title II of the Statute regarding workers' issues, such as working conditions, tort claims protection, workers' compensation, and displacement are included in a separate regulatory package developed jointly by the Department of Health and Human Services and the Department of Labor. Likewise, several related amendments affecting the AFDC program contained in the Statute, as well as changes to the title IV-D program, are included in separate regulations packages. Section 303, which provides for the extension of Medical Assistance under title XIX of the Social Security Act when a family loses AFDC eligibility, will be implemented under separate regulations to be published by the Health Care Financing Administration.

JOBS

Pub. L. 100-485 requires State IV-A agencies to have a JOBS program under a plan approved by the Secretary of HHS no later than October 1, 1990, or, at State option, as early as July 1, 1989. It further requires each State IV-A agency to make the program available in each subdivision of the State where it is feasible to do so by October 1, 1992. At least every 2 years, the State IV-A agency must review and update its JOBS plan and submit the updated plan to the Secretary for approval.

Section 201(b) of the Statute (which adds section 482(a)(1)(D)(i) to the Act) provides for the repeal of the current WIN and WIN Demonstration programs upon State implementation of the JOBS program, which may be no later than October 1, 1990. JOBS program authority will be under the new title IV-F of the Act.

Child Care and other Supportive Services

Under the Statute, at the time that a State IV-A agency implements the JOBS program, the State IV-A agency must provide funding for child care, or provide child care, if the State IV-A agency determines such are necessary to enable participation in JOBS or to participate in an approved education or training program. It also requires that participants be assisted with transportation and other work-related expenses. Under section 302, effective April 1, 1990, twelve months of child care (transitional child care) is guaranteed for former recipients who were receiving AFDC in 3 of the 6 months prior to the loss of AFDC as the result of increased hours of work, increased earnings, or the loss of the earned income disregards. Child care fees (to partially offset the costs) must be charged on a sliding scale based on family income and size. The transitional child care provision is in effect until September 30, 1998.

Technical and Conforming Amendments

Section 202 of the Statute amends certain sections of title IV-A of the Act and repeals title IV-C. These changes are necessitated by the creation of the JOBS program and the close-out of the WIN and WIN Demo programs. They include, among others, the repeal of the community work experience, employment search and work supplementation programs as of October 1, 1990, unless the State IV-A agency is operating under an approved JOBS plan prior to that date.

Regulatory Procedures

Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be performed for any "major rule." A major rule is one that:

—Has an annual effect on the national economy of $100 million or more;
—Results in a major increase in costs or prices for consumers, any industries, any government agencies, or any geographic region;
—Has significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The increased expenditures authorized for JOBS and child care and other supportive services under the Statute are expected to have an annual effect on the national economy of over $100 million in each of the first five years of operation. The calculations for expenditures under the Statute are based on the anticipation of increased expenditures in work, training and education programs, and related supportive services (particularly child care), which will be partially offset by payment of child care fees by parents as well as reduced welfare costs in the long run. It is envisioned that required funding levels will decrease over time as a result of the impact of the JOBS program on long-term dependency and the number of families on AFDC.

We have determined that any economic impact in excess of $100 million per year is the result of section 201 of Pub. L. 100-485 (the Statute). The implementing regulations will not significantly affect expenditures. For this reason, an extensive analysis of the economic impact of this rule is not required.

There may be increased administrative costs for State IV-A agencies due to the expansion of work programs and related support services. While a portion of these costs is reimbursable, they are not mandated by these rules. State IV-A agency decisions concerning work programs and support services will affect administrative costs. Some increase in costs may be necessary because the Statute requires a minimum number of programs.

There is no evidence that competition, employment, investment, productivity, innovation or the United States' competitiveness will be affected adversely, as a result of this rule.

Paperwork Reduction Act

Certain sections of these proposed regulations contain information collection requirements which are subject to review and approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980. The Department will submit these requirements to the Office of Management and Budget for its review and approval. Other organizations and individuals desiring to submit comments on the information collection requirements are requested to send them to the agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building—Room 3208, Washington, DC 20502, ATTENTION: Desk Officer for the Office of the Assistant Secretary for Family Support, Department of Health and Human Services.

Regulatory Flexibility Act

The Secretary certifies, under 5 U.S.C. 605(b), enacted by Pub. L. 96-354, the Regulatory Flexibility Act, that this regulation, if promulgated, will not result in a significant impact on a substantial number of small entities because it primarily affects State governments and individuals. Certain small entities, such as providers of child care services, could receive a positive benefit from this program, but regulatory flexibility analyses are required for adverse impacts only.

Therefore, a regulatory flexibility analysis as provided in Pub. L. 96-354, the Regulatory Flexibility Act, is not required. This regulation is issued under the authority of section 1102 of the Social Security Act.

Federalism and Family Effects

We certify that this action has been assessed using the criteria and principles set forth in Executive Orders 12606 and 12612.

Analysis Required by Executive Order 12612 on Federalism

If a policy leads to Federal control over traditional State responsibilities or decreases the ability of States to make policy decisions with respect to its own functions, that policy is determined to have a significant federalism effect.

The Statute requires that all State IV-A agencies implement a JOBS program by October 1, 1990. In addressing the problems of welfare dependency, which are national in scope, the Statute mandates certain JOBS activities, and requires State IV-A agencies to choose to implement two of four optional program activities (job search, on-the-job training, work supplementation, and community work experience programs).

Previously, State IV-A agencies were required to participate in a Work Incentive (WIN) or WIN Demonstration program and could opt to provide other work programs. Under the work program option, the State IV-A agency chose which type of work programs to implement.

The Family Support Act is more specific than prior work program authorities regarding the activities which may be offered by State IV-A agencies and the population they are to serve under the various program authorities. However, within these limitations, the proposed rules are drafted to allow the State IV-A agencies considerable flexibility in the design and operation of their JOBS program. Moreover, title II of the Statute provides authority to Indian Tribes to operate autonomous programs.

HHS has consulted with State IV-A Directors, other State, County, Tribal and local representatives, as well as welfare rights advocacy groups, labor unions, and similar organizations for their comments and suggestions in those areas of the program where options are available such as assessment, educational activities, and maintenance of effort. These proposed regulations reflect the consideration of those comments and suggestions.

VOL

1989
UMI

The Statute mandates Federal support and technical assistance from the Departments of Health and Human Services and Labor in enhancing the flexibility and information resources of each State. Federal assistance is also required to be available to State IV–A agencies upon request for program assessment and to ensure that State IV–A agencies have adequate information both to carry out the program and to develop programs specifically fashioned for their individual demographic requirements.

The Statute calls for the development of performance standards by October 13, 1991. The Department is directed to do so in consultation with the Secretary of Labor, Governors, State and local program administrators, community-based organizations, and similar groups. This permits participation by States through the entire development process. In its rulemaking, the Department has made a conscious effort to refrain from prematurely establishing standards but proposes, based on section 606 of the Statute, to establish certain uniform reporting requirements. We expect no State laws to be preempted.

Analysis Required by Executive Order 12606 on the Family

The JOBS program is expected to have an overall beneficial family impact. This analysis discusses this impact in terms of the criteria in the Executive Order.

(a) The objectives of the JOBS program, to provide training, education, job placement, and employment to end welfare dependency, will result in more secure and stable family units. For two-parent families, the Statute provides State options for spousal participation, thus enlisting both parents in the drive toward independence. The potential danger to family self-image, stability and marital commitment posed by welfare dependency increases as a family remains on welfare. The decrease in dependency and increase in self-sufficiency which the Statute is designed to achieve will help strengthen families and ameliorate the erosive effects of poverty.

(b) The Statute provides significant support for the nurture and supervision of children in the form of guaranteed child care, which will enable parents to work to achieve self-sufficiency and increase their earnings.

Parents will continue to have supervision of their children as they would have in any working family, with options for choosing sources of child care. Federal financial support for child care services in no way changes the nature of that care, which may continue to be provided by siblings, relatives, friends and neighbors without State intrusion, except insofar as States and localities have already chosen or may in the future choose to regulate or license family day care providers.

Some families may feel that their control over their own destiny is diminished by mandatory requirements established by Congress to continue their education or seek employment while placing their children in child care. This is true in a limited sense, but it represents a positive compromise by a family in which a tradeoff is made between immediate autonomy and a better future through cooperation with the requirements under the JOBS program.

(c) The JOBS program does not substitute governmental activity for any of the functions of the family. It will help the family perform its nurturing functions. It will also provide support while the family attains economic independence.

(d) The JOBS program is specifically directed at increasing family earnings. Enhanced earned income disregards, support services, transitional child care and other benefits lasting beyond the period of AFDC eligibility will guarantee that earnings are not wholly offset by reductions of grants or loss of associated benefits.

(e) The JOBS options and services are to be designed and delivered by the non-Federal levels of government, i.e., States, localities, and Indian Tribes. The Federal government will not intrude upon family autonomy or decisions.

(f) The provisions in the Statute regarding the JOBS training program and the related child care and other supportive services emphasize that a strong family structure is critical for the nation's economic strength, and is an important source of values that promote the work ethic. Targeting families in economic crisis with support services and active help towards gaining (or regaining) strength and self-sufficiency, sends the message that all levels of government are getting involved in assisting families.

(g) Finally, the emphasis on achievement in the JOBS program should send the right message to young people about the rewards of self-reliance and the direct connection between responsible behavior and their own economic success.

Objectives of the Family Support Act and These Regulations

The Family Support Act embodies a new consensus that the well-being of children depends not only on meeting their material needs, but also on the parent's ability to become economically self-sufficient. The Statute assumes that self-sufficiency and family responsibility are necessary and achievable goals and makes education, training, and child care available to allow individuals to reach that goal. The Statute further recognizes the mutual obligations of parents, who are currently dependent, to work toward self-sufficiency through private employment, and of the government to support that effort.

These proposed regulations have been drafted to implement the objectives of the Statute and of the Administration of President Bush. Several key principles have guided their development:

—That the value of the Aid to Families with Dependent Children program should be measured not just by its ability to meet the income needs of individuals served, but also by its ability to help these individuals achieve independence;

—That parents have the primary responsibility for the support and welfare of their children and that programs should be designed to help parents meet these responsibilities;

—That women and their children represent the overwhelming proportion of AFDC recipients; that within this group the most dependent are never-married mothers who did not complete high school and who had their first child at a young age; and that programs designed to reduce overall dependency must necessarily address this group;

—That consistent with individual responsibility is choice, and that parents be given a wide range of options for child care while participating in the program;

—That basic education (such as literacy and high-school equivalency) is one of the most important tools an individual needs to achieve full citizenship and independence, and that this should be an important JOBS component;

—That basic skills training can be an important element in an individual's reaching self-sufficiency;

—That JOBS programs be designed to prepare participants for private employment in jobs they can realistically be expected to obtain;

—That resources be maximized through the coordination of existing programs at all levels of government and in concert with community-based volunteer and business organizations; and

—That States be given maximum flexibility to design program components within the JOBS

provisions of the Statute in order to tailor programs to meet local needs.

In the sections below, we discuss our overall plan for program implementation, and provide in-depth discussions of each section of the proposed regulations. In these discussions, we refer to the Family Support Act of 1988 as "the Statute", and the Social Security Act as "the Act". We also use the pronoun "she" when referring to applicants, recipients, and participants. Unless otherwise specified, "she" is a generic term meaning both she and he. This choice of terminology is appropriate because the great majority of adult caretakers in the AFDC program are women.

Overview of JOBS Program Implementation

Section 204 of the Family Support Act of 1988 permits State IV–A agencies to implement a JOBS program as of July 1, 1989, regardless of the publication of implementing regulations. Many States intend to do so. As a consequence, we provided instructions to States in January of 1989 (FSA–IM–89–3). This Information Memorandum described the process for submitting JOBS and Supportive Services plans to the Department for review until final regulations are published.

The more detailed requirements proposed in this Notice of Proposed Rulemaking will only be effective upon publication of the final rule. The process and guidelines described in FSA–IM–89–3 continue to apply until the final rule is published.

We expect to provide preprints for JOBS and Supportive Services plans simultaneously with or immediately following publication of the final regulations. These preprints will contain a detailed description of the design and operation of States' JOBS programs and associated supportive services.

For the purposes of the following discussion, we use the terms "interim plans" and "initial plans". Interim plans are plans submitted by a State IV–A agency in a format other than the preprints for JOBS and Supportive Services plans. Initial plans are the first plans submitted by a State IV–A agency, and can be either an interim plan or a preprinted plan, depending on when the plans are submitted. State IV–A agencies must submit initial JOBS and Supportive Services plans 45 days before planned implementation. When the plan preprint is made available, States which are operating a JOBS program under interim plans will be given 60 days to resubmit plans in the required format.

Federal financial participation (FFP) will not be available for expenditures incurred before the date that initial JOBS and Supportive Services plans are approved. More information regarding this issue, as well as the proposed State JOBS and Supportive Services plan review process, is provided below.

The preamble discussion generally follows the sequence of the proposed rules, with the exception that the description of conforming changes to the existing regulations is last, whereas the conforming changes precede the JOBS and Supportive Services sections in the proposed regulations.

Part 250—Job Opportunities and Basic Skills Training Program

Subpart A—Purpose and Definitions

Purpose (§ 250.0 of the Proposed Regulations)

This section of the proposed regulations contains the goals of the JOBS program and the regulatory objectives of Part 250.

Definitions (§ 250.1 of the Proposed Regulations)

We propose to include a number of definitions in order to facilitate understanding of the regulations. These definitions are discussed below.

Terms Related to the JOBS Program. The term "adult recipient" is defined in accordance with section 403(k)(4) of the Social Security Act. The term "caretaker relative" is used in several places in the Act. However, we have not provided a definition in this regulation. Traditionally, States have established procedures for determining who the caretaker relative is for each assistance unit, and we intend to continue this practice. The term "target population" is defined to meet the requirements of sections 403(l)(2)(B) and 403(l)(2)(C) of the Act. The definition includes provision for any State to adjust the particular target populations if it satisfactorily justifies the change to the Secretary.

For purposes of convenient reference in the body of the regulation, we define a number of words and acronyms. These include standard references such as "Secretary" and "Department"; thus, any reference to the Departments of, or the Secretaries of, Education, Interior, or Labor is made specific. We define "component" as including all services and activities that a State may make available under §§ 250.44 through 250.48. We define a number of acronyms common to work and welfare programs, such as "CWEP," "OJT," and "UP." We include "FFP" for Federal financial participation. We include a definition of "MSA" since we propose the use of defined Metropolitan Statistical Areas in assessing issues related to statewideness requirements in the legislation. We add several acronyms that are specific to JOBS, such as the "JOBS" acronym itself, and "JAS" as the reference for the JOBS Automated System for recordkeeping and reporting purposes.

Terms Related to Educational Programs, Services or Activities. The Family Support Act provides for extensive educational services, and sets certain requirements, such as that participants make "satisfactory progress" or be in "good standing." Since the relevant terms are well understood by the Federal and State education establishment, we have defined these terms in accordance with those understandings. For example, the definition of the term "institution of higher education" derives from the corresponding definition of the term found in section 481(a) and section 1201(a) of the Higher Education Act of 1965, as amended (20 U.S.C. 1088 and 1141).

The term "postsecondary education" is defined to include a program of postsecondary instruction in the institutions captured in the definition of "institution of higher education," and a program of instruction in other institutions referenced by section 435(b) and section 435(c) of the Higher Education Act (20 U.S.C. 1085) as well as in any public institutions in the State that may not be covered by the Higher Education Act. The definition of postsecondary education: (1) Allows a State to exercise a wide choice among educational activities, (2) includes private postsecondary schools among the institutions that the State might utilize to meet the educational needs of JOBS participants, (3) provides the protections concerning educational quality that are built into the Higher Education Act, and (4) permits States to select training from among any public postsecondary institutions that might not meet the definitions in the Higher Education Act.

We wish to avoid uncertainty in applying the terms found in the Higher Education Act to the educational activities used in the JOBS program. Therefore, our definitions provide that the State IV–A agency use the determinations that are available in the course of the Secretary of Education's process for certifying institutional eligibility to apply for the Higher Education Act student financial assistance programs. This provision does not appear to be burdensome, nor

VOL 54 ISS 73 AP 18 1989 UMI

is it an unrealistic way of securing a decision regarding a postsecondary institution's compliance with the definition, since we anticipate that welfare recipients who enroll in postsecondary education or activities will have the benefit of Federal student financial aid, such as Pell Grants and Guaranteed Student Loans.

The definitions of "limited English proficiency" and "basic literacy level" are consistent with the manner in which the Department of Education's Office of Vocational and Adult Education uses these terms. We propose that the objective of "education to achieve a basic literacy level" is to provide an individual with the equivalent of successful completion of eighth grade. This involves instruction designed for a participant who has minimal competence in reading, writing and computation, and therefore is not sufficiently prepared to meet the educational requirements of everyday life in the United States. However, this does not mean that a State IV–A agency must provide English as a second language if such instruction would not be necessary for an individual to become self-sufficient (e.g., where an employer does not require English proficiency.)

Since the term "remedial" appears within the clause, "basic and remedial education to achieve a basic literacy level," in section 482(d)(1)(A)(i) of the Act, we believe that this term refers to repetition of education previously given for the purpose of achieving a "basic literacy level," as we have defined that term. We have defined "basic education" in § 250.44 of these regulations as referring to such education given for the first time. We invite comment as to whether this can be expected to be an operationally useful distinction.

Terms Related to Making Good or Satisfactory Progress in Educational Activities. Our proposed definition of "make good progress" and "making satisfactory progress" is consistent with the *Federal Student Financial Aid Handbook* of the U.S. Department of Education, which is available in most schools and public libraries. The proposed definition would require that a standard include both a qualitative element (e.g., grade point average) and a quantitative element (e.g., time limit for completion of the program or course of study). The proposed rule would permit the standard to provide that a participant may be considered to be making satisfactory progress during a probationary period or due to mitigating circumstances.

Operationally, we propose that an institution's current standard be used, with the mutual agreement of the State IV–A agency and the State education agency. We see such mutual agreement as serving several purposes. First, we believe the source of the standard should be the institution offering the program, because of variances among educational programs. Second, the practice is compatible with Department of Education student financial assistance guidelines. Third, State IV–A agencies are required by the Act to permit or support educational activities only if the participant is "making good progress" and the education relates to the participant's employment goal.

The rule would require another source of expertise regarding good or satisfactory progress to be taken into account when available. If the school or program attended by the JOBS participant is accredited by an accrediting body that is listed as recognized by the Secretary of Education and that has an established policy relating to satisfactory progress, then that policy shall apply. This provision will ensure the compatibility of this aspect of the JOBS program with Department of Education policies. In order to assure that participation in these types of education components is meaningful and productive, we are considering including time standards where the educational activity is not part of an established educational program, such as high school. Examples are average hours per week or limits on the time period permitted to make specified educational gains. Comments are specifically requested on the establishment of such limits.

The definition of "make good progress" and "making satisfactory progress" contained in the proposed rule will at a minimum apply in two places. First, in section 402(a)(19)(E) of the Social Security Act, a State welfare agency may require an 18 or 19 year old custodial parent who lacks a high school diploma or its equivalent to accept a job or training—instead of enrolling in an educational program leading to a high school diploma or its equivalent —if the participant "fails to make good progress in successfully completing such educational activities." Second, in section 402(a)(19)(F) of the Act, a State IV–A agency may accept, as satisfactory participation in the JOBS program, a participant's attendance in good standing in an "institution of higher education," or in a "school or course of vocational or technical training," if the participant is "making satisfactory progress."

We believe that the intent of the Family Support Act in establishing a standard of "good" or "satisfactory" progress in educational activities is to make it clear that an individual may be permitted to obtain education that may enhance her ability to become self-sufficient, but that ineffective attendance in educational activities will not do so.

Making Good or Satisfactory Progress in Training Programs. The Family Support Act does not include a qualitative measure of making good or satisfactory progress for training programs under JOBS, such as OJT and skills training. However, after consultation with the Department of Labor, we propose to expand the definition of making good or satisfactory progress to apply to OJT and skills training. We do so to assure that training offered through JOBS results in an increase in participants' skills and competencies, and that such progress be monitored by the State IV–A agency.

Operationally, this will require that qualitative measures be developed. If such measures already exist for a training program, then they can be applied with the agreement of the State IV–A agency. If they do not exist, the State IV–A agency will be required to develop appropriate measures as a condition of including such training in a JOBS component. We propose to allow State flexibility in defining measures of good or satisfactory progress because there will be a great deal of variation in the types of training programs which States will choose to offer. However, we strongly urge the State IV–A agency to consult with the appropriate State employment and training agency in developing such measures.

The measure of good or satisfactory progress should be used by the State IV–A agency to determine whether a participant should continue in a course of training and whether to continue to provide supportive services, pursuant to § 255.2 of the proposed rule.

We considered whether to apply the concept of making satisfactory progress in measuring participation rates for OJT and skills training. We did include qualitative measures in the standard for participation rates for educational components because such standards have common meanings that are generally understood and used by educational institutions. However, we are concerned that including such measures in training components for purposes of the participation standards could discourage States from setting meaningful standards, if such standards would affect their ability to meet the participation rates.

We also considered precluding FFP for the costs of training activities for individuals not making good or satisfactory progress. However, we are concerned that this might discourage States from including training components in their JOBS programs.

Because we believe that qualitative measures for training components are important for the successful and efficient operation of the JOBS program, we invite comment on the approach we propose. We also invite comments regarding the alternatives described above, as well as other options.

Terms Related to Participation. The rule proposes a definition of "participation" that relates only to the question of determining what minimum activity levels in each component a State may count towards meeting the participation rate requirements for enhanced Federal matching set out in section 403(1)(3)(A) of the Act. This proposed definition does not preclude FFP for JOBS activities which do not count in determining participation rates. The proposed definition stems from several statements in the conference report that participation is intended to be significant. We received requests from numerous States to permit the definitions of participation in each of the components to be set individually by the States. We did not do so because we believe that Congress intended to offer flexibility to the States in deciding how to design successful programs, but that the measurement of participation rates be consistent among States.

For example, under the proposed rule, an individual would be participating if: (1) Her specified activity level for work supplementation or OJT is full-time; (2) her specified activity level is not less than the equivalent of 20 hours per week in job skills training, job readiness activities, CWEP, or group job search; or (3) she is making satisfactory progress in an educational activity. A State IV–A agency may prescribe greater participation requirements and may count partial participation in several components whenever the individual so assigned meets the average hours requirement of the assigned components.

We propose a definition of participation for purposes of the UP work requirement that follows the legislation. A parent's activity level must meet the 16-hour work requirement in work supplementation, CWEP, OJT, or a State-designed work program approved by the Secretary. An alternative is provided for parents under age 25 who do not have a high school diploma or its equivalent: In such case the State IV–A agency may require the parent to make satisfactory progress towards high school completion, or towards another basic education objective.

Thus, for a UP parent, it is possible to be participating in any component at its specified level, and contribute towards the State meeting the overall participation requirement. Likewise, such a parent would contribute to both participation requirements if she is active in one of the four work components at the higher specified levels. However, if the activity was at least 16 hours per week, but less than the higher specified levels, in any of the four work components, she would only contribute to the UP participation requirement.

We exclude two principal items from this definition of participation. An individual assigned to job development and placement would not count for participation, since our proposed definition of this required component would make it principally an agency activity rather than a client activity. The rule proposes that individuals whose only active involvement in JOBS is assessment or orientation, or receiving supportive services, would not count as participating for this purpose.

Our proposed definition of participation, required for purposes of § 250.74, is not meant to preclude a State from assigning an individual to an amount of required activity in a component that is less than the specified minimum if it is appropriate for the individual. For example, an individual might be required to be engaged in ten hours of individual job search per week. This level of activity would satisfy the requirements of the individual's employability plan but would not meet the minimum Federal definition of participation (for purposes of the participation rate requirement).

In addition, we believe that States should apply a qualitative measure in determining an individual's progress in a training component. We therefore propose that in measuring progress in reaching the goals set in an individual's employability plan, the State IV–A agency must incorporate qualitative measures for training components.

We considered how to treat sanctioned individuals in determining a State's participation rate. One suggestion was that they be counted as participants, since the State IV–A agency had taken all steps necessary to encourage self-sufficiency. However, it is possible that such a policy could be viewed as an incentive for States to sanction individuals and to extend sanctions. Another suggestion was that sanctioned individuals be excluded from the denominator used in calculating participation rates. We chose this option since it protected States from being penalized when they took appropriate actions to sanction recipients, but it does not treat sanctioning as comparable to actual participation. We welcome comments on this approach.

The rule provides a definition of "intensive job search," for the purpose of calculating participation rates for the Unemployed Parent work requirement, that conforms to the standards for participation in individual job search.

We also considered and discussed with States the option of determining participation rates based on an average of the number of hours of participation by all recipients. However, this option was rejected because of State concerns about the administrative burden of this approach. We would welcome any additional comments on this approach and any other methods for determining participation standards.

Subpart B-Administration

State IV–A Agency Administration (§ 250.10 of the Proposed Regulations)

Section 482(a)(2) of the Social Security Act identifies the State IV–A agency as the State agency responsible for the administration or supervision of the JOBS program. Similar provisions apply to the AFDC and Adult Assistance programs (see sections 2(a)(3), 402(a)(3), 1002(a)(3), 1402(a)(3), and 1602(a)(3) (Aid to Aged, Blind, and Disabled) of the Social Security Act). Longstanding Federal policy construing these latter requirements has interpreted them to mean that the State IV–A agency must maintain overall responsibility for the design and operation of the program and may not delegate to other than its own officials functions involving discretion in the administration or supervision of the program (see § 205.100). Accordingly, we believe that the same policy should apply to the State IV–A agency in its administration or supervision of the JOBS program. This means that the State IV–A agency may not delegate the entire JOBS program to another entity.

However, it does permit the State IV–A agency broad contracting authority as described in proposed § 250.13 and related preamble. For example, the State IV–A agency may delegate a wide range of activities—such as orientation, literacy testing, and JOBS activities and services. However, it may not delegate functions such as exemption and priority determinations or dispute

VOL 54 ISS 73 AP 18 1989 UMI

resolution and hearings since these involve discretionary judgments.

We believe that State IV–A agencies should have maximum flexibility to administer their programs within the requirements of the Act. We recognize that in many States, other agencies—such as Job Training Partnership Act (JTPA) agencies, the State education agency, the State employment security agency and community-based organizations—have been effectively performing a range of educational, training and employment related functions for welfare recipients. Thus, rather than requiring State IV–A agencies to train or expand in-house staff to perform similar JOBS functions which do not directly involve discretionary judgments, we propose to provide State IV–A agencies the flexibility of determining how they can most effectively use all potential State resources. However, before a State IV–A agency contracts for any JOBS service or activity, it must ensure that such service or activity is not otherwise available to JOBS participants on a non-reimbursable basis. This requirement is discussed in detail in proposed § 250.13 and related preamble on contracting and in proposed § 250.72 and related preamble concerning maintenance of effort provisions.

We do not intend either to encourage or discourage State IV–A agencies from contracting out JOBS functions, but propose to provide State IV–A agencies with the latitude to determine how best to administer their programs. No matter how extensively a State IV–A agency uses its contracting authority, the entity to which a function is delegated must follow the policies, rules, and regulations issued by the State IV–A agency and must not be empowered to review, change, or disapprove any administrative decision of the State IV–A agency.

Requirement for a Statewide Program (§ 250.11 of the Proposed Regulations)

Section 482(a)(1)(D) of the Social Security Act requires that by no later than October 1, 1992, a State IV–A agency must make the JOBS program available in each subdivision of the State where it is feasible to do so, taking into account the number of prospective participants, the local economy, and other relevant factors. If the State IV–A agency determines that the program will not be made available in all political subdivisions, it must provide appropriate justification to the Secretary in its JOBS plan. If the justification is not adequate, the Secretary may disapprove the plan.

It is expected that the State IV–A agencies will make a serious and determined effort to implement programs throughout all local jurisdictions to the maximum extent possible, so that eligible families will have an opportunity to benefit from the new services that are authorized under the legislation.

In determining how specific to be in the regulations, we considered the statements in the Conference Report (H. R. Rep. No. 100–998, 100th Cong., 2d Sess. 112 (1988)). The conferees intended that the program be provided to as many recipients as possible. Specifically, section 482(d)(1)(A)(i)(I) of the Act requires that the State JOBS plan include educational activities, such as high school or equivalent education, and basic literacy and English proficiency training. The conferees noted (H. R. Rep. No. 100–998, 100th Cong., 2d Sess. 141 (1988)) that there would be those for whom enrollment in regular school programs would be inappropriate, and consequently suitable alternatives would have to be identified or developed. We believe that at least some of these educational activities are available in the majority of political subdivisions in all States, and they, therefore, should be made available, as appropriate, to AFDC recipients.

However, State resources may not permit the inclusion of other components, such as the optional components in section 482(d)(1)(A)(ii) of the Act, in all political subdivisions. To allow maximum State flexibility in designing State JOBS programs, we propose the following.

State IV–A agencies will not be required to implement all mandatory and optional components in all political subdivisions in which they operate a JOBS program. Further, differences in the level of component availability will be permissible.

In order to determine whether a State IV–A agency should submit appropriate justification for less than statewide operation, we propose to apply the criteria described below. If a State meets these criteria, then no justification will be required.

First, a "minimal" JOBS program should be available to most adult recipients in a State. A minimal program includes high school or equivalent education, as specified at section 482(d)(1)(A)(i)(I) of the Act, one optional component from among those specified at section 482(d)(1)(A)(ii) of the Act, and information and referral to non-JOBS employment services. In determining statewideness, we propose that a minimal program be available in a number of political subdivisions sufficient to serve 95 percent of adult recipients.

With few exceptions, high school is available in all political subdivisions of a State. At least one of the optional components, job search, is relatively inexpensive to operate. Referral to public employment services is a simple method for directing recipients to potential employment.

Second, a "complete" JOBS program should be available to a large proportion of adult recipients. A complete program includes, but is not limited to, all mandatory and any two optional components, pursuant to section 482(d)(1)(A) of the Act. In determining statewideness, we propose that a complete program be available in all Metropolitan Statistical Areas (MSAs) in the State, as well as in a number of political subdivisions sufficient to serve 75 percent of adult recipients in the State.

The use of MSA boundaries is a nationally recognized system for distinguishing among economically different areas of States. We propose to add the 75 percent requirement because the number of adult recipients living in MSAs is relatively low in many rural States.

We considered requiring justification for less than statewide program operation in all cases. However, we believe that this would be a great administrative burden, both for State IV–A agencies and for Federal reviewers. The strategy described above is an attempt to meet congressional intent and statutory requirements in a practical manner. These criteria should not be considered to be guidelines for planning a JOBS program. Rather, they provide only a basis for Federal review of the statewideness requirement. We invite comments on this strategy.

Section 250.11(c) of the proposed rule will provide the basis for our review of the statewideness requirement. If a State JOBS program will not be available in the number of political subdivisions sufficient to meet the criteria of that section, the justification to the Secretary for excluding any portion of the State from the JOBS program will include the information identified in § 250.11(c)(2).

The factors listed in this section expand on the items identified in section 482(a)(1)(D) of the Act. That section specifies two factors—i.e., the prospective participants and the local economy. We propose to add one additional item: whether a State IV–A agency will, even with the proposed areas excluded, fully expend all JOBS

funds available to it for the period covered by the plan. This additional information will help in determining whether a State IV–A agency is proposing to concentrate services on specific geographic areas identified as particularly critical to reducing long-term dependency, and as a consequence, is unable to implement a statewide program.

We do not believe that depressed local market conditions would necessarily make a JOBS program infeasible. For example, even in areas of high unemployment, there are generally job opportunities because of job turnover and segmented job markets. However, in a rural area where the sole employer has recently closed its plant, a State IV–A agency might be justified in not operating a JOBS program, or in operating a minimal program. A State IV–A agency should consider these types of distinctions, and include this information in the justification for less than statewide operation.

In designing a State JOBS program that will be less than statewide, a State should assure that political subdivisions not be excluded on the basis of ethnic, racial or religious characteristics.

Because the statewideness requirement is not effective until October 1, 1992, phased implementation of the program will be permitted. As a consequence, an initial State JOBS plan may not reflect a level of component availability sufficient to meet the statewideness requirement. We would therefore expect that, no later than the first biennial review, for the plan period beginning October 1, 1992, the State JOBS plan and the State Supportive Services plan (pursuant to § 255.1) will be updated to reflect either sufficient program availability to meet this requirement, or a justification for less than statewide implementation.

Coordination and Consultation (§ 250.12 of the Proposed Regulations)

Section 402(g) and section 483 of the Social Security Act contain a number of provisions designed to assure coordination of the JOBS program, including child care pursuant to § 255.3(h) of the proposed regulations, with other education, training, and employment programs available in a State. The purpose of this coordination is to provide comprehensive, quality services to meet the multifaceted needs of welfare recipients in the most effective and efficient manner.

At the Federal level, the Department is working closely with the Departments of Labor, Education, and Interior, and expects State and local IV–A agencies to promote coordination among their counterpart agencies. The JOBS program should be coordinated with providers such as Job Training Partnership Act (JTPA) agencies, the Employment Service, vocational education, adult basic education, Headstart and preschool programs under chapter 1 of the Education, Consolidation and Improvement Act of 1981, school and nonprofit child care programs and other human development programs.

Congress intended that agencies identify existing resources to prevent duplication of services and to assure that other program services are available to JOBS participants. Such coordination is necessary to assure that costs for services for which welfare recipients have been eligible are not shifted to the JOBS program. The proposed regulations preclude such shifts in costs, as described in the maintenance of effort provisions in § 250.72.

Section 483 of the Act requires coordination with JTPA agencies, since one of JTPA's major goals is reducing welfare dependency. The JTPA requires that AFDC recipients be served in at least equal proportion to their incidence within the eligible population. Twenty-three percent of current participants under JTPA are AFDC recipients.

At the State level, the JOBS plan must be consistent with JTPA coordination criteria and must be reviewed by the State job training coordinating council (SJTCC) prior to submission to the Secretary. We strongly encourage the State IV–A agency to meet regularly with the SJTCC regarding the planning and implementation of the JOBS program to identify common JOBS–JTPA activities and services, and to develop an integrated strategy which ensures that eligible AFDC recipients receive training and employment services in an effective, non-duplicative manner.

At the local level, the welfare agency must consult with private industry councils (PICs) on the development of arrangements and contracts under JOBS and to identify and obtain advice on the types of jobs that are available, or are likely to become available, in the area. These provisions reflect congressional concern that JOBS resources not be used inefficiently, i.e., provided to ineffective service providers or expended on training for jobs which are not available to participants.

The local relationship between the welfare agency and the PIC is crucial to assure that welfare recipients receive the JTPA services for which they are eligible. Thus, we strongly urge local welfare administrators to be represented on the PIC or, at a minimum, to become actively involved in PIC meetings, as appropriate.

Initial and ongoing coordination with the State IV–A agency and local educational systems will enable State IV–A agencies to access needed expertise in this new area of welfare agency involvement, to avoid duplication of welfare services and to assure that welfare recipients receive the necessary educational services for which they are eligible. Welfare agencies should meet regularly with their State or local educational counterparts to ensure that educational providers are involved in the planning and delivery of the JOBS program at all levels.

Section 250.21 of the proposed regulations requires State IV–A agencies to describe in the JOBS plans efforts to coordinate with JTPA, basic and adult education programs, programs under the Carl D. Perkins Vocational Education Act and other vocational services, and other human development programs.

Furthermore, the proposed regulations in § 250.20 specifically provide that State IV–A agencies make the proposed JOBS plan available to members of federally recognized Indian Tribes and Alaska Native organizations during the public comment period. This segment of the population is highlighted essentially to assure that a Tribal entity eligible to operate a separate JOBS program, pursuant to § 250.91 of the regulations, has sufficient opportunity to coordinate with the State in the planning of JOBS.

Coordination is necessary whether the Tribe or organization decides to operate an independent program or receive services from the State, but is particularly important if a Tribal entity does operate a separate program. While a Tribal grantee will have responsibility for JOBS, the State IV–A agency will maintain responsibility for the basic AFDC program and for child care services, including transitional child care services. Given this interrelationship, §§ 250.12 and 250.93(b)(1) of the proposed regulations require that the State IV–A agency and the Tribal applicant exchange all available information on adult Tribal AFDC recipients necessary to determine a Tribe's or organization's JOBS funding level. In addition, the requirements in § 250.94 concerning Tribal JOBS administration and in § 250.95 regarding child care elaborate on the need for the State and Tribal grantee to develop mutually agreed upon procedures and methodologies to assure that Tribal participants receive equitable treatment under the AFDC and JOBS programs.

VOL 54 ISS 73 AP 18 1989 UMI

Contracting Authority (§ 250.13 of the Proposed Regulations)

Section 485 of the Social Security Act grants State IV–A agencies broad contracting authority, which is reflected in § 250.13 of the proposed regulations. At the same time, however, the Act requires administration of the JOBS program by the single State IV–A agency, therefore limiting contracts to those activities which do not involve discretion. Further clarification of this limitation is provided in proposed § 250.10 and the accompanying preamble language.

Section 250.13 incorporates the requirements of section 485 of the Act regarding the factors which must be taken into consideration in selecting service providers and the prohibition against contracts for services which are otherwise available on a non-reimbursable basis. Regarding the issue of provider selection, the requirement for consultation with private industry councils is described in the proposed § 250.12 on coordination and consultation. The statutory prohibition against contracts for services which would be otherwise available reflects congressional concern that costs of services for which welfare recipients have been eligible not be shifted to the JOBS program. Since it is so closely connected to the provisions on maintenance of effort (section 482(a)(3) of the Act), we elaborate on its interpretation in § 250.72 of the proposed regulation and preamble.

Before States contract for services under JOBS, we expect that they will carefully identify those services which have traditionally been available to welfare recipients at no cost as well as community-based or volunteer programs that may provide competent services at minimal or no cost. The statutory language clearly intends that State IV–A agencies fully utilize all resources otherwise available to serve JOBS participants on a non-reimbursable basis. For instance, other programs have paid for many educational services provided to AFDC recipients, including those available under the Adult Education Act (20 U.S.C. 1201 *et seq.*), the Higher Education Act (20 U.S.C. 2301 *et seq.*) and the Carl D. Perkins Vocational Education Act (20 U.S.C. 1001 *et seq.*) Similarly, through JTPA, the State employment security agency, State employment and training programs and the Community Services Block Grant program, extensive employment and training services—such as job counseling, job development and placement, job skills training, and on-the-job training—have been offered to eligible low income individuals, many of whom are AFDC recipients.

We also have included in this section a provision which specifies that for the purposes of FFP, State IV–A agencies must segregate costs according to applicable matching rates, as defined at § 250.73(b)(1), in any contract or arrangement under the JOBS program. This means that contracted services will qualify for Federal matching funds at the same rate as those services which the State IV–A agency provides directly. This provision is included to assure that State IV–A agency decisions on contracting will be based upon the efficient administration of the program and that consistent Federal matching will be available to the State IV–A agency regardless of the method used to provide services.

In addition to the specific contracting requirements included in this section, contracted services under JOBS are subject to the requirements of Part 92 with the following exception. We propose to exclude the provisions under § 92.30(d)(4). These provisions, which require prior Federal approval of contracts, appear to be inconsistent with congressional intent since they would severely limit a State IV–A agency's contracting authority under section 485 of the Act.

State IV–A agencies should be aware that they are subject to the procurement requirements of only paragraph (a) of § 92.36. This means that State IV–A agencies are required to assure that JOBS contracts follow State and local laws, regulations, and procedures regarding procurement. Indian Tribes and Alaska Native organizations, however, are subject to the Federal procurement requirements of § 92.36 (b) through (i). This is consistent with longstanding Federal policy.

Subpart C–State Jobs Plan Requirements and Content

Requirement for a State JOBS Plan (§ 250.20 of the Proposed Regulation)

The JOBS provisions are found in title II of the Family Support Act, which includes changes to Part A and creates Part F in Title IV of the Social Security Act. State implementation of these provisions will be covered under a new State plan for JOBS (the JOBS plan). The requirements for that plan and the procedures for its submission are discussed below. Title III of the Statute also requires that States provide child care and other necessary supportive services. These services will be covered under a Supportive Services plan, to be developed and submitted with the JOBS plan. A discussion of the Supportive Services plan and related requirements is at § 255.1.

We believe that it is appropriate to include the new statutory requirements in section 402(a)(19) of the Social Security Act as well as all requirements of Title IV–F in a separate JOBS plan. This position is supported by the language of section 482(a)(1)(A) of the Social Security Act, which requires the JOBS plan to meet "all of the requirements of this part and section 402(a)(19)."

Section 482(a)(2) of the Act provides that the State IV–A agency will be responsible for the administration or supervision of the State's JOBS program. Based on this provision, we propose that the State IV–A agency be responsible for the submission of the State JOBS and Supportive Service plans, after completion of all coordination requirements and review by the Governor.

Plan Approval Prior to Implementation. In FSA–IM–89–3 ("Preliminary Information for States Interested in Implementing JOBS * * *", January 19, 1989) as well as in § 250.20(a)(2) of these proposed rules, we request that States submit the initial JOBS and Supportive Services plans for approval 45 days prior to implementation.

The Family Support Act does not directly address the question of whether a State's JOBS plan must be submitted and approved prior to a State's implementation of the program. However, the statutory language best supports the position that the JOBS plan should be approved prior to a State's implementation. In several places the Statute references JOBS programs operated and funded under approved plans; the implication is that programs could not be operated and funded unless a JOBS plan had been approved. Specifically, the statutory language includes the following: (1) Section 482(a)(1)(A) of the Social Security Act states, "As a condition of its participation in the program of aid to families with dependent children under Part A, each State shall establish and operate a job opportunities and basic skills training program * * * under a plan *approved by the Secretary* * * *"; (2) Section 403(k)(1) provides that "Each State *with a plan approved under Part F* shall be entitled to payments * * *"; and (3) Section 403(l)(1)(A) provides, "In lieu of any payment under subsection (a), the Secretary shall pay to each State *with a plan approved under section 482(a)* * * *." (emphasis added).

Submission of Initial JOBS Plans 45 Days Before Anticipated Implementation. This timeframe is not found in the Family Support Act. In § 250.20(e)(1) we propose a 90-day period for Federal review of the biennial update of JOBS plans. We are proposing a 45-day period for the initial submission in recognition of the fact that many States intend to implement JOBS in the earliest possible quarter, and there will be fewer Federal requirements since final rules will not have been published. Under the circumstances we believe this will provide a reasonable period of time within which to conduct an orderly and responsible review of a State's submission.

Interim Plans. Initial State JOBS and Supportive Service plans submitted prior to the issuance of plan preprints will be approved as interim plans. States with interim plans will be required to submit new JOBS and Supportive Service plans 60 days after the issuance of a preprint form by the Secretary. An approved interim plan shall remain in force until action is taken by the Secretary to approve or disapprove the preprint. Although described as a new plan, the JOBS plan preprint will not be subject to the requirement for review by the SJTCC before submission to the Secretary, unless substantial changes have been made.

In an effort to ease the administrative burden on States and to establish a uniform schedule for submission of subsequent State plans that coincides with the Federal fiscal year, we propose the following. All plans submitted between the issuance of the preprints and October 1, 1990, (whether resubmission of interim plans or initial plans), if approvable, shall remain in force until action is taken by the Secretary to approve or disapprove the first biennial update, described below. This timeframe is appropriate because States are required to have statewide JOBS programs (unless satisfactory justification for less than statewide operation has been provided to the Secretary) during the period covered by the first biennial update.

Amendments. States may submit amendments to approved plans, if necessary, prior to the required resubmission described below. The current process for submission and review of amendments, as described at § 201.3(f) and § 201.3(g), will apply. Submission of plan amendments does not relieve the State of the obligation to resubmit its plan to the Secretary for approval every two years.

Resubmission of State Plans: Biennial Update. Section 482(a)(1)(A) of the Act requires that the State submit its State plan not less often than every two years to the Secretary for approval. We propose to consider the biennial update a new plan, which must be submitted for approval 90 days prior to the date it is to become effective. The biennial update must be available for public review and comment in accordance with the provisions of § 250.20(c). To ease the administrative burden, we propose to establish October 1, 1992 as the effective date for the first resubmission of all State plans. Therefore, we propose that all State plans be resubmitted by July 1, 1992 to be effective October 1, 1992.

We recognize that this process is very different from existing title IV–A plan amendment procedures. However, we believe that there are several compelling reasons to treat the biennial update as a new plan for which approval by the Secretary is required: (1) The specific requirement that it be resubmitted (not less than every two years) distinguishes it from the regular title IV–A plan amendment process at § 201.3, which requires only that plan amendments be submitted by the end of the calendar quarter of implementation; (2) the requirements for coordination and consultation, including the requirement that the State plan be submitted to the SJTCC for review and comment, would be significantly lessened if it were only required once prior to JOBS implementation and never thereafter; and (3) the nature of the information that section 482 of the Act requires be in the State plan makes it an "operational plan." Much of it is specific to the period which the plan covers, such as the number of persons to be served and the extent to which other services will be available by provider and type of service. Such information must be updated for each new period in order to make the plan a useful document.

However, we do not propose to put an undue burden on States in the submission of State plan updates. Therefore, we propose that the State plan update consist of four parts: (1) Assurances regarding those parts of the State JOBS plan and Supportive Services plan that remain unchanged; (2) a description of any changes in program operations, including but not limited to, changes in the mix of components or target populations to be served; (3) specific information for the period of the update regarding estimates of persons to be served and the availability of services provided by the State IV–A agency as well as other providers; and (4) an assurance that the State JOBS plan is consistent with the coordination criteria specified in the current Governor's Coordination and Special Services Plan required under section 121 of the JTPA. The State plan preprint shall be the vehicle for the update.

Public and Inter-Agency Review of State JOBS Plans. The Act requires that the State agency submit its JOBS plan to the State Job Training Coordinating Council (SJTCC) 60 days before submission to the Secretary. We propose to expand this requirement in several ways. We propose to require submission of the proposed plan to the State education agency, based on the extensive required and optional education activities under JOBS, and the general coordination requirements in section 483 of the Act related to State and local education agencies.

In accordance with section 483(a)(1) of the Act, we propose to require the content of the plan, where it relates to job training and work preparation, to be consistent with the coordination criteria specified in the Governor's coordination and special services plan required by section 121 of the Job Training Partnership Act.

The Statute also requires that the State JOBS plan be made available for public review and comment 60 days prior to submission to the Secretary. In response to the concerns of State IV–A agency directors, we propose that all public and State agency comments on the plan be resolved at the State level. It was noted that if this were not made clear, the State efforts to resolve disagreements could become a problem, since commenters might choose to press their view at the Federal level rather than at the appropriate State level.

State Plan Content (§ 250.21 of the Proposed Regulation)

Proposed § 250.21 lists the information we propose to require in the JOBS plan. We will provide a preprint similar to the current Streamlined State Plan for the IV–A program which will elicit all necessary information in a standardized format. The preprint will guide States in submitting the JOBS plan, and will expedite review. It will also provide a basis for comparison of State programs.

In § 250.21 of the proposed rule we have listed all information that we expect to include in the JOBS plan preprint. This list does not include all JOBS program requirements. These other requirements are included, as appropriate, in other sections of the proposed rules.

Subpart D—Participation Requirements, Exemptions and Sanctions

Requirements for Individual Participation and Exemptions (§ 250.30 of the Proposed Regulations)

Under current law, all applicants for and recipients of AFDC are required to register and participate in WIN or WIN Demonstration program activities unless they are exempt. For example, an individual is exempt if she is the parent or other caretaker relative of a child under age 6 and is personally providing care for the child with only very brief and infrequent absences. Section 402(a)(19)(C) of the Act provides for exemptions from participation in JOBS that are similar to those that existed under WIN. The exemptions are contained at § 250.30 and are discussed below.

Child under 16. A child who is under 16 or is attending full-time an elementary, secondary, vocational or technical school is exempt. However, the exemption does not apply to a custodial parent even if she is also a dependent child. We make this interpretation to be consistent with the definition of "adult recipient" in section 403(k) of the Act which specifically includes a child who is the custodial parent of another dependent child in the definition of "adult recipient" for the purpose of determining a State's allocation under JOBS.

Advanced Age. We propose to define "advanced age" for the purposes of this exemption to mean over 60 years of age. This is consistent with the upper age exemption in the Food Stamp Program and should ease the administrative burden on State agencies.

Remoteness. Section 402(a)(19)(C)(vii) of the Act also provides an exemption for remoteness. This exemption is for the individual who lives in a political subdivision that has a JOBS program, but who resides so far away from a JOBS activity that participation is not feasible.

Working more than 30 hours per week. Section 402(a)(19)(C)(iv) of the Act retains the exemption for working 30 hours or more per week.

Currently, under WIN, § 224.20 provides a Federal standard for this exemption: the job has to be unsubsidized and expected to last at least 30 days. The Federal standard was designed to insure that the employment is bona fide and likely to lead to self-sufficiency for the family. However, in consultation with States, we have heard that the Federal definition does not provide States with enough flexibility to require participation by individuals who are working sporadically at very low wages.

We, therefore, propose to allow State IV–A agencies to establish their own standards for the type of "work" that qualifies for this exemption. For example, such a standard might require that the job pay at least minimum wage. The standards must be included in the State JOBS plan as provided at § 250.20.

Pregnancy. Currently, a pregnant woman in her third trimester is exempt based on the pregnancy. Section 402(a)(19)(C)(vi) of the Act exempts pregnant women during the second and third trimesters based on the pregnancy.

However, we would strongly encourage States to urge pregnant women to volunteer to participate in the program, particularly those who are not yet 20 years of age and without a high school education. Since these women will be required to participate soon after their children are born, pursuant to § 250.32(a), it would be a much smoother transition and a more effective process if they do not drop out of the educational system during their pregnancy.

Age of the Youngest Child. Section 402(a)(19)(C)(iii) of the Act provides that a parent or other relative of a child under 3 (or an age less than 3, but not less than 1, if the State plan so provides) is exempt if the parent or relative is personally caring for the child. It also provides that the parent or relative of a child under 6 is exempt if personally caring for the child unless the State IV–A agency assures the necessary child care and that participation in the program will not be required for more than 20 hours per week. However, both of these exemptions are superseded by the requirement at section 402(a)(19)(E) of the Act that custodial parents under age 20 attend educational activities if they have not finished high school and child care is otherwise available. A more complete discussion of this requirement is contained in the preamble for § 250.32.

We propose to limit the child care exemption to one parent or caretaker relative per case. This is consistent with section 402(a)(19)(D) of the Act which specifically allows only one such exemption in a two-parent unemployed parent case. We believe that by analogy it is a reasonable interpretation to apply the same requirement in an AFDC case and, therefore, where there is more than one person who can qualify for the exemption, only one person may be exempt. We also believe that this policy is consistent with the language that the individual must be "personally providing care."

Exemptions in Unemployed Parent (UP) Cases. Section 402(a)(19) of the Act does not exempt a parent in an AFDC-UP family from JOBS participation due to the other parent's participation in JOBS. Accordingly, the State IV–A agency may require the second parent to participate unless he or she meets another exemption criterion such as caring for a young child. However, section 402(a)(19)(D) of the Act also allows States to require both parents to participate, notwithstanding the exemption for having a young child, if child care is guaranteed in accordance with section 402(g) of the Act.

If the State IV–A agency does not elect this option, section 402(a)(19)(D) of the Act provides that only one parent may be exempt for personally caring for a young child. We propose to allow a State to establish policy on whether the principal earner is eligible for the exemption for caring for a child under age 3.

Other Exemptions. Other exemptions provided in section 402(a)(19)(C) of the Act, including the incapacity, illness, and caring for another ill or incapacitated individual in the household, are implemented in the proposed regulations and follow the language of the current WIN regulations, which implement identical exemptions. We do encourage State IV–A agencies not to automatically exempt someone as incapacitated if the individual could be served or employed if reasonable accommodation for the incapacity were made.

The proposed regulation requires that State IV–A agencies regularly review the appropriateness of exemptions, especially those of a temporary nature. Such review must occur, at a minimum, at each redetermination for AFDC.

Volunteers (§ 250.31 of the Proposed Regulations)

Section 402(a)(19)(B)(i)(II) of the Act contains a general requirement that State IV–A agencies must allow applicants for and recipients of AFDC who are exempt under section 402(a)(19)(C) to participate in JOBS on a voluntary basis if the program is available in their area and State resources otherwise permit.

However, section 402(a)(19)(B)(ii) of the Act contains a specific requirement that in determining priority of participation within the target groups defined in section 403(1)(2)(B), the State IV–A agency shall give first consideration to applicants and recipients who volunteer. We interpret the use of the term "volunteer" to include both mandatory and exempt

applicants and recipients so that a State may elect to prioritize among volunteers and, if appropriate, give priority to non-exempt volunteers.

The statutory priority given to volunteers in target groups does not usurp the State IV–A agency's authority to determine the type of program it will offer. Several factors may affect a State's decision on priority services including (1) goals of the State program, (2) availability of resources, and (3) the effect of selection of individuals to participate on the States's ability to meet participation rate standards. Section 402(a)(19)(B)(iv) of the Act specifically provides that a State IV–A agency need not allow or require participation of an individual if such participation would affect the State's rate of reimbursement pursuant to Section 403(1)(2) because the State could not expend 55 percent of its funds on individuals in the target groups. This provision is incorporated in the proposed regulation at § 250.74(a)(3).

The proposed regulation at § 250.31(b) describes the consequences for volunteers who stop participating in JOBS. For exempt individuals who stop participating in the program without good cause, their priority status to participate in the program is lost as long as other individuals are actively seeking to participate. For individuals who are not exempt but enter the program voluntarily, the regulation provides that if such an individual stops participating without good cause, the individual is subject to sanction as described in § 250.34. We believe that this approach provides fair and equitable treatment for all non-exempt participants and avoids the situation in which a non-exempt (mandatory) participant could avoid participating in JOBS by volunteering first and then dropping out without good cause. If the rule about volunteers losing priority status were applied in that situation, the mandatory individual would become part of the group served after all others thereby avoiding her obligation to participate.

Participation Requirements for Education (§ 250.32 of the Proposed Regulations)

Congress recognized the importance of education to the achievement of long-term self-sufficiency, especially for young parents, and it addressed it in two ways in the Family Support Act. First, the Act requires State IV–A agencies to make available a range of educational activities which are described in the proposed regulations at § 250.44. Second, the Act requires that to the extent educational services are available and State resources permit, the State must (subject to certain exceptions described below) require the custodial parent under 20 who has not finished high school (or its equivalent) to participate in an appropriate educational activity.

Congress thought it important enough to specifically provide that a young parent under 20 years of age is not exempt from educational activities even if she has a child under 3 and to give State IV–A agencies the option to require that she attend full-time if it is in the pursuit of a high school diploma or its equivalent. This is a very important step in insuring that young parents are encouraged and helped to remain in school and not ignored until their youngest child turns 3. In addition, in section 403(l)(2)(B)(iii) of the Act, Congress designated custodial parents under 24 who have not completed high school and who are not enrolled in high school (or a high school equivalency course) at the time they apply for aid, one of the four populations specifically targeted for services.

Section 402(a)(19)(E) of the Act provides State IV–A agencies with several options for young custodial parents. The State may establish criteria for excusing custodial parents under age 18 from the high school attendance requirements described above. We believe, however, that excusing custodial parents from high school attendance should be rare. We propose that in such cases State IV–A agencies must provide for assignment to available educational alternatives and that all determinations be made based on an assessment of the individual's circumstances. The proposed regulation further provides that the State agency's criteria may not excuse anyone from high school who is subject to the State's compulsory attendance requirements. We also propose that the State may not categorically excuse someone because of the grade level she has completed. For example, it is not sufficient to say that a 17-year-old who has only finished 8th grade is automatically excused.

For custodial parents who are age 18 or 19, the State IV–A agency may require participation in training or work activities in lieu of educational activities if the individual is not making good progress in completing educational activities or, if an educational assessment, prior to assignment, determines that such educational activities are inappropriate for the individual.

The statutory reference to "custodial parent" in section 402(a)(19)(E) has prompted some to question whether 16- to 18-year-olds who are not parents are eligible for JOBS services. We want to be clear that they are. If they are not in school, they are mandatory participants because they do not meet the exemption criteria. In addition, if the individual is a member of a family in which the youngest child will lose eligibility within two years because of age, she is a member of one of the target groups described at § 250.1 earmarked for services. We believe that, like their counterparts who are parents, 16- to 18-year-olds should be encouraged and helped to remain in school or to participate in other educational activities.

For individuals 20 years of age or over, if they have not earned a high school diploma (or its equivalent), section 482(d)(2) of the Act provides that if the State IV–A agency requires such an individual to participate, it must include educational activities consistent with her employment goals as a component in her employability plan. There are two exceptions: (1) If the individual demonstrates a basic literacy level, or (2) if the long-term employment goal identified in the individual's employability plan does not require a high school diploma (or its equivalent).

Participation Requirements for Unemployed Parents (§ 250.33 of the Proposed Regulations)

Section 403(1)(4)(A)(i) of the Act provides that a State IV–A agency must require at least one parent in a family eligible for AFDC due to the unemployment of the principal earner in the family to participate for at least 16 hours a week in one of the following components of the JOBS program: work supplementation program, a community work experience program or other work experience program, on-the-job training, or a State-designed work program approved by the Secretary.

If a parent is under age 25 and has not completed high school or an equivalent course of education, section 403(1)(4)(A)(i) of the Act permits the State IV–A agency to require the parent to participate in educational activities directed at attaining a high school diploma (or equivalent) or in another basic education program. The Act does not specifically define minimum levels of participation for individuals in this category. However, we have defined a minimum level of participation in educational activities for the purpose of determining the general participation rate, and we propose to adopt the same standard for this part of the UP participation requirements. That standard is "making satisfactory progress", as defined at § 250.1.

VOL 54 ISS 73 AP 18 1989 UMI

Section 403(1)(4)(A)(ii) of the Act provides that in the case of a parent participating in a community work experience program for the maximum number of hours as provided in § 250.63, such participation shall meet the requirements of this section even if it is less than 16 hours per week. On the other hand, nothing in this section relieves the parent of the obligation under § 250.63(d) to participate in CWEP for the maximum number of hours even if it exceeds the 16 hours per week provided in this section.

Sections 403(1)(4)(B) and (C) of the Act provide that, by FY 1994, each State IV–A agency must have 40 percent of its Unemployed Parent caseload participating at least 16 hours per week in a work component described in this section. This requirement increases by steps to 75 percent in FY 1997. The consequences of not meeting these rates are contained at § 250.74(c) and discussed further in the preamble to that section. We believe that it would be prudent for State IV–A agencies to incorporate programs designed to meet these requirements at the time that they implement JOBS (or as soon as they have a UP program). Early implementation of this provision will allow States to increase the coverage of their programs on an incremental basis so that they can be at 40 percent by FY 1994. In addition, by implementing concurrently with JOBS, the State IV–A agency will maintain a consistent approach to serving unemployed parents.

In addition, we have read this provision together with the technical amendments that section 202 of the Statute makes to the Unemployed Parent program. These amendments impose additional requirements on States to require early participation by principal earners, and on principal earners to participate or apply for participation in JOBS within 30 days of receipt of aid. These provisions are discussed more fully in the preamble to the technical and conforming amendments. By establishing a work program in accordance with this section, the State IV–A agency would have in place a program to which it could promptly and easily assign principal earners.

Sanctions (§ 250.34 of the Proposed Regulations)

Section 402(a)(19)(G) of the Act provides for sanctions if an individual who is required to participate in JOBS fails to participate in the program or refuses to accept employment without good cause.

Length of Sanctions. The length of sanctions for the Work Incentive Program was established in a joint regulation issued by the Secretaries of HHS and Labor. There are set periods of 3 payment months for the first failure to participate and 6 payment months for any subsequent failure. The length of sanction for WIN Demonstration and CWEP programs follows WIN regulations. The length of sanction for employment search also follows WIN regulations unless a State has adopted a lesser sanction period in its IV–A plan. Participation in work supplementation is voluntary.

Section 402(a)(19)(G)(ii) of the Act sets forth the length of sanction periods for JOBS purposes. For the first failure to participate or accept employment, the sanction lasts until the failure to comply ceases. For the second failure, the sanction lasts until the failure to comply ceases or 3 months whichever is longer. For any subsequent failure, the sanction lasts until the failure to comply ceases or 6 months whichever is longer.

We have heard from some States that it may be difficult to determine when a "failure to comply ceases". Accordingly, we propose a definition of this concept that we believe allows the State IV–A agency to determine that the individual has actually demonstrated a willingness to participate in the program and, therefore, has ceased her non-compliance. We propose that a State may require an individual to engage in either the activity to which she was previously assigned, or in some other activity designed by the State to lead to full participation, for a period of up to two weeks in order to demonstrate willingness to participate. If the individual successfully participates in such activities, the sanction will cease as of the day she agreed to participate. If the State IV–A agency has no activity to which it can assign the individual, the sanction will cease on the day she agrees to participate.

For instance, if a sanctioned individual says on Monday that she wants to participate, the State may require her to come in and develop an employability plan or attend a pre-employment orientation. If she successfully completes the assigned activity, her sanction shall be considered to have ended on Monday.

Nature of Sanction. If a parent or other caretaker relative in a one-adult AFDC family failed or refused to participate in the WIN program or accept employment, her needs were not taken into account in determining the family's need for assistance and the amount of the assistance payment. In addition, aid had to be paid to a third party in the form of protective or vendor payments unless the agency was unable to arrange such payments. Further, if the only dependent child in a family failed or refused to participate, the entire family would be ineligible for AFDC. Finally, if the parent who was designated as the principal earner, for purposes of section 407, failed or refused to participate, the entire family was sanctioned.

Section 402(a)(19)(G) of the Act makes several changes to the way the sanction is applied to the parent (or caretaker) and her family. The general rule is that the needs of the individual are not taken into account in determining need for assistance and the amount of the assistance payment. The provision that aid is denied to a family if the only dependent child fails to participate is not carried over so the general rule applies to such a family. Despite the child's failure to participate, she is still considered a "dependent child" for the purpose of determining the eligibility of the family.

Section 402(a)(19)(G)(i)(I) of the Act retains the requirement for protective or vendor payments if the sanctioned individual is the parent or other caretaker relative, and the State can make such an arrangement. This applies to both one-parent and two-parent families. We have amended § 234.60(a)(12) to incorporate this change.

Section 402(a)(19)(G)(i)(I) of the Act revises the sanctions for two-parent families who are eligible under section 407 of the Act. In addition to applying the general rule to the individual who failed or refused to participate, the Act provides that the needs of his or her spouse will also not be taken into account in determining the family's needs for assistance and the amount of its assistance payment if the spouse is not participating in the JOBS Program. The rest of the family will have their eligibility determined without inclusion of the needs of the sanctioned parent (and spouse, if such spouse is not participating in JOBS).

3-Month Notice. Section 402(a)(19)(G)(ii) of the Act also requires the State IV–A agency to notify an individual whose failure or refusal has continued for 3 months of the individual's option to end the sanction by terminating the failure. The proposed regulation clarifies that, in the case of the third and all subsequent sanctions, the notice must be sent after 3 months, but it must say that the individual cannot terminate the sanction until the full 6-month sanction has elapsed.

Good Cause (§ 250.35 of the Proposed Regulations)

Sections 402(a)(19)(G) and (H) of the Act provide that a sanction may only be imposed if the individual does not have good cause for failing to participate in JOBS or refusing to accept employment. The concept of "having good cause" covers a broad range of circumstances. Sometimes situations arise where an individual is unable to participate for a day or several days because of such things as illness or a breakdown in child care arrangements or transportation. These are often short-term situations resulting from events beyond her control. There are other circumstances in which good cause will give the individual an on-going reason for not participating (lack of available child care). Between these two, there will be circumstances in which an individual will have "good cause" for turning down a specific job or assignment ("net loss of cash income") but will be required to continue to participate.

Under the WIN program "good cause" was defined in the Federal WIN Handbook. Existing regulations for CWEP and employment search require the State to define good cause in the State IV–A plan. There are several specific provisions that give an individual "good cause" for failing or refusing to participate or to accept employment. We have incorporated them in the proposed regulations at § 250.35 and describe them as follows.

(1) If the individual is a parent or other relative personally providing care for a child under age 6 and the employment would require such individual to work more than 20 hours per week, the participant shall have good cause.

(2) For all individuals, good cause exists if child care (or day care for any incapacitated individual living in the same home as a dependent child) is necessary for an individual to accept employment or enter or continue in the program and such care is not available and the State agency fails to provide the care. In judging whether good cause exists in these circumstances, the State IV–A agency should determine whether there are any other individuals in the home who are capable of providing the necessary care.

(3) If accepting a job would result in a net loss of cash income for an assistance unit pursuant to section 402(a)(19)(H) of the Act, good cause exists. However, if the State IV–A agency elects to make a supplemental payment to the family so that it does not experience a net loss of cash income, good cause does not exist.

(4) Finally, the State IV–A agency may define other reasons for good cause. These could include such events as inclement weather, breakdown of transportation and/or child care arrangements, short-term illness not requiring a doctor's care, or a family emergency.

While we believe that each State is in the best position to establish its own definition of other reasons for "good cause," we expect that States will develop standards that will insure the integrity of the JOBS program.

Calculating Net Loss of Cash Income. "Net loss of cash income" means that work-related expenses which would otherwise not be incurred must be subtracted from the gross income to determine whether the resulting net income is at least equal to the cash assistance received at the time the employment is offered. We propose that "gross income" includes, but is not limited to, earnings, unearned income, and cash assistance. The calculation of the amount of cash assistance to be counted in "gross income" must be based on current determination including the application of the appropriate earned income disregards. The need for and amount of a "supplemental payment" must be computed each month and include application of the appropriate earned income disregard.

Certain categories of expenses would logically be deducted from the gross salary, e.g., mandatory payroll deductions. However, other necessary expenses related directly to work must also be deducted. We considered two methods of measuring these other work expenses: (1) A reasonable allowance, similar to the $75 work expense deduction ($90 as of October 1, 1989) at § 233.20(a)(11)(B) or (2) actual, reasonable work-related expenses. In this regulation, we propose that State IV–A agencies use actual, reasonable work-related expenses in determining whether a "net loss of cash income" will occur. This calculation should be figured on an individual basis.

The use of actual expenses best serves the legislative purpose of ensuring that a participant who is required to accept a job is not penalized by having less income than was available while she was receiving assistance. The use of a "reasonable allowance" seems to duplicate the disregard requirement of section 402(a)(8) of the Act. If Congress had intended to add mandatory payroll deductions to the disregards of section 402(a)(8), such language could have been included.

Treatment of Supplemental Payments. Supplemental payments are treated as AFDC expenditures under sections 403(a) (1) or (2) of the Act. Families receiving such payments shall not be considered categorically eligible for AFDC and are not eligible for Medicaid as AFDC recipients.

Eligibility for extended Medicaid (or transitional benefits after April 1, 1990) will be determined as of the month the family becomes ineligible for AFDC due to the acceptance of the offer of employment.

Application to UP Cases. This definition does not supersede the 100-hour rule as applied to unemployed parents (UPs). Since the Act does not allow for AFDC payments to families where deprivation does not exist (two-parent families where neither is incapacitated and in which the principal earner is working more than 100 hours per month), it follows that a supplemental cash payment cannot be made to a UP family if the parent who is the principal earner is working more than 100 hours per month. Congress did recognize that the current definition of "unemployment" for the purposes of qualifying for aid under section 407 of the Act should be studied and authorized several demonstrations where alternative definitions to the 100-hour rule could be tested.

Conciliation and Fair Hearings (§ 250.36 of the Proposed Regulations)

Prior to the Family Support Act, there was no statutory requirement for a conciliation process. However, Federal regulations at §§ 224.60, 224.62, and 224.63 outline procedures for dispute resolution and conciliation in the WIN Program.

Section 482(h) of the Act requires that a State IV–A agency establish a conciliation procedure for the resolution of disputes involving an individual's participation in the JOBS program. We do not propose to describe specific procedures that all States must adopt. However, we believe that it was Congress' intent that States have a conciliation procedure that is neither so short as to be meaningless nor so long as to undermine the mandatory nature of the program and the imposition of sanctions.

An effective conciliation process can resolve misunderstandings or disagreements before they get to the point of resulting in a sanction. For example, a conciliation process could be used to resolve disagreements over the employability plan. It could also be used when a participant's attendance at an assigned activity has been irregular but

VOL 54 ISS 73 AP 18 1989 UMI

not yet sanctionable. Even if it appears that the failure to participate or refusal to accept employment is clear, the conciliation process can prevent the need to go to a full hearing.

We believe that an effective conciliation process has the following features. Either the recipient or the agency can request conciliation. At some point in the conciliation, the individual's rights and responsibilities under the program should be clearly explained, and she should be informed of the consequences of continued failure to participate. The conciliation should be time-limited, and the individual should be made aware of this. We recommend that the period be no more than 30 calendar days. The agency should attempt to schedule at least one face-to-face meeting between the individual and a representative of the agency. It may be appropriate for a disinterested third-party to participate in such a meeting. If the agency initiates the conciliation process and, after reasonable efforts to schedule and hold a conciliation meeting, the individual does not appear for such meeting, the agency may end the conciliation process. The State's efforts at conciliation should be well-documented in the case file.

Fair Hearings. Under WIN the fair hearing process is complicated by the joint administration of the program. The WIN sponsor (the employment agency) is responsible for resolving disputes and providing for a hearing procedure on issues related to the individual's participation in WIN activities. An individual has a right to appeal through the State employment agency to the National Review Panel at the U.S. Department of Labor. An individual who exhausts all her appeals through the Department of Labor is "deregistered." The deregistration notice is sent to the State IV–A agency which then institutes its procedures to reduce or close the grant based on failure to be registered with WIN. Proper notice has to be sent to the individual, and she has a right to a hearing under § 205.10. Such a hearing can only address issues related to the amount of the reduction or closure of the grant. It cannot review the employment agency's determination of failure or refusal to participate. This two-tiered system often means that enforcing participation requirements in WIN is difficult and time-consuming.

For the WIN Demonstration program, community work experience program, work supplementation program, and employment search, the State IV–A agency is required to follow the hearing and notice procedures in § 205.10.

Under section 482(h) of the Act, the State IV–A agency must provide a hearing when the conciliation process does not resolve a dispute. The Act provides States with two options. The State may follow the hearing and notice procedures of § 205.10. As an alternative, the State may establish a separate hearing system. However, the State IV–A agency may not contract out the responsibility for providing a hearing to any other agency. An alternative hearing system could provide for a hearing only on the issues associated with JOBS disputes. It should be noted, however, that before an individual's grant could be reduced, suspended, discontinued, or terminated, she must be afforded an opportunity for a hearing that meets the standards of *Goldberg* v. *Kelly*, 397 U.S. 254 (1970).

Subpart E—Operation of State Jobs Programs/Program Components

Providing Program Information to AFDC Applicants and Recipients (§ 250.40 of the Proposed Regulations)

Section 482(c) of the Social Security Act requires the State IV–A agency to provide all AFDC applicants and recipients with information on the JOBS program including education, training, and employment opportunities; available supportive services including child care and transitional child care for which they are eligible; the State IV–A agency's obligations; and the participant's responsibilities.

Although the Act only requires that this information cover the JOBS program, the conference report indicates that it is also important that the information cover child support responsibilities. Thus, this section of the proposed regulations requires that the State IV–A agency provide information on securing child support and establishing paternity as well as related requirements.

The purpose of providing program information on JOBS and child support is to ensure that all applicants and recipients are encouraged, assisted and required to fulfill their responsibilities to support their children by preparing for and obtaining employment and by ensuring their cooperation in the establishment of paternity and enforcement of child support obligations.

To provide a State IV–A agency with the flexibility to administer their programs to accommodate variations in local resources and needs, the proposed regulations permit a State IV–A agency to develop the processes, methods of delivery, and timeframes for providing this information. These must be described in the JOBS plan pursuant to § 250.21(g)(5). A State IV–A agency may provide this program information as the JOBS program is phased in by district office or target groups, as long as it is provided in a timely manner. We propose that a State IV–A agency provide this program information to applicants at the time of application and to recipients at the time of the first redetermination after the State IV–A agency's implementation of JOBS.

According to section 482(c)(5) of the Social Security Act, after the State IV–A agency provides a recipient with the information described above, it must, within one month, notify the recipient of the opportunity to indicate her desire to participate in JOBS. The agency must provide a clear description of how to enter the program. The Act does not, however, provide specifics regarding this notification process. To allow the State IV–A agency latitude in providing such notification to applicants, except those assigned to job search, this proposed section permits the State IV–A agency to make such notification within one month of eligibility determination. Thus the State IV–A agency does not have to provide information to all applicants, many of whom may never become eligible. Following the language of the conference report, the regulations indicate that such notification must be in writing. H.R. Rep. No. 998, 100th Cong., 2nd Sess. 132(1988).

Because the idea of participant preference can be confusing as it applies to non-exempt recipients, the proposed regulations clarify that an indication by a non-exempt individual that she does not want to participate does not prevent a State IV–A agency from requiring that individual to participate. Alternately, consistent with other due process guarantees, a State IV–A agency may not interpret a lack of response or indication of a preference not to participate in JOBS by a non-exempt individual to constitute, by itself, failure to participate. Also, a State IV–A agency must inform a non-exempt participant before she decides to voluntarily enter the program that she would be subject to sanction if she stopped participating in the program without good cause.

Initial Assessment and Employability Plan (§ 250.41 of the Proposed Regulations)

Initial Assessment. We are proposing that the State IV–A agency must conduct an initial assessment of each participant's employability based on: (1) Educational, child care and other supportive services needs; (2) the participant's proficiencies, skills, deficiencies, and prior work experience; and (3) a review of the family circumstances, which may include the needs of any child of the participant.

The proposed regulations further provide that the initial assessment can be conducted through various methods including interviews, testing, counseling, and self-assessment instruments. Self-assessment instruments generally include check-off lists or survey forms designed to help the individual identify supportive service needs such as child care and transportation, and accomplishments such as educational level completed, prior work experience and skills acquired through employment or hobbies.

Appropriate assessment methodologies may vary among State IV–A and local programs due to differences in caseload size, program resources, and program philosophies. A State IV–A agency may also use different assessment methodologies to address individual recipient needs. For example, a State IV–A agency may find it cost-effective to do a limited, initial assessment for recipients, followed by a more in-depth assessment only as participant needs dictate. Since the Act does not provide specific details about assessment services and the conference report eliminated the requirement for testing literacy and reading skills, we believe Congress intended to give a State IV–A agency broad flexibility in this area.

We recommend that, where appropriate, State IV–A agencies use nationally recognized, standardized, and industry-developed tests to determine reading and literacy levels and aptitude skills before assigning participants to specific educational and vocational training programs. Such testing may help the State IV–A agency assure that limited resources are used effectively and that participants are not placed in activities that are inappropriate for them. The proposed regulations permit a State IV–A agency to use a wide variety of assessment methods.

The proposed regulations do not set forth timeframes (except for those individuals in job search pursuant to § 250.60) or establish a process for conducting the initial assessment. However, the proposed rule provides that a State IV–A agency must conduct the initial assessment within a reasonable timeframe prior to participation. The assessment process must be described in the State JOBS plan, as provided at § 250.21.

Employability Plan. Section 482(b) of the Act requires that the State IV–A agency develop an employability plan in consultation with the JOBS participant based on the initial assessment. It further specifies that the employability plan must contain an employment goal, describe the supportive services to be provided and the JOBS activities to be undertaken. The proposed regulation follows the requirements of the Act as to the basic content of the employability plan but leaves design and administration of the actual employability plan to the State IV–A agency.

Congress was particularly concerned that employability plans reflect the availability of jobs in the local job market so that JOBS resources would be expended efficiently. This concern is discussed in more detail in the preamble to proposed § 250.12 on coordination.

As appropriate, the employability plan may identify services to be provided to address the needs of a participant's child, such as drug education or life skills planning courses. Many services for children are generally available to low-income community residents at no cost through local educational programs or volunteer services.

The employability plan should reflect a direct path to available employment. States might consider including a schedule of activities that would lead to employment by a specified date to achieve this goal. The employability plan should include activities which are selected to achieve self-sufficiency in an expeditious manner.

Section 482(b)(1)(B) provides that the employability plan must also take into account participant preferences as much as possible within the limits of the State's JOBS program. We interpret this to mean that in developing an individual's employability plan, the State IV–A agency must consider the needs and preferences of the participant in the context of agency goals and constraints (including program resources, available services and local employment opportunities). The proposed regulation specifies that final approval of the employability plan rests with the State IV–A agency. This approval provision is particularly important in establishing the State IV–A agency's authority to determine the appropriateness of self-initiated activities as provided in proposed § 250.48.

In developing employment goals and establishing appropriate participation requirements, the State IV–A agency should not limit a participant's options based upon traditional views of appropriate male and female roles. Such limitations would be inconsistent with the requirements on non-discrimination at section 484(a)(3) of the Social Security Act, and could contravene the self-sufficiency goals of the program.

Agency-Participant Agreement (§ 250.42 of the Proposed Regulations)

Section 482(b)(2) of the Social Security Act provides that, following the initial assessment and the development of the employability plan, the State IV–A agency may require the JOBS participant (or the adult caretaker in the family of which the participant is a member) to negotiate and enter into an agreement with the State IV–A agency.

This is not a new concept. Currently, some State IV–A agencies require WIN/WIN Demonstration participants to sign a written agreement or contract with the welfare agency. Usually, this agreement is included as part of the employability plan and specifies the actions the recipient will take to implement the plan and the agency services and resources to be made available to the recipient. Generally, the agreement or contract includes well-defined time lines and benchmarks for progress for both the recipient and the agency. Thus, the agency-participant agreement is viewed as the basic tool for outlining the mutual responsibilities, expectations and specific tasks of both the recipient and the agency.

The proposed regulations follow the conference report and permit a State IV–A agency to consider the agreement a contract. H.R. Rep. No. 998, 100th Cong., 2nd Sess. 129 (1988). Such contract is subject to applicable State laws and regulations.

This section of the proposed regulations provides that the option need not be statewide. However, the State IV–A agency will be required to describe in its JOBS plan the purpose and content of such agreements or contracts and the types of participants for whom it will be used. Proposed § 250.21 contains the State JOBS plan content requirements.

Case Management (§ 250.43 of the Proposed Regulations)

Generally, a case management system is designed to support and strengthen the participant's capacity to become self-supporting and to help assure that participants and their families have access to the resources and opportunities required for self-support. Case management may be advocated on the grounds that the activities and services a recipient may need to progress to self-support are so scattered among programs and agencies that a case manager is needed so that progress is not delayed and frustrated.

VOL 54 ISS 73 AP 18 1989 UMI

Under the proposed regulations, a State IV–A agency that chooses to establish a case management system is given flexibility to design its case management services and procedures. Case management does not have to be offered in all political subdivisions that have a JOBS program. Proposed § 250.21 provides that State IV–A agencies must describe their case management approach covering the scope of services offered, the political subdivisions included, and the types of recipients and percent of caseload served in their State JOBS plan.

Mandatory Components (§ 250.44 of the Proposed Regulations)

Education. Section 482(d)(1)(A)(i) of the Act provides that the required educational activities are: (1) High school education or its equivalent; (2) basic and remedial education to achieve a basic literacy level (we propose a definition that is discussed in § 250.1); and (3) education in English as a second language. The conference report (H.R. Rep. No. 998, 100th Cong., 2nd Sess. 142 (1988)) states that where enrollment in regular high school programs is deemed inappropriate, the State IV–A agency is expected to identify or develop alternative education activities to meet the needs of JOBS participants.

The proposed regulation provides at § 250.32(b) that if a State requires participation in JOBS of an individual age 20 or over who has not completed high school, it must include educational activities consistent with her employment goal. There are two exceptions: if the individual demonstrates a "basic literacy level," or if her long-term employment goal does not require a high school level of education. We propose elsewhere, on advice from the Department of Education, to define "basic literacy level" as successful completion of the eighth grade. In responding to these two requirements in the Act, we note that levels of education between "basic" education and "high school" are not explicitly specified. Nonetheless, they are clearly allowable as JOBS educational activities. Section 250.44(a) provides that the educational activity may include any activity below the postsecondary level, which means that an intermediate educational goal between basic education and high school is acceptable if the State IV–A agency concludes that it corresponds to the individual's long-term employment goal.

The Family Support Act provides no definition for the required work and training programs. It does, however, require reporting of activity and costs related to each selected program or activity. We, therefore, propose to regulate functional definitions for the three remaining mandatory components of "job skills training," "job readiness activities," and "job development and placement."

We sought available definitions of these terms from the Department of Labor, principally with reference to definitions used by the State employment security agencies and the Job Training Partnership Act programs. Not all programs required by the Family Support Act are defined in DOL programs, such as "job readiness activities." Other programs or activities are defined differently, such as "job development" and "job placement", which are established in the Act as a single, combined, required program activity, but which are each defined differently by JTPA and the Employment Service.

In a two-day meeting with selected State welfare agency directors and their work program directors, strong opinion was voiced that wherever possible, definitions of employment and training terms correspond with existing definitions used by the State agencies from whom State welfare agencies would often be seeking both contracted and non-reimbursed services. While we have endeavored to be responsive to these State concerns in this regard, we had to choose between or combine definitions. We invite comment on the operational usefulness of the distinctions we propose for such purposes as program design and data maintenance in case records.

Job Readiness Activities. Under the proposed rule, "job readiness" centers on pre-employment preparation, and would exclude activities that would readily fit within the scope of other defined components, such as vocational skills training. The Department of Labor advised us that "job readiness activities" are not defined by the Employment Service. However, employment security agencies define several closely related terms. Thus, a "non-job-ready" person is one who is deficient in work attitudes, behaviors or skills and is therefore unable to get and keep a job; a "job ready individual" is one who, among other things, has no physical, mental or job skill barriers that preclude employment; and "employability" is defined as, among other things, work behavior and attitudes that are necessary to compete successfully in the labor market. We agree with the Department of Labor observation, and propose in the rule, that an activity related to removing such barriers would be defined as a job readiness activity.

Job Skills Training. We propose to adhere to what we believe is the commonly understood meaning of the term—pre-employment training in technical job skills. It would, for example, correspond approximately to what was understood in the WIN and WIN Demonstration programs as institutional training.

In order to assure that skills training offered through JOBS results in an increase in participants' skills and competencies, and that progress can be monitored by the State IV–A agency, we propose to require that qualitative measures for progress be developed for all skills training that is included as a JOBS component. This is discussed in more detail in the definition of making good or satisfactory progress in a training component in § 250.1.

Job Development and Job Placement. The proposed rule would define "job development and job placement" as agency activity on behalf of participants to create or discover openings, and to market participants for them. This is consistent with a longstanding approach in employment programs. We have followed that historical pattern as a means of distinguishing agency activity that is relatively intense on behalf of a participant, from a participant's intense activity in Job Search. Based on this distinction, we propose to exclude this component from the definition of "participation" found in § 250.1.

We also do not intend that this component should have any connection with the longstanding concept in employment security agencies of a "placement" as an outcome. The specialized meaning of this outcome measure for employment security agencies does not correspond to the requirements or expectations of JOBS.

Optional Components (§ 250.45 of the Proposed Regulations)

In addition to the four required components, the State IV–A agency must also offer at least two of the following four activities in its JOBS program:

(1) Group and individual job search;
(2) On-the-job training;
(3) Work supplementation; and
(4) Community work experience, or other approved work experience program.

Except for on-the-job training, these optional components are generally based on existing law and program regulation. The Act provides for a few changes to programmatic aspects of these components which are discussed in the following sections. Otherwise, we have adopted as much of the existing regulations as possible. Since the Act establishes common sanctions, eligibility criteria, FFP guidelines, target populations and service area coverage for the JOBS program, the regulations governing the optional components will no longer have specific language addressing these areas as there was when they were discrete IV–A work programs.

Like the required components, the optional components need not be operated uniformly throughout the State. However, the additional State options do provide an opportunity for the State IV–A agency to develop a program meeting specific needs of individuals while recognizing State economic and environmental factors. Congressional conferees (H.R. Rep. No. 100–998, 100th Cong., 2d Sess. 141 (1988)) stressed the desirability of programs that respond to varying circumstances, including changes in the unemployment rate and different needs that exist in rural and urban areas. Our regulations seek to reflect this congressional intent.

Postsecondary Education (§ 250.46 of the Proposed Regulations)

We have defined postsecondary education in § 250.1. We interpret the language of section 482(d)(1)(B)(i) of the Act to mean that the offering of postsecondary education is an entirely optional matter for the State IV–A agency to address in its JOBS plan, except that we have limited such education to that which is directly related to the fulfillment of an individual's employment goal, i.e., to obtain useful employment in a recognized occupation. Within this occupational limitation, the State IV–A agency must set forth the bases upon which it will determine whether postsecondary education is appropriate.

We believe that the proposed restriction of postsecondary education to education related to the goal of obtaining useful employment in a recognized occupation is consistent with the intent of the JOBS program. The program's aim to reduce long-term welfare dependence would not be served by permitting a JOBS participant to embrace the broader, more general educational goals that also fall within postsecondary education but that have a less well-defined occupational connection.

While we cannot prohibit the use of JOBS funds for this activity, we are extremely concerned about the potential cost. We strongly urge States to use other available resources for postsecondary education and concentrate JOBS funds on short-term activities which lead to employment. A State must consider the wide range of other components which must be included in their JOBS program when determining whether to fund postsecondary education. We will monitor State expenditures in this area carefully.

We propose to exclude the costs of such education, including tuition, books and fees, from coverage as special needs under § 233.20(a)(2)(v). Since the Act now provides funding for this activity and places a specific cap on the overall JOBS funding, we would be circumventing the Statute were we to allow additional funding under special needs.

Other Education, Training, and Employment Activities (§ 250.47 of the Proposed Regulations)

Section 482(d)(1)(B)(ii) of the Act provides that the Secretary may approve additional components not specified in the Act. Because, in the course of the conference, public service employment was specifically considered as a potential optional component and finally rejected by the conferees, we have expressly excluded public service employment from the acceptable possibilities. By public service employment we mean what that term meant under the WIN and CETA programs: a fully subsidized job in a public agency that is not expected to convert to unsubsidized employment.

Self-Initiated Education or Training (§ 250.48 of the Proposed Regulations)

This section describes State options regarding individuals already engaged in education or training at the time they are otherwise required to begin participation in JOBS. Section 402(a)(19)(F) of the Act gives the State IV–A agency the option to allow such individuals to continue attendance at an institution of higher education or in a school or course of vocational or technical training if certain conditions are met. The proposed rule requires that a participant: (1) Attend the educational activity at least half-time; (2) make "satisfactory progress in such institution, school, or course"; and (3) be enrolled in a course of study that is consistent with her employment goals.

While the wording of the Act could lead to an interpretation that the half-time attendance provision pertains only to the school or course of vocational or technical training, this would leave a question as to the amount of time the participant would have to be in attendance at an institution of higher education. We see no reason to distinguish an "institution of higher education" from a "school or course of vocational or technical training" in applying a minimum attendance requirement. Rather, we see the proposal to have the half-time attendance requirement apply to higher education as serving three beneficial purposes. First, it provides guidance as to minimal expectations of participation. Second, it serves as an indicator associated with making satisfactory progress in the institution, as defined in § 250.1. Third, the proposed half-time requirement is consistent with such requirements for half-time attendance contained in certain student financial aid programs operated under the Higher Education Act. For example, the Guaranteed Student Loan Program requires a student to be enrolled at least half-time in order to receive aid from that program.

The proposed meaning of the term "vocational or technical training" is incorporated into § 250.48 of the proposed rule. In this context, it is included within the meaning of "postsecondary education," as defined in these regulations, but limited to education that both leads to useful employment in a recognized occupation and results in other than a baccalaureate or advanced degree. This limitation is compatible with definitions contained in the Higher Education Act and the Carl D. Perkins Vocational Education Act. Such a limitation also fits with the more fundamental purpose of the Family Support Act to reduce welfare dependency. We do not believe the JOBS program was intended to foster the acquisition of postsecondary education in the broad sense of the programs found in the Higher Education Act, under which long-term educational activities clearly are supported.

In supplying definitional information, the Department of Education stated that one of its primary concerns was "whether welfare recipients who are enrolled in postsecondary schools have the ability to benefit from the programs in which they are enrolled. The Division of Adult Education believes that the State should perform an educational assessment of the ability to benefit of any JOBS participant * * * before enrollment is considered 'satisfactory participation * * *.'"

Other commenters asserted that there is potential for abuse by the institutions cited in section 402(a)(19)(F) that would enroll welfare recipients as a means of securing indirect funding by means of student aid under the Higher Education Act.

VOL 54 ISS 73 AP 18 1989 UMI

We believe that, in the case of self-initiated training which the State IV–A agency might find to be satisfactory for participation in the JOBS program, an educational assessment of the participant and adherence to benchmarks of satisfactory progress are crucial to the protection of both the participating student and Federal funds. Therefore, the proposed rule requires an assessment and development of an employability plan, before the agency determines the appropriateness of her pre-existing education or training activity to a defined employment goal.

The proposed rule provides that the State IV–A agency may place restrictions upon the self-initiated postsecondary education that may be accepted as meeting JOBS participation requirements. For example, the State IV–A agency might restrict such postsecondary education to a maximum of two years. Further, a State IV–A agency might choose to permit an individual who is within two years of completing a four-year program to complete it if the requirements of this section otherwise are fulfilled. We would encourage States in delineating restrictions to be mindful that the goal of self-initiated training should be to move the participant from welfare dependence within a reasonable time. Therefore, shorter programs leading to specific occupational goals are preferable to longer educational programs that may have far less specific employment goals.

The proposed rule prohibits the use of Federal JOBS funds to pay self-initiated postsecondary education that the State may consider to constitute satisfactory participation in the program, pursuant to § 250.48. In the case of self-initiated postsecondary education, section 402(a)(19)(F) of the Act specifically states that such costs shall not constitute federally reimbursable expenses under JOBS.

The remaining proposed provisions of § 250.48 largely repeat provisions found in section 402(a)(19)(F) of the Act. The rule proposes that, consistent with the Act, the State IV–A agency must not permit other JOBS activities to interfere with State-approved self-initiated training. Also, while the costs of self-initiated postsecondary education will not be reimbursable under JOBS, the costs of child care, transportation, and other supportive services that the State IV–A agency determines are necessary for attendance are eligible for Federal reimbursement.

Subpart G—Optional Components of State JOBS Programs

Job Search Program (§ 250.60 of the Proposed Regulations)

Section 482(g) of the Act provides for group and individual job search as an optional component under JOBS. Although we describe all mandatory and optional components in separate sections, we recognize that it will be appropriate for States to combine them for certain clients. Job search is an excellent example. While job search by itself is an appropriate activity for the job ready who have basic workplace skills, for those who are skills deficient, job search should be coupled with other education and training activities.

The Act generally retains the provisions of the current law at section 402(a)(35) of the Act with some modifications. The first change is that Congress expressed its intent that job search be "intensive". We interpret this to mean that, in order to qualify as an optional component in which participation counts for the purposes of calculating participation rates pursuant to § 250.74, a job search program must be well-structured and include specific activities to be undertaken by the participant or the agency on behalf of the participant. Such activities must be defined in the State JOBS plan.

Current law provides that a State IV–A agency may require an initial period of up to 8 consecutive weeks of job search which may begin at the time of application for aid. Some States have used this initial period to do a preliminary screening of the individual's employability prior to assessment and development of the employability plan. The Act amends this provision to provide that the State IV–A agency may not require an individual to participate in job search for longer than 3 weeks without performing an assessment as defined at § 250.41. The 3 weeks of job search prior to assessment count as part of the 16 weeks that are allowable during the application period and first year.

The Act also permits an additional 8 weeks of job search in any subsequent period of 12 consecutive months. We propose to adopt the existing interpretation of "an additional 8 weeks" to mean 8 weeks or its equivalent. For example, an equivalent would be one week a month for 8 months. We point out, however, that if a State IV–A agency adopts a definition of "equivalent to 8 weeks" that stretches out the length of job search, without combining it with other activities, such job search may not meet the proposed standards for job search for the purposes of computing participation rates. Those standards are found at § 250.1.

The Act also provides that a State IV–A agency may require additional job search only in conjunction with some other education, training or employment activity which is designed to enhance the individual's employment prospects. For example, if a State IV–A agency requires an 8-week period of job search for a recipient and then assigns the individual to skills training, it is permissible to require her to engage in job search at the end of the training as part of the training.

However, participation in job search is not an allowable activity for FFP or participation rates under the JOBS program if an individual has participated for more than 4 months out of the 12 preceding months. We interpret "4 months" to be 4 months or its equivalent. Therefore, job search for one week a month for 8 months (after the initial 8 weeks), as described above, would be within the allowable activities.

On-The-Job Training (§ 250.61 of the Proposed Regulations)

Section 482(d)(1)(A)(ii)(II) of the Act provides for on-the-job training (OJT) as one of the four optional components in JOBS. Section 250.61 contains the regulations for OJT.

Our definition of OJT is based on the definition contained in WIN regulations at § 224.42(a) and information provided by the Department of Labor. JTPA regulations do not define OJT, although it is an allowable activity. There are a few basic principles that govern OJT. The participant is hired first by the employer. While engaged in productive work, she is provided training which gives her the knowledge or skills essential to the full and adequate performance of that job. She is compensated at a rate (including benefits) comparable to that of other employees performing the same or similar jobs, and the employer is reimbursed by the State IV–A agency or its agent for the extraordinary costs of training and the additional supervision that is required. At the end of the OJT, the participant is retained as a regular employee.

In order to assure that OJT assignments offered through JOBS result in an increase in participants' skills and competencies, and that progress can be monitored by the State IV–A agency, we propose to require that qualitative measures for progress be developed for all OJT assignments that are included under JOBS. This is discussed in more detail in the definition of making good or satisfactory progress in a training component in § 250.1.

Rate of Reimbursement and Duration of OJT. We propose to limit the rate of reimbursement to employers to no more than an average of 50 percent of the wages paid by the employer to the participant during the period of the OJT. The operational experience of the six federally-funded grant diversion demonstration projects in which subsidy levels ranged from 25 percent to 83 percent did not suggest that higher rates significantly increased job opportunities. Furthermore this limitation is consistent with JTPA, WIN, and employment security policy. We, therefore, believe that by adopting a comparable policy, we avoid fostering competition among programs as to the wage subsidies they offer. Section 250.61(b) contains this provision.

We also considered whether to regulate the length of OJT. We have decided against setting limits in regulation because we believe that States should have the flexibility to design the program that both meets the needs of the State and the individuals they plan to serve, especially if they use OJT for target populations. While we permit State flexibility, we strongly recommend that State IV–A agencies use the guidance that is available, such as the Dictionary of Occupational Titles, in determining the appropriate length of training and that State IV–A agencies assure that training is only for as long as is reasonable to learn the necessary skills.

Eligibility for Services during Participation. Wages from OJT are considered to be earned income for any purpose of the law, which is consistent with current AFDC policy. A person who loses eligibility for AFDC because of earned income in accordance with § 233.20 or because of the application of the 100-hour rule in the case of the principal earner in a Unemployed Parent case will continue to be considered a participant in JOBS for the duration of the OJT. This will allow the agency to make payments to the employer through the completion of the OJT. This is comparable to the WIN regulations at § 224.42 which provide that a person in an OJT is considered to be a WIN registrant for the duration of the OJT even if she is no longer receiving AFDC. It also means that the participant may be eligible for the supportive services available to other participants in JOBS even though she is not receiving an AFDC grant. However, since the participant will have earned income, we believe that the State IV–A agency, in determining the need for supportive services, should treat the participant as it would treat an individual who finds unsubsidized employment.

As a participant in JOBS, the individual will be eligible for child care as determined by the State IV–A agency to be necessary for participation for the duration of the OJT. We have considered how to handle child care once the OJT ends. We propose the following approach in the regulation. Since the individual was not in receipt of AFDC in the previous month, she is not eligible for the twelve months of transitional child care when the OJT ends. However, if she would have been eligible for transitional care at the time that she lost eligibility for AFDC due to going into the OJT, she can get transitional care for the number of months left in the 12-month eligibility period.

For example, an individual who goes into OJT loses eligibility for AFDC in January. The OJT continues until April during which time she receives child care as a participant. If she would have been eligible for transitional child care under Part 256 in February, she is eligible for the remaining 9 months (from May to January). She would, of course, have to meet the requirements of eligibility and would have to contribute to the cost of the child care in accordance with the State's sliding fee scale. Alternatively, a State IV–A agency may simply provide child care as transitional child care from the time that the individual becomes ineligible for AFDC due to income from the OJT if she would otherwise qualify. This approach has the advantage of being fairly simple although it would disadvantage an individual who would not qualify for transitional benefits because she did not meet the other eligibility criteria (for example, was not in receipt of AFDC for 3 of 6 preceding months). We believe that our approach of providing up to 12 months of transitional child care to OJT participants assures that individuals who enter employment are treated equitably whether the employment is unsubsidized or subsidized.

Eligibility for Medicaid extensions is determined at the time the individual loses eligibility for AFDC. In other words, there is no provision, as there is under work supplementation, which allows OJT participants who are no longer AFDC recipients to be eligible for Medicaid based solely on their status as participants.

Differences between OJT and Work Supplementation. Under JOBS, OJT and work supplementation are two of the four programs from which a State must choose its optional components. We carefully considered the differences between OJT and work supplementation under the Act. Since the Deficit Reduction Act of 1984 broadened the kinds of jobs that could be filled under work supplementation to include jobs in the private sector, many State IV–A agencies have used the existing work supplementation program authority to run what is essentially an OJT program. The diverted grants are used to pay the subsidy to the employer.

There have been many recommendations to make OJT and work supplementation as compatible as possible in our regulations so as to allow States maximum flexibility in program design. We have carefully considered all the arguments and conclude that OJT and work supplementation must be considered separate components. We have two major reasons for reaching this conclusion.

The first is a new provision (section 464(c) of the Act) which specifically bars any participant in a work supplementation component from being assigned to "fill any established, unfilled position vacancy." The same prohibition has always existed in CWEP and is carried over to CWEP by the Statute. However, it is a new provision as it applies to work supplementation and, if we assume that it has the same meaning as it has under CWEP, it appears to limit the use of the work supplementation component to jobs that did not previously exist.

The second reason is that the Act allows State IV–A agencies to apply special rules to participants in work supplementation jobs that are not available to persons in OJT. The State IV–A agency may reduce or extend earned income disregards as they apply to work supplementation participants (section 482(e)(2)(G)). The State IV–A agency may exempt work supplementation participants from retrospective budgeting requirements (section 482(e)(3)(D)). In addition, the State IV–A agency must extend Medicaid coverage to participants in work supplementation (section 482(e)(6)). There is no basis for extending any of these special rules to OJT participants and, if we did not make any distinction, there would be no way to determine which rules should apply to a given participant.

Furthermore, there is no compelling reason in OJT to invoke the special rules which are necessary to divert grants to a wage pool in work supplementation. Since JOBS funds are used to reimburse the training costs of the employer, the State IV–A agency, in its planning

VOL 54 ISS 73 AP 18 1989 UMI

process, should calculate how many OJT training opportunities the State will develop and proceed accordingly.

For States which are concerned that diverted grants will not provide an adequate wage pool for their work supplementation component, we point out that they may earmark JOBS program monies at any time to add to the diverted grant money in the wage pool to ensure that sufficient funds are available for subsidy. This money could be unused OJT money, or any other JOBS program money. However, it is not permissible to use diverted AFDC grants in the OJT component.

Work Supplementation Program (§ 250.62 of the Proposed Regulations)

Section 482(e) of the Act provides for a work supplementation program (WSP) as an optional component under the JOBS program. This component allows the State IV–A agency to pay, or "divert," all or part of the AFDC grant to an employer to cover part of the costs of the wages paid to an AFDC recipient who is participating in the program. The Act adopted most of the existing law. However, there were a few changes made to the work supplementation program by the Statute which are discussed below.

Currently, only those individuals who would have been eligible for AFDC under a State IV–A Plan as it was in effect in May 1981, or as modified thereafter as required by Federal law, can participate in work supplementation. The Act does not carry over this provision to the JOBS program.

Currently, participation in the work supplementation program is voluntary, i.e., the AFDC recipient can elect to participate in work supplementation by accepting an offer of work. However, once the individual enters the program, she can be considered a mandatory participant. This is necessary to insure the integrity of the program and to carry out the agreements with employers. Under the Act, the State IV–A agency may require an individual who is not exempt to participate in any appropriate component, including work supplementation.

Retrospective Budgeting/Monthly Reporting. The Deficit Reduction Act of 1984 and interim final rules at § 233.36, published September 10, 1984, provide that State IV–A agencies must require monthly reports from those assistance units with earned income or recent work histories. Additionally, § 233.31(a) provides that all assistance units required to file monthly reports must have the amounts of their assistance payments determined retrospectively. Because work supplementation program participants have earned income, they have been subject to monthly reporting and retrospective budgeting rules. The States, however, had the option to request waivers to exempt such participants from these two requirements.

The proposed regulation at § 250.62(g) permits State IV–A agencies to exempt individuals who are participating in work supplementation from retrospective budgeting requirements and to determine their monthly payments prospectively. This means the amount of assistance payable to the participant's family for any month will be based on the income and other relevant circumstances in that month.

While the legislation does not specifically address the monthly reporting issue, we propose that State IV–A agencies be permitted to exempt participants in supplemented jobs from monthly reporting without seeking a waiver. This policy is consistent with past practice. Furthermore, exemption from monthly reporting will allow the States to have one policy for all recipients whose payments are computed prospectively.

Calculating the Diverted Grant. The regulation at § 250.62(f) allows the State IV–A agency to "freeze" a participant's AFDC grant (residual payment) as an alternative to monthly recomputations. Under this procedure, upon taking a supplemented job the participant's AFDC base grant is recalculated considering her earnings from the job and any other sources. If her earnings and other income drop her base grant to zero, the entire amount of the grant is "diverted" to a wage pool from which the employer is paid. If the earnings and other income do not cause the complete loss of the base grant, she receives a "residual" payment. The difference between the base grant and residual payment is diverted to a wage pool.

A wage pool is a mechanism which allows States to pool (divert) AFDC grants not paid to the WSP participant and pay employers a standardized amount for all WSP participants' wages. From the Federal perspective, the pool is an account or listing for accumulating and tracking the diverted amounts so that FFP can be claimed when payments are made to employers.

The following example illustrates: The potential participant is a parent in a regular AFDC case receiving a monthly grant of $450. A full-time supplemented job is found which would pay $720 per month. The individual is currently eligible for the $30 and ⅓ and standard earned income disregards, has no other income, child care is being provided at no cost and no changes are foreseen in the family's needs, income, or resources.

Countable Income=$720−$90 (work expense after 10/1/89)−$30=$600
$600−(⅓ of $600)=$400
Residual Payment=$450 (AFDC grant)−$400 (countable income)=$50
Diverted Grant=$450 (AFDC grant)−$50 (residual payment)=$400

If a State elects to "freeze" a participant's residual payment, the State IV–A agency must determine at the time of placement what payment amount, if any, the participant will be eligible for given the hours of work, wages and other circumstances while participating in a supplemented job. Once this initial payment is determined, the amount is "frozen", and the participant, if otherwise eligible, receives the same amount (residual payment) for each month of participation regardless of changes which occur during the participation. Even though a participant may be otherwise ineligible for AFDC benefits, she can continue to participate, and the State can continue to receive FFP.

Although the basic concept of "frozen" grants is attractive, States may be concerned about their ability to make adjustments in certain limited circumstances (for example, when the household size changes). Therefore, State IV–A agencies are permitted to make limited adjustments to a participant's residual payment within a "frozen" grant policy. Under such a "partial" freeze, for example, one State might make adjustments only in cases where the State's need or payment standards change. Another State might make adjustments not only under those circumstances, but also where the family size changes. If a State chooses a partially frozen grant policy, it must be consistently applied. That is, if a State IV–A agency provides adjustments for factors which would increase the payment amount, it must also make downward adjustments if changes in those same factors would cause a decrease in payment amounts.

The use of the terms "frozen" and "partially frozen" grants is not new. This policy is retained from the previous work supplementation program because States feel that freezing grants eases administration of the program. It is also consistent with § 250.62(b)(2) which gives State IV–A agencies broad discretion in establishing the terms and conditions under which jobs, payments, wages, and the conditions of participation are defined.

If a participant becomes ineligible for AFDC for any reason other than earnings from the supplemented job, the individual will not be eligible for a residual payment. However, she may continue in the supplemented job. Since she is not due a residual payment, the entire basic grant amount is diverted to the wage pool. For example, if a family becomes ineligible because of the receipt of a lump sum payment, the family would no longer receive a residual payment, but participation in the supplemented job could continue.

Wage Pool Sampling. Section 482(e)(2)(F) of the Act allows the States to use a sampling methodology to determine the amount of money available for the wage pool. By selecting a sample of work supplementation cases to determine available monies for the wage pool, State IV–A agencies will not need to track all grants diverted on an individual basis. Reconciliation of the wage pool for each participant served is eliminated. Reconciliation is still required based on the results of the sample.

The State IV–A agencies will need to develop a method to select an unbiased sample of work supplementation cases of sufficient size to produce statistically valid results when applying this method across the universe of work supplementation participants. The method used by the State IV–A agency must be described in its JOBS plan.

Medicaid Eligibility. Currently, States have the option to provide Medicaid to the participant and her family if they are otherwise eligible. Section 482(e)(6) of the Act requires that States provide Medicaid coverage to the participant and family members who would be otherwise eligible for AFDC if not participating in work supplementation. The Health Care Financing Administration (HCFA) is responsible for issuing regulations to implement this section of the Statute.

Child Care Eligibility. In § 250.62(h) we propose to allow State IV–A agencies to provide child care to work supplementation participants according to the same policy that we apply to OJT participants. A more complete explanation of this policy is contained in the preamble to § 250.61 on OJT.

Community Work Experience Program (§ 250.63 of the Proposed Regulations)

Section 482(f) of the Act provides for a community work experience program (CWEP). The new program generally retains the provisions in the current law, with modifications. The Act allows for training along with actual experience as ways to improve the employability of participants. We interpret this to mean that a State IV–A agency can include an element of training in a work experience position.

Under current law, section 409(a)(1) of the Act, the maximum number of hours in any month that a participant may be required to work is that number which equals the amount of financial assistance payable to the assistance unit divided by the greater of the Federal or the applicable State minimum wage. The Statute modifies this calculation to clarify that the State IV–A agency must deduct any child support collected (except the $50 pass-through) in making the calculation of maximum hours.

Section 482(f)(2) of the Act provides that after 6 months of an individual's participation in CWEP and at the conclusion of each work and/or training assignment, the State IV–A agency must provide a reassessment and revision, as appropriate, of the individual's employability plan.

Section 482(f)(1)(B)(ii) of the Act provides that after an individual is assigned to CWEP for 9 months, she may not be required to continue in the assignment unless the maximum number of hours of participation is no greater than the amount of the assistance payment (excluding child support collected but not the $50 pass-through) divided by the highest of: (a) The Federal minimum wage; (b) the applicable State minimum wage; or (c) the rate of pay of individuals employed in the same or similar occupations by the same employer at the same site.

The provision requiring a State IV–A agency to exclude the amount of aid for which it is reimbursed by a child support collection from the calculation of the maximum hours an individual must participate is new, although several States have done so under current law. Since the reimbursement from the child support collection will often not occur in the month for which the calculation of hours is being made, we welcome suggestions, particularly from States which have such calculations, on ways to implement this provision that would meet the intent of Congress but would not be overly burdensome to States to apply.

We propose to incorporate the provisions of the Food Security Act of 1985 (Pub. L. 99–198) regarding the addition of food stamp benefits into the calculation of CWEP hours. The Food Security Act provides that recipients are exempt from Food Stamp work registration if they are participating in an AFDC CWEP program. The Food Security Act gives States the option of adding food stamp benefits to the AFDC grant in the computation of CWEP hours in these cases. The maximum number of hours that a Food Stamp recipient, who is exempt from Food Stamp work requirements because of participation in CWEP, can be required to participate in CWEP is 120 hours a month. Since the Statute makes minimum changes to CWEP in incorporating its basic provisions into JOBS, we propose to consider JOBS CWEP to be the same as AFDC CWEP for the purposes of this provision.

The Act allows States to have other work experience programs. States may offer such programs if they are described in the State JOBS plan and approved by the Secretary. An alternative work experience program could be modeled after the WIN work experience program in which a participant is assigned to a full-time, temporary position for a limited number of weeks. Such a program gives the participant the experience of working full-time and learning what the demands of full-time employment are, both on the job and at home. Alternative work experience programs offer States the opportunity to be more creative and may be less burdensome administratively. Any alternative work program is subject to the FFP limitations at § 250.63(j) and the general program standards contained in section 484 of the Act.

Subpart H—Funding

JOBS Allocation Entitlement (§ 250.70 of the Proposed Regulations)

Federal funding for JOBS is provided as a capped entitlement. The amount of funds available to a State with an approved JOBS plan under title IV–F is determined by the formula provided in the proposed regulation at § 250.70(b). Unlike funds authorized under title IV–A, which is an open-ended entitlement program, funds not obligated by the end of the fiscal year cannot be carried over, as stated in the proposed regulation at § 250.70(c).

States will be required to liquidate all obligations incurred during a fiscal year within one year after the end of that fiscal year. The liquidation period for grant programs subject to the regulations at Part 92 is normally 90 days (§ 92.23(b)). However, we are proposing to permit one year for liquidation in the regulation at § 250.70(d) for the JOBS program because we recognize that States may need more flexibility in administering the program.

VOL 54 ISS 73 AP 18 1989 UMI

Allotment of JOBS Limit of Entitlement (§ 250.71 of the Proposed Regulations)

All States are required to have an operating JOBS program effective October 1, 1990. However, States may begin operating a JOBS program before that date. At the earliest, States may begin their JOBS programs on July 1, 1989. Funding proportional to the quarters the program is in operation in the State in a given fiscal year will be provided as described in the proposed regulation at § 250.71(a).

JOBS funding for Puerto Rico, Guam, the Virgin Islands, and American Samoa is not subject to the funding restrictions at section 1108 of the Social Security Act (see the proposed regulation at § 250.71(c)(1)). For these jurisdictions, the costs related to the provision of child care under Part 255 are subject to the JOBS limit of entitlement. This includes the costs of child care services and related administrative costs (see the proposed regulations at § 250.71(c)(2)). For these same jurisdictions, the costs related to the provision of transitional child care services under Part 256, which includes the cost of the services and the related administrative costs, are available for matching under title IV–A (see the proposed regulations at § 250.71(c)(3)).

The JOBS program provides direct funding to Indian Tribal and Alaska Native organizations. The Federal funds available to Tribes and organizations constitute a reduction to the allotment of the State in which the Tribe or organization is located. The proposed regulations at § 250.90 provide the specific requirements for Indian Tribal and Alaska Native organization participation in the JOBS program.

Maintenance of Effort (§ 250.72 of the Proposed Regulations)

Funding for the JOBS program is not intended to refinance existing programs, but to add to the effort of assisting individuals to avoid long-term dependency. We interpret this purpose to mean that JOBS funds are not to be used to replace non-Federal funds to pay for education, training, and employment activities which were already in existence prior to a State's implementation of the JOBS program. The proposed regulation at § 250.72(a) defines "non-Federal" funds.

State and local funding for the purposes of the JOBS program must not be less than State and local expenditures incurred in fiscal year 1986 for education, training, and employment activities dedicated to assist AFDC individuals in becoming self-sufficient, as provided in the proposed regulation at § 250.72(b). Examples of types of expenditures included in this fiscal year 1986 "maintenance of effort" provision are: A State's share of costs incurred in operating the title IV–A work programs and the WIN, or WIN Demonstration, program, as appropriate; a State's costs for a GED program operated in behalf of welfare recipients and applicants; a State's share of costs incurred in operating a State education, training, or work program for welfare recipients including AFDC recipients; a State's costs for work-related supportive services, such as child care, also incurred in this effort.

The proposed regulations at § 250.72 (c) and (d) establish the conditions under which FFP will be provided for expenditures certified for activities that are not otherwise available to the JOBS participant. We are proposing that FFP will not be provided for activities and services that are otherwise available to an AFDC recipient on a non-reimbursable basis. Thus, it would not be permissible to begin claiming the costs of AFDC recipients' high school attendance as an expenditure for JOBS. Nor would it be permissible to claim subsidy costs where the State has had a program in effect to subsidize an activity for low-income residents; however, under JOBS a State could pay for the portion that was not previously subsidized. On the other hand, it would be a permissible JOBS expenditure to pay for an additional education program established solely for AFDC recipients.

Matching Rates (§ 250.73 of the Proposed Regulations)

JOBS program activities are subject to three different rates of FFP. The FFP rate for that part of the total JOBS funds comprised of the States' WIN or WIN Demonstration allotment for FY 1987 is 90 percent. This rate may be applied toward any allowable cost of the JOBS program. A State's 10 percent share may be in the form of cash or in the form of in-kind contributions. Section 403(1)(1)(B) of the Act does not provide a definition of "in-kind"; it states only that it be fairly evaluated. Therefore, in order to provide States flexibility in this area, we are proposing to permit a State's share of in-kind to be State in-kind or third party in-kind contributions. This is currently the practice for the WIN program and we propose to incorporate this practice in the JOBS program but only for this portion of the funding for JOBS.

Costs Matched at the FMAP Rate with a 60 Percent Floor. Federal matching under the JOBS program is also available at a State's Medicaid matching rate (the FMAP) for certain costs of the program that exceed a State's WIN or WIN Demonstration allotment. In this category, for the purposes of the JOBS program, the minimum matching rate is 60 percent.

Expenditures which may be claimed in this category are the personnel costs (defined throughout the preamble and proposed regulations as salary and benefits only) of full-time staff involved in any capacity of the JOBS program, whether programmatically or administratively. Full-time staff are those individuals employed for a normal work week according to a State's definition of full-time. We propose that States cannot count part-time staff as full time with a full-time equivalency measure.

The Act provides the same match rate for those full-time JOBS employees who will be involved in administrative functions such as: assessing the needs of JOBS participants and developing appropriate employability plans; accounting; systems operation; and supervision. The assessment of child care needs and referral to appropriate services for JOBS participants can be matched at this rate when performed by a full-time JOBS employee.

The match rate also applies to costs associated with a JOBS participant's involvement in a component of the program. This includes program costs, such as OJT payments to an employer or tuition and fees for GED classes, if not precluded by the proposed regulations at § 250.48. It also includes the personnel costs of staff and first-line supervisors directly providing component services to participants on less than a full-time basis.

The costs of equipment, supplies, and materials that are used by a JOBS participant while she is actively participating in a JOBS component are available at the FMAP rate (with a minimum of 60 percent). However, indirect costs are not matchable at this rate.

Costs Matched at 50 Percent. The FFP rate of 50 percent for the JOBS program includes the costs of general administrative activities. This includes personnel costs of staff administering the program on less than a full-time basis and all other non-staff costs not matchable at the program matching rate. Administrative costs include, for example, personnel costs for case managers and program planners not employed full-time for the JOBS program. FFP at 50 percent is available within the JOBS cap funding limit for both direct and indirect costs, such as utilities and space. (See OMB Circular No. A–87.)

A State's share of costs at the program matching rate or at the administrative matching rate must be in cash. In-kind contributions, whether State in-kind or third party in-kind, cannot be used as the State's share.

State agencies are encouraged to seek financial support from private sources to develop and enhance JOBS program activities and other activities which help individuals to become self-sufficient. Funds donated from private sources for the JOBS program may be considered as a portion of a State's share of matching costs if such funds meet the criteria of § 235.66.

Reduced Matching Rate (§ 250.74 of the Proposed Regulation)

Target Groups. For the JOBS program, the Act provides certain safeguards to assure that the increased Federal funding intended to assist individuals in avoiding long-term dependency is directed largely towards those individuals who are most in need of assistance. The proposed regulation at § 250.74(a) provides that if, in any fiscal year, a State fails to expend 55 percent of its JOBS allotment on members of the State's target population as defined in proposed § 250.1, the Federal matching rate for all JOBS expenditures for that same year will be reduced to 50 percent. The Secretary, however, may waive this reduction if a State can satisfactorily demonstrate that the characteristics of the caseload in that State make it infeasible to meet the requirements of the proposed regulation at § 250.74(a) and that the State is targeting other long-term or potential long-term recipients.

Participation Rates. To ensure that States effectively serve the purpose of the JOBS program, section 403(1)(3)(A) of the Act establishes participation rates that States should meet for fiscal years 1990 through 1995. The proposed regulation at § 250.30 and its accompanying preamble describe participation requirements under the JOBS program. The term "participation" is defined in the proposed regulations at § 250.1.

Failure to meet the participation rates, which are defined in the proposed regulation at § 250.74(b), will reduce the matching rate for all JOBS expenditures to 50 percent. The participation rate for fiscal year 1990 is 7 percent; however, States are not subject to a reduction in the Federal matching rate to 50 percent in the following fiscal year. Fiscal year 1992 is the first year in which States will become liable for reduction of FFP for failure to meet the participation rates (for failure to meet the fiscal year 1991 standard). Methods for determining participation rates are included in the proposed regulations at § 250.74(b) (2) and (3).

The Secretary may waive in full or in part any penalties applicable to a State for not meeting these participation rates. The proposed regulations at § 250.74(b)(4) provide the conditions under which a full or partial waiver may be granted.

AFDC–UP Participation Rates. JOBS participation rates for the AFDC-unemployed parent (AFDC–UP) program have also been established by the Act and appear in the proposed regulations at § 250.74(c)(1). AFDC–UP participation rate requirements go into effect in fiscal year 1994, and the first penalty would be imposed in fiscal year 1995.

While the statutory language refers to waiving the penalty for not meeting the participation rates, and sets the waiver criteria, the actual penalty is not defined in the Act. We believe it is appropriate that the penalty for failure to meet the AFDC–UP participation rates be a reduction to 50 percent in FFP. This penalty is identical to the penalty established in the Act for failure to meet the general participation rates. It is also consistent with the penalty established for failure to expend 55 percent of JOBS funds on targeted groups.

As an alternative, we considered applying the penalties cited under section 404 of the Act for failure to substantially comply with the provisions of section 402(a). The appropriate penalties under this section include the withholding of all AFDC grant funds to a State or the withholding of certain funds limited to specific categories. However, we concluded that this penalty would be too harsh.

The Secretary may waive in full or in part any penalties applied to a State for not meeting the participation rates for the AFDC–UP program. The proposed regulations at § 250.74(c)(3) provide the conditions under which a full or partial waiver may be applied.

Activities Excluded from FFP (§ 250.75 of the Proposed Regulations)

There are certain activities for which Federal matching under the JOBS program is not available under any circumstance. These are identified in the proposed regulations at § 250.75. In addition, there are certain costs unallowable for FFP that apply only to the community work experience program and alternative work experience programs included in an approved JOBS plan. The proposed regulations pertaining to these unallowable costs are located at § 250.63(j).

Financial Reports, Records, Statements and Audits (§ 250.76 of the Proposed Regulations)

Grants provided under the JOBS program of title IV–F are subject to the grant management regulations at Part 92. These regulations apply to federally-assisted programs that are not funded as open-ended entitlement programs, such as the AFDC program. (For the AFDC program, the grant regulations at Part 74 continue to apply.) The following provisions of Part 74 also apply to grants subject to Part 92: §§ 74.62(a), 74.173, 74.174(b), 74.304, 74.710, and 74.715.

With respect to these regulations, States are reminded that all claims for Federal reimbursement must be supported by appropriate documentation. JOBS funds under title IV–F are subject to audit and financial and programmatic review. Claims for improper costs under the JOBS program will be subject to disallowance. Comments are specifically requested on a standard sampling procedure (within the guidelines found in § 250.80) to determine such disallowances. Disallowance procedures for JOBS funds will be similar to the disallowance procedures for the AFDC program. Where appropriate, expenditures of the JOBS program are subject to the cost allocation provisions at Part 95, Subpart E.

Costs Matchable as AFDC Payments (§ 250.77 of the Proposed Regulations)

Section 402(a)(19)(H) of the Act specifies that costs incurred by the State for supplemental payments to families so that they do not experience a net loss of cash income, pursuant to § 250.35, shall be treated as title IV–A costs. However, they are not considered AFDC benefit payments for any purpose.

Payments to employers in the work supplementation program include part or all of an AFDC grant that has been diverted to cover part of the wages paid to an AFDC recipient participating in this program (see proposed regulations at § 250.62(1)). Because these payments are AFDC benefit payments, they are available for Federal matching under the AFDC program.

Subpart I—Uniform Data Collection Requirements

Uniform Data Collection Requirements (§ 250.80 of the Proposed Regulations)

The Family Support Act imposes substantial reporting requirements related to the JOBS program and its attendant child care provisions. Section 487(b) of the Social Security Act contains a minimal set of uniform

VOL 54 ISS 73 AP 18 1989 UMI

reporting requirements that may be augmented as the Secretary determines. Section 403(e), among other data elements, requires a State to provide information on the use of child care by AFDC recipients.

The Act also implicitly establishes reporting requirements by conditioning enhanced FFP on meeting requirements for certain levels of participation and for a minimum expenditure level for certain target groups.

In order to meet the above reporting requirements, we are proposing that States be required to submit electronically on an ongoing basis a sample of unaggregated case records of JOBS participants in each month with a minimal set of data elements as prescribed in § 250.82. The case records would be identified by a State-supplied substitute for the Social Security Number. The sample in a State would have to be of sufficient size to provide accurate data at the State level, plus or minus one percentage point, at a 95 percent confidence level, for all data elements necessary to determine whether a State qualifies for enhanced FFP under any of the provisions of § 250.74.

In addition to this sample, States would submit aggregate reports on a quarterly basis of the number of non-exempt AFDC recipients. Finally, in lieu of a cost tracking system that would identify all funds spent on each individual member of the State's target population, we propose that a State develop a table of average total unit cost per component and service made available by the State. The table would be updated annually. We propose to use activity data submitted in the State's sample of unaggregated case record data, as discussed above, in conjunction with the State's table of costs, to determine whether the State has met the 55 percent requirement.

We are offering the above described approach as an alternative to requiring periodic aggregate, hard-copy reporting. We propose this sample in lieu of aggregate reporting because we believe it will meet statutory reporting requirements, provide more useful information to the Federal government, and be less burdensome to States. Very few of the data elements are not directly involved in meeting an explicit or implicit statutory reporting requirement.

On the other hand, we foresee the possibility that a sample-based reporting requirement may introduce levels of complexity for States. We also anticipate that in States with relatively smaller numbers of AFDC cases, a State may find it less burdensome to submit the universe of their case records, rather than develop a sample that might need to approach the universe in order to achieve the required levels of accuracy. The rule would allow universe reporting in lieu of a sample.

The above described method of reporting would place a more substantial burden on the Department than simply handling input of hard-copy report forms from the States. Nonetheless, the overall approach may be of sufficient value both to States and the Department, that the additional complexities and burdens would be worth the effort. We invite comment, particularly with regard to operational implications for the States.

Given the substantial data reporting requirements mandated statutorily, we have attempted to keep additional reporting requirements to a minimum. However, many individuals and organizations with whom we have consulted have urged us to collect outcome information such as job entries, welfare grant reductions, case closures and retained employment for JOBS participants. We realize that such information is frequently requested by legislative bodies and by the public, and that some States might want to compare themselves to others with respect to the measures cited above. Others have commented that the interpretation of these data is ambiguous and that there is an additional burden that collecting them would place on States. We have not included outcome measures or other types of measures, such as receipt of transition services, in these proposed regulations, but we may include such reporting requirements in the Final Rule. We invite comment with respect to the utility and the data collection burden of outcome measure reporting.

State Data Systems Options (§ 250.81 of the Proposed Regulation)

Given the large number of individuals who may participate in the JOBS program and the detailed nature of the subcategories of data required by the Statute, we believe it is unlikely that a State can either operate its program effectively or meet the minimum requirements in the Statute without an automated client-based information system. To these ends, we propose in § 250.81 to permit various rates of FFP for different parts of the system needed to operate the JOBS program effectively. For the sake of distinguishing this subsystem from all others in a State's welfare data system, we refer here and in the definitions in § 250.1, to a State's JOBS Automated System, or JAS.

We propose that all requirements of § 95.611, and of § 205.37, be met with regard to any funding for a State's JAS.

We propose three JAS funding arrangements be available to the States. Title IV–F funding at 50 percent FFP would be available for a State's JAS. Title IV–A funding, also at 50 percent FFP, would be available for the interface between a State's IV–A system and its JAS, if the State's IV–A system is a non-FAMIS system. For the interface between a State's JAS and a FAMIS IV–A system, title IV–A FFP would be available at 90 percent.

We propose the interface of an automated JOBS program with the title IV–A FAMIS system, for verification of eligibility and reconciliation of data, would include planning, development and implementation of title IV–A subsystems to: (1) Manage information on eligibility factors or target group membership; (2) effect notifications and referrals including non-cooperation; (3) check records of applicants and recipients on a periodic basis with other agencies to verify continued eligibility; and (4) notify appropriate officials when a recipient ceases to be eligible.

Required Case Record Data (§ 250.82 of the Proposed Regulation)

In this section we propose a minimum content for the case record that will permit our derivation of all reportable data required by the several parts of the Statute and the Act noted with regard to § 250.80 above. We specify this minimum, in part, in support of the proposed submission of a sample of unaggregated case record data. However, we believe this approach also enables States to record the minimum data necessary to operate the JOBS program effectively. We particularly seek comment on States' views as to whether some or all of the minimal case record data should be required for all JOBS participants, or only for the sample of cases the State would be required to submit to the Department.

Subpart J–Operation of Jobs Programs by Indian Tribes and Alaska Native Organizations

Scope and Purpose (§ 250.90 of the Proposed Regulations)

The Statute provides that Indian Tribes and Alaska Native organizations may apply to the Secretary by April 13, 1989 for direct funding to conduct a JOBS program. Tribal (refers to both Indian Tribes and Alaska Native organizations) groups had to apply by this date in order to receive direct JOBS funding in any future year.

The Department issued initial application guidelines (FSA–AT–89–11) on February 24, 1989, to officials of

federally recognized Indian Tribes and Alaska Native organizations. Based on comments received from Tribal leaders, requesting that the April 13, 1989 application not be treated as a final document, and on the fact that we were still developing Federal policy at the time these guidelines were issued, we advised Tribal applicants that we would not disapprove their applications based on their initial submittal. We also advised applicants that we would issue further guidance after April 13, 1989.

Eligible Indian Tribe and Aleska Native Organization Grantees (§ 250.91 of the Proposed Regulations)

The proposed regulations clarify the general eligibility requirements of the Act concerning Indian Tribes. They reflect congressional intent that an Indian Tribe must be recognized by the Federal government as eligible to receive services from the Bureau of Indian Affairs in order to be eligible for the JOBS program. Specifically, Report 100–37 of the Senate Committee on Finance (p. 39) states that " * * * an Indian tribe is any tribe, band, nation, or other organized group or community of Indians * * * that is recognized by the Federal government as eligible for services from the Bureau of Indian Affairs and is located on a reservation * * *."

In addition, consortia or Tribal organizations representing eligible Tribes may operate a JOBS program if they meet certain conditions. These conditions provide that such consortia or organizations have the managerial and administrative capacity to operate the program and have received documented authority from the participating Tribes to conduct the program on their behalf.

Selection Criteria for Eligible Alaska Native Organizations (§ 250.92 of the Proposed Regulations)

The Act is very specific about the program eligibility of Alaska Native organizations. It limits Departmental approval to only one application from an Alaska Native organization for each of the 12 geographical regions. The proposed rules establish criteria which the Department will use to designate the Alaskan Native organization grantee. The criteria are very similar to those used by JTPA in designating Native American grantees for its program. However, since under the JOBS program the Alaska Native grantee must serve all eligible Native Alaskans residing in the region in which the grantee is located, we have specifically required that the grantee demonstrate either that it has previous experience in operating regionwide programs or that it can establish the capability to effectively administer the program throughout the region.

Funding Formula (§ 250.93 of the Proposed Regulations)

The Act specifies that JOBS funding for an Indian Tribe is based on the number of adult members of the Tribe receiving AFDC compared to the total number of adult AFDC recipients in the State. The formula for Alaska Native organizations is based on the number of adult Alaska Natives receiving AFDC who reside within the boundaries of the region which the Alaska Native organization represents compared to the total number of adult AFDC recipients in the State of Alaska.

Since the Act does not establish a designated geographical service area for Tribes, as it does for Alaska Native organizations, the proposed rules define such area. The Tribe will receive JOBS funds based on the number of adult members of the Tribe receiving AFDC who reside in the designated service area as compared to the total number of adult AFDC recipients in the State. Thus, the designated area creates a manageable program service area which permits funds to be provided based on those Tribal members who could realistically be served by the Tribe. The State IV–A agency will be expected to provide JOBS services to Tribal recipients outside of the designated area. A designated service area concept is used in various other programs such as JTPA, the Community Services Block Grant and those under the Bureau of Indian Affairs (BIA).

State IV–A agencies and Tribes or organizations have a mutual responsibility to share all available information so a funding level can be calculated. Accordingly, the proposed regulations specify that the State IV–A agency and the Tribe or organization must exchange available information on adult Tribal AFDC recipients needed to determine the estimated number of the eligible Tribal recipients and to define the designated service area, if other than the reservation or trust lands, as appropriate. This requirement reflects the fact that the State IV–A agency is the most appropriate source of data relating to AFDC recipient status. However, many State IV–A agencies cannot identify individuals in their caseload by Tribal affiliation and thus will probably need membership or residence information from Tribes or organizations to verify Tribal AFDC recipient status.

We recognize that State IV–A agencies and Indian Tribes or Alaska Native organizations may have difficulty developing data on adult Tribal AFDC recipients, especially using the definition of adult recipient contained in the Act (i.e., an individual other than a dependent child, including a minor custodial parent of another dependent child, who is receiving AFDC).

Because of these data deficiencies, we strongly encourage Indian Tribes or Alaska Native organizations and State IV–A agencies to enter into agreements which establish population estimates as well as service area definitions, as appropriate. If a State IV–A agency and Tribe or organization cannot agree on the number of Tribal eligible recipients and/or the designated service area, the Department will, in consultation with the Tribe or organization and the State IV–A agency, make the final determination.

Non-Tribal recipients in a designated area are subject to the requirements of the State's JOBS program. However, a State IV–A agency may through contract (or other referral arrangement) authorize an Indian Tribe grantee to serve non-Tribal members residing in the designated service area. The State IV–A agency may only delegate to a Indian Tribe grantee those functions which do not involve agency discretionary judgment, as discussed in proposed § 250.10 and related sections of the preamble.

Program Administration, Implementation and Operations (§ 250.94 of the Proposed Regulations)

Program Administration. Under the proposed rules, the Tribe or organization must designate an administrative entity, such as the social services agency or the Tribal JTPA agency, to be responsible for the administration of the JOBS program. This responsibility for program administration includes all the requirements under the Act, unless waived under proposed § 250.96, as we, as applicable requirements under all other related Federal regulations. Such regulations include the general funding provisions under Part 92 which are generally applicable to Tribal administration of Federal programs (as reflected in § § 250.13 and 250.77 of the proposed rules) and the joint Department of Labor/Department of Health and Human Services regulations being developed which cover worker's issues such as working conditions and displacement, as appropriate.

The responsibility to administer JOBS means that the Tribe or organization has the responsibility for program functions such as exemption and priority determinations, orientation, referrals,

VOL 54 ISS 73 AP 18 1989 UMI

assessment and development of the employability plan, JOBS activities and hearings involving JOBS participation issues. However, the proposed regulations clarify that certain other related functions, such as imposition of sanctions, are retained by the State IV–A agency based on its responsibility to administer the IV–A program. For instance, if the Tribe or organization determines that an individual failed to meet participation requirements, the State IV–A agency would be responsible for making the necessary AFDC payment changes, after the individual has been afforded appropriate due process.

Part 255 proposes that the State IV–A agency (which receives matching Federal funds under title III of the Statute to guarantee child care for JOBS participants) provide necessary child care for Tribal participants either directly or through contract with the Tribe or organization. Also, under Part 256 the State IV–A agency is responsible for transitional child care benefits. Because of these interrelated functions, we encourage State IV–A agencies and Tribal grantees to enter into agreements to develop the referral and operating procedures necessary for effective program implementation.

Implementation. The proposed rules permit the Tribe or organization to begin its JOBS program before the State implements its program. This provision reflects the sovereignty of the Tribe or organization to operate its program to the full extent allowable under the Act. Given that proposed § 255.2(f) requires the State IV–A agency to guarantee child care necessary for Tribal members' participation, this proposed section (§ 250.94) of the regulations provides options to permit a Tribe or organization to conduct its program prior to the State's implementation. During the period prior to the State's implementation of the program, these options permit the Tribe or organization to either guarantee necessary child care for its participants or to operate its program on an entirely voluntary basis. These provisions are discussed in detail in the proposed § 250.95 and accompanying preamble concerning supportive services.

Also, the proposed rules and the initial application guidelines (FSA–AT–89–11) require that the Tribe or organization submit its application with final documentation to the Department at least 45 days prior to implementation to provide sufficient opportunity for the Secretary's review and approval. Similar to the requirements for State IV–A agencies at § 250.20(b), the proposed rules indicate that the Tribe or organization may not begin its JOBS program prior to approval by the Secretary. Prior approval is necessary given the complexity of the program, the needed interface which must occur between the Tribal applicant and the IV–A agency, and the fact that Tribal programs represent a whole new direction for welfare work programs.

Operations. This section of the proposed regulations exempts Tribes and organizations from the requirements of § 250.12 in order to specify appropriate coordination requirements for Tribal grantees. Under this proposed section, the Tribe or organization is required to provide its application to the State IV–A agency prior to its submittal to the Department. This is to ensure that necessary interface with the State IV–A agency has been established, including the development of agreements or methodologies, to assure that Tribal recipients receive equitable treatment under both the AFDC and JOBS programs.

The proposed rules also indicate the appropriate agencies and programs with which the Tribe or organization must coordinate. The coordination requirements reflect congressional concern that agencies administering JOBS identify available resources from other programs in order to prevent duplication of services, to assure that the maximum level of services is available to participants and to ensure that costs of these other program services for which welfare recipients have been eligible are not shifted to the JOBS program. This latter provision is closely related to the provisions on maintenance of effort which are described in the proposed § 250.98 and preamble.

Furthermore, although Tribal grantees would be subject to § 250.44, which covers mandatory components, they would not be subject to § 250.45, which covers optional components. The proposed § 250.94(e) instead requires Tribal JOBS programs to include four mandatory components and at least one optional component. The following program design modification is proposed to more realistically reflect the special circumstances and needs of Tribal grantees.

Because the four mandatory components cover basic education, training and employment activities, many of which should be available to Tribal participants through other program resources, we believe that most Tribal programs should be able to offer all four components. For example, many literacy programs should be available to Tribal recipients through the Office of Indian Education and, thus, would not be funded under JOBS.

The Tribal program need include only one optional component. Of the four options given to States, two components—community work experience program (CWEP) and the work supplementation program—are integrally linked with AFDC recipient grants. Thus, the proposed rules require that adequate operational agreements be worked out between the State IV–A agency and Tribal grantee before the Department can approve these components.

A Tribe is permitted to include, as an optional component, a work experience program as approved by the Secretary or alternative education, training, and employment activities as approved by the Secretary. We would approve, for example, an alternative work experience program which generally met the requirements of a CWEP, JTPA, or BIA work experience program. Tribes or organizations are cautioned that in order to receive approval of alternative education, training and employment activities, such approaches must be consistent with the purpose of the JOBS program to reduce welfare dependency and must serve only eligible AFDC recipients. Thus, if JOBS is linked with another program such as JTPA, a Tribal grantee must be able to validate that JOBS funds were used only to serve Tribal JOBS participants. These stipulations are proposed to protect the integrity of the program. Based on congressional concern as well as our careful consideration, the proposed rules further indicate that JOBS funds not be used for public service employment or for allowances.

Supportive Services (§ 250.95 of the Proposed Regulations)

Under the proposed rules, the Tribal grantee must provide for the work-related supportive services, such as clothing or transportation, necessary to enable an individual to participate in the JOBS program. Tribes or organizations must follow the proposed requirements regarding work-related supportive services under Part 255. The Tribal grantee is given flexibility to determine the types of supportive services and methods of delivery but must describe these services/methods in its application documentation pursuant to proposed § 250.97(f)(6).

Since State IV–A agencies are required to provide child care under Part 255 of the proposed regulations, this section proposes that the Tribe or organization must ensure, based on a method which is acceptable to the Tribe or organization and the State, that necessary child care is available when requiring an individual to participate in its program. Since the State IV–A agency will be providing child care services and the Tribe or organization will be designating who participates, we strongly encourage Tribal grantees to develop with State IV–A agencies appropriate referral mechanisms to ensure that Tribal participants receive necessary child care services. In addition, we are encouraging State IV–A agencies to contract with Tribal grantees for providing child care services for Tribal participants.

The proposed regulations at § 255.2(f) are designed to ensure that States provide sufficient funds to meet the child care needs of Tribal participants and that States use comparable and appropriate methods of providing child care for Tribal participants as they use for non-Tribal participants in the State. The Tribe or organization may guarantee child care for its participants through other program sources.

If the Tribe or organization begins its JOBS program before the State IV–A agency, the Tribal grantee can operate an entirely voluntary program. However, after the State implements its JOBS program, the Tribe or organization may no longer operate an entirely voluntary program, and necessary child care must be arranged to require non-exempt individuals to participate. This provision is consistent with congressional concern, as reflected by the participation and exemption requirements in § 250.30, that individuals who are reasonably able to participate in the program, and for whom guaranteed child care is available, should be required to participate.

Waiver Authority (§ 250.96 of the Proposed Regulations)

This proposed section indicates that certain requirements of the Act and of the proposed rules do not apply to Tribal grantees, as they are unique to State programs. These include provisions relating to State agency administration, the State's JOBS funding allotment or State matching requirements. Thus, these have been determined to be inappropriate for Tribal JOBS programs by the Secretary pursuant to his authority under the Act.

A Tribe or organization may also request waivers for any other requirements of the Act not specifically mentioned but must provide proper justification. The Secretary would consider the appropriateness of such waivers on a case-by-case basis.

Application Requirements and Documentation (§ 250.97 of the Proposed Regulations)

The proposed Tribal application requirements generally follow State JOBS plan requirements, which are discussed in detail in proposed § 250.20 and related preamble.

Under the Act, Tribes and organizations had to apply to the Department by April 13, 1989, in order to conduct a JOBS program. Since we were still developing JOBS policies at the time we released guidelines for Tribal application, we advised Tribal groups in the application notice (FSA–AT–89–11) that their April 13 submissions would probably need to be supplemented.

We believe that the additional application documentation proposed in this section is necessary in order to provide the Secretary with a sufficient level of information upon which to base approval. We determined that this additional documentation was needed, based on our review of all the requirements reflected in the Act and those being proposed for State JOBS programs. Because of the complexity of the JOBS program requirements and the degree of program flexibility we would like to provide Tribal grantees under our waiver authority, we do not think these application requirements impose an undue administrative burden upon Tribal grantees. The application must serve as the Department's primary vehicle for assessing whether a Tribal grantee is meeting the requirements of the Act and regulations.

Maintenance of Effort for Indian Tribes and Alaska Native Organizations (§ 250.98 of the Proposed Regulations)

Tribal grantees are not subject to the requirements in proposed § 250.72. Proposed § 250.98 makes maintenance of effort provisions more appropriate for Tribal entities. The proposed requirements on maintenance of effort reflect congressional concern that JOBS funding not be used to supplant existing funding for programs which have been available for welfare recipients.

This means that JOBS funds should be used only to provide educational, training and employment activities for Tribal participants which are in addition to those which would otherwise be available. For example, where a high school education has been available to Tribal members, JOBS funds must not be used to pay for this activity. Thus, the Tribal grantee may not contract for services which are otherwise available on a non-reimbursable basis pursuant to the proposed regulation at § 250.13.

Part 255—Child Care and Other Work-Related Supportive Services During Participation in Employment, Education, and Training

Purpose (§ 255.0 of the Proposed Regulations)

The purpose for the issuance of the proposed regulations is to implement section 301 of the Family Support Act of 1988.

State Plan Requirements (§ 255.1 of the Proposed Regulations)

Title III of the Statute adds section 402(g) to title IV–A of the Act. Thus, child care is not part of the title IV–A plan which is covered in section 402(a) of the Act. Neither is it included in the State JOBS plan under title IV–F, which is covered in section 482(a) of the Act. In fact, section 402(g) does not address whether a plan is needed regarding the provision of supportive services. However, we propose that services provided under sections 301 and 302 of the Statute be covered by a separate plan submitted in accordance with these regulations. Further, we propose that the State Supportive Services plan covering services under section 301 of the Statute be submitted at the same time as the JOBS plan to ensure appropriate public and Federal review. The approval process will follow that for the State JOBS plan which is specified in § 250.20.

We propose that the State Supportive Services plan contain information about child care services, work-related supportive services, and work-related expenses necessary for JOBS. We propose to require a description of the services in the State Supportive Services plan. We further propose to ask the State IV–A agency to cross reference the State Supportive Services plan in their State JOBS plan to show the coordination between the two plans. The specific State Supportive Services plan requirements are contained at § 255.1. In States where Tribal entities are direct-funded to operate a JOBS program, the State Supportive Services plan must include specific information on the State's provision of child care services for JOBS participants served by those Tribal entities.

Eligibility (§ 255.2 of the Proposed Regulations)

Section 402(g) of the Act provides that the State IV–A agency must guarantee child care to the extent that the State determines necessary for an individual in a family with a dependent child to: (1) Accept or maintain employment, or (2) participate in an education and training activity if the agency approves the

VOL 54 ISS 73 AP 18 1989 UMI

activity and periodically determines that the individual is satisfactorily participating in the activity. (Such education and training is not limited to activities funded under JOBS.) Where the State IV–A agency determines that child care is necessary, it cannot require an individual to participate in an activity or to accept or maintain employment unless it guarantees child care.

Child Care Guarantee. The State IV–A agency must guarantee child care for an eligible family if resources are available. The guarantee may be limited by State appropriation ceilings, the available supply of other State, local and federally-funded services, such as title XX services, and the target group priorities. We propose that the state should assure in its Supportive Services plan that child care provided or claimed for reimbursement is reasonably related to the hours of participation or employment.

The State IV–A agency must also assure that sufficient child care will be available to meet the participation rates described in § 250.74. We propose that the State Supportive Services plan must describe how sufficient child care will be made available as a condition of plan approval. We are particularly interested in comments intended to further specify State plan requirements for a "description of how the State will assure that sufficient child care will be available to meet participation rates in § 250.74."

A State IV–A agency is not required to treat child care benefits under this Part of the proposed regulations as an absolute entitlement and to provide all employed recipients and participants in JOBS with child care benefits. Frequently, child care is provided through informal arrangements at no cost. The child care guarantee does not mean that paid child care must be available for every participant. In determining whether child care is necessary, the State IV–A agency may take into account informal care.

We propose to limit the guarantee of child care to those families with dependent children under 13 or who are physically or mentally incapable of caring for themselves, when the State IV–A agency determines such care is necessary. Limiting child care to these situations is a reasonable policy, consistent with the limits enacted for the Dependent Child Care Tax Credit by section 703(a) of the Family Support Act, and, which will apply to taxable years beginning after December 31, 1988. We believe these limits reflect widely-held views (reflected in a variety of laws and legislative proposals) on appropriate governmental participation in expenditures for child care services.

We also propose to require State IV–A agencies to guarantee care for any child who would be required to be in the assistance unit if it were not for the receipt of SSI under title XVI or foster care payments under title IV–E and would otherwise be guaranteed such care. Although these two categories of individuals are excluded from the AFDC assistance unit, they are treated as dependent children for certain other purposes.

State IV–A agencies must guarantee needed care to recipients who are working at the time the State implements JOBS as well as to recipients who begin working on or after the date the State IV–A agency implements this provision.

Other Supportive Services. The Act requires that the State IV–A agency pay for or reimburse the costs of transportation and other work-related expenses, including work-related supportive services, if the State IV–A agency determines they are necessary for an individual to participate in JOBS. We propose to allow State IV–A agencies to define work-related supportive services and work-related expenses in the State Supportive Services plan. They may include one-time, special work-related expenses which would enable individuals to accept or maintain employment. On-going expenses related to employment are already covered by the work expense disregard (which is raised to 90 effective October 1, 1989); therefore, no provision for such expenses has been made under section 301 of the Statute or these proposed regulations. We propose that the plan must describe methods of providing other supportive services, specify monetary limits for each type, and indicate the basis for determining the need for the type of service.

Verification of Participation in Education or Training Activities. Child care, transportation, and other supportive services necessary for an individual to participate in JOBS or other education and training activities that are approved under JOBS by the State IV–A agency are eligible for FFP. Under the Act, child care and other supportive services for those in "non-JOBS" education and training is allowable only to the extent that these activities are "consistent with the individual's employment goals." This language led us to the conclusion that an employability plan would need to be developed for those in outside education and training. Such a conclusion is also consistent with the statutory language indicating that participation in outside education and training would constitute satisfactory participation in JOBS. Thus, we propose to consider participants in these activities as JOBS participants and to authorize their supportive services other than child care through the JOBS program.

We propose that the State IV–A agency document approval of outside education and training activities in an employability plan and that the agency periodically (but not less than every three months) determine that a recipient is making satisfactory progress, as defined at § 250.1. Three months is considered a review period. However, State IV–A agencies should be aware that child care services (or other supportive services) provided to individuals who are not satisfactorily participating could be considered payments for ineligible individuals and might be subject to disallowances, even if States were following this three-month monitoring standard.

We propose to permit State IV–A agencies to provide child care and other necessary supportive services for up to two weeks for families in which an individual is waiting to enter approved education or training activities or to begin a component. This provision is included to ensure that child care services (or other service arrangements) are not lost and that continuity of care is provided so that an individual may continue the employability process.

Services for Applicants. We were faced with the question of whether Congress intended that child care be available to recipients of AFDC only, or to applicants as well. In considering this issue, we concluded that child care should be available, as it was under prior law, when the agency requires an applicant to participate in job search. We also propose that temporary child care be available for other activities necessary to prepare the individual for participation in the program, such as orientation. States have told us that the lack of such child care during orientation results in a very high absenteeism rate.

However, we do not believe that it is proper or efficient use of resources to provide child care to applicants who are already in education or training or who are employed, until their eligibility is determined. Also, it is not proper use of resources to provide services to applicants who are not likely to be determined eligible. A State IV–A agency may provide services to certain individuals (e.g., job search participants) whose eligibility has not been determined, as long as it has no information indicating that the individual would not likely qualify for benefits.

We are proposing that the State IV–A agency must provide child care to AFDC applicants and recipients who are served by a JOBS program administered by Tribal or Alaska Native organizations. Such services shall be available to the same extent that they are available to eligible participants in the State's JOBS program. State IV–A agencies must provide an equitable level of services for Indians and Alaska Natives, and they must provide the same range of methods or arrangements, unless certain methods would not be feasible because of the nature of child care services available in Tribal service areas.

Although the Act requires that child care be guaranteed so that an individual may accept or maintain employment, it is silent on whether the State IV–A agency can pay for work-related expenses in order for the same individual to accept or maintain a job.

We are proposing that such expenses would be allowable if the individual participates in a component, including work supplementation, which involve actual work. Further, if a State IV-A agency assigned the individual to the optional component of job search, such expenses would be allowable. However, in other components like skills training or education, job acceptance or maintenance expenses would not be incurred, and therefore not allowed.

We propose to allow State IV–A agencies to make one-time payments for reasonable work-related expenses to an applicant or recipient so that she may accept or maintain employment, if the State IV–A agency so provides in its Supportive Services plan. Such expenses might include a uniform, a set of tools, a pair of eyeglasses (if not available elsewhere), or the fee for a driver's license.

Methods of Providing Child Care and Other Supportive Services (§ 255.3 of the Proposed Regulations)

The Act provides a number of methods to guarantee child care. Specifically, we propose that the State IV–A agency may:

(1) Provide the care itself;

(2) Arrange care through public or private providers by use of contracts or vouchers;

(3) Provide cash or vouchers in advance to the caretaker relative so that the child care costs may be prepaid;

(4) Reimburse the caretaker relative for child care expenses incurred;

(5) Arrange with other agencies and community volunteer groups for non-reimbursed care;

(6) Use the earned income disregard; or

(7) Adopt such other measures as the State IV–A agency deems appropriate.

We propose that the State IV–A agency describe which of these methods it will use in its Supportive Services plan. We elaborate on certain of the options here.

Direct Provision of Child Care. Historically, State IV–A agencies have not provided child care directly except in a few instances. The Act prohibits the State IV–A agency from spending money on construction, so instances where a State IV–A agency would provide the care itself may remain rare. However, we can foresee a situation where a State IV–A agency might provide child care services within the agency while a parent is in a JOBS orientation session. Where care is provided directly, Federal matching is subject to the same limits on costs as would be applied for outside child care; State IV–A agencies cannot charge their direct and overhead costs for providing care without regard to the limits established pursuant to § 255.4(a).

Vouchers. Vouchers have become a very popular method of providing care as they may give parents great freedom of choice. Many States are using voucher systems, also referred to as purchase-of-care mechanisms, for child care delivery. If a State IV–A agency wishes to institute such a system, the Department can provide referrals to agencies with expertise in establishing one.

Voluntary Providers. In planning to meet the child care demands related to the Statute, there may be an opportunity for communities to mobilize volunteer resources to expand existing programs. For example, there is a growing need for before and after school care for school-age children. Volunteers under the supervision of professional caregivers could be a tremendous addition to the staff necessary for such programs. Many communities are also recruiting retired citizens to help fill personnel shortages in day care centers by creating staff positions for aides which can be filled by volunteers.

Direct Payments to the Caretaker Relative. The State IV–A agency may pay the caretaker relative directly either by providing payment in advance or by reimbursing the caretaker relative who has already paid for the care. In these situations, the family member cannot receive the earned income disregard for child care specified at § 233.20(a)(11)(i), and the determination of eligibility and payment amount must be determined without considering child care costs or payments.

Income Disregards. The State IV–A agency may use the existing child care disregards as provided at § 233.20(a)(II)(i). Although the child care disregard is not specifically listed among the methods in the Act, Congress demonstrated its intent that the disregard continue when it raised the amount of the child care disregard in title IV of the Statute effective October 1, 1989.

Inclusion of the disregard as a method for guaranteeing child care under this Part does not mean that the provisions of this Part supersede existing provisions regarding the child care disregard. Thus, the disregard remains limited by the amount specified in section 402(a)(8)(A)(iii) of the Act. it remains available for expenditures on children aged 13 and over, and it is not limited by the local market rate.

We propose that State IV–A agencies could make supplemental payments for child care costs which exceed the disregard amounts, but are within the limits established under this Part. We also propose at § 255.3(f), that, in cases subject to retrospective budgeting, State IV–A agencies could modify their budgeting procedures to provide for child care costs in the first one or two months of employment. This option is discussed in more detail later.

The Statute prohibits a State IV–A agency from disadvantaging any family receiving AFDC on October 13, 1988, through a change in its method of reimbursing the cost of child care. The only method for reimbursing child care costs for recipients with earnings on that date was the earned income disregard.

The only families who could be disadvantaged by a change in method are those who received the disregard on October 13, 1988 and who would be subject to a new method under the State's Supportive Services plan. In these cases, failure to apply the disregard method increases the likelihood that a family would be ineligible due to income.

At § 255.3(e), we propose to require that, for recipients who received AFDC payments on October 13, 1988, which were determined by using the child care disregard at § 233.20(a)(11)(i), the State IV–A agency must determine current AFDC eligibility and payments based on the continued application of the disregard in order to find out if the family would be disadvantaged. If the family would be disadvantaged, we propose to prohibit the State IV–A agency from using one of the direct payment methods for these individuals.

Parental Choice. The proposed regulations at §§ 255.3(c) and 255.3(d)

BEST COPY AVAILABLE

VOL 54 ISS 73 AP 18 1989 UMI

reflect our desire to allow the caretaker relative to choose the type of child care (center, group family day care, family day care or in-home care), if more than one type is available. This is consistent with section 482 of the Act which requires State IV–A agencies to provide information to individuals about child care, including what assistance is available to help the participant select appropriate child care services.

Our proposed regulations at § 255.3(d) also provide that an individual who is required to participate under Part 250 may not refuse appropriate care unless she can arrange other care or demonstrate that such refusal will not prevent or interfere with participation. Thus, an individual's choice is not constrained by the methods or types of care which the State IV–A agency has elected to provide under its Supportive Services plan. The State IV–A agency is required to pay for the child care services arranged by the individual, even if that would require that it set up an alternative mechanism for payment of such services. Such payment would still be subject to the limits established by this Part.

Needs of the Child. The Act and the proposed regulations at § 255.3(b) require that the State IV–A agency must take into account the needs of the child if it arranges the care. This means that care must be available during the hours needed, including before or after school (or both) as well as care for the entire day. The care must be reasonably accessible so that neither the child nor the caregiver must travel distances beyond what is normally acceptable in the community.

Special attention should be given to children with special needs. There are a variety of programs funded at the Federal and the State level for children with special needs. Often, there is little or no coordination between these programs and other dependent care. We encourage State IV–A agencies to make a special effort to identify programs that might benefit JOBS participants and their children and to coordinate with these programs.

There are many materials already developed by the Department, the States, and the private sector that contain information on the types of care and selection of appropriate care. State IV–A agencies may find it cost effective to use local child care resource and referral (CCR&R) agencies to provide this information for them. Child care resource and referral agencies exist throughout the country as a public/private venture to serve the community. They keep data on available resources (including openings and providers), often listing not only name, address, and cost of care, but information on curriculum and special programs.

Other Supportive Services. We propose at § 255.3(g) that State IV–A agencies can provide transportation or other supportive services either directly or through payment or reimbursement. This policy is consistent with current Federal policy and State practices under existing work program options.

Coordination. Under the Act and proposed regulations at § 255.3(h), the State IV–A agency must coordinate its child care activities with existing early childhood education programs in the State, including Head Start and preschool programs funded under Chapter 1 of the Education Consolidation and Improvement Act. State IV–A agencies should build upon existing resources to expand the range of services available to JOBS participants. We recognize that helping a mother set up a stable child care plan, especially if it involves more than one provider, can be difficult. However, we also know how important a well-developed plan is; poorly thought-out arrangements break down, causing disruption to training and employment. We believe that the provision of services for the two-week interim may prevent the disruption of such carefully planned arrangements and allow continuity of care.

Meeting Child Care Costs Under Retrospective Budgeting. Recipients who need child care before beginning employment often lack sufficient funds to pay for such care before receiving their paychecks. In State IV–A agencies that use a two-month retrospective budgeting cycle and meet child care through the disregard at § 233.20(a)(11), for the first four months of employment, a family only receives recognition of child care costs for two of those four months. For example, under current rules, if a recipient becomes employed in January and has child care costs in January, February, March and April, the child care disregard will not offset income in determining the amount of the payment until March and April. If a State IV–A agency decides to provide child care for the first and second month of employment, as a start-up cost, the State IV–A agency could not use the disregard to offset income used to determine March and April's payment because the recipient did not actually meet the cost of child care in January and/or February.

We propose to allow State IV–A agencies to provide start-up costs for child care for the initial one or two months of employment and to apply the disregard for the third and fourth months as if such costs had been paid by the recipient. However, in order to prevent duplication of benefits, if a State IV–A agency elects to do this, it may not apply the disregard to income used to determine the payment for the month(s) following the month in which child care ceases. The State IV–A agency may meet the start-up costs by making direct payments to the provider or by reimbursing the recipient. Any reimbursement shall not be counted as income or resources for any month.

Allowable Costs and Matching Rates (§ 255.4 of the Proposed Regulations)

Section 402(g)(1)(C) of the Act and § 255.4(a) of the proposed regulations provide that FFP is available for payments for the actual cost of child care up to the statewide limit chosen by the State IV–A agency. This statewide limit may be the disregard level at § 233.20(a)(11)(i), or some higher figure. In no case is FFP available for payments which exceed the applicable local market rate.

An example may help to explain this provision. Suppose a State IV–A agency sets a statewide limit ($250), which is higher than the child care disregard, for the purpose of calculating the amount of child care costs that it will pay for or reimburse. In City A, the applicable local market rate is also $250. Thus the State IV–A agency can pay for the actual cost up to $250. In City B, the applicable local market rate is $225. Thus even if the care cost $250 in City B, FFP would only be available for $225. In City C, the applicable local market rate is $275. FFP would be available for only $250 (the Statewide limit) or, if less than $250, the actual cost of care.

Local Market Rates. Each State IV–A agency must establish local market rates, and the State Supportive Services plan must explain the methodology used to establish them. We do not propose to impose any statistical formula to be used uniformly. However, in § 255.4(a)(2), we are proposing four guidelines which the State IV–A agency would have to follow in establishing these rates.

First, the State IV–A agency would have to base the rates on a representative sample of providers, obtained in a survey by the State IV–A agency or under an outside survey. Second, we believe the data generally should be collected for areas no greater than political subdivisions. While we are interested in minimizing the administrative burdens on the State IV–A agency in establishing these rates, we are also concerned that local market rates be determined for small enough geographical areas to reflect actual expected costs. In major urban markets, political subdivisions may be too large an area for this purpose, and we will continue to consider alternative approaches.

Also, it might be appropriate to consolidate information on areas which are very small or which are very similar in nature (such as small towns or remote regions of a state) rather than to develop independent estimates for all subdivisions. We would welcome suggestions in both these areas.

Thirdly, we are proposing that the local market rates be established at the 75th percentile. This level was selected because it represents a reasonable balance between concerns about fiscal accountability and accessibility to services.

Finally, we are proposing that local market rates should be determined by type of care such as center care, group family day care, family day care, and in-home care. Rates should be differentiated by care for infants, toddlers, preschool and school children and whether there are different rates for full-time and part-time care. Where appropriate, rates should reflect reductions in the cost of care for additional children from the same family.

States IV–A agencies should not find it a burden to establish local market rates since they have told us that they have used local market rate information for the preparation of their State budgets and in the calculation of their allowable title XX rate for child care. Also, studies are available to a State IV–A agency if help is needed in establishing local market rates. Many States rely on information provided by the local child care resource and referral agencies such as the studies done in 1987 and 1988 by the California Child Care Resource and Referral Network that gave costs of care, licensed capacity, enrollment, open slots, wait lists, hours of care, transportation, and types of regulated providers.

Collecting data on unregulated caregivers providing care in the home of the child may be more difficult and demand a different approach. We are aware of this difficulty, and we welcome suggestions that would help State IV–A agencies obtain this information. We will make information about current studies and methodologies available to interested State IV–A agencies.

Applicable Standards for Child Care. The Statute requires that FFP be available for child care only if it meets applicable standards of State and local law and requires that parents be allowed access to the child care services. The requirement for parental access would cover custodial parents and non-custodial parents consistent with court orders governing such matters.

The State IV–A agency must also establish procedures to ensure that center-based care will be subject to State and local requirements designed to ensure basic health and safety, including fire safety, protections. The State must also endeavor to develop guidelines for family day care if it does not already have them. We do not believe, however, that Congress intended to limit child care only to care that is specifically regulated by current State or local law. Other care, even if it is unregulated at the State or local level, is reimbursable under the Act. For example, some States exempt from their standards any center care that is under the auspices of a religious organization. Some States do not have licensing or registration standards for family day care. Other States do not require licensing or registration for family day care until they serve more than a specified number of children.

It should be noted that there are few laws covering in-home care, i.e., care of a child in that child's own home. Appropriate individuals may be paid as in-home caregivers, unless there are State restrictions regarding the age of the caregiver or restrictions based on the fact that the caregiver may already be in the grant. We propose that FFP be available for child care provided in the child's home by a relative (who is not a member of the AFDC unit) such as a grandparent, aunt, or older sibling. FFP is also available for care by a relative outside of the home if care by that relative meets any applicable standards.

Many State and local agencies have indicated concern that adequate child care resources will not be available. However, the Conference Report does not support an interpretation that Congress intended to provide funds for activities such as resource development, recruitment and training under this program. Therefore, the proposed regulations at § 255.4(f) specify that administrative costs for such activities as recruitment and training of providers, licensing, or resource development would not be considered allowable IV–A costs.

Under the Statute, Congress authorized a separate appropriation of $13,000,000 for fiscal years 1990 and 1991 for the Secretary to make grants to the States to improve their licensing and registration requirements and procedures, and to monitor child care provided to children who receive aid under the State plan. State grants would reflect the State's proportion of the number of children in the State receiving aid under the State IV–A plan compared to the national total. The State would have to provide matching funds for these funds for an amount that is not less than 10 percent of the amount of the grant.

FFP is available for child care on Indian reservations if that care meets applicable State or Tribal standards. When both State and Tribal standards exist, the Tribal standards are the applicable standard. Following the Act, we propose that any such applicable Tribal standards for center-based child care include, at a minimum, requirements to ensure basic health and safety protections, including fire safety.

Matching Rates. The costs of providing transportation, work-related expenses, and other work-related supportive services are matched at 50 percent and are under the JOBS cap.

FFP is available for child care benefits at the Federal medical assistance percentage and is not subject to the funding cap for JOBS for any State IV–A agency other than Puerto Rico, the Virgin Islands, Guam and American Samoa. For these jurisdictions, treatment of child care costs incurred is described at § 250.71(c). Although the Statute does not directly address child care administrative costs, we propose that such costs be matched at the administrative matching rate for AFDC as expenditures necessary for the proper and efficient administration of the program. Matchable administrative expenditures would include costs such as staff, supplies and overhead associated with the determination of eligibility for benefits, computation and issuance of benefit payments, reviews of payment accuracy, hearings, program referrals, program planning and management, and data collection and reporting.

Although the Statute does not explicitly extend safeguarding against fraud and abuse to the supportive services authorized under the Statute, we believe that it is in the best interest of the Federal government and the State IV–A agency to require the State IV–A agency to do so. We have incorporated such a requirement at § 255.4(h). State IV–A agencies may use any method they deem reasonable to insure that charges are properly claimed and paid, and that they cover services actually received. Financial reviews to identify costs not eligible for FFP will be an important part of Federal oversight.

Special Needs. In the past, many supportive services, especially for persons participating in employment

VOL
54
ISS
73
AP
18
1989
UMI

and training programs, have been allowed as special needs. With the enactment of JOBS and the new child care provisions, Congress established specific programs for funding for such services and eliminated the need to treat such costs as special needs. Furthermore, for education and training activities and supportive services other than child care, it established an overall cap on the amount of Federal funds which it wanted to commit for these purposes. We, therefore, propose that State IV–A agencies not be permitted to provide child care or payment for other supportive services that may be provided under JOBS as special needs.

Nature of Child Care Payments. Under section 402(g)(3)(A) of the Act, child care payments are funded under 403(a). However, they are not IV-A assistance payments as such. Thus, (1) they are covered under a Supportive Services plan, rather than the State IV-A plan; (2) their receipt does not provide categorical Medicaid eligibility; (3) there is no entitlement to direct payment of benefits; (4) they are not subject to disallowance under the AFDC quality control system; and (5) they are not treated as assistance payments for the purposes of child support enforcement. At the same time, however, these child care benefits are funded on the same basis as AFDC, as an open-ended entitlement program, and they are administered by the same agency. Thus, for ease of administration, we are proposing at § 255.4(i) that they be subject to many of the same administrative and financial rules as AFDC. For example, we are proposing that child care payments be subject to similar financial reporting requirements, that similar procedures apply with respect to issues like the appeal of disallowances and the treatment of cancelled and uncashed checks, and that grants to States are subject to the same basic administrative rules.

As indicated earlier, we are proposing that child care expenditures not be subject to disallowance under the AFDC Quality Control (QC) system. It appears that the QC system would not be an effective or proper vehicle for this purpose. However, consistent with the efficient administration of the program, we are considering using the existing QC process as a means of sampling cases and gathering information on the correctness of child care payments. Using the data from the QC system, we propose to take disallowances following the procedures currently used for AFDC administrative costs. We welcome comments on this matter.

Due process requirements (using the JOBS or IV–A hearing process, as appropriate) would apply. However, except in situations where a change in the method of payment affects AFDC benefit levels, requirements for timely notice would not apply to disputes about the method of payment. Under this Part, State IV–A agencies have discretion about the method of payment to be used; unlike the AFDC program, recipients are not necessarily entitled to assistance in any particular form.

Also, we view child care benefits under this Part to be a conditional entitlement in that they must be guaranteed only to the extent necessary for an individual to accept or retain employment or to participate in a JOBS activity which the State IV–A agency is requiring. Therefore, if disputes arise about the provision of child care benefits under this part or the State IV–A agency proposes to deny, discontinue, terminate or reduce child care benefits, the individual is entitled to a hearing, but is not entitled to a continuation of child care benefits in the same amount or form pending that hearing. Consistent with the requirements of § 205.10, however, the individual's AFDC payment may not be reduced because of sanctions under § 250.33 or because of changes in the method of guaranteeing an individual's child care benefits while a hearing is pending.

For example, in cases where a recipient's participation in a JOBS activity or in outside education or training ceased (e.g., due to illness or termination due to unsatisfactory progress), the State IV–A agency would cease providing child care benefits. The individual could appeal that State IV–A agency decision, but child care benefits would not have to be provided during conciliation or while a hearing was pending. In the meantime, the recipient might be prevented from continuing (or resuming) participation because of the termination of child care benefits. She could not have her AFDC benefits reduced for non-participation while a hearing was pending, and the termination of child care benefits would be considered in determining whether she had good cause for non-participation. If the State IV–A agency later requires the individual to again participate, necessary child care would have to be guaranteed.

Child Care Standards (§ 255.5 of the Regulations)

The language of the Act reflects Congress' intent to ensure the health and well-being of the children for whom child care is provided. Child care must meet current applicable standards of State and local law; however, States are not required to develop new standards. Consistent with congressional intent, we are not proposing to create Federal requirements in this area. At § 255.1(e), we propose that the State Supportive Services plan include an assurance that the State will meet the appropriate standards of State and local law. The State must make the standards available upon request to the Family Support Administration for the purposes of program reviews, payment reviews and audits.

The proposed rules incorporate the requirements in the Statute that the State provide the Secretary with a description of State and local requirements for center-based care designed to ensure basic health and safety, including fire safety, protections and endeavor to develop guidelines for family day care. The Secretary shall report to the Congress on the nature and content of State and local standards for health and safety by October 1, 1992. We will be sending an Action Transmittal to the State IV–A agency at a future date requesting the information necessary to meet these requirements. For the purpose of the one-time report to Congress it would be helpful if the State IV–A agency describe both the procedures that have been and that will be established. The State also must endeavor to develop guidelines for family day care if such guidelines do not already exist.

Uniform Reporting Requirements for Child Care (§ 255.6 of the Proposed Regulations)

Consistent with the requirements of Section 606 of the Statute, State IV–A agencies are required to report information on child care to ensure that the provisions of the Statute are effectively implemented. These requirements are addressed in § 255.6 of the proposed rules. We are also considering including a requirement that the State IV–A agency report the number of children for whom care is provided, by type of care, under both Parts 255 and 256. We invite comments on this proposal. However, more information will be sent to State IV–A agencies concerning these requirements. State IV–A agencies should know that, as in any other fiscal expenditure, adequate information must be in the case record documenting these expenditures.

Part 256—Transitional Child Care

Purpose (§256.0 of the Proposed Regulations)

The purpose for the issuance of the proposed regulations is to implement

section 302 of the Family Support Act of 1988.

State Plan Requirements (§ 256.1 of the Proposed Regulations)

The State Supportive Services plan must include the methods available to provide extended child care. We suggest that the State IV–A agency use the same methods, except for the income disregard, that it has in place for providing child care during employment, education and training, including JOBS.

The State Supportive Services plan must also contain the sliding fee scale under which the family will contribute to the cost of the child care.

Like the initial JOBS plan, we would expect the State IV–A agency to submit a Supportive Services plan for transitional child care 45 days before the April l, 1990, effective date. Where a State has not previously submitted a Supportive Services plan because it has not implemented its JOBS program, the Supportive Services plan for transitional child care would contain both the provisions discussed here and any provisions described at § 255.1 that apply to transitional care. For example, the transitional plan would include necessary assurances on procedures and information on local market rates.

Eligibility (§ 256.2 of the Proposed Regulations)

Effective April 1, 1990, certain AFDC recipients will, upon loss of eligibility for AFDC because of employment, become eligible for 12 consecutive months of child care. To be eligible for this benefit, the former recipient must have received AFDC (or been considered a recipient under § 233.20(a)(3)(viii)(D)) for 3 of the prior 6 months. The proposed rule defines the first month of the period of eligibility as the first month the individual becomes ineligible for AFDC because of one of the following three events:

(1) Any increase in earned income;

(2) The loss of the $30 + 1/3 or the $30 disregard because of the expiration of the time limit on its use; or

(3) For AFDC–UP cases only, an increase in the number of hours worked to over 100 hours per month.

We propose to require that the former recipient request this benefit in writing on a form prescribed by the State and that the payment of the benefit cannot be for any month prior to the request. This is similar to the basic rule for the AFDC program, in which no payment can be made for any period prior to the filing of an application, even though otherwise eligible.

We are proposing these policies at § 256.2(b)(3) so that the State IV–A agency can obtain the information it needs to determine eligibility on a timely basis and to evaluate the need for child care. They also provide the State IV–A agency and the former recipient an opportunity to explore alternative child care arrangements before costs are incurred.

The State has the responsibility of informing the recipient that the transitional child care benefits are available. Such notification should take place at the time the State provides the program information required at § 250.40 and be repeated at the time of termination of the individual's AFDC benefits. We are therefore proposing to require that recipients be notified of their potential eligibility for transitional child care when they become ineligible for AFDC and that they be informed of the steps they need to take to ensure that they apply for and receive all benefits for which they would be eligible. Individuals should also be clearly informed of the consequences of the failure to apply, i.e, the loss of transitional child care benefits for any month prior to the month of application.

We considered when the first month of ineligibility must occur to qualify a former recipient for this benefit. We decided that the first month of ineligibility for AFDC–and the concomitant first month of eligibility for transitional child care—must be April, 1990, or later, because April l, 1990, is the effective date for the transitional child care provisions. Therefore, to receive transitional child care for April, 1990, the last month of AFDC benefits must have been in March, 1990, and March would be one of the three months with receipt of AFDC benefits required during the six-month period following September which are necessary for eligibility.

We propose that, based on the intent that families have help with their child care needs for 12-months after losing their AFDC benefits, families who do not need child care immediately after such loss of AFDC may begin to receive child care in any month during the 12-month eligibility period for the remaining balance of the 12month period. For example, a family that does not need child care until five months after going off AFDC would qualify for that month and the remaining six months of the 12 month eligibility period. If child care is not requested until the fifth month, the State cannot pay retroactively for the first four months of the 12-month period.

The law provides that a family is ineligible for transitional child care if the caretaker relative, who is a member of the AFDC family, terminates employment without good cause or fails to cooperate in establishing paternity and enforcing child support. Cooperation in establishing paternity and enforcing child support is discussed at § 232.12.

We propose that if the caretaker relative loses a job (with good cause as defined at § 250.35), and then (prior to re-establishing eligibility for AFDC) finds another, the family would qualify for the remaining portion of the 12-month eligibility period. Also, if the caretaker relative loses a job and the family goes back on AFDC, that family could again become eligible for a full 12 months of transitional child care as long as it meets the eligibility requirements discussed above.

Fee Requirement (§ 256.3 of the Proposed Regulations)

Section 402(g)(3)(A)(vii) of the Act requires the State agency to establish a sliding fee scale for the purpose of calculating a family's contribution for transitional child care. Section 256.3 of the proposed regulations describes this requirement.

We considered imposing specific limits on the fee scales determined by the States. In particular, we considered setting a minimum contribution by families with income above the poverty level, and limiting the availability of these benefits to those with income below 185 percent of poverty, as is the case with certain Medicaid benefits. However, we have not proposed these or other limits because we recognize that States currently employ a variety of different fee scales, and we want to solicit suggestions for Federal limits which would not be too cumbersome for States, in light of their current practices. We believe Federal rules should be developed because we are concerned that: (1) Without a realistic contribution by the former recipient to her child care expenses, the transitional nature of these benefits will be lost; (2) the interests of self-sufficiency and cost-effectiveness be served; and (3) the benefits available to former welfare recipients not be disproportionate to those available for families similarly situated. We are therefore interested in specific suggestions for Federal rules in this area.

We also propose at § 256.3(c) to allow the States to set different periods of payment collection for differing levels of payment. For example, it may not be cost-effective to collect and record very low fees every month. Data will be required in the case record concerning the fee schedule and the collection of the fee.

VOL 54 ISS 73 AP 18 1989 UMI

Under the proposed regulations at § 256.3(e), the State IV–A agency must take appropriate action if a family does not pay its fee. If a family does not cooperate in paying its fee, we propose that it would become ineligible for continued transitional benefits, and it would remain ineligible for so long as back fees were owed, unless satisfactory arrangements have been made to make full payment. However, transitional child care benefits would not be discontinued without due process, and benefits would be continued pending a hearing, if requested. Unless the fee requirements are taken seriously by States and recipients of benefits, the program will not be effective in providing a transition toward self-sufficiency.

States must keep case records open for 12 months after the individual, who loses AFDC eligibility, becomes eligible for the transitional child care.

Other Provisions (§ 256.4 of the Proposed Regulations)

In part because the transitional child care provisions of the Statute have distinct beginning and ending dates separate from the other child care provisions of the Statute, we have included them as a separate part in these proposed regulations. However, most of the provisions in Part 255 apply to this part. For example, the provisions of § 255.3(a) regarding the methods of providing child care generally apply to transitional child care although the income disregard is not an option in these cases. The other provisions in Part 255 that pertain to allowable costs, matching rates, standards, disallowance procedures, and uniform reporting also apply. One minor exception to this general rule relates to the funding of Puerto Rico, Guam, the Virgin Islands and American Samoa. The exception reflects the fact that child care costs under Part 255 for these jurisdictions are covered under the JOBS funding cap, while their transitional child care costs fall under the section 1108 limits. Another exception is that transitional child care benefits cannot be suspended, reduced, discontinued or terminated until a decision is rendered after a hearing requested within a timely notice period. Transitional child care benefits under this Part represent an entitlement in a broader sense than benefits under Part 255, and recipients of these benefits do not have the same protections (in terms of continuation of AFDC benefits and the option to cease participation) as those available to individuals receiving child care under Part 255.

Technical and Conforming Amendments (§§ 205.50, 224.0, 233.20, 233.90, 233.100, 234.60, 238.01, 239.01 and 240.01 of the Proposed Regulations)

Section 202 of the Family Support Act, Pub. L. 100–485, contains the technical and conforming amendments to title IV–A of the Social Security Act which are required by the enactment of the Statute.

Until October 1, 1990, we cannot remove existing Federal regulations which have been amended by the Statute because the existing regulations will continue to govern State IV–A agencies until they have approved JOBS plans. Therefore, in amending the Federal regulations, we have either incorporated JOBS provisions in the existing regulation (for example, § 205.50 on safeguarding of information) or added a provision specific to States with JOBS programs (for example, treatment of earned income at § 233.20(a)(11)(v)).

Sections 202 and 204 repeal the following statutory provisions of title IV as of October 1, 1990: Part C (WIN); section 409 of Part A (community work experience program (CWEP)); section 402(a)(35) of Part A (employment search); and section 414 of Part A (work supplementation). For States which implement JOBS prior to October 1, 1990, the Federal regulations governing WIN (Part 224), CWEP (Part 238), work supplementation (Part 239), and employment search (Part 240) will no longer apply. Therefore, we have added a provision to each of these existing regulations clarifying that the current regulations do not apply to States with approved JOBS plans and will be repealed for all States as of October 1, 1990. The proposed regulations which distinguish the applicability of the current regulations are found at §§ 224.0(c) (WIN), 238.01(b) (CWEP), 239.01(b) (work supplementation), and 240.01(b) (employment search).

Section 202 of the Statute amends section 402(a)(9)(A) of the Act to include programs under Part F for which the State IV–A agency must also provide safeguards which restrict the use or disclosure of information concerning applicants or recipients. In accordance with these amendments, we have amended § 205.50(a)(1)(i)(A) to cover programs under Part F under our safeguarding regulations.

Section 202 of the Statute also amends section 402(a)(8)(A)(iv) of the Act regarding the treatment of earned income to remove special treatment afforded earned income from public service employment and incentive payments for institutional training under the Work Incentive program. In lieu of amending § 233.20(a)(11)(iv) which governs treatment of earned income under WIN, we have added a new provision at § 233.20(a)(11)(v) that governs the treatment of earned income and expenses in States with approved JOBS plans. For regular employment or OJT, the disregards in §§ 233.20 (a)(11)(i) and (a)(11)(ii)(B) apply. For earned income from a job under work supplementation, the same disregards apply unless a State IV–A agency has elected to provide differently in its State JOBS plan in accordance with § 250.62 (j) and (k). Section 233.20(a)(11)(v)(C) provides that any advance payment or reimbursement to the JOBS participant for child care, transportation, work-related expenses, or work-related supportive services is to be disregarded. Section 233.20(a)(11)(v)(D) provides that payment for or reimbursement of child care pursuant to Part 255 for employed individuals who are not JOBS participants is disregarded.

Changes to Section 407. Section 202 of the Statute amends section 407(d)(1) of the Act which defines a "quarter of work" for the purposes of qualifying for benefits under the Unemployed Parent (UP) Program. Under current law, a "quarter of work" is defined as having earned income of $50 or more during the period of three consecutive calendar months, or as having participated in WIN or CWEP during the quarter. The amendment replaces participation in WIN or CWEP with participation in a JOBS program. Similarly, we are amending the definition of "quarter of work" at § 233.100(a)(3)(iv) to add participation in JOBS if a State IV–A agency has an approved JOBS plan under § 250.20. We keep participation in WIN and CWEP in the definition of "quarter of work" because, even after a State IV–A agency has an approved JOBS plan, participation in either CWEP or WIN during a quarter prior to implementation of JOBS will count as meeting the "quarter of work" requirement.

Under current law, a principal earner in an AFDC-Unemployed Parent Case must be registered with WIN or, if exempt because of remoteness, with a public employment office as a condition of eligibility for aid. In addition, there is a requirement that the principal earner be certified to participate in WIN within 30 days after receipt of AFDC. Certification means that the necessary support services are available so that recipients can participate in training or employment. Additionally, Federal financial participation is not available if, after the 30 days, the State IV–A agency has not taken action to certify the principal earner to WIN.

The Statute amends the current law to provide that aid will be denied if the parent, unless exempt under the new section 402(a)(19)(C)(vii), is not currently participating or available for participation in a JOBS program, or, if exempt due to remoteness, is not registered with the State public employment office. We have amended § 233.100(a)(5)(i) to add this provision for States with approved JOBS plans.

The Statute further amends the Act to provide that within 30 days after receiving aid, the parent must participate or apply for participation in the JOBS program, unless the program is not available in the area where the parent is living. We have amended § 233.100(a)(6) to add this provision for States with approved JOBS plans.

The Statute also amends the Act to provide that FFP will not be available to the State IV–A agency for any period beginning with the 31st day after the individual receives aid, if the State has not taken appropriate steps directed towards the participation of the parent in a JOBS program. We have amended § 233.100(c)(2)(iii) to add this provision for States with approved JOBS plans.

Other Provisions. We are also proposing to remove the provision at § 233.90(b)(2) which states that an otherwise eligible child under age 18 may not be denied aid if he fails to attend school or make satisfactory grades. This regulation runs counter to the provisions in the Act and congressional intent that State IV–A agencies focus their attention on school attendance requirements for teen-aged recipients. Since it raised questions about the ability of a State IV–A agency to impose such requirements on non-exempt recipients, we have deleted it.

The Statute also amends section 402(a)(19)(G) of the Act to extend to the JOBS program the requirement that the State IV–A agency make vendor or protective payments in the event the caretaker relative is sanctioned for failure to participate. Therefore, we have revised § 234.60(a)(12) to add JOBS to the list of programs for which imposing a sanction requires a State IV–A agency to provide protective or vendor payments.

Finally, we also propose to amend § 233.20(a)(2)(v) to prohibit the use of special needs for child care, work-related expenses, and other work-related supportive services that can be paid for under JOBS. A more complete discussion of this provision is contained in the preamble to § 255.4.

All conforming amendments and other changes to Chapter II necessitated by the Family Support Act will be handled in another regulatory package.

(Catalog of Federal Domestic Assistance Programs 13.780, Assistance Payments Maintenance Assistance)

Note: We have requested that the JOBS program be added to the Catalog of Federal Domestic Assistance and we have received a tentative assignment of No. 13.781.

Catherine Bertini,

Acting Assistant Secretary for Family Support.

Approved: April 6, 1989.

Louis W. Sullivan,

Secretary, Department of Health and Human Services.

Accordingly, Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

PART 205—GENERAL ADMINISTRATION—PUBLIC ASSISTANCE PROGRAMS

1. The authority citation for Part 205 is revised to read as set forth below:

Authority: Sections 402, 403, 406, 411, 1102, and 1106(a) of the Social Security Act (42 U.S.C. 602, 603, 606, 611, 1302, and 1306(a)); Section 202 of pub. L. 100–485, 102 Stat. 2377.

2. Section 205.50 is amended by revising paragraph (a)(1)(i)(A) to read as follows:

§ 205.50 Safeguarding information for the financial assistance programs.

(a) • • •

(1) • • •

(i) • • •

(A) The administration of the plan of the State approved under title IV–A, the plan or program of the State under title IV–B, IV–C, IV–D, or IV–F or under title I, X, XIV, XVI (AABD), XIX or XX or the supplemental security income (SSI) program established by title XVI. Such purposes include establishing eligibility, determining amount of assistance, and providing services for applicants and recipients.

• • • • • •

PART 224—WORK INCENTIVE PROGRAMS FOR AFDC RECIPIENTS UNDER TITLE IV OF THE SOCIAL SECURITY ACT

1. The authority citation for Part 224 is revised to read as set forth below and the authority citations following all the sections in Part 224 are removed:

Authority: Sections 402(a)(19), 430–444 and 1102 of the Social Security Act (42 U.S.C. 602(a)(19), 630–644, and 1302); Sections 202 and 204 of Pub. L. 100–485, 102 Stat. 2377, 2381.

2. In § 224.0, paragraph (c) is added to read as follows:

§ 224.0 Purpose and scope.

• • • • • •

(c) The provisions of this part do not apply to any State IV–A agency which has an approved JOBS plan under § 250.20. A list of State IV–A agencies with approved JOBS plans is available

VOL 54 ISS 73 AP 18 1989 UMI

from the Family Support Administration, Office of Family Assistance, 370 L'Enfant Promenade, SW., Washington, DC 20447. For all State IV–A agencies the provisions of this part are repealed as of October 1, 1990.

PART 233—COVERAGE AND CONDITIONS OF ELIGIBILITY IN FINANCIAL ASSISTANCE PROGRAMS

1. The authority citation for Part 233 is revised to read as set forth below and the authority citations following all the sections in Part 233 are removed:

Authority: Sections 1, 402, 406, 407, 1002, 1102, 1402, and 1602 of the Social Security Act (42 U.S.C. 301, 602, 606, 607, 1202, 1302, 1602, and 1382 note); and Section 6 of Pub. L. 94–114, 89 Stat. 579 and Part XXIII of Pub. L. 97–35, 95 Stat. 843, and Pub. L. 97–248, 96 Stat. 324, and Pub. L. 99–603, 100 Stat. 3359, Section 221 of Pub. L. 98–181, as amended by Section 102 of Pub. L. 98–479 (42 U.S.C. 602 note) and Section 202 of Pub. L. 100–485, 102 Stat. 2377.

2. In § 233.20, paragraph (a)(2)(v) is revised, paragraphs (a)(11)(v) and (a)(11)(vi) are redesignated as paragraphs (a)(11)(vi) and (a)(11)(vii) respectively and a new paragraph (a)(11)(v) is added to read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *

(2) * * *

(v) If the State IV–A agency includes special need items in its standard:

(A) Describe those that will be recognized and the circumstances under which they will be included, and

(B) Provide that they will be considered for all applicants and recipients requiring them; except that:

(*1*) Under AFDC, work expenses and child care (or care of incapacitated adults living in the same home and receiving AFDC) resulting from employment or participation in either a CWEP or an employment search program cannot be special needs, and

(*2*) In a State which has a JOBS program under Part 250, child care, work-related expenses, and other work-related supportive services resulting from participation in JOBS (including participation pursuant to §§ 250.46, 250.47, and 250.48) cannot be special needs.

* * * * *

(11) * * *

(v) The treatment of earned income and expenses under JOBS is as follows:

(A) For earned income from regular employment or on-the-job training, as described at § 250.61, the disregards in paragraphs (a)(11)(i) and (a)(11)(ii)(B) of this section shall apply.

(B) For earned income from a job under the work supplementation component, as described at § 250.62, the disregards in paragraphs (a)(11)(i) and (a)(11)(ii)(B) of this section shall apply unless the State IV–A agency in its State JOBS plan, has elected to provide otherwise under § 250.62(j) and § 250.62(k).

(C) For all activities under JOBS, advance payments or reimbursement to the participant for child care, transportation, work-related expenses, or work-related supportive services is disregarded.

(D) Payment or reimbursement of child care pursuant to Part 255 for employed individuals who are not JOBS participants is disregarded.

* * * * *

§ 233.90 [Amended]

3. In § 233.90, paragraph (b)(2) is removed and paragraphs (b)(3) through (b)(6) are redesignated (b)(2) through (b)(5).

4. Section 233.100 is amended by revising paragraphs (a)(3)(iv); (a)(5)(i); (a)(6); and (c)(2)(iii) to read as follows:

§ 233.100 Dependent children of unemployed parents.

(a) * * *

(3) * * *

(iv) A "quarter of work" with respect to any individual means a period (of 3 consecutive calendar months ending on March 31, June 30, September 30, or December 31) in which he or she received earned income of not less than $50 (or which is a "quarter of coverage" as defined in section 213(a)(2) of the Act), or in Which he or she participated in a community work experience program under Part 238, the Work Incentive program under Part 224, or, if the State IV–A agency has an approved JOBS plan pursuant to § 250.20, in a program under Part 250.

* * * * *

(5) * * *

(i) If and for so long as such child's parent, unless exempt under § 224.20, is not currently registered for the work incentive program or if exempt under § 224.20(b)(6), is not currently registered with a public employment office in the State, except that in a State with an approved JOBS plan under § 250.20, such child's parent, unless exempt under § 250.30(b), must be currently participating (or available for participation) in a program under Part 250, or, if he is exempt under § 250.30(b)(5), must be registered with a public employment office in the State, and

* * * * *

(6) Provide that within 30 days after the receipt of such aid, unemployed principal earners will be certified for participation in the Work Incentive program under Part 224 or, if the State IV–A agency has an approved JOBS plan pursuant to § 250.20, will participate or apply for participation in a program under Part 250 unless the program is not available in the area where the parent is living.

* * * * *

(c) * * *

(2) * * *

(iii) For any period beginning with the 31st day after receipt of aid, if and for long as no action is taken during the period to certify the parent for participation in the Work Incentive program under Part 224, or if the State IV–A agency has an approved JOBS plan pursuant to § 250.20, no action is taken during the period to undertake appropriate steps directed toward the participation of such parent in a program under Part 250; and

* * * * *

PART 234—FINANCIAL ASSISTANCE TO INDIVIDUALS

1. The authority citation for Part 234 is revised to read as follows and all other authority citations which appear throughout Part 234 are removed:

Authority: Sections 402, 403, 406 and 1102 of the Social Security Act (42 U.S.C. 602, 603, 606, and 1302); Section 201 of Pub. L. 100–485, 102 Stat 2359.

2. Section 234.60 is amended by revising paragraph (a)(12) to read as follows:

§ 234.60 Protective, vendor and two-party payments for dependent children.

(a) * * *

(12) In cases where an individual is sanctioned for failure to participate in WIN, employment search, CWEP, or JOBS, the State plan must provide that when protective or vendor payments are made pursuant to § 224.52(a)(1), § 238.22, § 240.22(a)(1), § 240.22(b)(1) and § 250.34(c) of this chapter, only paragraphs (a)(7), (9)(ii), and (11)(i) and (ii) of this section will be applicable.

* * * * *

PART 238—COMMUNITY WORK EXPERIENCE PROGRAM

1. The authority citation for Part 238 is revised to read as follows and all other authority citations which appear throughout Part 238 are removed:

Authority: Section 409 and 1102 of the Social Security Act (42 U.S.C. 609 and 1302); sections 202 and 204 of Pub.L. 100–485, 102 Stat 2378, 2381.

2. Section 238.01 is revised to read as follows:

§ 238.01 Scope of this part.

(a) *General.* State IV–A agencies may operate community work experience programs (CWEP) which serve a useful public purpose, and require AFDC recipients to participate in them as a condition of AFDC eligibility. The purpose of these CWEP programs is to provide work experience for AFDC recipients. CWEP projects must meet appropriate standards for health and safety and may not displace persons currently employed or fill established unfilled vacancies. Subject to the conditions specified at § 238.16, State IV–A agencies must provide necessary transportation, day care, and other related services or reimburse CWEP participants for costs directly related to participation in the program. Allowable costs to operate CWEP (see Subpart D) are matched by the Federal government at the AFDC administrative match level (50 percent).

(b) *Applicability.* The provisions of this part do not apply to any State IV–A agency which has an approved JOBS plan under § 250.20. A list of State IV–A agencies with approved JOBS plans is available from the Family Support Administration, Office of Family Assistance, 370 L'Enfant Promenade, SW., Washington, DC 20447. For all State IV–A agencies, the provisions of this part are repealed as of October 1, 1990.

PART 239—WORK SUPPLEMENTATION PROGRAM

1. The authority citation for Part 239 is revised to read as follows and all other citations which appear throughout Part 239 are removed:

Authority: Sections 414 and 1102 of the Social Security Act (42 U.S.C. 614 and 1302); sections 202 and 204 of Pub. L. 100–485, 102 Stat. 2378, 2381.

2. Section 239.01 is revised to read as follows:

§ 239.01 Scope of this part.

(a) *General.* Under the work supplementation program, State IV–A agencies may use AFDC funds to develop and subsidize work for AFDC recipients as an alternative to aid provided to AFDC recipients. The work supplementation program may be implemented notwithstanding the definitions contained in section 406 of the Social Security Act or any other provision of law. Under this program AFDC recipients may choose, on a voluntary basis, to accept an offer of work to the extent such jobs are made available. In order to pay for the costs of developing and subsidizing these jobs, a State IV–A agency may reduce the need standard in effect for selected categories of recipients on the basis of their ability to participate in the work supplementation program. The reduction of the need standard may be made for either the entire State or for selected geographical areas. The total amount of Federal financial participation for operation of a State IV–A agency's work supplementation program is limited as provided in Subpart D of this part.

(b) *Applicability.* The provisions of this part do not apply to any State IV–A agency which has an approved JOBS plan under § 250.20. A list of State IV–A agencies with approved JOBS plans is available from the Family Support Administration, Office of Family Assistance, 370 L'Enfant Promenade SW., Washington, DC 20447. For all State IV–A agencies, the provisions of this part are repealed as of October 1, 1990.

PART 240—EMPLOYMENT SEARCH

1. The authority citation for Part 240 is revised to read as follows and all other citations which appear throughout Part 240 are removed:

Authority: Sections 402(e) and 1102 of the Social Security Act (42 U.S.C. 602(a) and 1302); sections 202 and 204 of Pub. L. 100–485, 102 Stat. 2377, 2381.

2. Section 240.01 is revised to read as follows:

§ 240.01 Scope of this part.

(a) *General.* Each State with a plan approved under title IV–A of the Social Security Act may establish a program of employment search in accordance with the requirements in this part. The single State agency designated in the State plan to administer or supervise the AFDC program must administer the employment search program.

(b) *Applicability.* The provisions of this part do not apply to any State IV–A agency which has an approved JOBS plan under § 250.20. A list of State IV–A agencies with approved JOBS plans is available from the Family Support Administration, Office of Family Assistance, 370 L'Enfant Promenade, SW., Washington, DC 20447. For all State IV–A agencies, the provisions of this part are repealed as of October 1, 1990.

Title 45, Chapter II, Code of Federal Regulations is amended by adding a new Part 250 to read as follows:

PART 250—JOB OPPORTUNITIES AND BASIC SKILLS TRAINING PROGRAM

Subpart A—Purpose and Definitions

Sec.
250.0 Purpose.
250.1 Definitions.

Subpart B—Administration

250.10 State IV–A agency administration.
250.11 Requirement for a statewide program.
250.12 Coordination and consultation.
250.13 Contracting authority.

Subpart C—State Plan Requirements and Content

250.20 Requirement for a State JOBS plan.
250.21 State plan content.

Subpart D—Participation Requirements, Exemptions and Sanctions

250.30 Requirements for individual participation and exemptions.
250.31 Volunteers.
250.32 Participation requirements for education.
250.33 Participation requirements for unemployed parents.
250.34 Sanctions.
250.35 Good cause.
250.36 Conciliation and fair hearings.

Subpart E—Operation of State JOBS Programs/Program Components

250.40 Providing information to AFDC applicants and recipients.
250.41 Initial assessment and employability plan.
250.42 Agency-participant agreement.
250.43 Case management.
250.44 Mandatory components.
250.45 Optional components.
250.46 Postsecondary education.
250.47 Other education, training and employment activities.
250.48 Self-initiated education or training.

Subpart F—[Reserved]

Subpart G—Optional Components of State JOBS Programs

250.60 Job search program.
250.61 On-the-job training.
250.62 Work supplementation program.
250.63 Community work experience program.

Subpart H—Funding

250.70 JOBS allocation entitlement.
250.71 Allotment of JOBS limit of entitlement.
250.72 Maintenance of effort.
250.73 Matching rates.
250.74 Reduced matching rate.
250.75 Activities excluded from FFP.
250.76 Financial reports, records, statements and audits.
250.77 Costs matchable as AFDC payments.

Subpart I—Uniform Data Collection Requirements

250.80 Uniform data collection requirements.
250.81 State data systems options.
250.82 Required case record data.

VOL 54 ISS 73 AP 18 1989 UMI

Subpart J—Operation of JOBS Programs by Indian Tribes and Alaska Native Organizations

250.90 Scope and purpose.
250.91 Eligible Indian Tribe and Alaska Native organization grantees.
250.92 Selection criteria for eligible Alaska Native organizations.
250.93 Funding formula.
250.94 Program administration, implementation and operations.
250.95 Supportive services.
250.96 Waiver authority.
250.97 Application requirements and documentation.
250.98 Maintenance of effort for Indian Tribes and Alaska Native organizations.

Authority: Sections 402, 403, 481 note, 482, 483, 484, 485, 486, 487, and 1102 of the Social Security Act as amended (42 U.S.C. 602, 603, 681, 682, 682 note, 683, 684, 685, 686, 687, and 1302); section 204(b) of Pub. L. 100–485, 102 Stat. 2381.

Subpart A—Purpose and Definitions

§ 250.0 Purpose.

(a) The purpose of the Job Opportunities and Basic Skills Training (JOBS) program under titles IV–A and IV–F of the Social Security Act is to encourage, assist, and require applicants for and recipients of AFDC to fulfill their responsibilities to support their children by preparing for, accepting and retaining employment. To assure that needy families with children are provided the means to avoid long-term welfare dependency, the JOBS program is intended to:

(1) Provide individuals with the opportunity to acquire the basic education and skills necessary to qualify for employment;

(2) Provide necessary supportive services, including transitional child care and medical assistance, so that individuals can participate in JOBS and accept employment;

(3) Promote coordination of services at all levels of government in order to make a wide range of services available, especially for individuals at risk of long-term welfare dependency, and to maximize the use of existing resources; and

(4) Emphasize accountability for both participants and service providers.

(b) This part provides that a State IV–A agency, as a condition of participation in the AFDC program, must operate a JOBS program. In addition, these regulations require that States provide child care and other supportive services for participants in the JOBS program, as well as certain other individuals, pursuant to Parts 255 and 256. This part contains the policies, rules and regulations pertaining to the Job Opportunities and Basic Skills Training (JOBS) program.

(c) This part is applicable to States with approved JOBS programs pursuant to § 250.20, and to all States as of October 1, 1990.

§ 250.1 Definitions.

Except to the extent otherwise specified in this section, terms used in Part 250 shall have the same meaning otherwise applicable to the Aid to Families with Dependent Children (AFDC) program.

Adult recipient means an individual other than a dependent child (unless such child is the minor custodial parent of another dependent child) whose needs are met (in whole or in part) with payments of Aid to Families with Dependent Children.

Basic literacy level means a literacy level that allows a person to function at the level of an individual who has successfully completed the eighth grade.

Component means any of the services or activities available under the provisions of § 250.44 through § 250.48.

CWEP means the community work experience program authorized in § 250.45 and § 250.63.

Department means the U.S. Department of Health and Human Services.

FFP means Federal financial participation in expenditures made by a State.

Institution of higher education means any institution determined by the Secretary of Education to meet:

(1) The definition of such term contained in either section 1201(a) or section 481(a) of the Higher Education Act of 1965 (20 U.S.C. 1001 *et seq.*), as amended; or

(2) The definitions of "proprietary institution of higher education" or "postsecondary vocational institution," which are defined at sections 481 (b) and (c) of that Act.

Intensive job search is, for purposes of § 250.74(c), job search by a parent in an Unemployed Parent case that is either group or individual job search for a monthly average equivalent to 20 hours per week.

JAS means a JOBS Automated System authorized under § 250.81 for a State to support its operation of the JOBS program.

JOBS is the Job Opportunities and Basic Skills Training program required by section 402(a)(19) of the Social Security Act, as amended by section 201(a) of the Family Support Act of 1988 (Pub. L. 100–485) and set forth in Part F of title IV of the Social Security Act, as added by section 201(b) of the Family Support Act.

JOBS plan means the statewide operational plan for JOBS.

Limited English proficiency means limited ability in speaking, writing, or understanding the English language by a person whose native language is a language other than English, or who lives in a family or community environment where a language other than English is the dominant language.

Make good progress and *Making satisfactory progress* in an educational component mean that the participant in any educational activity is meeting, on a periodically measured basis of less than one year, such as a term or quarter, a consistent standard of progress based upon a written policy that was: developed by the educational institution or program in which she is enrolled; and approved by the appropriate State or local education agency and the State welfare agency. Such standard includes both a qualitative measure of a participant's progress, such as a grade point average, and a quantitative measure, such as a reasonable time limit by which a student is expected to complete her studies. If the educational institution or program is accredited by an accrediting body that is listed by the Secretary of Education and that has established a satisfactory progress policy, then that body's policy shall apply. Upon review and approval by the State education agency and the State IV–A agency, the standard may provide that a student who does not meet the institution's or program's progress standard is nonetheless making satisfactory progress during a probationary period, or shall be deemed to be making satisfactory progress because of mitigating circumstances.

Make good progress and *Making satisfactory progress* in a training component (i.e., OJT and skills training) mean that the participant is meeting, on a periodically measured basis of less than one year, such as quarterly, a consistent standard of progress based upon a written policy that was: Developed by the training provider, and approved by the State IV–A agency. Such standard includes both a qualitative measure of a participant's progress, such as competency gains or proficiency level, and a quantitative measure, such as a reasonable time limit for completion of the training program.

MSA means Metropolitan Statistical Area, a system of geographical areas defined and maintained by the Executive Office of the President, Office of Management and Budget.

OJT means on-the-job training as authorized in § 250.45 and § 250.61.

Participation: (1) For purposes of determining a State's participation rate under § 250.74(b) and § 250.74(c), an individual is participating if she is:

(i) An AFDC recipient who is assigned to a JOBS program component specified in paragraph (5) of this definition for at least the minimum activity level specified in that paragraph, or an applicant assigned to the job search program for the State's specified activity level; and

(ii) Participating at the assigned level of activity or has provided documented good cause for temporary absence in accordance with State policy.

(2) An individual active only in orientation, assessment, or employability development planning or case management is not a participant for these purposes.

(3) When an individual is assigned to activities in more than one component, she is a participant if the total of her hours meets the average hours requirement of the assigned components.

(4)(i) For purposes of the UP work requirement at § 250.33, a parent in a UP family is a participant if his or her activity level is at least 16 hours per week in work supplementation, CWEP, OJT, or a State designed work program approved by the Secretary.

(ii) A parent under the age of 25 in such a family who has not completed high school or an equivalent course of education will meet the UP work requirement if the State requires, in lieu of the work requirement in paragraph (4)(i) of this definition, the parent to participate in educational activities directed at attaining a high school diploma or its equivalent or completing a basic education program, and he or she is making satisfactory progress.

(5) The specified minimum activity levels for JOBS program components are the average monthly activity levels equivalent to the following:

(i) For any of the educational activities specified in § 250.44: Making satisfactory progress;

(ii) Job skills training: At least 20 hours of instruction or training per week;

(iii) Job readiness activities: At least 20 hours of structured, guided activity per week;

(iv) Individual job search: The equivalent in structured activity and employer contacts of 20 hours per week.

(v) Group job search: At least 20 hours per week.

(vi) OJT: Full-time work according to the standard of the occupation.

(vii) Work supplementation program: Full-time work according to the standard of the occupation.

(viii) CWEP: The lower of 20 hours per week or the CWEP maximum hours for that individual.

(ix) Other work experience: As defined by the State and approved by the Secretary; except that for the purpose of the UP work requirement, the activity, to qualify for participation, must constitute actual work, and not training, and be at least 16 hours per week.

(x) Postsecondary education: Making satisfactory progress.

(xi) Other allowed activities: As defined by the State and approved by the Secretary.

(6) This definition of participation is directly related to the requirements of § 250.74 and does not preclude a State from assigning an individual to a component for fewer hours than required to meet the participation rate if appropriate.

Postsecondary education means a program of postsecondary instruction offered by:

(1) An institution of higher education determined by the Secretary of Education to meet section 1201(a), or section 481 (a), (b), or (c) of the Higher Education Act of 1965, as amended;

(2) An institution of higher education or a vocational school determined by the Secretary of Education to meet section 435(b) or section 435(c) of the Higher Education Act of 1965, as amended; or

(3) A public institution that is legally authorized by the State to provide such a program within the State.

Secretary means the Secretary of Health and Human Services.

Target population means that group composed of each individual who:

(1) Is receiving AFDC, and who has received such aid for any 36 of the preceding 60 months;

(2) Makes application for AFDC, and has received such aid for any 36 of the 60 months immediately preceding the most recent month for which application has been made;

(3) Is a custodial parent under the age of 24 who:

(i) Has not completed a high school education and, at the time of application for AFDC, is not enrolled in high school (or a high school equivalency course of instruction); or

(ii) Had little or no work experience in the preceding year; or

(4) Is a member of a family in which the youngest child is within 2 years of being ineligible for AFDC because of age.

For a particular State, this term will include, in lieu of individuals listed, such alternative groups of long-term or potential long-term recipients as the State has demonstrated to the satisfaction of the Secretary are feasible target populations in that State's caseload.

UP means Unemployed Parent and refers to that segment of the AFDC program authorized in section 407 of the Social Security Act which provides aid with respect to a dependent child who is deprived of parental support or care by reason of the unemployment of the parent who is the principal earner.

Subpart B—Administration

§ 250.10 State IV–A agency administration.

(a) The State agency responsible for the administration or supervision of the State's title IV–A plan is responsible for the administration or supervision of the JOBS program.

(b) The provisions of § 205.100(b) apply to this section.

(c) Examples of functions which must be retained by the State IV–A agency pursuant to § 250.13 of this part include the following:

(1) Establishment of optional provisions and components of the program;

(2) Responsibility for program planning, design of program, and determining who should participate;

(3) Establishment of program participation requirements;

(4) Development of definition of good cause for failing to participate;

(5) Development of definition of failure to participate; and

(6) Determination of how assistance shall impact on the AFDC grant as a result of a dispute involving an individual's participation.

§ 250.11 Requirement for a statewide program.

(a) Not later than October 1, 1992 the State must make the JOBS program available in each political subdivision (county, parish or independent city) where it is feasible to do so.

(b) Although all required and at least two optional components, as described in §§ 250.44 and 250.45, must be included in a State JOBS program, all such components need not be operated in every political subdivision of the State, nor need the State operate each such component to the same extent in each political subdivision.

(c)(1) If the State IV–A agency concludes that a statewide program is not feasible, appropriate justification must be submitted to the Secretary for review and approval as part of its JOBS plan, unless the following criteria are met:

VOL 54 ISS 73 AP 18 1989 UMI

(i) A minimal JOBS program would be available in a number of political subdivisions sufficient to serve 95 percent of adult recipients; and

(ii) A complete JOBS program would be available in all Metropolitan Statistical Areas in the State, and in a number of political subdivisions sufficient to serve 75 percent of adult recipients.

(iii) A minimal program includes high school or equivalent education, as specified at § 250.44, one optional component from among those specified at § 250.45, and information and referral to available non-JOBS employment services. A complete program includes all mandatory components as well as any two optional components.

(2) The justification must include the following:

(i) The number of adult recipients that would be excluded and a comparison of:

(A) The estimated average annual unit cost per participant were the JOBS program extended to them with

(B) The estimated average annual unit cost per JOBS participant in the included areas;

(ii) A description of the local economic conditions that make operation of the program in such areas infeasible; and

(iii) Whether the State expects to expend all of its limit of entitlement, pursuant to § 250.70, for the period covered by the JOBS plan.

§ 250.12 Coordination and consultation.

State IV–A agencies are required to assure coordination of JOBS program services, including child care pursuant to § 255.3(h) of the regulations, with related services provided by other agencies.

(a) The Governor shall assure that JOBS program activities are coordinated with programs under the Job Training Partnership Act (JTPA) and with any other relevant employment, training, and education programs available within the State. At a minimum, this means that the appropriate job training and preparation components of the State JOBS plan shall be consistent with the coordination criteria specified in the Governor's coordination and special services plan required under section 121 of the JTPA.

(b) In developing the JOBS plan and carrying out the JOBS program, including the supportive services provisions, the State IV–A agency must consult and coordinate with other providers, including those specified in paragraph (c) of this section, to identify existing resources to prevent duplication of services, assure that other program services are available to enable participants to achieve self-sufficiency, and assure that costs for these other services for which welfare recipients have been eligible are not incurred by the JOBS program pursuant to § 250.72.

(c) At a minimum, the State IV–A agency must consult and coordinate with:

(1) The State agency responsible for JTPA;

(2) The State agency responsible for the Employment Service;

(3) The State education agency for programs under the Adult Education Act (20 U.S.C. 1201 *et seq.*) and Carl D. Perkins Vocational Education Act (20 U.S.C. 2301 *et seq.*); and

(4) The State agencies responsible for child care activities as described in § 255.3(h).

(d) The State IV–A agency and local welfare agencies, as appropriate, must consult with the private industry councils (as established under section 102 of the JTPA):

(1) On the development of arrangements and contracts under JOBS, as described in § 250.13, and under the JTPA; and

(2) To identify and obtain advice on the types of jobs available, or likely to become available, in the area. The State IV–A agency must ensure that JOBS provides training only for the types of jobs which are, or are likely to become, available in the area, and that resources are not expended on training for jobs that are not likely to become available.

(e) The State IV–A agency must exchange certain information with an eligible Indian Tribe or Alaska Native organization interested in conducting a separate JOBS program under § 250.91.

(1) This information includes available data on adult Tribal or Alaska Native organization AFDC recipients necessary to determine a Tribe or organization's JOBS funding level and designated service area, as appropriate, as described in § 250.93(b). State and Tribal and Alaska Native organization representatives receiving such AFDC recipient data must follow comparable standards of confidentiality as described in § 250.93(b)(2).

(2) Since the State IV–A agency maintains responsibility for providing basic AFDC program services, such as eligibility notifications, as well as child care funds or services, to Tribal and Alaska Native organization JOBS participants, the State and such grantee must coordinate interrelated activities as described in § 250.94(a) and Part 255.

§ 250.13 Contracting authority.

The State IV–A agency shall carry out the JOBS program directly or through arrangements or under contracts with administrative entities under section 4(2) of the Job Training Partnership Act (JTPA), with State and local educational agencies, and with other public agencies, Indian Tribes or Alaska Native organizations or private organizations (including community-based organizations as defined in section 4(5) of the JTPA).

(a) Arrangements and contracts entered into under this section may cover any service or activity (including outreach, information and referral) to be made available under the JOBS program. Such contracted service or activity must be consistent with the requirements under § 250.10 and must not otherwise be available on a nonreimbursable basis, as specified in § 250.72(c).

(b) The State IV–A agency must consult with the private industry councils on the development of arrangements and contracts under JOBS pursuant to § 250.12.

(c) In selecting service providers, the State IV–A agency must take into account appropriate factors which may include past performance in providing similar services, demonstrated effectiveness, fiscal accountability, cost efficiency, ability to meet performance standards, and such other factors as the State IV–A agency may determine to be appropriate.

(d) For purposes of claiming FFP, the State IV–A agency must segregate costs by the applicable matching rates, as defined at § 250.73(b)(1), in any arrangement or contract entered into under this section.

(e) Services contracted under JOBS are subject to the requirements of Part 92, excluding the provisions at § 92.30(d)(4).

Subpart C—State Plan Requirements and Content

§ 250.20 Requirement for a State JOBS plan.

(a) As a condition of participation in the AFDC program, the agency responsible for administering or supervising the administration of the IV–A plan must:

(1) No later than October 1, 1990, establish and operate a JOBS program under a JOBS plan that has been approved by the Secretary before implementation and that meets the requirements of this Part;

(2) Submit its initial JOBS plan to the Secretary for review and action at least 45 days prior to the anticipated implementation date; and

(3) Submit its initial Supportive Services plan, in accordance with §§ 255.1 and 256.1 concurrent with the initial JOBS plan, except that a State which has not submitted a JOBS plan prior to April 1, 1990, must submit a Supportive Services plan for transitional child care in accordance with § 256.1 at least 45 days prior to implementation.

(b) The initial JOBS plan and Supportive Services plan will be subject to prior approval by the Secretary. FFP will only be available for expenditures incurred after approval by the Secretary.

(c) A State JOBS plan and Supportive Services plan must be submitted to:

(1) The Governor for review and comment; and

(2) The State Job Training Coordinating Council (SJTCC) and the State education agency for review and comment at least 60 days prior to submittal to the Secretary. The plan shall be published and otherwise made available to the public, including members of federally-recognized Tribes and Alaska Native organizations in the State, for review and comment, concurrent with submittal to the SJTCC and the State education agency. Comments received shall be resolved by the State.

(d)(1) State JOBS plans and Supportive Services plans submitted to the Secretary prior to the issuance of the JOBS and Supportive Services plan preprints shall be considered interim plans.

(2)(i) A State operating a JOBS program and providing supportive services under interim plans shall submit a new JOBS plan and a new Supportive Services plan for approval within 60 days of the date that JOBS and Supportive Services plan preprints are issued by the Secretary.

(ii) The new JOBS and Supportive Services plans must be submitted to the SJTCC no later than the date submitted to the Secretary, if substantial changes to the interim plans have been made.

(iii) Interim plans shall remain in force until formal action on the new plans is taken (i.e., approval or disapproval) by the Secretary.

(e)(1) The State must submit an update of its JOBS and Supportive Services plans to the Secretary for approval not less than every two years. The update shall be considered a new JOBS plan and Supportive Services plan, and shall be submitted to the Secretary for approval at least 90 days prior to beginning of the next biennial period. The State must follow the public review and comment provisions in paragraph (c) of this section.

(2) The update must consist of:

(i) Assurances regarding those parts of the State JOBS Plan and Supportive Services plan that remain unchanged;

(ii) A description of any changes in program operations including but not limited to changes in components and target populations served;

(iii) An estimate of the number of persons to be served by the program during the next biennium; and

(iv) An assurance that the State JOBS plan is consistent with the coordination criteria specified in the current Governor's Coordination and Special Services Plan required under section 121 of the JTPA.

(3)(i) For all States the first biennial update must be submitted by July 1, 1992, for the period beginning October 1, 1992.

(ii) A State JOBS plan and Supportive Services plan approved pursuant to paragraph (d)(2) of this section shall remain in force until formal action is taken (i.e., approval or disapproval) by the Secretary on the first biennial update.

(iii) Each approved biennial update shall remain in force until formal action is taken (i.e., approval or disapproval) by the Secretary on the update for the following biennial period.

(f) The State shall submit proposed amendments to approved plans as necessary and they shall be reviewed according to the process described at § 201.3 (f) and (g).

(g) A State that submits a plan, an amendment to an existing plan, or a biennial update that is not approvable will be given the opportunity to make revisions before formal disapproval; upon formal disapproval, a State may request a hearing pursuant to the process set forth in § 201.4 and Part 213.

§ 250.21 State plan content.

A State's JOBS plan must include the following:

(a) Assurances that the title IV–A agency will, upon approval of the JOBS plan by the Secretary, have in effect and operation:

(1) A JOBS program that meets the requirements of section 402(a)(19) and title IV–F of the Act, including assurances:

(i) By cross-reference to appropriate statutory and regulatory citations, that the JOBS program will meet all statutory and regulatory requirements; and

(ii) That to the extent the program, including child care, is available in a political subdivision of a State and the State's resources otherwise permit, the State will require non-exempt recipients to participate; and

(2) A program for providing child care and other supportive services consistent with the requirements of the Act and with the State's separate Supportive Services plan, pursuant to §§ 255.1 and 256.1.

(b) A statement of the goals and objectives of the State JOBS program, and how the State intends to implement the program during the biennium to support those goals and objectives. If the program is not implemented initially on a statewide basis, this description must include the anticipated schedule for phased implementation.

(c) A description of the administrative structure for the JOBS program, including:

(1) A description of the conciliation process and any alternative fair hearing process the State proposes; and

(2) The manner in which the title IV–A agency will assure, in accordance with section 402(a)(44) of the Act, that the benefits and services under title IV–F of the Act will be furnished in an integrated manner with those of titles IV–A and IV–D of the Act.

(d) Annual estimates of the numbers of persons to be served on a monthly basis during the biennium covered by the plan.

(e) Identification of the subdivisions, if any, proposed to be excluded. For any period after September 30, 1992, appropriate justification as required in § 250.11(c) must be included for not establishing the program in such subdivisions.

(f) A description of the nature of coordination with public and private education and training agencies and organizations, at the political subdivision and State levels, as required at § 250.12, and a description of the services identified as available and appropriate for participants in the State JOBS program.

(g) Descriptions of program operations to include:

(1) The required and optional components that will be provided, and the extent to which the range of services will vary by political subdivision or otherwise;

(2) The needs to be addressed through the provision of these services;

(3) The extent to which and the bases upon which, the State anticipates each service and activity will be available to JOBS participants during the biennium:

(i) On a non-reimbursable basis;

(ii) Through direct agency provision; and

(iii) On a purchase basis;

(4) The contracting processes that will be used to deliver services for the State IV–A agency, pursuant to § 250.13, including:

(i) The service providers such as JTPA agencies, educational agencies, and other public agencies or private organizations; and

VOL 54 ISS 73 AP 18 1989 UMI

(ii) The types of services to be provided such as skills training, vocational education, etc.;

(5) The orientation processes the IV–A State agency will use to provide program information to AFDC applicants and recipients pursuant to § 250.40(a); this description must specify the methods and timeframes for providing this information;

(6) The assessment processes the State IV–A agency will use, including variations among political subdivisions, pursuant to § 250.41(a). This description must include:

(i) The types of assessment tools selected (self-assessment survey, literacy tests, vocational aptitude testing, etc.); and

(ii) The bases for selection;

(7) If the State elects to use agreements or contracts with participants, pursuant to § 250.42(a), the purpose and content of such agreements or contracts and the basis for determining the groups of participants for which they will be used;

(8) If the State elects to use a case management system pursuant to § 250.43,

(i) The functions;

(ii) The participants to be included under the system (target populations vs. all participants); and

(iii) If not statewide, identification of the populations or areas that will use case management; and

(9) The process for developing an employability plan, pursuant to § 250.41.

(h) A description of any work experience program under § 250.63 or other employment, education, or training under § 250.47 that the State proposes.

(i) A description of how the State will determine the appropriateness of educational activities for different categories of participants, to include:

(1) State policy on educational requirements for parents under age 20 who have not completed high school or its equivalent, including any criteria for excluding parents under age 18 from such requirements;

(2) Any training or work alternatives in the case of a parent aged 18 or 19 who has not completed high school or its equivalent;

(3) State policy on educational activities for those age 20 or over without a high school diploma or GED;

(4) Criteria for determining those for whom attendance in higher education or a school or course of vocational or technical training is appropriate; and

(5) Policies for approval of postsecondary education (under section 482(d)(1)(B)(i) of the Act).

(j) A description of the criteria that will be used to refer participants to services and activities. The plan must describe the approaches the program will use for individuals who are:

(1) Members of the target populations described in § 250.1; and

(2) Parents and caretakers with children under the age of 6, including the State's exemption policy for those with children between the ages of 1 and 3.

(k) With regard to Unemployed Parent cases,

(1) A description of agency policies on exemptions and participation of a principal earner and the other parent; and

(2) A description of any State-designed work program to meet the UP work requirements at § 250.33.

(l) The State's policy for determining whether self-initiated education and training constitutes participation consistent with the individual's employment goals, and if the education or training is appropriate, how the State will assure that any other participation by such individual in the JOBS program will not be permitted to interfere.

(m) A description of any agreements the State IV–A agency has reached with the State's education agency, with regard to determining, consistent with the relevant definitions in § 250.1:

(1) Whether an individual is attending such education or training activities in good standing;

(2) Whether an individual is making satisfactory progress in such education or training; and

(3) How attendance that meets these specifications will be regularly determined to be continuing.

(n) A description of the State IV–A agency's actions to assure that training and education activities conducted under JOBS are directed toward specific jobs that are available, or are likely to become available, in the State.

(o) An assurance that individuals are not discriminated against on the basis of race, sex, national origin, religion, age, or handicapping condition in assignment to training and education developed under the JOBS program.

Subpart D—Participation Requirements, Exemptions and Sanctions

§ 250.30 Requirements for individual participation and exemptions.

A State JOBS plan must provide that:

(a) Where State resources otherwise permit, all recipients of AFDC who live in a subdivision covered by a JOBS program and for whom the State IV–A agency has guaranteed child care in accordance with Part 255 shall be required to participate in JOBS except as provided under paragraph (b) of this section.

(b) An individual shall be considered exempt and not be required to participate if she:

(1) Is a dependent child who is under age 16 (except a minor parent who is considered an adult recipient for purposes of this part) or attends, full-time, an elementary, secondary, vocational or technical school;

(2) Is ill, when determined by the State on the basis of medical evidence or another sound basis that the illness or injury is serious enough to temporarily prevent entry into employment or training;

(3) Is incapacitated, when verified by the State that a physical or mental impairment, determined by a physician or a licensed or certified psychologist, by itself or in conjunction with age, prevents the individual from engaging in employment or training under JOBS;

(4) Is 60 years of age or older;

(5) Resides in a subdivision of the State where the JOBS program is available, but in a location which is so remote from a JOBS program or activity that effective participation is precluded. The individual shall be considered remote if a round trip of more than 2 hours by reasonably available public or private transportation, exclusive of time necessary to transport children to and from a child care facility, would be required for a normal work or training day. However, if normal round trip commuting time in the area is more than 2 hours, then the round trip commuting time shall not exceed the generally accepted community standards;

(6) Is needed in the home because another member of the household requires the individual's presence due to illness or incapacity as determined by a physician or a licensed or certified psychologist, and no other appropriate member of the household is available to provide the needed care;

(7) Is working 30 or more hours a week. The State IV–A agency may establish minimum standards in its JOBS plan for work that qualifies an individual for this exemption;

(8) Is pregnant, and it has been medically verified that the child is expected to be born in the month in which participation would be required or within the following six-month period; or

(9)(i) Subject to paragraph (b)(9)(iv) of this section, is the parent or other relative of a child under 3 years of age (or an age less than 3 but not less than 1, if the State plan so provides) who is personally providing care for the child; or

(ii) Subject to paragraph (b)(9)(iv) of this section, is the parent or other relative personally providing care for a child under 6 years of age, unless the State IV–A agency assures that child care will be guaranteed and that participation in the program by the parent or relative will not be required for more than 20 hours per week.

(iii) Only one parent or other relative in a case may be exempt under paragraph (b)(9)(i) or paragraph (b)(9)(ii) of this section.

(iv) In the case of a family eligible for AFDC by reason of the unemployment of the parent who is the principal earner, only one parent may be exempt under paragraph (b)(9)(i) or paragraph (b)(9)(ii) of this section. The State IV–A agency may:

(A) Limit the exemptions in paragraph (b)(9)(i) and paragraph (b)(9)(ii) of this section to the parent who is not the principal earner;

(B) Make the exemptions in paragraph (b)(9)(i) and paragraph (b)(9)(ii) of this section inapplicable to both parents and require their participation in the program if child care in accordance with Part 255 is guaranteed with respect to the family.

(c) The State IV–A agency will reevaluate any exemption at such time as the condition is expected to terminate but no less frequently than each redetermination of AFDC eligibility.

§ 250.31 Volunteers.

The State IV–A agency must provide that applicants for and recipients of AFDC who are exempt under § 250.30 from participation in the program or who are not otherwise required by the State IV–A agency to participate will be allowed to do so on a voluntary basis to the extent that the program is available in the applicable political subdivision and State resources otherwise permit.

(a) The State IV–A agency shall give first consideration to applicants for or recipients of AFDC who volunteer to participate in determining the priority of participation within the target populations described at § 250.1.

(b) When an individual who volunteers to participate stops participating in the program without good cause as defined at § 250.35,

(1) If she has been determined to be exempt pursuant to § 250.30, she shall not be given priority to participate so long as other individuals are actively seeking to participate.

(2) If she has been determined not to be exempt pursuant to § 250.30, she shall be subject to sanction as described at § 250.34.

§ 250.32 Participation requirements for education.

(a) To the extent that the program is available in the political subdivision involved and State resources otherwise permit, in the case of a custodial parent who is not yet 20 years of age, has not completed a high school education (or its equivalent) and is not exempt from participation under § 250.30(b), the State shall require such a parent to participate in educational activities as described in § 250.44(a)(1). For purposes of this section, custodial parent means the parent who lives with the child, and custodial parents exempt under § 250.30(b)(9) because of the age of the youngest child.

(1) The State IV–A agency may require full-time participation (as defined by the educational provider) in educational activities directed toward the attainment of a high school diploma or its equivalent. This includes individuals who would otherwise only have to participate on a part-time basis because their youngest child is under 6 years of age.

(2) The State IV–A agency may excuse a custodial parent who is under age 18 from the school attendance requirement if such parent is determined to be beyond the State's compulsory attendance requirements and if the State's JOBS plan contains criteria for making this determination. The State's criteria:

(i) Must provide that each determination is based upon an individual assessment of the parent rather than upon the application of categorical exemptions;

(ii) May not rely solely upon grade completion; and

(iii) Must provide for participation in another educational activity as defined under § 250.44(a) from which the individual could benefit.

(3) The State IV–A agency may require a custodial parent who is age 18 or 19, and required to participate in JOBS under this section, to participate in training or work activities (subject to the 20-hour limit in § 250.30(b)(9)(ii)) in lieu of educational activities described at § 250.44(a) if one of the following conditions is met:

(i) Such parent fails to make good progress in successfully completing educational activities, or

(ii) Prior to any assignment of the individual to such educational activities it is determined, based on an educational assessment and the employment goal established in the individual's employability plan, that participation in educational activities is inappropriate for such parent.

(b) If a State IV–A agency requires an individual who has attained the age of 20 years and has not earned a high school diploma (or its equivalent) to participate in JOBS, the State agency shall include educational activities consistent with her employment goals as a component in the individual's employability plan. Any other services or activities may not be permitted to interfere with her participation in appropriate educational activities under § 250.44. However, a State IV–A agency may elect not to require an individual to participate in educational activities if:

(1) The individual demonstrates a basic literacy level; or

(2) The long-term employment goal of the individual, as identified by the State IV–A agency in her employability plan, does not require a high school diploma (or equivalent).

§ 250.33 Participation requirements for unemployed parents.

(a) The State IV–A agency shall require that at least one parent, in any family eligible for AFDC by reason of the unemployment of the parent who is the principal earner, participate for a total of at least 16 hours a week in a work supplementation program, a community work experience program, or other work experience program, on-the-job training, or a State-designed work program described in the State JOBS plan and approved by the Secretary. A State-designed work program may not substitute education or training activities for the work requirement.

(b) In the case of a parent under age 25 who has not completed high school or an equivalent course of education, the State IV–A agency may require the individual to participate in educational activities as defined at § 250.44(a) in lieu of one or more of the programs specified in paragraph (a) of this section. An individual meets the participation requirements of this section if he or she is making satisfactory progress as defined at § 250.1.

(c) An individual participating in a community work experience program under § 250.63 shall be considered to have met the participation requirement in paragraph (a) of this section if the individual participates for the maximum number of hours in any month calculated in accordance with § 250.63(d)(1).

§ 250.34 Sanctions.

(a)(1) When an AFDC recipient who is required to participate in the JOBS program, including those individuals required to participate because the State IV–A agency exercised its option under

VOL 54 ISS 73 APR 18 1989 UMI

§ 250.30(b)(9)(iii), fails without good cause to participate in the program or refuses without good cause to accept employment, the sanctions in paragraph (c) of this section shall apply during the following periods:

(i) For the first such failure or refusal, until the failure or refusal ceases;

(ii) For the second such failure or refusal, until the failure or refusal ceases, or 3 months, whichever is longer; and

(iii) For any subsequent failure or refusal, until the failure or refusal ceases, or 6 months, whichever is longer.

(2) Failure to participate in the program includes failure to meet State IV–A agency requirements for orientation, assessment, employability development, plan or case management.

(b) For the purpose of determining that an individual's failure to comply has ceased in the instance of a first sanction, a State IV–A agency may require the individual to participate in the activity to which she was previously assigned or an activity designed by the State to lead to full participation for a period of up to two weeks before terminating the sanction. If she successfully participates in such activities, the sanction will be considered to have terminated as of the day she agreed to participate. If no such activity is available, the sanction will terminate on the day she agrees to participate.

(c) During the sanction period:

(1) The State IV–A agency will not take into account the individual's needs in determining the family's need for assistance and the amount of the assistance payment.

(2) If the individual is a parent whose family is eligible in accordance with § 233.100, the State IV–A agency will not take into account the needs of his or her spouse in determining the family's need for assistance and the amount of the assistance payment unless the spouse is participating in the JOBS program.

(d) If such individual is a parent or other caretaker relative, payments for the remaining members of the assistance unit will be in the form of protective or vendor payments in accordance with § 234.60(a)(12). However, if after making reasonable efforts the State IV–A agency is unable to locate an appropriate individual to whom protective payments can be made, the State may continue to make payments on behalf of the remaining members of the assistance unit to the sanctioned caretaker relative.

(e) The State IV–A agency will promptly remind any individual in writing whose failure or refusal has continued for 3 months, of the individual's option to end the sanction. The notice shall advise that:

(1) She may immediately terminate the first or second sanction by participating in the program or accepting employment; and

(2) She may terminate any subsequent sanction after six months have elapsed by participating in the program or accepting employment.

§ 250.35 Good cause.

For the purposes of § 250.34(a), good cause for failure to participate in the program or refusal to accept employment shall be found if:

(a) The individual is the parent or other relative personally providing care for a child under age 6 and the employment would require such individual to work more than 20 hours per week;

(b) Child care (or day care for any incapacitated individual living in the same home as a dependent child) is necessary for an individual to participate or continue participation in the program or accept employment and such care is not available and the State agency fails to provide such care;

(c) The employment would result in the family of the participant experiencing a net loss of cash income. A participant may not claim good cause under this paragraph if the State IV–A agency assures that the family will not experience a net loss of cash income by making a supplemental payment. Net loss of cash income results if the family's gross income less necessary work-related expenses is less than the cash assistance the individual was receiving at the time the offer of employment is made. Gross income includes, but is not limited to, earnings, unearned income and cash assistance; or

(d) The individual meets other grounds for good cause set forth by the State IV–A agency in its JOBS plan.

§ 250.36 Conciliation and fair hearings.

(a) Each State IV–A agency shall establish a conciliation procedure to resolve disputes related to an individual's participation in the JOBS Program.

(b) If a dispute is not resolved through conciliation, the State shall provide the individual with an opportunity for a hearing. The hearing process may follow the provisions of § 205.10. Alternatively, the hearing process may be established especially for the JOBS program. However, assistance may not be suspended, reduced, discontinued, or terminated as a result of a dispute involving an individual's participation in JOBS unless the hearing meets the due process standards set forth by the U.S. Supreme Court in *Goldberg* v. *Kelly*, 397 U.S. 254 (1970).

Subpart E—Operation of State JOBS Programs/Program Components

§ 250.40 Providing program information to AFDC applicants and recipients.

(a) The State IV–A agency must at the time of application or redetermination inform all AFDC applicants and recipients, in writing and orally as appropriate, of the availability of the program activities and the supportive services for which they are eligible, and agency and participant responsibilities, including:

(1) Education, employment, and training opportunities available under the JOBS plan;

(2) Supportive services, including, but not limited to, child care during participation, transitional child care, health coverage transition options pursuant to section 1925 of the Act, and transportation and other work-related supportive services provided under the JOBS plan;

(3) The obligations of the State IV–A agency including the program and supportive services to be provided, as described in paragraphs (a) (1) and (2) of this section;

(4) The rights, responsibilities, and obligations of participants in the program, including but not limited to, the grounds for exemptions from participation and the consequences for refusing or failing to participate (including the effect on volunteers as described in § 250.31);

(5)(i) The types and locations of child care services reasonably accessible to participants in the program. Such information may be provided directly or through arrangement with others such as the appropriate human services or resource and referral agency;

(ii) The assistance that is available to help participants select appropriate child care services; and

(iii) The assistance available, on request, to help participants obtain child care services.

(b) The agency must also inform applicants and recipients of their responsibility to cooperate in establishing paternity and enforcing child support obligations, as described in Part 232, and must assist individuals in obtaining the paternity establishment and child support services for which they may be eligible.

(c)(1) After the State IV–A agency gives an AFDC applicant the information described in paragraphs (a) and (b) of this section, the State IV–A agency must notify the individual, in writing, within one month of the determination of eligibility, of the opportunity to indicate her desire to participate in the program and provide a clear description of how to enter the program.

(2) After the State IV–A agency gives an AFDC recipient the information described in paragraphs (a) and (b) of this section, the State IV–A agency must notify the individual, in writing, within one month of providing that information, of the opportunity to indicate her desire to participate in the program, and provide a clear description of how to enter the program.

(3) The notification provision in paragraph (c)(1) and (c)(2) of this section does not prohibit the State IV–A agency from requiring non-exempt recipients, or applicants in the case of job search, to participate in the JOBS program prior to the one-month notice.

(4) If a non-exempt individual indicates a preference not to participate, in response to such notification under paragraph (c)(1) or (c)(2) of this section, such a preference does not prevent the State IV–A agency from otherwise requiring participation in JOBS.

§ 250.41 Initial assessment and employability plan.

(a)(1) Within a reasonable time period prior to participation the State IV–A agency must make an initial assessment of employability based on:

(i) The individual's educational, child care, and other supportive services needs;

(ii) The individual's proficiencies, skills deficiencies and prior work experience;

(iii) A review of the family circumstances, which may include the needs of any child of the individual; and

(iv) Other factors that the State IV–A agency determines are relevant in developing the employability plan, as described in paragraph (b) of this section.

(2) The State IV–A agency may conduct the initial assessment through various methods such as interviews, testing, counseling and self-assessment instruments.

(b) On the basis of the assessment described in paragraph (a) of this section, the State IV–A agency must develop an employability plan in consultation with the participant, including a participant in a self-initiated activity pursuant to § 250.48 of this part.

(1) The employability plan must:

(i) Contain an employment goal for the participant;

(ii) Describe the services to be provided by the State IV–A agency, including child care and other supportive services pursuant to Part 255;

(iii) Describe the JOBS activities, as described in Subpart E of this part, that will be undertaken by the participant to achieve the employment goal; and

(iv) Describe any other needs of the family, pursuant to paragraph (a)(1)(iii) of this section, that might be met by JOBS, such as participation by a child in drug education or in life skills planning sessions.

(2) The employability plan shall take into account:

(i) Available program resources;

(ii) The participant's supportive services needs;

(iii) The participant's skills level and aptitudes;

(iv) Local employment opportunities; and

(v) To the maximum extent possible the preferences of the participant.

(3) The employability plan shall not be considered a contract.

(4) Final approval of the plan rests with the State IV–A agency.

§ 250.42 Agency-participant agreement.

(a) Following the initial assessment and the development of the employability plan as described in § 250.41, the State IV–A agency may require the participant (or the adult caretaker in the family of which the participant is a member) to negotiate and enter into an agreement with the State IV–A agency.

(1) Such agreement should indicate at a minimum:

(i) The purpose of the agreement;

(ii) The participant's obligations under the program;

(iii) The length of participation in the program, including the number of hours of participation per week; and

(iv) The educational, training and employment activities and the supportive services, including child care, to be provided by the agency during the period of participation.

(2) If the State IV–A agency elects this option, it must give the participant such assistance as she may need to review and understand the agreement.

(3) This agreement may be considered a contract between the State IV–A agency and the JOBS participant, pursuant to applicable State laws and regulations.

(b) If the State IV–A agency elects to use agreements or contracts, it does not have to use them in all political subdivisions having JOBS programs. The State IV–A agency, however, must apply this provision to participants on an equitable basis.

§ 250.43 Case management.

(a) The State IV–A agency may assign a case manager to a participant and the participant's family. The decision to assign a case manager may be made on a case-by-case basis.

(b) The case manager must be responsible for assisting the family to obtain any services that may be needed to assure effective participation in the program.

§ 250.44 Mandatory components.

A State's JOBS program must include the following four services and activities. The State IV–A agency need not make each service or activity a discrete offering, but may combine several into a single program activity, provided that the State IV–A agency can adequately distinguish the principal components for the purpose of Federal reporting requirements. The required services and activities are:

(a) Any educational activity below the postsecondary level that the State IV–A agency determines to be appropriate to the participant's employment goal. Such activities may be combined with training that the State IV–A agency determines is needed in relation to the participant's employability plan. The educational activities that must be made available include, but are not limited to:

(1) High school education or education designed to prepare a person to qualify for a high school equivalency certificate;

(2) Basic and remedial education that will provide an individual with a basic literacy level, equivalent to successful completion of grade 8, in order to fulfill an employment goal; basic education is instruction to provide these educational skills for the first time; remedial education involves repetition of such instruction previously given to the participant; and

(3) Education in English proficiency for an individual who is not sufficiently competent to speak, read or write the English language to allow employment commensurate with her employability goal;

(b) Job skills training, which includes vocational training for a participant in technical job skills and equivalent knowledge and abilities in a specific occupational area. The State IV–A agency must develop qualitative measures for making good or satisfactory progress, pursuant to § 250.1, for such programs, including those arranged through contracts and agreements, in order to qualify the training program as a component activity under JOBS;

(c) Job readiness activities that help prepare participants for work by

VOL 54 ISS 73 AP 18 1989 UMI

assuring that participants be familiar with general work place expectations, and exhibit work behavior and attitudes necessary to compete successfully in the labor market; and

(d) Job development and job placement activity by the agency, in soliciting a public or private employer's unsubsidized job opening, or in discovering such job openings, and the marketing of participants, and securing job interviews for participants.

§ 250.45 Optional components.

A State JOBS program must include, but is not limited to at least, two of the following four components:

(a) Group and individual job search, as described in § 250.60;

(b) On-the-job training, as described in § 250.61;

(c) Work supplementation, as described in § 250.62; and

(d) Community work experience program, or other approved work experience program, as described in § 250.63.

§ 250.46 Postsecondary education.

A State's JOBS program may include referral of a participant to postsecondary education, as determined necessary to meet any individual goals that are directly related to obtaining useful employment in a recognized occupation, within limits established by the State IV–A agency and reflected in the State JOBS plan. In accordance with § 233.20(a)(2)(v), the costs of such education, including tuition, books and fees, do not qualify for FFP as special needs.

§ 250.47 Other education, training, and employment activities.

(a) A State's JOBS program may include education, training, and employment activities other than those described in §§ 250.44 through 250.46, but which are included in the approved State JOBS plan.

(b) In no event will a State program of public service employment be approved under JOBS.

§ 250.48 Self-initiated education or training.

(a) The State IV–A agency may allow a parent or other caretaker relative or any dependent child in the family who is attending in good standing an institution of higher education (as defined in section 481(a) of the Higher Education Act of 1965), or a school or other entity offering a course of vocational or technical training, at the time she would otherwise be required to commence participation in the JOBS program, to continue to attend. Vocational or technical training consists of postsecondary education, as defined in § 250.1, that both leads to useful employment in a recognized occupation and results in other than a baccalaureate or advanced degree. Such participation shall meet the individual's obligation to participate in accordance with requirements at § 250.30 if the following conditions are met:

(1) The participant is attending at least half-time as defined by the institution; and

(2) The participant is making satisfactory progress in such institution, school, or course; and

(3) The course of study is consistent with the individual's employment goal.

(b) An applicant or recipient shall appear for an assessment and the development of an employability plan so that the State IV–A agency may determine the appropriateness of the educational or training activity.

(c) If the State IV–A agency approves the educational or training activity, any other JOBS activities in which such individual participates may not be permitted to interfere with the education or training activity.

(d) A State IV–A agency may restrict postsecondary education or training in its State JOBS plan.

(e) The costs of such education or training shall not constitute federally reimbursable expenses under JOBS.

(f) The costs of child care, transportation and other supportive services which the State IV–A agency determines are necessary for such attendance are eligible for Federal reimbursement pursuant to § 255.4.

Subpart F—[Reserved]

Subpart G—Optional Components of State JOBS Programs

§ 250.60 Job search program.

(a) A State IV–A agency may operate a job search program as a component of its JOBS program. A job search program may serve participants in either group or individual job-seeking activities.

(1) Individual job search includes the provision of counseling, training, information dissemination and support on a one-to-one basis.

(2) Group job search includes the provision of counseling and training in a group setting where applicants or recipients are taught job-seeking skills, and may include a phone bank from which participants contact potential employers.

(b) In addition to non-exempt recipients, a State IV–A agency may require an individual applying for AFDC to participate in job search unless she is exempt under § 250.30(b).

(c) A State IV–A agency may require an individual to participate in a job search program from the time she files an application for aid for an initial period of up to eight consecutive weeks. Following this initial period (which may extend beyond the date when eligibility is determined) the State IV–A agency may require additional participation in job search not in excess of eight weeks (or its equivalent) in any period of 12 consecutive months. The first such period of 12 consecutive months shall begin at any time following the close of the initial period.

(1) A State IV–A agency may not delay the processing of an individual's application for aid because of her participation in job search.

(2) In no event may an individual be required to participate in job search for more than 3 weeks before the State IV–A agency conducts an assessment as provided at § 250.41.

(d) Additional job search activities beyond those required in paragraph (c) of this section may be required only in conjunction with some other educational, training, or employment activity designed to improve the individual's employment prospects.

(e) Job search by an individual under this section shall in no event be treated, for any purpose, as an activity under JOBS if the individual has participated in such job search for 4 months out of the preceding 12 months.

§ 250.61 On-the-job training.

(a) A State IV-A agency may operate an on-the-job training (OJT) program as a component of its JOBS program. Under OJT a participant is hired by a private or public employer and while engaged in productive work receives training that provides knowledge or skills essential to the full and adequate performance of that job. The State IV–A agency or its agent shall enter into a contract with the OJT employer to subsidize the extraordinary costs incurred by the employer in providing training and additional supervision to the participant.

(b) Payments to an employer for on-the-job training shall not exceed an average of 50 percent of the wages paid by the employer to the participant during the period of such training.

(c) A participant in OJT shall be compensated by the employer at the same rates, including benefits and periodic increases, as similarly situated employees or trainees and in accordance with applicable law, but in no event less than the higher of the Federal minimum wage or applicable State or local minimum wage law.

(d) Wages paid to participants in OJT will be considered to be earned income for purposes of any provision.

(e) If a participant in OJT becomes ineligible for AFDC pursuant to the rules applicable to earned income at § 233.20, or pursuant to the 100-hour rule at § 233.100 in the case of a principal earner in an unemployed parent case, she shall remain a JOBS participant for the duration of the OJT and may be eligible for supportive services under Part 255 available to other JOBS participants similarly situated.

(f) If the individual would have been eligible for transitional child care pursuant to Part 256 at the time the ineligibility for AFDC occurred, she shall be eligible for transitional child care after the OJT ends for the number of months that remain in the 12-month period following the month in which she became ineligible for AFDC after OJT ended. As an alternative, the State IV–A agency may treat all child care provided after an individual in an OJT job loses eligibility for AFDC as transitional child care if the individual meets the requirements at Part 256.

(g) The State IV–A agency must develop qualitative measures for making good or satisfactory progress, pursuant to § 250.1, for OJT, in order to qualify as a component activity under JOBS.

§ 250.62 Work supplementation program.

(a) A State IV–A agency may operate a work supplementation program as a component of its JOBS program. Under the work supplementation program, a State IV–A agency may use AFDC funds to develop and subsidize jobs for AFDC recipients as an alternative to aid.

(b) A "supplemented job" is a job provided under this section to an eligible individual by the State or local agency administering the State IV–A plan or by any other employer for which all or part of the wages are paid by such State or local IV–A agency.

(1) The State IV–A agency may use whatever means it determines appropriate to provide or to subsidize jobs for participants.

(2) The State IV–A agency may provide or subsidize any type of job. It may determine the length of time the position is to be provided or subsidized, the amount of wages to be paid to the recipient, the amount of subsidy to be provided by the State or local IV–A agency, and the conditions of participation, except that no participant may be assigned to fill any established, unfilled position vacancy in accordance with section 484 of the Act.

(c) An eligible individual is an individual who is in a category which the State IV–A agency determines should be eligible to participate in the work supplementation program, and who would, at the time of placement in the supplemented job, be eligible for AFDC if the State IV–A agency did not have a work supplementation program in effect. For the purpose of this section, time of placement is defined as the date on which the State IV–A agency and the employer reach agreement on the terms of the placement and the specific individual to be placed.

(d) A State or local IV–A agency administering the State plan is not required to provide employee status to any eligible individual to whom it provides a job position or with respect to whom it subsidizes all or part of the wages paid to such individual by another entity under this program, nor is it required to provide that eligible individuals filling job positions provided by other entities under such program be provided employee status by such entity during the first 13 weeks in which they fill such position.

(e) Participants in supplemented jobs will be paid wages which shall be considered to be earned income for purposes of any provision of law.

(f) The State IV–A agency may elect to calculate the amount of an eligible individual's residual (direct AFDC) grant, if any, at the time of placement in the supplemented job and base the amount of the residual grant (the AFDC grant minus earnings and other countable income) for the duration of the individual's participation in the supplemented job (in whole or part) on that calculation. Such a policy is known as "freezing the grant." If the individual becomes otherwise ineligible for AFDC benefits, the State IV–A agency may allow the individual to continue in the supplemented job and divert the AFDC grant to the wage pool, but the State IV–A agency shall not pay a residual grant to the individual.

(g) At State option, individuals who hold supplemented jobs may be exempt from the retrospective budgeting requirements at Part 233 and monthly reporting, and the amount of the aid which is payable to the family of any such individual for any month, or which would be so payable but for the individual's participation in a supplemented job, shall be determined on the basis of the income and other relevant circumstances in that month.

(h) If an individual in a supplemented job would have been eligible for transitional child care pursuant to Part 256 at the time the ineligibility for AFDC occurred, she shall be eligible for transitional child care after her supplemented job ends for the number of months that remain in the 12-month period following the month in which she became ineligible. In the alternative, the State IV–A agency may treat all child care provided after an individual in a supplemented job loses eligibility for AFDC as transitional child care if the individual meets the requirements at Part 256.

(i) A State IV–A agency may adjust the standard of need under the State IV–A plan as the State determines to be necessary and appropriate to carry out a work supplementation program. Such changes in the need standard may be made notwithstanding § 233.20.

(1) The standard of need in effect in those subdivisions of the State in which such program is in operation may be different from the need standard in effect in subdivisions in which such program is not available.

(2) The standard of need for categories of recipients of aid may vary among such categories as the State IV–A agency determines to be appropriate on the basis of ability to participate in the work supplementation program.

(3) A State IV–A agency may make further adjustments in the amount of aid paid under the title IV–A plan to different categories of recipients in order to offset increases in benefits from other government-provided, needs-related programs as the State IV–A agency deems necessary and appropriate to further the purpose of the work supplementation program.

(j) A State IV–A agency may reduce or eliminate the amount of earned income to be disregarded from participation in a supplemented job.

(k) Notwithstanding the time limitations on the $30 and one-third and the $30 disregard in § 233.20(a)(11), a State IV–A agency may allow a participant employed in a supplemented job to receive the $30 and one-third or the $30 disregards for one or more of the first nine months of such employment.

(l) Payments by the State IV–A agency to individuals or to entities providing jobs for recipients under the work supplementation program shall be expenditures incurred by the State IV–A agency for AFDC and shall not exceed the amount that would otherwise be payable under the title IV–A plan if the family of each individual employed in the program had received the maximum amount of aid payable to such a family with no income for a period of either 9 months or the length of the individual's employment in the program, whichever is less. (This amount is determined without regard to any adjustments made under paragraphs (i), (j), and (k) of this section, and for each month of participation, may be based upon the

VOL 54 ISS 73 AP 18 1989 UMI

maximum amount that would otherwise have been payable for a month at the time of placement in the program).

(m) A State IV–A agency may determine the amounts to be reserved and used for providing and subsidizing jobs under this section by using a sampling methodology. The State IV–A agency must describe its sampling methodology in its JOBS plan.

§ 250.63 Community work experience program.

(a) A State IV–A agency may operate a community work experience program (CWEP) as a component of its JOBS program. The purpose of CWEP is to improve the employability of individuals not otherwise able to obtain employment by providing work experience and training to assist them to move promptly into regular public or private employment.

(b) The State IV–A agency shall provide coordination among a community work experience program, any program of job search, and the other employment-related activities under the JOBS program to insure that job placement will have priority over participation in CWEP, and that individuals eligible to participate in more than one program under JOBS are not denied AFDC on the grounds of failure to participate in one such program if they are actively and satisfactorily participating in another. The State IV–A agency may provide that part-time participation in more than one such program may be required where appropriate.

(c) Community work experience programs shall be limited to projects which serve a useful public purpose in fields such as health, social service, environmental protection, education, urban and rural development and redevelopment, welfare, recreation, public facilities, public safety, and day care.

(d)(1) The maximum number of hours that an individual may be required to work or undergo training (or both) in CWEP is the number of hours which would result from dividing the family's monthly grant amount by the greater of the Federal or the applicable State minimum wage.

(2) A State IV–A agency may include the value of food stamp benefits in computing the maximum number of hours that a food stamp recipient, who is exempt from food stamp work registration by virtue of her participation in a CWEP program under JOBS, is required to participate. No food stamp recipient, who is exempt from food stamp work registration, may be required to participate in CWEP under JOBS more than 120 hours per month.

(3) The portion of a recipient's aid for which the State is reimbursed by a child support collection (except for the $50 pass-through) shall be excluded in determining the maximum number of hours that she is required to work.

(e) Nothing contained in this section shall be construed as authorizing the payment of AFDC as compensation for work performed, nor shall a participant be entitled to a salary or to any work or training expense provided under any other provision of law by reason of her participation in a CWEP program.

(f) To the extent possible, a State IV–A agency should take into account the prior training, experience and skills of a recipient in making appropriate work assignments.

(1) After each six months of an individual's participation in a community work experience program and at the conclusion of each assignment under such a program the State IV–A agency must provide a reassessment and revision, as appropriate, of the individual's employability plan.

(2) After an individual has been assigned to a position for a total of nine months, such individual may not be required to continue in that assignment unless the maximum number of hours of participation is no greater than the family's grant divided by the highest of:

(i) The Federal minimum wage; or

(ii) The applicable State minimum wage; or

(iii) The rate of pay for individuals employed in the same or similar occupations by the same employer at the same site.

The portion of a recipient's aid for which the State is reimbursed by a child support collection (not including the $50 pass-through) shall continue to be excluded in determining the number of hours that such individual may be required to work.

(g) Participants in CWEP may perform work in the public interest (which otherwise meets the requirements of this section) for a Federal office or agency with its consent, and, notwithstanding 31 U.S.C. 1342, or any other provision of law, such agency may accept such services, but such participants shall not be considered to be Federal employees for any purpose.

(h) Nothing in this section or in any State plan approved under § 250.20 shall be construed to prevent a State IV–A agency from operating (on such terms and conditions and in such cases as the State IV–A agency may find to be necessary or appropriate) a community work experience program.

(i) CWEP participants must not fill established, unfilled position vacancies in accordance with section 484 of the Act.

(j) FFP is not available for:

(1) Capital expenditures, depreciation or use allowances in connection with a CWEP;

(2) The cost of making or acquiring materials or equipment in connection with participation in a project; or

(3) The cost of supervision of participants.

(k) The State IV–A agency may offer any other work experience program which is described in the JOBS plan and approved by the Secretary.

(1) The program narrative for such a program should include a description of the potential sponsors; the type of activities; the hours or length of participation required; target group(s); and how the program is different from CWEP.

(2) The limitations on FFP for CWEP in paragraph (j) of this section apply to all State work experience programs.

(3) Any other work experience program must meet the general program standards at section 484 of the Act.

Subpart H—Funding

§ 250.70 JOBS allocation entitlement.

(a) Federal matching for JOBS program expenditures is limited to a national total equal to the amounts authorized and appropriated for each fiscal year.

(b) A State IV–A agency with an approved JOBS plan shall be entitled to payments from this annual limit. The maximum annual payment for a State will be the sum of two amounts:

(1) An amount equal to the State's WIN or WIN Demonstration allotment for fiscal year 1987; and

(2) An amount allocated from the balance of the annual national limitation on the basis of each State's relative average monthly number of adult recipients as defined at § 250.1.

(c) In accordance with § 92.23, JOBS funds allocated to a State IV–A agency for a given Federal fiscal year are for use during that fiscal year and must be obligated by the State no later than the end of the fiscal year. Carry forward of an unobligated balance of Federal funds to a succeeding Federal fiscal year is not permitted. An unobligated Federal fund balance at the close of a Federal fiscal year will be returned to the Federal government through the issuance of a negative grant award by the Department following receipt of the final quarterly expenditure report for the fiscal year.

(d) A State must liquidate all obligations incurred under the title IV–F grant awards not later than one year after the end of the fiscal year for which the funds were awarded and obligated. The Federal share of unliquidated obligations will be returned to the Federal government.

§ 250.71 Allotment of JOBS limit of entitlement.

(a) For a State IV–A agency that implements JOBS in a quarter of a fiscal year prior to October 1, 1990, the State's allotment from its JOBS limit of entitlement for that period will be proportional to the number of such quarters that JOBS is operational in that State in that fiscal year.

(b) An Indian Tribe or Alaska Native organization which receives the Secretary's approval to conduct a JOBS program shall receive a direct payment for operation of its JOBS program, without the requirement for a non-Federal share, pursuant to § 250.93.

(1) The amount of any such direct payment will be deducted from the amount of the State's allotment, and will be proportional to the Tribe's or organization's proportion of the State's adult AFDC recipient population, as established pursuant to § 250.93.

(2) The remaining allocation to a State IV–A agency shall be subject to the regulations governing FFP at § 250.73.

(c) The following rules apply to Puerto Rico, Guam, the Virgin Islands and American Samoa which are subject to the provisions of section 1108 of the Act:

(1) The limitations on payments contained in section 1108 do not apply to a State's annual limit of entitlement for the JOBS program as described in § 250.70(b).

(2) The availability of FFP for child care under Part 255 and the related appropriate FFP rates are described at § 255.4(b)(2) and § 255.4(g).

(3) The availability of FFP for transitional child care under Part 256 and the related appropriate FFP rates are described at § 256.4(b).

§ 250.72 Maintenance of effort.

(a) Federal JOBS funds shall not be used to supplant non-Federal funds for existing services and activities that promote the purposes of JOBS. Non-Federal funds include both State and local match of Federal funds for existing services for AFDC applicants and recipients and the amounts spent directly by the State IV–A agency without benefit of Federal matching funds.

(b) State and local IV–A agency expenditures for these purposes shall not be less than the fiscal year 1986 level. At a minimum, this requirement applies to non-Federal funds expended for programs to increase self-sufficiency, reduce welfare dependency, and increase earnings of AFDC applicants and recipients.

(c) State IV–A agency contracts and arrangements may be made for services only to the extent that they are not otherwise available on a non-reimbursable basis. "Not otherwise available" here means that if the services were available for AFDC applicants and recipients before JOBS, the State IV–A agency's provider must maintain that level of service before the State IV–A agency may contract for additional services of the same sort from that agency.

(d) Any State IV–A agency arrangement or contract must contain a certification from the provider that the services being contracted for are not otherwise available from that provider on a non-reimbursable basis. Services provided on a "non-reimbursable basis" are those services that a State is required to provide to all citizens or to the low income population, including AFDC applicants and recipients.

(e) A State IV–A agency directly providing JOBS component services must certify in the State JOBS plan that such services are not otherwise available on a nonreimbursable basis.

§ 250.73 Matching rates.

(a) From a State IV–A agency's total annual limit of entitlement, FFP is available at a rate of 90 percent for expenditures up to an amount equal to the State's WIN or WIN Demonstration allotment for fiscal year 1987. The State's match for this amount may be in cash or in kind fairly evaluated.

(b)(1) FFP will be available for the balance of a State IV–A agency's limit of entitlement as follows:

(i) At the higher of the State's Medicaid matching rate or 60 percent for program costs as described in paragraph (c) of this section, and for personnel costs (salaries and benefits) for full-time staff working in any capacity in the JOBS program; and

(ii) At 50 percent for all other administrative costs, as described in paragraph (d) of this section, and transportation, work-related expenses, and work-related supportive services as defined in Part 255.

(2) A State's match for these amounts must be in cash, not in kind. The State share for private and public funds must meet the requirements of § 235.66.

(c) The term "program costs" includes: the costs for an individual's participation in a component, such as OJT payments to an employer, and tuition and fees, where not excluded, for an individual's participation in a JOBS education component; the personnel costs (salaries and benefits) for staff and first-line supervisors directly providing component services to participants, and the costs for equipment, supplies and materials used by a JOBS participant while she is actively participating in the activities of a component.

(d) "Administrative costs" are those costs not considered "program costs", including overhead expenditures, JOBS subsystems costs, personnel costs (salaries and benefits) for staff not directly providing component services to participants such as second-line supervisors and above, personnel administration costs, and all other indirect costs.

§ 250.74 Reduced matching rate.

(a)(1) FFP for a State IV–A agency shall be 50 percent (rather than the rates described in § 250.73) in any fiscal year in which that State spends less than 55 percent of the State's JOBS expenditures on applicants and recipients who are members of the State's target populations as defined in § 250.1.

(2) If any State IV–A agency demonstrates to the satisfaction of the Secretary that the characteristics of the caseload in that State make it infeasible to meet the requirements of paragraph (a)(1) of this section, and that the State is targeting an approved set of long-term or potential long-term recipients, the match rate in § 250.73 shall be applied.

(3) A State IV–A agency need not require or allow participation of an individual in the program if, as a result of such participation, the amount payable to the State for quarters in a fiscal year with respect to the program would be reduced pursuant to paragraph (a)(1) of this section.

(b)(1) FFP for a State IV–A agency shall be 50 percent (rather than the rates described in § 250.73) in any fiscal year for the State's JOBS expenditures if the State's participation rate (determined under paragraph (b)(2) of this section) for the preceding fiscal year does not equal or exceed:

(i) 7 percent if the preceding fiscal year is 1990;

(ii) 7 percent if such year is 1991, however, no reduction in FFP shall be made in 1991 for any failure to meet the participation rate specified in (b)(1)(i) of this section;

(iii) 11 percent if such year is 1992;

BEST COPY AVAILABLE

VOL 54 ISS 73 AP 18 1989 UMI

(iv) 11 percent if such year is 1993;
(v) 15 percent if such year is 1994; and
(vi) 20 percent if such year is 1995.

(2) The State IV–A agency's participation rate for a fiscal year shall be the average of its participation rates for computation periods in such fiscal year. The computation periods shall be:

(i) The fiscal year, in the case of fiscal year 1990;

(ii) The first six months, and the seventh through twelfth months, in the case of fiscal year 1991;

(iii) The first three months, the fourth through sixth months, the seventh through ninth months, and the tenth through twelfth months, in the case of fiscal years 1992 and 1993; and

(iv) Each month, in the case of fiscal years 1994 and 1995.

(3) The State IV–A agency's participation rate for a computation period shall be the number, expressed as a percentage, equal to: (i) The average monthly number of individuals required or allowed by the State to participate in the program, who have participated (as defined in § 250.1) in such program in months in the computation period, plus the number of individuals required or allowed by the State to participate in such program, who have so participated in that month in such period for which the number of such participants is the greatest; divided by (ii) twice the average monthly number of individuals required to participate in such period (other than individuals described in paragraphs (9)(i) and (9)(iv) of § 250.30(b) with respect to whom the State IV–A agency has exercised its option to require their participation and individuals sanctioned under § 250.34).

(4) If the Secretary determines that the State IV–A agency has failed to achieve the participation rate for any fiscal year specified above, he may waive, in whole or in part, the reduction in the payment rate otherwise required by paragraph (b)(1) of this section if he finds that:

(i) The State is in conformity with section 402(a)(19) and Part F of the Act;

(ii) The State has made a good faith effort to achieve the applicable participation rate for such fiscal year; and

(iii) The State has submitted a proposal which is likely to achieve the applicable participation rate for the current fiscal year and the subsequent fiscal years (if any) specified therein.

(c)(1) FFP for a State IV–A agency shall be 50 percent beginning in fiscal year 1995 for the State's JOBS expenditures (rather than the rates described in § 250.73) if the percentage of UP cases meeting the participation requirements in § 250.33, for the preceding fiscal year does not equal or exceed:

(i) 40 percent in the case of the average of each month in fiscal year 1994;

(ii) 50 percent in the case of the average of each month in fiscal year 1995;

(iii) 60 percent in the case of the average of each month in fiscal year 1996; and

(iv) 75 percent in the case of the average of each month in each of the fiscal years 1997 and 1998.

(2) The percentage of participants for any month in a fiscal year for this purpose shall equal the average of: (i) The number of individuals described in § 250.33 who have met the requirement therein; divided by (ii) the total number of principal earners (but excluding those in families who have been recipients of aid for 2 months or less if, during the period that the family received aid, at least one parent engaged in intensive job search as defined in § 250.1).

(3) If the Secretary determines that the State IV–A agency has failed to achieve the participation rate for any fiscal year specified above, he may waive, in whole or in part, the reduction in the payment rate otherwise required by paragraph (c)(1) of this section if he finds that:

(i) The State is in conformity with section 402(a)(19) and Part F of the Act;

(ii) The State has made a good faith effort to achieve the applicable participation rate and has been unable to do so because of economic conditions in the State, including significant numbers of recipients living in remote locations or isolated rural areas where the availability of work sites is severely limited, or because of rapid and substantial increases in the caseload that cannot reasonably be planned for; and

(iii) The State has submitted a proposal which is likely to achieve the applicable participation rate for the current fiscal year and the subsequent fiscal years (if any) specified therein.

§ 250.75 Activities excluded from FFP.

(a) The costs of education or training activities (such as tuition, books, fees, room, board) that the State IV–A agency determines may constitute participation under the provisions of § 250.48 shall not constitute federally reimbursable expenses for purposes of the JOBS program.

(b) No funds shall be used for construction.

(c) No funds shall be used to assist, promote, or deter union organizing.

§ 250.76 Financial reports, records, statements and audits.

(a) Financial reporting of JOBS program expenditures are generally subject to the requirements of the existing regulations at § 201.5 and § 92.41, as appropriate.

(b) Financial records and accounts shall be made available for audit purposes to the Secretary or any authorized representative.

(c)(1) JOBS program funds are subject to the administration of grant regulations at Part 92.

(2) Program funds and activities shall be audited in conformity with the requirements of §§ 92.26 and 74.62(a).

(3) JOBS program records are subject to the "retention and access requirements for records" at § 92.42.

(d) FFP improperly claimed under the JOBS program is subject to disallowance. If a State IV–A agency disagrees with a decision to disallow FFP, it can appeal within 30 days of the date of the disallowance decision. The procedures for appeal of AFDC disallowances apply, including review of the Departmental Appeals Board in accordance with Part 16 of these regulations.

§ 250.77 Costs matchable as AFDC payments.

(a) Costs incurred by the State IV–A agency for supplemental AFDC payments shall be treated as title IV–A costs with respect to which sections 403(a)(1) or 403(a)(2) of the Act apply, when such payments are made in order that a recipient's family shall not experience a net loss of cash income from the recipient having been required by the State to accept a job.

(b) Payments to employers under work supplementation as described at § 250.62(1) shall be expenditures incurred by the State IV–A agency for AFDC.

Subpart I—Uniform Data Collection Requirements

§ 250.80 Uniform data collection requirements.

(a) A State IV–A agency must provide to the Department a sample of monthly unaggregated case record data containing such data and identifiers as are specified in § 250.82. The sample must be provided in formats specified by the Department. Each record of the sample must contain an identifier that is not the Social Security number, and that protects the privacy of the individual relative to the requirements of § 205.50. The sample must be large enough to provide a precision of plus or minus one percentage point at a 95 percent

confidence level, for at least those data elements necessary to determine a State's FFP as required in § 250.74. Submission of the universe of JOBS case records is also acceptable. Data must be submitted electronically on an ongoing basis, with all cases submitted no later than 45 days after the end of the month.

(b) For purposes of determining participation rates, a State IV–A agency must report, for each month, on a quarterly basis, the aggregate number of individuals required to participate as specified in § 250.74(b)(3)(ii).

(c) A State IV–A agency must annually develop and submit to the Secretary a table of the previous Federal fiscal year's average total cost per participant per month of participation, separately stated with regard to each component and service the State IV–A agency makes available. The Department will determine a State IV–A agency's eligibility for enhanced FFP as specified at § 250.74(a) by applying a State's activity levels of target population participants to that State's table of average costs.

(d) A State IV–A agency must submit any other information that the Secretary determines necessary.

§ 250.81 State data systems options.

(a) A State IV–A agency may integrate its JOBS Automated System (JAS) with an existing or planned title IV–A system. A State IV–A agency may also use a stand-alone system. Either option must be a client-based information system capable of producing at a minimum all data elements required in § 250.82. FFP may be available from either title IV–A or title IV–F funds, as described in paragraphs (b) and (c) of this section.

(b)(1) Title IV–A funding is available for acquisition and development of the JOBS interface between title IV–A and title IV–F requirements. The interface of an automated JOBS program with the title IV–A system, for verification of eligibility and reconciliation of data, includes planning, development and implementation of title IV–A subsystems to:

(i) Manage information on eligibility factors and target group membership;

(ii) Effect notifications and referrals including non-cooperation;

(iii) Check records of applicants and recipients on a periodic basis with other agencies to verify continued eligibility; and

(iv) Notify appropriate officials when a recipient ceases to be eligible.

(2) If the JAS interfaces with an existing or planned FAMIS-type system and all FAMIS requirements are met, 90 percent FFP is available. Otherwise interface expenditures are matched at 50 percent.

(c) JOBS funding is available at a 50 percent administrative rate for the acquisition and development of the remainder of the JAS, subject to the requirements of § 205.37. This excludes the JOBS interface with the title IV–A subsystem, but includes all other input, maintenance and reporting of those data elements required in § 250.82 that cannot be obtained from the title IV–A subsystem through the JOBS interface. A cost allocation plan must be approved to share the cost among all Federal and State programs benefiting from the State's JAS.

(d) The Advance Planning Document (APD) for each subsystem must meet all existing requirements for such a system pursuant to § 205.37.

(e) Administrative funding under either title IV–A or title IV–F for systems development, implementation, operation and/or automatic data processing equipment acquisition must comply with the requirements of § 95.611.

§ 250.82 Required case record data.

(a) In order for a State IV–A agency to produce unaggregated case record data that are required to be reported with regard to individuals who are served in the JOBS program, the data elements specified below are required to be maintained in the State IV–A agency's individual case record for each JOBS participant and for each individual in a self-initiated activity that the State has determined to be eligible for support services. To the extent the State IV–A agency's JAS can access the required elements in the required form from other subsystems, duplicate entry is to be avoided.

(b) The minimum data elements are:

(1) Case identifier in lieu of Social Security Number;

(2) Date of birth;

(3) Basis of eligibility, including codes for UP or regular AFDC, and for deprivation factor;

(4) Applicant or recipient status;

(5) Beginning date of current AFDC eligibility;

(6) Prior receipt of AFDC;

(7) Education level;

(8) Literacy level, when established through an educational assessment using TABE or other State-prescribed tool;

(9) Target group codes to identify, for that month, which of the target groups specified in § 250.1 an individual was a member of, if any, at the time of assessment;

(10) Participation status as defined in § 250.1(1).

(11) Participation status in a component as defined in § 250.1(5), including separate identification of self-initiated educational or training activity;

(12) Participation status in intensive job search as defined in § 250.1 or UP work participation as defined in §§ 250.1(4) (i) and (ii);

(13) Date entered into current JOBS component, or initial assessment;

(14) Date entered into initial JOBS component as defined in §§ 250.1 (5) or (6);

(15) Amount of child care payment during the month, pursuant to section 402(g)(1)(A).

Subpart J—Operation of JOBS Programs by Indian Tribes and Alaska Native Organizations

§ 250.90 Scope and purpose.

The purpose of an Indian Tribe or Alaska Native organization JOBS program is to assure that Tribal (refers to both an Indian Tribe and Alaska Native organization) members receiving AFDC obtain the education, training and employment services they need to avoid long-term dependency. Tribal grantees are subject to all the regulations under Part 250, unless otherwise indicated in this subpart, and, as appropriate, regulations under Parts 255, 74, and 92, which include general funding and disallowance and termination provisions for Federal programs.

§ 250.91 Eligible Indian Tribe and Alaska Native organization grantees.

Funds shall be allotted to operate a JOBS program pursuant to § 250.71 to groups meeting the following eligibility standards:

(a) An Indian Tribe, defined as any Tribe, band, nation, or other organized group or community of Indians which:

(1) Is federally recognized as eligible for the special programs and services provided by the United States Government to Indians because of their status as Indians; and

(2) Has a reservation, which means Indian reservations, public domain Indian allotments, or former Indian reservations in Oklahoma.

(b) A consortium or Tribal organization representing more than one Tribe if each participating member Tribe meets the eligibility requirements for JOBS as defined in paragraph (a) of this section. Such organizations must also meet the following criteria:

(1) All the participating members must be in geographic proximity to one another. However, a consortium may operate in more than one State;

VOL
54
ISS
73
AP
18
1989
UMI

(2) The consortium must demonstrate that it has the managerial, technical or administrative staff with the ability to properly administer government funds, manage a JOBS program, and comply with the provisions of the Statute and of the regulations;

(3) The consortium must submit with its JOBS application a resolution from each participating Tribe authorizing the consortium to receive JOBS funds on behalf of each Tribe in its JOBS program.

(c) An Alaska Native Organization including any Alaska Native village, or regional or village corporation eligible to operate a Federal program under Public Law 93-638 (Indian Self-Determination and Education Assistance Act, 25 U.S.C. 450) or such group's designee. The boundaries of an Alaska Native organization are those of the geographical region, established pursuant to section 7(a) of the Alaska Native Claims Settlement Act, (85 Stat. 688) within which the Alaska Native organization is located.

§ 250.92 Selection criteria for eligible Alaska Native organizations.

(a) The Secretary may approve only one application from an Alaska Native organization for each of the 12 geographical regions established pursuant to section 7(a) of the Alaska Native Claims Settlement Act. The Department shall designate the Alaska Native grantee for each geographic region based on the following criteria:

(1) Previous experience in operating an effective employment and training program serving Indians and Native Alaskans;

(2) The number and kinds of activities of similar magnitude and complexity that the applicant has successfully completed; and

(3) The ability to provide services effectively to all eligible Native Alaskans residing in the region.

(b) In order to be approved an Alaska Native application must promote the efficient and nonduplicative administration of the JOBS program in the State of Alaska.

§ 250.93 Funding formula.

(a) A Tribal grantee's share of program funds will be calculated annually pursuant to § 250.71 and will be based on the following ratio:

(1) The number of adult members of the Indian Tribe receiving AFDC who live in the designated service area—defined as reservation only, the reservation plus adjacent counties, or the reservation plus adjacent land within a specified distance which would be reasonably accessible for Indian Tribal JOBS participants—compared to the total number of adult AFDC recipients in the State; or

(2) The number of adult Alaska Natives receiving AFDC who reside within the boundaries of the region which the organization represents to the total number of adult AFDC recipients in the State of Alaska.

(b)(1) The State IV-A agency and the Indian Tribe or Alaska Native organization must exchange available information on adult Tribal AFDC recipients needed to determine the eligible Tribal population and to define the designated service area, if other than the reservation or trust lands, as appropriate. State and Tribal representatives receiving such AFDC recipient data must follow standards of confidentiality to assure that recipient and Tribal privacy is protected pursuant to § 205.50.

(2) If sufficient data on adult AFDC members of a Tribe or of an Alaska Native organization are not available, the State IV-A agency and the Tribe or organization may enter into an agreement covering a mutually agreed upon estimated figure of the eligible Tribal population and the designated service area, as appropriate.

(3) If the State IV-A agency and the Tribe or organization cannot agree on the number of Tribal adult AFDC recipients and/or designated service area, the Secretary, in consultation with the Tribe or organization and State, will make the final determination of Tribal funding.

(c) A Tribal grantee is not required to match Federal funds.

§ 250.94 Program administration, implementation and operations.

(a) The Tribal grantee must designate a Tribal agency or department to administer the Tribal JOBS program.

(1) The designated agency or department will be responsible for the administration of the Tribal JOBS program including the requirements under 402(a)(19) and Part F of the Act.

(2) The responsibility for the administration of JOBS, pursuant to paragraph (a)(1) of this section, includes functional areas such as exemption and priority determinations (§ 250.30), orientation and referrals (§ 250.40), assessment and the development of the employability plan (§ 250.41), JOBS activities (§ 250.44 and § 250.94(e)), dispute resolution and hearings (§ 250.36). Certain other related functions are retained by the State IV-A agency. These include the imposition of sanctions as described in § 250.34 and the administration of provisions on child care (Part 255) and transitional child care services (Part 256).

(3) The designated agency or department may not delegate or contract out any functions which involve agency discretion, as detailed in § 250.10 of the regulations.

(b) The Tribe or organization may begin operating its JOBS program as of the first day of any quarter between July 1, 1989,and October 1, 1990, independent of the State's JOBS implementation date. If the Tribe or organization elects to begin operating its program before the State, during this interim time period:

(1) The Tribe or organization must guarantee necessary child care (without additional title IV-A funding for child care pursuant to Part 255) if it requires an individual to participate in its JOBS program.

(2) If the Tribe or organization cannot guarantee necessary child care as described in paragraph (b)(1) of this section, it cannot require an individual to participate in its JOBS program but may operate an entirely voluntary program.

(c) The Tribe or organization may not begin its JOBS program prior to approval of the Secretary. Final documentation for the application (meaning supplemental materials submitted after the initial April 13, 1989, application) must be sent to the Department at least 45 days prior to implementation of the Tribal program. This will allow sufficient time for the Department's review and approval.

(d)(1) Tribes or organizations shall not be subject to the specific requirements of § 250.12 of the regulations, but must coordinate program services with appropriate agencies as follows:

(i) The Tribal application with final documentation must be submitted to the State IV-A agency for its review and comment at least 30 days before submittal to the Secretary. The Tribe or organization shall consider comments made by the State IV-A agency in its application submitted to the Secretary.

(ii) The application with final documentation must also be made available to Tribal members for review and comment at least 30 days prior to submittal to the Secretary. The Tribe or organization must certify in its application that such public participation has taken place.

(2) To operate a JOBS program, the Tribe or organization must coordinate with the State IV-A agency to ensure that interrelated program functions are effectively performed. These functions include State responsibilities—such as providing to the Tribal grantee eligibility notifications and the necessary child care funds or services for Tribal participation—and Tribal responsibilities—such as notifying the State IV-A agency when Tribal members fail to participate without good cause.

(3) A Tribe or organization must consult and coordinate with other providers including those specified in paragraph (d)(4) of this section, to identify existing resources, prevent duplication of services and ensure that the maximum level of services is available to enable participants to achieve self-sufficiency.

(4) At a minimum, the Tribal grantee must consult and coordinate with:

(i) The Tribal agency responsible for JTPA, if applicable;

(ii) The Tribal agency responsible for other employment and training services, including those offered under the Bureau of Indian Affairs;

(iii) The Tribal agency responsible for education including any programs under the Bureau of Indian Affairs, the Department of the Interior, or under the Office of Indian Education, of the Department of Education.

(5) The Tribal grantee must consult with existing formal advisory councils, such as private industry councils, as appropriate, on the development of arrangements and contracts under JOBS, as described in § 250.12(d).

(6) The Tribal grantee must consult with private industry councils and Tribal Employment Rights Offices, as appropriate, to identify and obtain advice on the types of jobs available, or likely to become available, within a reasonable commuting distance from the Tribe's designated service area or the organization's boundaries. The Tribe or organization must ensure that JOBS provides training for the types of jobs which are, or are likely to become, available in or near its designated service area or organization's boundaries and that resources are not expended on training for jobs that are not likely to become available.

(e) Tribal programs are subject to the requirements of § 250.44 but are not subject to the requirements of § 250.45.

(1) A Tribal JOBS program must include all the mandatory components at § 250.44 unless the Tribe or organization can provide justification to show that such activities are inappropriate. A Tribe or organization's application must describe the types of activities and methods of delivery for each of the mandatory components.

(2) Tribal programs are not subject to the provisions at § 250.45 but must include at least one of the following components unless a Tribe or organization can provide justification to show that such activities are inappropriate:

(i) Group and individual job search, as described in § 250.80;

(ii) On-the-job training, as described in § 250.81;

(iii) Community work experience program, as described in § 250.83, or a work experience program as approved by the Secretary;

(iv) Work supplementation program, as described in § 250.82;

(v) Alternative education, training and employment activities which are not described in § 250.80, § 250.81, § 250.82 or § 250.83, as approved by the Secretary.

(A) Innovative approaches with the private sector are encouraged if they are consistent with the purpose of JOBS to assist AFDC recipients to avoid long-term dependency.

(B) JOBS funds may not be used for public service employment or for allowances other than for those required for supportive services as described in Part 255.

(3) Because the amount of the IV-A payment is an integral part of determining participation in work supplementation and community work experience programs, a Tribe or organization may operate these programs only if adequate agreements with the State IV-A agency are implemented. The agreements should cover operational procedures and the exchange of information, including grant levels and child support calculations for community work experience participants and earnings for work supplementation participants.

§ 250.95 Supportive services.

(a) The Tribal grantee must provide, pay for, or reimburse necessary supportive services (other than child care) pursuant to Part 255, including transportation and other work-related expenses, that the Tribe or organization determines are necessary to enable an individual to participate in JOBS.

(b) The State IV-A agency is responsible for guaranteeing child care for Tribal JOBS participants according to the provisions specified under Part 255.

(c) If the Tribe or organization is using child care funds or services provided by the State pursuant to paragraph (b) of this section, it must ensure, based on a method which is mutually acceptable to the State IV-A agency and Tribal grantee, that necessary child care is available when requiring an individual to participate in its program.

(d) If the Tribe or organization does not choose to use State funds or services for child care, it must provide (without additional title IV-A funding for child care) these funds or services in order to guarantee necessary child care when requiring an individual to participate.

(e) Once the State has implemented its JOBS program, the Tribe or organization, in order to require an individual to participate, must guarantee necessary child care either through the State IV-A agency, pursuant to paragraphs (b) and (c) of this section, or directly, pursuant to paragraph (d) of this section; but it may not operate an entirely voluntary JOBS program.

§ 250.96 Waiver authority.

The Secretary may waive any JOBS requirements set forth under titles IV-A and IV-F that he determines inappropriate for Tribal JOBS programs.

(a) The Secretary has determined that certain requirements of the Act are inappropriate for JOBS programs operated by Indian Tribes or Alaska Native organizations. They cover the following provisions or sections of the regulations:

(1) Section 250.10 (IV-A agency administration);

(2) Section 250.11 (Statewide requirement);

(3) Section 250.12 (Coordination and consultation);

(4) Section 250.20 (State plan requirements);

(5) Section 250.21 (State plan content);

(6) Section 250.33 (UP-16 hour rule);

(7) Section 250.45 (Optional components);

(8) Section 250.70 (a) and (b) (Allocation entitlement);

(9) Section 250.71 (b)(2) and (c) (Allotment);

(10) Section 250.72 (Maintenance of effort);

(11) Section 250.73 (Matching rates);

(12) Section 250.74 (Reduced matching rates including provisions relating to target groups);

(13) Section 250.81 (State data systems);

(14) Section 255.1 (c) and (h) (Supportive Services plan requirements);

(b) A Tribe or organization may request that the Secretary waive any other requirements of the Statute not listed under paragraph (a) of this section with proper justification. The Secretary will consider the appropriateness of such waivers on a case-by-case basis.

§ 250.97 Application requirements and documentation.

(a) As a condition of participation in the JOBS program, the designated Tribal agency or department responsible for administering the JOBS program must:

VOL 54 ISS 73 AP 18 1989 UMI

(1) No later than October 1, 1990, establish and operate a JOBS program under a JOBS application that has been approved by the Secretary before implementation and meets the requirements of Parts 250 and 255, as appropriate.

(2) Submit final documentation for the application to the Secretary for review and action at least 45 days prior to the anticipated implementation date. The Tribal grantee may not begin its JOBS program prior to the Secretary's approval pursuant to § 250.94(c).

(b) The Tribal application must be submitted to the State IV-A agency for comment at least 30 days prior to submittal to the Secretary. The application shall be made available to Tribal members for review and comment at least 30 days prior to submittal to the Secretary. Comments received shall be resolved by the Tribe or organization.

(c)(1) The Tribal grantee must submit an update of its JOBS application to the Secretary for approval at least every two years. The update shall be considered a new JOBS application and shall be submitted to the Secretary for approval at least 90 days prior to beginning of the next biennial period. The Tribal grantee must follow the public review and comment provisions in paragraph (b) of this paragraph.

(2) The update must consist of:

(i) Assurances regarding those parts of the Tribal JOBS application that remain unchanged;

(ii) A description of any changes in program operations including but not limited to changes in component activities; and

(iii) An estimate of the number of persons to be served by the program during the next biennium.

(3)(i) For all Tribal grantees the first biennial update must be submitted by July 1, 1992, for the period beginning October 1, 1992.

(ii) Each approved biennial update shall remain in force until formal action is taken (i.e. approval or disapproval) by the Secretary on the update for the following biennial period.

(d) The Tribal grantee shall submit proposed amendments to the approved application as necessary, and they shall be reviewed according to the process described at §§ 201.3(f) and 201.3(g).

(e) A Tribe or organization that submits an application, an amendment to an existing application, or a biennial update to its application that is not approvable will be given the opportunity to make revisions before formal disapproval; upon formal disapproval, a Tribe or organization may request a hearing pursuant to the process set forth in § 201.4 and Part 213.

(f) A Tribal applicant must submit documentation (which is in addition to the information requested in the application) covering the following items for the Secretary's review before final approval of the application can be determined:

(1) Assurances that the administering Tribal agency will have in effect a JOBS program which meets the requirements of section 402(a)(19) and title IV-F of the Act, unless waived by the Secretary, and including crossreferences to all appropriate statutory and regulatory requirements that the JOBS program will meet;

(2) A description of the administrative process and methods of delivery for:

(i) Providing program information under § 250.40;

(ii) Assessments pursuant to § 250.41;

(iii) Agency-participant agreements, if this option is elected;

(iv) Case management system (§ 250.43), if this option is elected;

(3) A description of the mandatory and elected optional component activities described under § 250.94(e) and the methods of delivery;

(4) A description of the selection and assignment criteria that will be used to refer participants to the various services and activities provided under the Tribal JOBS program;

(5) A description of the coordination processes with other programs, including any agreements with the State IV-A agency, Tribal JTPA agency, other employment and training agencies and educational agencies. Specify how these other agencies will track and report to the Tribe or organization on satisfactory participation and use of JOBS funds, if applicable;

(6) A description of how the administering Tribal agency will determine eligibility for work-related expenses such as clothing or transportation and other supportive services; a listing of the work-related expenses and the supportive services it will provide to its JOBS participants; the methods of delivering these supportive services; and

(7) A description of the conciliation and hearings procedures which meet the due process standards specified in proposed § 250.36, including notification to the State IV-A agency of formal decisions that a non-exempt Tribal member has failed to participate.

§ 250.98 Maintenance of effort for Indian Tribes and Alaska Native organizations.

Tribal programs are not subject to the requirements in § 250.72 but are subject to the following requirements:

(a) JOBS funds shall be used only for education, training and employment activities that are in addition to those which would otherwise be available to Tribal AFDC recipients in the absence of such funds.

(b) A Tribe or organization may contract for services only to the extent that such services are not otherwise available to AFDC Tribal recipients on a non-reimbursable basis.

Title 45, Chapter II, Code of Federal Regulations is amended by adding a new Part 255 to read as follows:

PART 255—CHILD CARE AND OTHER WORK-RELATED SUPPORTIVE SERVICES DURING PARTICIPATION IN EMPLOYMENT, EDUCATION, AND TRAINING

Sec.

255.0 Purpose.
255.1 State plan requirements.
255.2 Eligibility.
255.3 Methods of providing child care and other supportive services.
255.4 Allowable costs and matching rates.
255.5 Child care standards.
255.6 Uniform reporting requirements for child care.

Authority: Sections 402, 403 and 1102 of the Social Security Act as amended (42 U.S.C. 602, 603 and 1302).

§ 255.0 Purpose.

This part contains the regulations pertaining to child care and other supportive services for families receiving, and in some cases applying for, AFDC. State IV-A agencies must provide such services, under conditions specified below, to eligible families to allow participation in employment, education or training.

§ 255.1 State plan requirements.

A State IV-A agency operating a program under title IV-A must submit a Supportive Services plan to the Secretary which includes the following:

(a) The methods the State IV-A agency will use to provide child care in accordance with § 255.3.

(b) The dollar amount which the State IV-A agency establishes for limiting the amount of payment or reimbursement for child care, if the State IV-A agency elects pursuant to § 255.4(a)(1), to set an amount higher than the amount of the disregard at § 233.20(a)(11)(i).

(c) A description of the types of other supportive services and work-related expenses, including transportation, which will be available to participants in the JOBS program under Part 250, the monetary limits to be applied to each type of service or activity, and the basis for determining need for each type.

(d) A description of the priorities to be applied in determining when needed child care will be guaranteed for

accepting or maintaining employment and for education or training, including JOBS participation;

(e) An assurance that procedures are established to ensure that:

(1) Child care meets applicable standards of State and local law in accordance with § 255.5;

(2) Child care activities are coordinated in accordance with § 255.3(h); and

(3) Any entity providing child care allows parental access as required under § 255.4(c)(1).

(f) An assessment of the availability of child care services provided on a non-reimbursable basis by Federal, State and local sources other than title IV-A.

(g) Specification of a State IV-A agency's policies on interim child care and other supportive services as provided in § 255.2(d).

(h) Specification of a State IV-A agency's policy on provision of one-time work-related expenses in accordance with § 255.2(g), including:

(1) The types of any such expense; and

(2) The monetary limits to be applied to such benefits.

(i) A description of the methodology used for setting local market rates pursuant to § 255.4(a)(2). Such methodology must address rates established for each type of care (i.e., center, group family day care, family day care, and in-home care) provided. The plan must address variations in the costs of care for infants, toddlers, preschool and school-age children, whether care is full or part-time, and reduction in the cost of care for additional children in the same family if such variations exist. The rates must be submitted to the Family Support Administration Regional Office and must be updated periodically, but no less than biennially.

(j) A description of how the State will assure that sufficient child care will be available to meet the participation rates in § 250.74.

(k) In States where Tribal entities are directly funded to operate a JOBS program, a description of how the State will provide child care services for JOBS participants served by those Tribal entities.

(l) An assurance that child care provided or claimed for reimbursement is reasonably related to the hours of participation or employment.

§ 255.2 Eligibility.

(a) The State IV-A agency must guarantee child care for a dependent child under age 13, or who is physically or mentally incapable of caring for himself or herself, as verified by the State consistent with the verification requirement at § 250.30(b)(3), (and for a child who would be a dependent child except for the receipt of benefits under Supplemental Security Income under title XVI or foster care under title IV-E), to the extent that such child care is necessary to permit an AFDC eligible family member to:

(1) Accept employment or remain employed; or

(2) Participate in an education or training activity (including participation in the JOBS program under Part 250) if the State IV-A agency approves the activity and periodically (but not less then every three months) determines that the individual is satisfactorily participating in the activity. An approved activity is one that is consistent with the individual's employability plan.

(b) The guarantee under paragraph (a) of this section also applies to American Indians and Alaska Natives who are subject to participation requirements under Subpart J of Part 250, consistent with the requirement in paragraph (f) of this section.

(c) The State IV-A agency must provide, pay for, or reimburse for transportation and other work-related expenses (including other work-related supportive services) which it determines are necessary to enable an individual to participate as required in the JOBS program under Part 250.

(d) The State IV-A agency may provide for child care and other necessary supportive services for a period of up to two weeks for an individual who is waiting to enter an approved education, training, employment, or JOBS component.

(e) The State IV-A agency must provide child care and supportive services necessary for applicants to participate in job search pursuant to § 250.60 and in other activities to prepare them for participation in the JOBS program, if such participation is required.

(f) The State IV-A agency must make child care services available to recipients who are participating in a JOBS program operated by an Indian Tribe or Alaska Native organization, pursuant to §§ 250.94 and 250.95. Child care services, which are also appropriate in meeting any special needs of Tribal participants, must be made available on an equitable basis. To the extent it is appropriate, the same range of reimbursement methods must be available to Tribal JOBS participants as are available to participants in the State JOBS program.

(g) The State IV-A agency may provide one-time work-related expenses to an applicant or recipient so that she may accept or maintain employment.

(h) AFDC applicants and recipients are entitled to hearings under the provisions of §§ 205.10 or 250.36, as appropriate, on issues concerning the denial of, prompt issuance of, or intended actions to discontinue, terminate, suspend or reduce assistance under this Part. However, changes in the manner of payment are not subject to timely notice requirements, and the provisions of § 205.10(a)(6) regarding aid paid pending a hearing do not apply.

§ 255.3 Methods of providing child care and other supportive services.

(a) The State IV-A agency may use any of the following methods for guaranteeing the availability of child care:

(1) Providing the care directly;

(2) Arranging the care through providers by use of purchase of service contracts or vouchers;

(3) Providing cash or vouchers in advance to the caretaker relative in the family;

(4) Reimbursing the caretaker relative in the family;

(5) Arranging with other agencies and community volunteer groups for non-reimbursed care;

(6) Using the child care disregard as provided in § 233.20(a)(11)(i); or

(7) Adopting such other arrangements as the State IV-A agency deems appropriate.

(b) In arranging for child care, the State IV-A agency must take into account the individual needs of the child, including the reasonable accessibility of the care to the child's home and school, or caretakers' place of employment or training, and the appropriateness of the care to the age and special needs of the child.

(c) If more than one type of child care is available, e.g., center, group family care, family day care or in-home care, the caretaker relative must be provided an opportunity to choose the arrangement. The State IV-A agency may select the method of payment under paragraph (a) of this section.

(d)(1) An individual required to participate under Part 250 may refuse available appropriate child care as determined by the State IV-A agency, if she can arrange other child care or can show that such refusal will not prevent or interfere with participation in approved education or training activities (including JOBS) or employment.

(2) The State IV-A agency must establish at least one method by which self-arranged child care can be paid.

VOL 54 ISS 73 AP 18 1989 UMI

(e)(1) If a State IV–A agency chooses to meet the cost of child care through a method other than use of the child care disregard at § 233.20(e)(11)(i), the State IV–A agency must then determine AFDC eligibility and payment amount without this disregard, except for families described in paragraph (e)(2) of this section.

(2) In the case of a family which was receiving AFDC on October 13, 1988, based on application of the child care disregard at § 233.20(a)(11)(i), if such a family would be disadvantaged as a result of meeting the cost of child care other than through the child care disregard, the State is prohibited from choosing such alternate method of payment.

(f) For cases subject to retrospective budgeting, for the first and second months of employment, the State IV–A agency may meet the cost of child care directly or through reimbursement and apply the child care disregard at § 233.20(a)(11)(i) to offset income received in those months when used to determine the amount of the AFDC payment for the corresponding payment months. The State IV–A agency's payment shall not be counted as income or resources for any month. Under these circumstances, a State IV–A agency may not apply the disregard to income used to determine the amount of the payment for the month(s) following the month in which child care ceases.

(g) The State IV–A agency may assure the availability of necessary transportation and other work-related expenses (including other work-related supportive services) through direct provision, or payment, or reimbursement of costs consistent with its Supportive Services plan.

(h) Each State IV–A agency must coordinate its child care activities with existing early childhood education programs in the State, including Head Start programs, preschool programs funded under Chapter 1 of the Education Consolidation and Improvement Act of 1981, and school and nonprofit child care programs (including community-based organizations receiving funds designated for preschool programs for handicapped children).

§ 256.4 Allowable costs and matching rates.

(a) FFP is available for the actual cost of child care up to a statewide limit established by the State IV–A agency in its State Supportive Services plan, but not for more than the applicable local market rate.

(1) In setting the statewide limit, the State IV–A agency may choose the amount of the child care disregard at § 233.20(a)(11)(i), or some higher amount.

(2) The applicable local market rates must be determined:

(i) Based on representative samples of child care providers;

(ii) For areas no larger than political subdivisions; and

(iii) Based on the 75th percentile cost of such types of care in the local areas.

(3) Local market rates must:

(i) Be established for center care, group family care, family day care, and in-home care;

(ii) Differentiate among care for infants, toddlers, pre-school and school-age children, where applicable;

(iii) Differentiate between full-time and part-time care, if applicable; and

(iv) Consider reductions in the cost of care for additional children in the same family.

(b)(1) Except for Puerto Rico, Guam, the Virgin Islands, and American Samoa, in the case of amounts expended for child care, FFP shall be at the Federal medical assistance (Medicaid) rate and is included in the title IV–A general program entitlement.

(2) For Puerto Rico, Guam, the Virgin Islands, and American Samoa, the rate is 75 percent and is included in the JOBS limit of entitlement.

(c) FFP is available only if:

(1) The entity providing the care allows parental access; and

(2) The care meets applicable standards of State and local law.

(d) In the case of amounts expended for transportation and other work-related expenses and supportive services for eligible individuals, FFP shall be at the rate of 50 percent and is subject to the annual limit of entitlement, pursuant to § 250.73(b)(1).

(e) The State IV–A agency is not permitted to provide payment for child care or any other supportive service or work-related expense as an AFDC special need pursuant to § 233.20(a)(2)(v)(B)(2).

(f) No Federal matching is available for the recruitment or training of child care providers, resource development, or licensing activities.

(g) The matching rate for child care administrative costs under this part is 50 percent and, except for the Puerto Rico, Guam, the Virgin Islands, and American Samoa, the amount is outside the funding limitation for JOBS.

(h) The State IV–A agency must take reasonable precautions to guard against fraud and abuse in the funding of child care costs.

(i)(1) Federal matching funds improperly claimed for child care services or administration are subject to disallowance under Part 201. If the State IV–A agency disagrees with the decision to disallow FFP, it can appeal under existing IV–A procedures, including review of the Departmental Appeals Board in accordance with Part 16 of these regulations.

(2) Financial reporting of child care expenditures is generally subject to the requirements of the existing regulations at § 201.5.

(3) Child care expenditures are generally subject to the requirements of Part 201, including the provisions at § 201.5(e) (regarding the applicability of most of the requirements of Part 74 to the administration of grants to States), the provisions at Subpart B (regarding review and audits), and the provisions of § 201.67 (regarding treatment of uncashed or cancelled checks).

§ 255.5 Child care standards.

(a) The State IV–A agency must establish procedures to ensure that center-based child care will be subject to applicable standards of State and local law including those designed to ensure basic health, safety protection, and fire safety. Such standards must be made available upon request by the Secretary.

(b) The State must also endeavor to develop guidelines for family day care if it has not already done so.

§ 255.6 Uniform reporting requirements for child care.

Each State IV-A agency shall be required to provide such child care information and data as are determined to be necessary by the Secretary to ensure the effective implementation of the provisions under this part and Part 250. The uniform reporting requirements include, at a minimum, the average monthly number of families served, the types of such families, the amounts expended with respect to families assisted, and the length of time for which such families are assisted. The information and data for these families shall be separately stated with respect to families who have earnings and those who do not, and with respect to families who are receiving aid under the State IV-A plan and those who are not.

Title 45, Chapter II, Code of Federal Regulations is amended by adding a new Part 256 to read as follows:

PART 256—TRANSITIONAL CHILD CARE

Sec.
256.0 Purpose.
256.1 State plan requirements.
256.2 Eligibility.
256.3 Fee requirement.
256.4 Other provisions.

Authority: Section 402, 403 and 1102 of the Social Security Act as amended (42 U.S.C. 602, 603 and 1302).

§ 256.0 Purpose.

This part contains the regulations pertaining to child care available to families whose eligibility for AFDC assistance has ceased due to increased hours of, or earnings from, employment or as a result of the loss of income disregards due to the expiration of the time limits at § 233.20(a)(11).

§ 256.1 State plan requirements.

(a) The State Supportive Services plan specified under § 255.1 must include a description of:

(1) The methods the State IV-A agency will use to provide extended child care; and

(2) The sliding fee scale under which families will contribute toward the cost of child care.

(b) A State IV-A agency which has not implemented a JOBS program as of April 1, 1990 must submit a Supportive Services plan for transitional care which includes the provisions described in this part and the provisions at § 255.1 which apply to transitional child care (i.e., paragraphs (b), (d), (e), (f), (i) and (l)).

§ 256.2 Eligibility.

(a) The State IV–A agency must guarantee child care for a child who is under age 13 or who is physically or mentally incapable of caring for himself or herself, as verified by the State consistent with the verification requirement at § 250.30(b)(3), and who would be a dependent child, if needy (and for a child who would be a dependent child except for the receipt of benefits under Supplemental Security Income under title XVI or foster care under title IV-E), to the extent that such care is necessary to permit a member of an AFDC family to remain employed.

(b) A family is eligible for transitional child care provided the following conditions are met:

(1) The family must have ceased to receive AFDC as a result of increased hours of, or increased income from, employment or the loss of income disregards due to the time limitations at § 233.20(a)(11);

(2) The family must have received AFDC in at least three of the six months immediately preceding the first month of ineligibility; and

(3) The family must apply for transitional child care benefits in writing. There is no eligibility for benefits prior to the month of application.

(c) Eligibility for transitional child care begins with the first month for which the family is ineligible for AFDC, for the reasons included in paragraph (b)(1) of this section, and continues for a period of 12 consecutive months. Families may begin to receive child care in any month during the 12-month eligibility period.

(d) The family is not eligible for child care under this part for any remaining portion of the 12-month period if the caretaker relative:

(1) Terminates employment without good cause, as defined in § 250.35; or

(2) Fails to cooperate with the State IV–A agency in establishing payments and enforcing child support obligations, as defined in § 232.12.

(e) If the caretaker relative loses a job with good cause, and then finds another job, the family can qualify for the remaining portion of the 12-month eligibility period.

§ 256.3 Fee requirement.

(a) The State IV–A agency must require each family receiving transitional child care to contribute toward the payment for such care based on the family's ability to pay.

(b) In accordance with limits established by the Secretary, each State IV–A agency shall establish a sliding fee scale which will include minimum income levels at which fees will be assessed, the income levels at which full costs will be charged to the family, and the proportional share of the costs for families with intermediate levels of income.

(c) A State IV–A agency may vary the period of collection for different fee levels.

(d) In cases where the family's contribution under this section is paid to the State IV–A agency, such contribution is subject to the program income requirements in Part 74, Subpart F.

(e) Individuals who fail to cooperate in paying required fees will, subject to appropriate notice and hearings requirements, lose eligibility for benefits under this part for so long as back fees are owed, unless satisfactory arrangements are made to make full payment.

§ 256.4 Other provisions.

(a) The State IV–A agency, in providing transitional child care, must meet the requirements in §§ 255.3 (a), (b), (c), and (f), 255.5, and 255.6, pertaining to the methods of providing child care, child care standards, disallowances, coordination, services to Indians and Alaska Natives and uniform reporting requirements.

(b) The provisions on child care costs and matching rates at § 255.4 shall apply to this part, except in the case of Puerto Rico, Guam, the Virgin Islands, and American Samoa, child care expenditures under this part are not covered as JOBS expenditures, but as expenditures subject to the limitation under section 1108 of the Act.

(c) The State IV–A agency must notify all families of their potential eligibility for transitional child care services under this part in writing, and orally as appropriate, at the time they become ineligible for AFDC. The notification must include information on the steps they must take to establish eligibility for benefits and the consequences of failing to apply promptly, i.e., the loss of benefits for any month prior to the month of application.

(d) Provision of benefits under this part are subject to the notice and hearings provisions at § 205.10, except that timely notice requirements do not apply to changes in the manner of payment.

Listing of Major Defense Systems; Notice

VOL 54 ISS 73 AP 18 1989 UMI

Billing Code 3810-01

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Contracting; Reporting Procedures on Defense Related Employment.

AGENCY: *Office of the Secretary, DOD.*

ACTION: *Listing of Major Defense Systems.*

SUMMARY: *This rule is the fiscal year 1989 listing of major defense systems under 10 U.S.C. §§ 2397, 2397b, and 2397c. This part is published to assist present and former DOD employees, Agency Ethics Officials and Defense contractors in complying with their obligations under these sections of the United States Code.*

EFFECTIVE DATE: *September 30, 1988.*

FOR FURTHER INFORMATION CONTACT: *Lt. Col. John R. Shaughnessy, Standards of Conduct Office, Room 1E461, The Pentagon, D.C. 20301-1600. Telephone (202) 697-5305.*

Title 3—

The President

Proclamation 5956 of April 14, 1989

Education Day, U.S.A., 1989 and 1990

By the President of the United States of America

A Proclamation

Ethical values are the foundation for civilized society. A society that fails to recognize or adhere to them cannot endure.

The principles of moral and ethical conduct that have formed the basis for all civilizations come to us, in part, from the centuries-old Seven Noahide Laws. The Noahide Laws are actually seven commandments given to man by God, as recorded in the Old Testament. These commandments include prohibitions against murder, robbery, adultery, blasphemy, and greed, as well as the positive order to establish courts of justice.

Through the leadership of Rabbi Menachem Schneerson and the worldwide Lubavitch movement, the Noahide Laws—and standards of conduct duly derived from them—have been promulgated around the globe.

It is fitting that we honor Rabbi Schneerson and acknowledge his important contributions to society. Our great Nation takes just pride in its dedication to the principles of justice, equality, and truth. Americans also understand that we have a responsibility to inspire the same dedication in future generations. We owe a tremendous debt to Rabbi Schneerson and to all those who promote education that embraces moral and ethical values and emphasizes their importance.

In recognition of Rabbi Schneerson's vital efforts, and in celebration of his 87th birthday, the Congress, by House Joint Resolution 173, has designated April 16, 1989, and April 8, 1990, as "Education Day, U.S.A." and has authorized and requested the President to issue an appropriate proclamation in observance of these days.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim April 16, 1989, and April 8, 1990, as Education Day, U.S.A. I invite Governors from every State and Territory, community leaders, teachers, and all Americans to observe these days through appropriate events and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this fourteenth day of April, in the year of our Lord nineteen hundred and eighty-nine, and of the Independence of the United States of America the two hundred and thirteenth.

George Bush

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 54 FR 12345.

THE FEDERAL REGISTER
WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC
WHEN: May 23; at 9:00 a.m.
WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC
RESERVATIONS: 202-523-5240

ST. LOUIS, MO
WHEN: May 23; at 9:00 a.m.
WHERE: Room 1612, Federal Building, 1520 Market Street, St. Louis, MO
RESERVATIONS: Call the Federal Information Center, St. Louis: 314-425-4106 Missouri (outside St. Louis): 1-800-392-7711 Kansas: 1-800-432-2934

Rules and Regulations

Federal Register
Vol. 54, No. 74
Wednesday, April 19, 1989

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89–NM–51–AD; Amdt. 39–6197]

Airworthiness Directives; Aerospatiale Model ATR–42 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Aerospatiale Model ATR–42 series airplanes, which prohibits use of the autopilot when operating in icing conditions. This amendment is prompted by an incident in which an Aerospatiale Model ATR–42 airplane operating in icing conditions experienced an autopilot disconnect and roll excursions. This condition, if not corrected, could lead to loss of control of the airplane.

EFFECTIVE DATE: May 3, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Robert McCracken, Standardization Branch, ANM–113; telephone (206) 431–1979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: The FAA has recently received a report of uncommanded autopilot disconnect occurring on Aerospatiale Model ATR–42 series airplane while operating in icing conditions, resulting in roll excursions up to 80 degrees. In this incident, it was reported that ice buildup and asymmetric wing lift may have been masked due to use of the autopilot. This condition, if not corrected, could lead to loss of control of the airplane.

This airplane model is manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, this AD requires a revision to the FAA-approved Airplane Flight Manual (AFM) which prohibits use of the autopilot when operating in icing conditions. This is considered to be interim action until final action is identified, at which time the FAA may consider further rulemaking to address it.

Since a condition exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Aerospatiale: Applies to Model ATR–42 series airplanes, certificated in any category. Compliance is required within 10 hours time-in-service after the effective date of this AD.

To minimize the potential hazards associated with operating in icing conditions, accomplish the following:

A. Incorporate the following into the Limitations Sections of the FAA-approved Airplane Flight Manual (AFM). This may be accomplished by including a copy of this AD in the AFM.

"When operating in icing conditions, as defined in AFM, or when freezing rain is forecast or reported, use of the autopilot is prohibited.

WARNING

Prolonged operation in freezing rain should be avoided. Ice accretion due to freezing rain may result in asymmetric wing lift and associated increased aileron forces necessary to maintain coordinated flight. Whenever the aircraft exhibits buffet onset, uncommanded roll, or unusual control wheel forces, immediately reduce angle-of-attack and avoid excessive maneuvering."

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM–113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM–113.

This amendment becomes effective May 3, 1989.

Issued in Seattle, Washington, on April 7, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89–9333 Filed 4–18–89; 8:45 am]

BILLING CODE 4910–13–M

VOL 54 ISS 74 AP 19 1989 UMI

14 CFR Part 39

[Docket No. 88-NM-39-AD; Amdt. 39-6192]

Airworthiness Directives; Airbus Industrie Models A300, A310, A300-600 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to Airbus Industrie Models A300, A310, A300-600 series airplanes, which requires inspection of the engine fire extinguisher bottles for an electrical grounding defect and repair, if necessary. This amendment is prompted by reports that during production there was insufficient electrical bonding between the engine firex bottle cartridge and the airplane structure. This condition, if not corrected, could result in the inability to actuate the fire extinguisher bottle when needed.

EFFECTIVE DATE: May 1, 1989.

ADDRESSES: The applicable service information may be obtained from Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Greg Holt, Standardization Branch, ANM-113; telephone (206) 431-1918. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: The Direction Générall de L'Aviation Civile (DGAC), which is the airworthiness authority of France, has notified the FAA of an unsafe condition which may exist on Airbus Industrie Models A300, A310, and A300-600 series airplanes. There has been a report that during production there was insufficient electrical bonding between the engine firex bottle cartridge and the airplane structure. This condition, if not corrected, could result in the inability to actuate the fire extinguisher bottle when needed.

Airbus Industrie has issued All Operator Telex (AOT) 26/88/01, which describes procedures for inspecting the engine fire extinguisher bottles for electrical bonding defects, and repair, if necessary. The DGAC has classified AOT 26/88/01 as mandatory and has issued Airworthiness Directive 88-181-069(B) addressing this subject.

These airplane models are manufactured in France and type certificated in the United States under the provisions of Section 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of the same type design registered in the United States, this AD requires inspection of the engine fire extinguisher bottles for an electrical bonding defect, and repair, if necessary, in accordance with the Airbus All Operator Telex described above.

Since a condition exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Airbus Industrie: Applies to Model A300 series airplanes, on which Modification 1988 has been accomplished (Post Service Bulletin A300-54-022), and all Model A310 and A300-600 equipped with Walter Kidde or APCO fire extinguisher bottles, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent the inability to actuate the fire extinguisher bottles, accomplish the following:

A. Within 10 days after the effective date of this AD, inspect the engine fire extinguishers for an electrical bonding defect in accordance with Airbus All Operator Telex (AOT) 26/88/01. If defects are found, repair prior to further flight, in accordance with the AOT.

B. Whenever the fire extinguishers bottles are replaced, perform the inspection required by paragraph A., above.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM-113.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the inspection/modification required by this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to Airbus Industrie, Airbus Support Division Avenue Didier Daurat, 31700 Blagnac, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective May 1, 1989.

Issued in Seattle, Washington, on April 4, 1989.

Steven B. Wallace,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89-9336 Filed 4-18-89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 88-NM-160-AD; Amdt. 39-6194]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Boeing Model 737 series airplanes, which requires that protruding head solid fasteners be installed in the upper row of all lap splices in the fuselage and in the two rows of Stringer 17. This amendment is prompted by reports of cracking on Boeing Model 737 airplanes from which the FAA has determined that widespread multiple site cracking cannot be reliably detected over the long term by visual or other non-destructive inspection (NDI) techniques. This action is necessary to ensure that undetected widespread cracking is minimized in these fuselage skins. Cracks, if allowed to grow undetected, could lead to structural failure and rapid decompression of the airplane.

EFFECTIVE DATE: May 19, 1989.

ADDRESSES: The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara J. Mudrovich, Airframe Branch, ANM-120S; telephone (206) 431-1927. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive, applicable to Boeing Model 737 series airplanes, which requires accomplishment of a terminating modification on all lap splices and along Stringer 17, which includes installation of protruding head solid fasteners, was published in the Federal Register on November 1, 1988 (53 FR 44163).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

The Air Transport Association (ATA) of America, commenting on behalf of its members, suggested that the proposal be withdrawn or the compliance times extended because the proposed short compliance times are not justified by one report by one operator of a 12-inch crack found in an area of a previous repair. The FAA does not concur. Although the report of a 12-inch crack in an area inspected 6 months prior to discovery further emphasizes the FAA's determination that widespread cracking in lap splices cannot be adequately maintained by inspection, the FAA's proposal is based primarily on the numerous reports of cracking received. The FAA has determined that rivet replacement will eliminate the risk of undetected cracks joining, which can result eventually in an uncontrolled decompression of the airplane. This AD action is, therefore, both justified and appropriate.

As a result of extensive FAA efforts following the accident in Hawaii in April 1988, which involved a Model 737 series airplane, it became apparent that widespread, multi-site cracking was not being discovered to the degree of assurance necessary to maintain safety of the aging transport airplane fleet. This, coupled with a better understanding of the human factors associated with numerous repetitive inspections, has caused the FAA to place less emphasis on repetitive inspections and more emphasis on material replacement. Thus, as aircraft begin to show the signs of multi-site damage and other indications of structural aging, the FAA has decided to require airplane modifications necessary to remove the source of the particular aging phenomenon. This is in lieu of the previous position of continual inspection and repair/modification on condition if cracks are found. This final rule is in consonance with that policy decision.

Two operators requested that the compliance time for accomplishment of the terminating modification in the area between body station (BS) 259 and BS 360 be extended to 4 years or 80,000 flight cycles, whichever occurs first, based on the minimal reports of cracking in this area and reduced load levels. The FAA concurs with the commenters and has determined that, because of the lesser loads in this area, the modification can be delayed without adversely impacting safety. Paragraph B. of the final rule has been revised accordingly. The FAA has determined that this change will neither increase the economic burden on any operator nor expand the scope of the AD.

Two operators requested that the compliance time be extended so that the modification may be accomplished at the first heavy maintenance visit after the accumulation of 70,000 flight cycles. The FAA does not concur. In light of the fact that there have been reports of multiple site cracking on airplanes with as low as 45,000 flight cycles, the FAA has determined that extension of the proposed compliance time for modification, as requested, cannot be justified.

One operator requested that the compliance time be extended so that the modification may be accomplished within 15 months following inspection with high frequency eddy current. The FAA does not concur. The FAA has determined that, due to evidence of widespread cracking, the integrity of the lap splices cannot be assured by currently required inspection techniques, which have not been successful in some cases. For this reason, an aggressive schedule to modify the splice configuration, regardless of inspections previously accomplished, is necessary.

One operator commented that the proposed rule should only apply to the lap splices at Stringers 4 and 10. The FAA does not concur with the commenter, since evidence of multiple site cracking has been reported at lap splices other than at Stringers 4 and 10. Additionally, all splices have the potential for structural failure if widespread cracking is allowed to remain undetected.

Transport Canada commented that the terminating modification has not been shown to be adequate. The FAA does not agree with this commenter. The terminating modification will correct the basic design inadequacy of the lap joints by removing the knife edge due to countersunk fastener installations. Further, the designed fail-safe capability will be verified by assurance of the tearstrap bond, as required by paragraphs A.1. and A.2.

Transport Canada also questioned the rationale of the proposed schedule. The FAA chose a schedule that would aggressively minimize the potential for future structural failure or rapid decompression due to lap splice multiple site cracking. The proposal requested comments on more appropriate schedules and received various comments. As noted above, the proposed schedule has been revised due to one of the comments received on this subject.

One operator commented that the problems associated with fairing clearance and installation of protruding head fasteners need to be resolved. The FAA has determined that the lap splice

VOL 54 ISS 74 AP 19 1989 UMI

modification will not be compromised due to fairing interference. The manufacturer has developed fairing rework instructions to resolve this problem, and will revise its service bulletin instructions to add these instructions.

One operator requested that any alternate means of compliance approved for the terminating modification of AD 88-22-11, Amendment 39-6059 (53 FR 44163; November 1, 1988) should be approved for the proposed rule as well. AD 88-22-11 requires external and internal inspections of the skin along certain fuselage skin lap joints and bonded doublers; the terminating action provided for in that AD is identical to the modification required by the proposed rule. The FAA concurs and has revised paragraph E. of the final rule to specify that accomplishment of the requirements of this AD constitutes terminating action for the requirements of AD 88-22-11, and that any alternate means of compliance previously granted as terminating action for AD 88-22-11 is considered approved alternate means of compliance for this AD as well.

Paragraph A.2. of the final rule has been revised to clarify that the area where tearstraps must be assured to be functional is "one bay above and below S-17;" the Notice had inadvertently specified this area as "two bays above and one bay below S-17."

Paragraph C. of the final rule has been clarified to specify the referenced subparagraph of paragraph A. as "A.1."

Paragraph D. of the Notice incorrectly referenced Boeing Service Bulletin 737-53-1069, Revision 1, as one source for repair procedures for cracks found in the skin along the lap joints. That reference has been deleted from this paragraph in the final rule.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule, with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator, nor will they increase the scope of the AD.

There are approximately 291 Model 737 series airplanes of the affected design in the worldwide fleet. It is estimated that 100 airplanes of U.S. registry will be affected by this AD, that it will take approximately 2,016 manhours per airplane to accomplish the required modifications, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $8,064,000.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities, because few, if any, Model 737 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 737 series airplanes, line numbers 001 through 291, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent decompression of the airplane, accomplish the following:

A. In accordance with the schedule set forth in paragraph B. of this AD:

1. Accomplish the terminating repair at all lap joints between BS 259 and BS 1016, which includes replacing all upper row fasteners with standard protruding head solid fasteners and assuring the tearstraps are functional 2 bays above and 1 bay below each lap joint, by the use of mechanical fasteners where disbonding of the tearstraps has occurred, in accordance with Boeing Alert Service Bulletin 737-53A1039, Revision 4, dated April 14, 1988.

2. Accomplish the preventative modification as described in Boeing Service Bulletin 737-53-1069, Revision 1, dated October 13, 1988, along S-17, using standard protruding head solid fasteners and assure the tearstraps are functional 1 bay above and below S-17, by the use of mechanical fasteners where disbonding of the tearstraps has occurred, in accordance with the Structural Repair Manual.

B. Airplanes are to be modified as required by paragraph A., above, in accordance with the following times after the effective date of this AD:

1. For fuselage structure between BS 360 and BS 1016:

Number of landings on effective date of this AD	Modify within the next:
70,000 or more	6 months.
60,000 to 69,999	12 months.
50,000 to 59,999	18 months.
40,000 to 49,999	24 months.
Less than 40,000	36 months.

2. For fuselage structure between BS 259 and BS 360, accomplish the modifications prior to a. or b., below, whichever occurs later:

a. the accumulation of 80,000 flight cycles or 4 years after the effective date of this AD, whichever occurs first; or

b. one year after the effective date of this AD.

C. For airplanes on which the procedure described in paragraph A.1., above, has been accomplished in accordance with Part IV, A.2, of Boeing Alert Service Bulletin 737-53A1039, Revision 4, dated April 14, 1988, within 15 months after accomplishment, or within 6 months after the effective date of this AD, whichever occurs later, perform an external visual inspection of the skin for corrosion and delamination at all lap joints in accordance with that service bulletin. If corrosion is found, prior to further flight, perform a low frequency eddy current inspection of the entire length of the affected panel to determine material loss. If cracks are found, prior to further flight, perform a high frequency eddy current inspection of the entire length of the affected skin panel for cracks in accordance with the service bulletin. Repair cracks, corrosion, and delamination, prior to further flight (except as permitted by paragraph D., below), in accordance with the service bulletin. Inspections are to continue at intervals not to exceed 15 months.

D. If corrosion found as a result of the external inspection does not exceed 10% of the skin thickness, reinspect for corrosion in accordance with paragraph C., above, at intervals not to exceed 2,250 cycles or 6 months, whichever occurs first, until a repair is accomplished. If such corrosion exceeds 10% of skin thickness or if cracking is found, repair prior to further flight, in accordance with Boeing Alert Service Bulletin 737-53A1039, Revision 4, dated April 14, 1988. Following such repair, resume inspections in accordance with paragraph C., above.

E. Accomplishment of the requirements of this AD constitutes terminating action for the

requirements of AD 88-22-11, Amendment 39-6059, and is equivalent to the terminating modification therein. Any alternate means of compliance issued for that amendment are considered approved for this amendment.

F. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

G. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective May 19, 1989.

Issued in Seattle, Washington, on April 10, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89-9335 Filed 4-18-89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 88-ANE-21; Amdt. 39-6102]

Airworthiness Directives; Davis Aircraft Products Company, Inc., Safety-Belts, FDC 6400B Series (90° Release Type) Black "Ultem" (Plastic) Latch-Cover

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires inspection and, if necessary, replacement of certain Davis Aircraft Products Co., Inc., safety-belts. Also, certain typographical errors involving part numbers (P/N's), which appeared in the NPRM, have been corrected. The AD is needed to prevent safety-belts from becoming difficult to release, with possible jamming of the buckle release mechanism, resulting in a dangerous condition during an emergency evacuation of an aircraft.

DATES:

Effective—May 24, 1989

Compliance—As required in the body of the AD.

ADDRESSES: The applicable service information may be obtained from Davis Aircraft Products Co., Inc., 1150 Walnut Ave., P.O. Box 525 Bohemia, New York 11716.

A copy of the applicable service information is contained in the Rules Docket, Docket No. 88-ANE-21, at the Federal Aviation Administration, New England Region, Office of the Assistant Chief Counsel, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. C. Kallis, Systems and Equipment Branch, ANE-173, New York Aircraft Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581; telephone (516) 791-6427.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD which requires that certain Davis Aircraft Products Company, Inc., safety-belts be inspected, and if necessary, replaced, was published in the Federal Register on June 14, 1988 (53 FR 22181).

The proposal was prompted by an FAA determination that certain FDC-6400B series (90° release type) black "Ultem" (plastic) latch-covers on the Davis Aircraft Products Company, Inc., safety-belt buckles have been cracking and creating difficulty in releasing the belt. This condition if not corrected could result in jamming of the buckle-release mechanism, when belt removal is required during an emergency evacuation of an aircraft.

Davis Aircraft Products Co., Inc., has issued recall (Service Bulletin No. 1, dated January 29, 1988) notices to all known operators who have purchased these safety-belts with the black "Ultem" latch-covers (90° release type), requesting them to check for certain part numbers designated on the labels and to return affected safety-belts to Davis Aircraft Products Co., Inc., for replacement at no charge for the rework and parts.

Interested persons have been afforded an opportunity to participate in the making of this amendment and due consideration has been given to all the comments received. Only one comment was received and the commenter responded with two objections. The first objection pertained to the statement in the supplementary information section of the NPRM that "wear" is the cause for the malfunctioning buckles. The commenter believes that, because of misuse in not fully engaging the release mechanism, excessive force is exerted on the plastic latch-cover. The second objection expressed by this commenter was that, in the summary section of the NPRM, it is not clear that the subject safety-belts are specifically the FDC-6400B series (90° lift to release) with black "Ultem" (plastic) latch-covers.

The FAA agrees with the commenter that, when the buckle latch-release is not fully engaged, excessive force will be imposed by the metallic adapter against the plastic covers. However, it is this excessive force that eventually creates wear and subsequent sticking or jamming of the mechanism upon releasing the belt.

Pertaining to the second objection from this commenter, the summary section of the NPRM serves the purpose of informing readers of the subject matter in brief and general terms; details are not addressed in this section, but rather left for the supplementary information section of the NPRM. In that respect, the NPRM mentions that the subject buckles are of a black "Ultem" (90° release type) plastic, and also in the effectivity of the AD the FDC-6400B series safety-belts are specifically called out.

The following typographical errors were noticed in the NPRM and are being corrected: P/N's FDC-6400B-29-1, FDC-6400B-29B-1, FDC-6400B-85-1, and FDC-6400B-90-1 should not reflect the -1 the end of the numbers, because the -1 suffix number at the end of the P/N is reserved to designate approved belts on the FAA/TSO metallic tag. Part Numbers FDC-6400B-63-50 and FDC-6400B-63-50, in consecutive order, should be FDC-6400B-63-507 and FDC-6400B-63-508. Part Number FDC-6400B-21-** should be FDC-6400B-31-**, and FDC-6400B-7*** should be FDC-6400B-7-***. Accordingly, except for the above corrections, the proposal is adopted without change.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications

VOL 54 ISS 74 AP 19 1989 UMI

to warrant the preparation of a Federalism Assessment.

Conclusion: The FAA has determined that this regulation involves 5,000 of the FDC 6400B series (90° release type) safety-belts; the cost per aircraft will involve minimal expense that would be required for shipping the safety-belts to Davis Aircraft Products Co., Inc. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 1034; February 26, 1979); (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal; and (4) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Air transportation, Aircraft, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD):

Davis Aircraft Products Co., Inc.: Applies to safety-belts which incorporate the black "Ultem" plastic latch-cover with the 90° type pull-release mechanism, as listed below:

Affected Safety-Belt Part Numbers (P/N's)

FDC-6400B-6
FDC-6400B-7-***
FDC-6400B-12
FDC-6400B-12B
FDC-6400B-18-3
FDC-6400B-18-5
FDC-6400B-18-21
FDC-6400B-18-23
FDC-6400B-18-25
FDC-6400B-18-27
FDC-6400B-18-29
FDC-6400B-18-505
FDC-6400B-19
FDC-6400B-20
FDC-6400B-22
FDC-6400B-27-3
FDC-6400B-29
FDC-6400B-29-2
FDC-6400B-29B
FDC-6400B-29B-2
FDC-6400B-30B
FDC-6400B-31-**

FDC-6400B-90-7
FDC-6400B-**-***-**-**

Compliance required within the next 100 flights, after the effective date of this AD, unless already accomplished.

To prevent the possibility of the applicable safety-belts from becoming difficult to release or becoming completely jammed when actuated through 90°, accomplish the following:

(a) Inspect safety-belts to determine if they have any of the above P/N's inscribed on the FAA-TSO-C22f metallic tag.

(b) Replace all safety-belts with the above P/N's with an approved safety-belt.

Notes: (1) Safety-belt assemblies that have been modified by Davis Aircraft Products Co., Inc., are marked with a -1 suffix number at the end of the Part Numbers (listed above) on the FAA-TSO-C22f metallic tag, and are approved.

(2) Davis Aircraft Products Co., Inc., has issued (recall) Service Bulletin No. 1, dated January 29, 1988, indicating that the affected safety-belts may be returned to them for replacement at no charge for the rework and parts.

(c) Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, New York Aircraft Certification Office, Federal Aviation Administration, 181 South Franklin Avenue, Room 202, Valley Stream, New York 11581.

(d) Upon submission of substantiating data, by an owner or operator, through an FAA Airworthiness Inspector, the Manager, New York Aircraft Certification Office, may adjust the compliance time specified by this AD.

This amendment becomes effective on May 24, 1989.

Issued in Burlington, Massachusetts, on December 22, 1988.

Arthur J. Pidgeon,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

[FR Doc. 89-9285 Filed 4-18-89; 8:45 am]

BILLING CODE 4910-13-M

* Denotes numerical (arabic) digit.

14 CFR Part 39

[Docket No. 89-NM-36-AD; Amdt. 39-6196]

Airworthiness Directives; Gulfstream Aerospace Corp. Models G1159 (G-II), G1159A (G-III), G1159B (G-IIB), and G-IV Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the **Federal Register** and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective as to all known U.S. owners and operators of Gulfstream Models G1159 (G-II), G1159A (G-III), G1159B (G-IIB), and G-IV series airplanes by individual letters. This Ad requires inspection of the electrical power leads to the engine fire extinguishers to determine proper installation and to correct the installation, if necessary. This action is prompted by reports of incorrect installation of the electrical power leads to the engine fire extinguishing systems. This condition, if not corrected, could result in a fire bottle being discharged into the wrong nacelle.

EFFECTIVE DATE: May 8, 1989.

This AD was effective earlier to all recipients of Priority Letter AD 89-05-05, dated March 8, 1989.

ADDRESSES: The applicable service information may be obtained from Gulfstream Aerospace Corporation, Technical Operations Department, Travis Field, P.O. Box 2206, Savannah, Georgia 31402-2206. This information may be examined at the FAA, Northwest Mountain Region, Transport Airplane Directorate, 17900 Pacific Highway South, Seattle, Washington, or at the Atlanta Aircraft Certification Office, FAA, Small Airplane Directorate, Aircraft Certification Service, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia.

FOR FURTHER INFORMATION CONTACT: Mr. Ben Durrance, Propulsion Branch, Atlanta Aircraft Certification Office, FAA, Small Airplane Directorate, Aircraft Certification Service, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia 30349, telephone (404) 991-3810.

SUPPLEMENTARY INFORMATION: On March 8, 1989, the FAA issued Priority Letter AD 89-05-05, applicable to Gulfstream Models G1159 (G-II), G1159A (G-III), G1159B (G-IIB), and G-IV series airplanes, which requires a one-time inspection of the electrical power leads to the engine fire extinguishers to determine proper installation. That action was prompted by six reports of the electrical power leads to the engine fire extinguishing systems found incorrectly installed (crossed) on various Gulfstream airplanes in service. Such an incorrect installation could cause a fire bottle to be discharged into the wrong nacelle.

Since this condition is likely to exist or develop on other airplanes of this same type design, this AD requires a one-time inspection of the electrical power leads to the engine fire extinguishers to determine proper installation and to correct the installation, if necessary. This is considered interim action until final action has been identified, at which time the FAA may consider further rulemaking to address it.

Since a situation existed, and still exists, that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The Federal Aviation Administration has determined that this regulation is an emergency regulation and that it is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required).

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Gulfstream Aerospace Corporation: Applicable to Model G1159 (G-II), G1159A (G-III), G1159B (G-IIB), and G-IV series airplanes, certificated in any category. Compliance is required as indicated, unless already accomplished.

To ensure that the engine fire extinguishing system electrical power leads are properly connected, accomplish the following:

A. Within the next 3 days or 10 hours time-in-service after the effective date of this AD, whichever occurs later, perform an inspection to determine proper configuration of electrical power leads to the engine fire extinguishing system, in accordance with the following Gulfstream Alert Customer Bulletins, as applicable: G-II (G1159/G1159B) Alert Customer Bulletin No. 20; G-III (G1159A) Alert Customer Bulletin No. 4; G-IV Alert Customer Bulletin No. 5; each dated February 2, 1989. If the configuration is not correct, prior to further flight, correct the installation in accordance with the appropriate Gulfstream Alert Customer Bulletin.

B. Immediately following any maintenance performed on the engine fire extinguishing system, perform the inspection procedures specified in the appropriate alert service bulletin specified in paragraph A., above, to ensure that proper functioning of the system is reestablished.

C. An alternate means of compliance of adjustment of the compliance time which provides an acceptable level of safety may be used when approved by the Manager, Atlanta Aircraft Certification Office, FAA, Central Region (Small Airplane Directorate, Aircraft Certification Service).

Note: If appropriate, the request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who will either concur or comment, and then send it to the Manager, Atlanta Aircraft Certification Office.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer, may obtain copies upon request to Gulfstream Aerospace Corporation, Technical Operations Department, Travis Field, P.O. Box 2206, Savannah, Georgia 31402-2206. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Atlanta Aircraft Certification Office, FAA, Small Airplane Directorate, Aircraft Certification Service, 1669 Phoenix Parkway, Suite 210C, Atlanta, Georgia.

This amendment becomes effective May 8, 1989.

It was effective earlier to all recipients of Priority Letter AD 89-05-05, issued March 8, 1989.

Issued in Seattle, Washington, on April 11, 1989.

Leroy A. Keith,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89-9334 Filed 4-18-89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 88-NM-168-AD; Amdt. 39-6193]

Airworthiness Directives; British Aerospace Model BAC 1-11 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD), applicable to certian British Aerospace Model BAC 1-11 series airplanes, which currently requires eddy current and ultrasonic inspections of the main landing gear support beams (manacle beam), and repair, if necessary. That action was prompted by a report of the collapse of a right main landing gear in service, attributed to stress corrosion cracking. This amendment requires additional maintenance actions and changes to some of the repetitive inspection intervals, and would provide an alternate means of compliance which terminates the need for the repetitive inspection. This amendment is prompted by further assessment of components associated with the main landing gear support beams, which identified the need for additional maintenance requirements. This condition, if not corrected, could lead to collapse of the main landing gear.

EFFECTIVE DATE: May 16, 1989.

ADDRESSES: The applicable service information may be obtained from British Aerospace PLC, Librarian for Service Bulletin, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the

VOL 54 ISS 74 AP 19 1989 UMI

Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. William Schroeder, Standardization Branch, ANM-113; telephone (206) 431-1565. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations by superseding AD 87-13-03, Amendment 39-5654 (52 FR 23943; June 26, 1987), applicable to British Aerospace Model BAC 1-11 series airplanes, to require additional maintenance actions, to change certain the repetitive inspection intervals, and to provide an alternate means of compliance which terminates the need for the repetitive inspections, was published in the **Federal Register** on January 13, 1989 (54 FR 1390).

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

The commenter supported the proposal.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 2 airplanes of U.S. registry will be affected by this AD, that it will take approximately 60 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $4,800. (the cost for the optional new main support beam is estimated to be $90,000 per airplane.)

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities, because few, if any, Model BAC 1-11 series airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the Docket.

List of Subjects 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By superseding AD 87-13-03, Amendment 39-5654 (52 FR 23943; June 26, 1987), with the following new airworthiness directive:

British Aerospace: Applies to all Model BAC 1-11 200 and 400 series airplanes, on which British Aerospace (BAe) main landing gear support structure Modification PM3070 is installed and Modification PM5928 has not been installed, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent collapse of a main landing gear, accomplish the following:

A. Perform initial and repetitive ultrasonic and eddy current inspections of the main landing gear support beams at initial times and repetitive intervals shown in Table I of this AD using procedures in BAe Alert Service Bulletin 57-A-PM6000, Issue 2, dated February 17, 1988.

TABLE I

Airplane Identification	Modification PM6000 Accomplishment Status	Initial Inspection Compliance Time	Repetitive Compliance Time Interval After Initial Inspection
Serial Numbers up to and including 402.	Not Accomplished	Whichever occurs later: —within 300 landings after July 30, 1987, (the effective date of AD 87-13-03, Amendment 39-5654); or —within 3 years since installation of new left and right main support beams.	Ultrasonic inspection: at intervals not to exceed 12 months. Eddy current inspections: at intervals not to exceed 36 months.
Serial Numbers 403 and subsequent.	Not Accomplished	Whichever occurs later: —within 300 landings after July 30, 1987, (the effective date of AD 87-13-03, Amendment 39-5654); or —within 6 years since new; or —within 6 years since installation of new left and right main support beams.	Ultrasonic inspections: at intervals not to exceed 12 months. Eddy current inspections: at intervals not to exceed 36 months.
For all A/P's on which Mod. PM6000 is accomplished prior to assembly of main support beam into wing.	Accomplished	Whichever occurs later: —within 6 years since new; or —within 3 years since new right and left main support beams are installed.	Ultrasonic inspections: at intervals not to exceed 2 years.
For all A/P's on which Mod. PM6000 is accomplished after assembly of main support beam into wing.	Accomplished	Within 2 years after installation of Modification PM6000.	Ultrasonic inspections: at intervals not to exceed 2 years.

B. Cracks in the main landing gear main support beam must be repaired, prior to further flight, in a manner approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

C. Installation of main support beam, part number ED03-5007/8 (Modification PM5928) constitutes terminating action for the requirements of this AD.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM-113.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to British Aerospace PLC, Librarian for Service Bulletins, P.O. Box 17414, Dulles International Airport, Washington, DC 20041. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This Amendment supersedes AD 87-13-03, Amendment 39-5654.

This Amendment becomes effective May 16, 1989.

Issued in Seattle, Washington, on April 6, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 88-NM-199-AD; Amdt. 39-6194]

Airworthiness Directives; SAAB-Scania Model SF-340A Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to SAAB-Scania Model SF-340A series airplanes, which requires inspection of the insulation in the Environmental Control System (ECS) compartment and securing of the Gamah Couplings with a locking wire. If inspection reveals leakage of hot air into the fuselage, an additional inspection is required for delamination of the stringer-to-skin bonding, and repair, if necessary. This amendment is prompted by a report of hot air leakage into the ECS compartment due to the separation of a Gamah Coupling, which resulted in delamination of the stringer-to-skin bonding due to overheated adhesive. This condition, if not corrected, could lead to reduced structural capability of the fuselage.

EFFECTIVE DATE: May 16, 1989.

ADDRESSES: The applicable service information may be obtained from SAAB-Scania AD, S-581.88, Linkoping, Sweden. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Mark Quam, Standardization Branch, ANM-113; telephone (206) 431-1978. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations, to include a new airworthiness directive, applicable to SAAB-Scania Model SF-340A series airplanes, which requires inspection of the insulation in the Environmental Control System (ECS) compartment and securing of the Gamah Couplings with a locking wire; and certain additional inspections for delamination of the stringer-to-skin bonding, and repair, if necessary; was published in the **Federal Register** on January 18, 1989 (54 FR 1944).

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received in response to the proposal.

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

It is estimated that 67 airplanes of U.S. registry will be affected by this AD, that it will take approximately 6 manhours per airplane to accomplish the required actions, and that the average labor cost will be $40 per manhour. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $16,080.

The regulations adopted herein will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($240). A final evaluation has been prepared for this regulation and has been placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39-[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.131 [Amended]

2. By adding the following new airworthiness directive:

Saab-Scania: Applies to Model SF-340A series airplanes, serial numbers -003 through -138, inclusive, certificated in any category. Compliance is required as indicated below, unless previously accomplished.

To prevent reduced structural capability of the fuselage, accomplish the following:

A. Within 30 days after the effective date of this AD, perform an inspection of the insulation in the Environmental Control System (ECS) compartment and secure the Gamah Couplings with a locking wire, in accordance with SAAB-Scania Service Bulletin SF340-21-022, dated October 31, 1988.

B. If the inspection required by paragraph A., above, reveals leakage of hot air, prior to further flight, inspect for delamination of the stringer to skin bonding, and repair, if necessary, in accordance with SAAB-Scania Service Bulletin SF340-53-025, dated October 31, 1988.

C. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM-113.

VOL 54 ISS 74 AP 19 1989 UMI

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to SAAB-Scania AB, S–581 88, Linkoping, Sweden. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective May 16, 1989.

Issued in Seattle, Washington, on April 6, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89–9286 Filed 4–18–89; 8:45 am]

BILLING CODE 4910–13–M

---

14 CFR Part 71

[Airspace Docket No. 89–AWA–8]

Alteration of the Detroit Terminal Control Area; Michigan

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the description of the Detroit Terminal Control Area (TCA). A portion of the Detroit TCA is described by using the Willow Run very high frequency omni-directional radio range (VOR). The Willow Run VOR has been decommissioned and that portion of the TCA, which was defined by the Willow Run VOR, is now defined by using latitude and longitude coordinates.

EFFECTIVE DATE: 0901 u.t.c., June 1, 1989.

FOR FURTHER INFORMATION CONTACT: Jesse B. Bogan, Jr, Airspace Branch (ATO–240), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–9253.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) describes the boundaries of Area A and Area B of the Detroit TCA by using latitude and longitude coordinates when practical. The boundaries of the areas are described by using the Willow Run VOR which has been decommissioned. Therefore, the boundaries of Area A and Area B are to be described by using latitude and longitude coordinates. In Areas C and D, changes have been made to show the correct radial off the Windsor VOR. Since this amendment will change the descriptions of the areas and not the design, I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because this action is a minor technical amendment in which the public would not be particularly interested. Section 71.403 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Terminal control areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.403 [Amended]

2. Section 71.403 is amended as follows:

Detroit, MI [Amended]

By removing the present description of Area A and substituting the following:

Area A. That airspace extending upward from the surface to and including 8,000 feet MSL within the lateral limits of the airspace beginning at lat. 42°17'10"N., long. 83°27'14"W.; thence northeast on a 047° bearing until intercepting the 7-mile DME arc of the Detroit Instrument Landing System (I–DTW) at lat. 42°20'50"N., long. 83°21'42"W.; thence clockwise along the I–DTW 7-mile DME arc until intercepting the Detroit Willow Run Airport Control Zone at lat. 42°10'15"N., long. 83°28'53"W.; thence counterclockwise along the Detroit Willow Run Airport Control Zone to the point of origin.

By removing the present description of Area B and substituting the following:

Area B. That airspace from 2,500 feet MSL to and including 8,000 feet MSL within the lateral limits fo the airspace beginning at the intersection of the I–DTW 7-mile DME arc at lat. 42°20'59"N., long. 83°21'42"W.; thence northeast on a 047° bearing until intercepting the I–DTW 8-mile DME arc at lat. 42°21'59"N., long. 83°19'57"W.; thence clockwise along the I–DTW 8-mile DME arc until lat. 42°13'54"N., long. 83°10'06"W.; thence eastbound on a 090° bearing until the United States shoreline, southbound along the United States shoreline to lat. 42°10'55"N., long. 83°09'25"W.; thence on a 214° bearing until intercepting the I–DTW 11-mile DME arc; thence clockwise along the I–DTW 11-mile DME arc until lat. 42°07'11"N., long. 83°32'30"W.; thence northeast on a 047° bearing to the point where the I–DTW 7-mile DME arc intercepts the Detroit Willow Run Airport Control Zone at lat. 42°10'15"N., long. 83°28'53"W.; thence counterclockwise along the I–DTW 7-mile DME arc to the point of origin.

In Area C, wherever "VOR 220°" appears change to "VOR 221°".

In Area D, by removing the words "Windsor VOR 220°" and substituting the words "Windsor VOR 221°".

Issued in Washington, DC, on April 7, 1989.

Harold W. Becker,

Manager, Airspace—Rules and Aeronautical Information Division.

[FR Doc. 89–9337 Filed 4–18–89; 8:45 am]

BILLING CODE 4910–13–M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 4

Statement of the Commodity Futures Trading Commission Regarding Disclosure by Commodity Pool Operators of Past Performance Records and Pool Expenses

AGENCY: Commodity Futures Trading Commission.

ACTION: Extension of comment period.

SUMMARY: On February 6, 1989, the Commodity Futures Trading Commission ("Commission") published in the **Federal Register** an interpretive statement regarding the disclosure requirements pertaining to commodity pool operators ("CPOs"). (54 FR 5597 (February 6, 1989).) The Commission requested comment on matters related to the presentation of prior performance data by CPOs and commodity trading advisors ("CTAs") and the presentation of the fees, commissions and expenses incurred by pools, and on any other issues relating to Part 4 disclosure requirements. The interpretive statement provided a period for public comment which ended April 7, 1989.

The Commission has been requested by several potential commentators to extend the comment period for the interpretive statement. Such additional time has been requested in order to allow the associations representing CPOs and CTAs to receive and analyze the comments of their memberships and present them to the Commission. The Commission believes that a thirty-day extension period is appropriate to enhance the opportunity for interested parties to comment on the issues raised in the release.

DATE: All comments on the Commission's interpretive statement concerning Part 4 disclosure requirements (54 FR 5597 (February 6, 1989)) must be received by May 5, 1989.

ADDRESS: Comments should be sent to the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581.

FOR FURTHER INFORMATION CONTACT: Tobey W. Kaczensky, Associate Director, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone (202) 254–8955.

Issued in Washington, this 13th day of April, 1989.

Lynn K. Gilbert,

Deputy Secretary to the Commission.

BILLING CODE 6351–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 175

[Docket No. 88F–0177]

Indirect Food Additives; Adhesives and Components of Coatings

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of polypropylene glycol dibenzoate and propylene glycol dibenzoate as components of adhesives in contact with food. This action is in response to two petitions filed by the Velsicol Chemical Corp.

DATES: Effective April 19, 1989; written objections and requests for a hearing by May 19, 1989.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Richard H. White, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of June 22, 1988 (53 FR 23455), FDA announced that two food additive petitions (FAP 8B4070 and FAP 8B4071) had been filed by Velsicol Chemical Corp., 5600 North River Rd., Rosemont, IL 60018–5119, proposing that § 175.105 *Adhesives* (21 CFR 175.105) of the food additive regulations be amended to provide for the safe use of polypropylene glycol dibenzoate and propylene glycol dibenzoate, respectively, as components of adhesives in contact with food.

FDA has evaluated data in the petitions and other relevant material. The agency concludes that the proposed food additive uses for polypropylene glycol dibenzoate and propylene glycol dibenzoate are safe, and that § 175.105(c)(5) should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petitions and the documents that FDA considered and relied upon in reaching its decision to approve these petitions are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that environmental impact statements are not required. The agency's findings of no significant impact and the evidence supporting those findings, contained in the environmental assessments, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before May 19, 1989 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 175

Adhesives, Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, Part 175 is amended as follows:

PART 175—INDIRECT FOOD ADDITIVES: ADHESIVES AND COMPONENTS OF COATINGS

1. The authority citation for 21 CFR Part 175 continues to read as follows:

Authority: Sections 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 175.105 is amended in paragraph (c)(5) by alphabetically adding two new entries in the table to read as follows:

§ 175.105 Adhesives.

* * * * *

(c) * * *

(5) * * *

VOL 54 ISS 74 AP 19 1989 UMI

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 89-9270 Filed 4-18-89; 8:45 am]

BILLING CODE 4160-01-M

21 CFR Part 177

[Docket No. 87F-0155]

Indirect Food Additives; Polymers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of ethylene terephthalate-isophthalate copolymers containing a minimum of 98 weight percent of polymer units derived from ethylene terephthalate for use as a component of articles in contact with alcoholic beverages. This action responds to a petition filed by the Goodyear Tire & Rubber Co.

DATES: April 19, 1989; objections by May 19, 1989.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Hortense S. Macon, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of June 4, 1987 (52 FR 21122), FDA announced that a petition (FAP 7B3990) had been filed by the Goodyear Tire & Rubber Co., 130 Johns Ave., Akron, OH 44305-4097, proposing that § 177.1630 *Polyethylene phthalate polymers* (21 CFR 177.1630) be amended to provide for the safe use of ethylene terephthalate-isophthalate copolymers containing a minimum of 98 weight percent of polymer units derived from ethylene terephthalate for use as a component of articles in contact with alcoholic beverages.

The agency received one comment concerning the petition. The comment was in support of the petition.

FDA has evaluated data in the petition and other relevant material, and concludes that the proposed food additive use is safe, and that § 177.1630 should be amended by adding new paragraph (j).

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before May 19, 1989, file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right of a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 177

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director of the Center for Food Safety and Applied Nutrition, Part 177 is amended as follows:

PART 177—INDIRECT FOOD ADDITIVES: POLYMERS

1. The authority citation for 21 CFR Part 177 continues to read as follows:

Authority: Sections 201(s), 409, 72 Stat. 1784-1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. Section 177.1630 is amended by adding new paragraph (j) to read as follows:

§ 177.1630 Polyethylene phthalate polymers.

• • • • •

(j) Polyethylene phthalate plastics, composed of ethylene terephthalate-isophthalate containing a minimum of 98 weight percent of polymer units derived from ethylene terephthalate, conforming with the specifications prescribed in paragraph (j)(1) of this section are used as provided in paragraph (j)(2) of this section.

(1) *Specifications.* (i) The food contact surface meets the specifications in paragraph (f)(1) of this section and

(ii)(*a*) *Containers with greater than 500 mL capacity.* The food-contact surface when exposed to 95 percent ethanol at 120° F for 24 hours should not yield chloroform-soluble extractives in excess of 0.005 mg/in².

(*b*) *Containers with less than or equal to 500 mL capacity.* The food contact surface when exposed to 95 percent ethanol at 120°F for 24 hours should not yield chloroform-soluble extractives in excess of 0.05 mg/in².

(2) *Conditions of use.* The plastics are used for packaging, transporting, or holding alcoholic foods that do not exceed 95 percent alcohol by volume.

Dated: April 10, 1989.

Richard J. Rork,

Acting Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 89-9271 Filed 4-18-89; 8:45 am]

BILLING CODE 4160-01-M

21 CFR Part 520

Oral Dosage Form New Animal Drugs Not Subject to Certification; Sulfamethazine Boluses

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Norden Laboratories, Inc. The application provides for the use of a bolus containing 5 grams of sulfamethazine for the treatment of certain diseases in ruminating beef and dairy calves.

EFFECTIVE DATE: April 19, 1989.

FOR FURTHER INFORMATION CONTACT: Charles E. Haines, Center for Veterinary Medicine (HFV-133), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3410.

SUPPLEMENTARY INFORMATION: Norden Laboratories, Inc., Lincoln, NE 68501, has filed NADA 140-909 (formerly NADA 99-967) which provides for the use of a 5-gram sulfamethazine bolus. The drug is indicated for use in ruminating beef and dairy calves for treating bacterial scours (colibacillosis) caused by *Escherichia coli*, necrotic pododermatitis (foot rot) and calf diphtheria caused by *Fusobacterium necrophorum*, bacterial pneumonia associated with *Pasteurella* spp., and coccidiosis caused by *Eimeria bovis* and *Eimeria zurnii*. The NADA is approved and 21 CFR 520.2260a is amended to reflect the approval. The NADA was originally filed as NADA 99-967 and contained sulfamethazine and neomycin. Norden Laboratories, Inc., reformulated the product by removing the neomycin and FDA has renumbered the application as NADA 140-909. (The status of the product containing sulfamethazine and neomycin under the Center for Veterinary Medicine's notice of opportunity for a hearing on its proposal to refuse approval of certain sulfonamide-containing drugs (53 FR 46050; November 15, 1988, corrected December 12 and 23, 1988; 53 FR 49988 and 51950; and February 2, 1989; 54 FR 5303) will be addressed in a notice to be published in a future issue of the **Federal Register**.) The basis for approval of NADA 140-909 is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(i) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 520

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 520 is amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 520 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

2. Section 520.2260a is revised to read as follows:

§ 520.2260a Sulfamethazine oblets and boluses.

(a)(1) *Sponsor.* See No. 010042 in § 510.600(c) of this chapter for use of 2.5-, 5-, or 15-gram sulfamethazine oblet.

(2) *Related tolerance in edible products.* See § 556.670 of this chapter.

(3) *Conditions of use*—(i) *Amount.* Administer as a single dose 100 milligrams of sulfamethazine per pound of body weight the first day and 50 milligrams per pound of body weight on each following day.

(ii) *Indications for use.* For treatment of diseases caused by organisms susceptible to sulfamethazine.

(A) *Beef cattle and nonlactating dairy cattle.* Treatment of bacterial pneumonia and bovine respiratory disease complex (shipping fever complex) (*Pasteurella* spp.), colibacillosis (bacterial scours) (*Escherichia coli*), necrotic pododermatitis (foot rot) (*Fusobacterium necrophorum*), calf diphtheria (*Fusobacterium necrophorum*), acute mastitis (*Streptococcus* spp.), acute metritis (*Streptococcus* supp.), coccidiosis (*Eimeria bovis* and *Eimeria zurnii*).

(B) *Horses.* Treatment of bacterial pneumonia (secondary infections associated with *Pasteurella* spp.), strangles (*Streptococcus equi*), and bacterial enteritis (*Escherichia coli*).

(iii) *Limitations.* Administer daily until animal's temperature and appearance are normal. If symptoms persist after using for 2 or 3 days consult a veterinarian. Fluid intake must be adequate. Treatment should continue 24 to 48 hours beyond the remission of disease symptoms, but not to exceed 5 consecutive days. Follow dosages carefully. Not for use in lactating dairy animals. Do not treat cattle within 10 days of slaughter. Not to be used in horses intended for food.

(4) *NAS/NRC status.* The conditions of use specified in this section have been reviewed by NAS/NRC and are found effective. Applications for these uses need not include effectiveness data as specified by § 514.111 of this chapter, but may require bioequivalency and safety information.

(b)(1) *Sponsor.* See No. 011519 in § 510.600(c) of this chapter for use of 5-gram sulfamethazine bolus.

(2) *Related tolerances in edible products.* See § 556.670 of this chapter.

(3) *Conditions of use*—(i) *Amount.* Administer 10 grams (2 boluses) of sulfamethazine per 100 pounds of body weight the first day, then 5 grams (1 bolus) of sulfamethazine per 100 pounds of body weight daily for up to 4 additional consecutive days.

(ii) *Indications for use.* Ruminating beef and dairy calves. For treatment of the following diseases caused by organisms susceptible to sulfamethazine: bacterial scours (colibacilloosis) caused by *E. coli*; necrotic pododermatitis (foot rot) and calf diphtheria caused by *F. necrophorum*; bacterial pneumonia associated with *Pasteurella* spp.; and coccidiosis caused by *E. bovis* and *E. zurnii*.

(iii) *Limitations.* Do not administer for more than 5 consecutive days. Do not treat calves within 11 days of slaughter. Do not use in calves to be slaughtered under 1 month of age or in calves being fed an all milk diet. Do not use in female dairy cattle 20 months of age or older; such use may cause drug residues in milk. Administer with adequate supervision. Follows recomended dosages carefully. Fluid intake must be adequate. If symptoms persist after 2 or 3 days, consult a veterinarian.

Dated: April 12, 1989.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

VOL 54 ISS 74 AP 19 1989 UMI

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 0

[Order No. 1339–89]

Organization and Functions of Special Independent Counsel for Members of Congress; Suspension

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This order amends the organizational statement on the Special Independent Counsel for Members of Congress in 28 CFR Part 0 by suspending 28 CFR 0.14. This order will revise the Code of Federal Regulations so that it accurately reflects the current rules.

EFFECTIVE DATE: April 12, 1989.

FOR FURTHER INFORMATION CONTACT: John C. Keeney, Deputy Assistant Attorney General, Criminal Division; telephone number: 202–633–2621. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: This regulation will amend title 28 of the Code of Federal Regulations in order to suspend § 0.14. This is not a major rule within the meaning of Exec. Order No. 12291. This will not have an impact on a significant number of small businesses. 5 U.S.C. 901.

List of Subjects in 28 CFR Part 0

Authority delegations (Government agencies).

By the authority vested in me, including 28 U.S.C. 509, 510, and 5 U.S.C. 301:

1. The Assistant Attorney General for the Criminal Division shall, pursuant to 28 CFR 0.55, exercise the authority necessary to complete any pending investigations.

2. Subpart B of Part 0 of title 28 of the Code of Federal Regulations is amended as follows:

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

1. The authority citation for Part 0 continues to read as follows:

Authority: 5 U.S.C. 301, 2303, 3103; 6 U.S.C. 1103, 1324A, 1427(g); 15 U.S.C. 644(k); 18 U.S.C. 2254, 3621, 3622, 4001, 4041, 4042, 4044, 4082, 4201 *et seq.*, 6003(b); 21 U.S.C. 871, 881(d), 904; 22 U.S.C. 263a, 1621–1645o, 1622 note; 28 U.S.C. 509, 510, 515, 516, 519, 524, 543, 552, 552a, 569; 31 U.S.C. 1108, 3801 *et seq.*; 50 U.S.C. App. 2001–2017p; Pub. L. 91–513, sec. 501; EO 11919; EO 11267; EO 11300.

§ 0.14 [Suspended]

2. Section 0.14 is suspended.

Date: April 12, 1989.

Dick Thornburgh,

Attorney General.

BILLING CODE 4410–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 191

The DOD Civilian Equal Employment Opportunity (EEO) Program

AGENCY: Office of the Secretary, DOD.

ACTION: Final rule.

SUMMARY: This document amends 32 CFR Part 191 to update the membership of the Defense Equal Opportunity Council (DEOC), update the definition of "affirmative action" as endorsed by the DEOC, and update the definition of "sexual harassment" as directed by the Secretary of Defense's memorandum dated July 20, 1988.

EFFECTIVE DATE: April 11, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. C. Haughton, Jr., Director for Civilian Equal Opportunity Policy, Department of Defense, Room 3A272, the Pentagon, Washington, DC 20301–4000, telephone (202) 695–0105 or autovon 225–0105.

SUPPLEMENTARY INFORMATION:

List of Subjects in 32 CFR Part 191

Equal employment opportunity, Government employees, Military personnel. Accordingly, 32 CFR Part 191 is amended as follows:

PART 191—THE DOD CIVILIAN EQUAL EMPLOYMENT OPPORTUNITY (EEO) PROGRAM

1. The authority citation continues to read as follows:

Authority: 5 U.S.C. 301, 10 U.S.C. 113.

2. Section 191.3 is amended by removing the last sentence in the definition *Affirmative action* and in *Equal Employment Opportunity (EEO)* and by revising the definition of *Sexual Harassment* as follows:

§ 191.3 Definitions.

* * * * *

Sexual Harassment. A form of sex discrimination that involves unwelcomed sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when:

(a) Submission to or rejection of such conduct is made either explicitly or implicitly a term or condition of a person's job, pay, or career; or

(b) Submission to or rejection of such conduct by a person is used as a basis for career or employment decisions affecting that person, or

(c) Such conduct interferes with an individual's performance or creates an intimidating, hostile, or offensive environment.

Any person in a supervisory or command position who uses or condones implicit or explicit sexual behavior to control, influence, or affect the career, pay, or job of a military member of civilian employee is engaging in sexual harassment. Similarly, any military member of civilian employee who makes deliberate or repeated unwelcomed verbal comments, gestures, or physical contact of a sexual nature is also engaging in sexual harassment.

* * * * *

§ 191.4 [Amended]

2. Section 191.4(a) is amended by adding at the end of the paragraph "Equal employment opportunity is the objective of affirmative action programs."

3. Section 191.4(b) is amended by adding at the end of the paragraph "Such programs, which shall be designed to identify, recruit, and select qualified personnel, shall be coordinated with the cognizant legal offices."

§ 191.6 [Amended]

4. Section 191.6(b)(8), change "1404.11" to "1404.12"

§ 191.8 [Amended]

5. Section 191.8(a), after the words "(Reserve Affairs)" add ", Director of Administration and Management,"

§ 191.9 [Amended]

6. Section 191.9 is amended by changing "semiannual" to "annual", changing "0288–EEO–SA" to "0288–EEO–NA" in paragraph (a)(3), removing paragraph (a)(2), redesignating paragraph (a)(3) to (a)(2), changing "semiannual" to "annual", changing "0288–EEO–SA" to "0288–EEO–NA" in paragraph (b)(2), removing paragraph (b)(1), and redesignating paragraphs (2) through (4) to (1) through (3).

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD7–89–06]

Temporary Drawbridge Operation Regulations; Atlantic Intracoastal Waterway, FL

AGENCY: Coast Guard, DOT.

ACTION: Temporary rule.

SUMMARY: The Coast Guard is temporarily changing the regulation governing the NASA Railroad drawbridge at the Kennedy Space Center by requiring the bridge to open only at scheduled intervals while it is being painted. This schedule will allow the painting to proceed in a timely fashion with minimal delay to vessel traffic.

DATES: These temporary regulations become effective April 17, 1989 and terminate on August 17, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Walt Paskowsky, (305) 536–4103.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rulemaking was not published for this regulation and it is being made effective in less than 30 days after **Federal Register** publication. NASA originally requested continuous daytime closure of the drawbridge for painting with a five minute opening each hour. This would have expedited return of the draw to normal operation, however, due to the expected heavy seasonal migration of vessels returning north on the Intracoastal Waterway, NASA agreed to minimize the closed periods by using a unique painting procedure. As a result, the bridge will be maintained in the open position most of the time, and during necessary periods of closure for painting, will be opened on the hour and half-hour.

Drafting Information

The drafters of this notice are Mr. Walt Paskowsky, Bridge Administration Specialist, project officer, and Lieutenant Commander S.T. Fuger, Jr., project attorney.

Discussion of Temporary Regulations

The NASA Railroad drawbridge presently operates automatically closing only for the passage of a train and remaining in the open position at all other times.

Due to the extremely limited clearance of the bridge in the closed position, NASA will be using a skycable attachment which will allow most of the painting to be done with the bridge in the open position. This temporary regulation change which adds scheduled openings between 7:30 a.m. and 3:30 p.m., Monday through Saturday, is intended to provide draw openings at 30 minute intervals during the occasional periods when the draw is being painted in the closed position.

List of Subjects in 33 CFR Part 117

Bridges.

Temporary Regulations

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is temporarily amended as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05–1(g); 33 CFR 117.43.

2. Paragraph (j) of § 117.261 is revised to read as follows for the period April 17, 1989 through August 17, 1989. Because this is a temporary rule, this revision will not appear in the Code of Federal Regulations.

§ 117.261 Atlantic Intracoastal Waterway, St. Marys River to Key Largo.

* * * * *

(j) NASA railroad bridge, mile 876.6 near Jay Jay. The draw shall be operated as follows:

(1) The bridge is not constantly tended.

(2) The draw is normally in the fully open position displaying flashing green lights to indicate that vessels may pass.

(3) When a train approaches the bridge the lights go to flashing red and a horn sounds four blasts, pauses and repeats four blasts. After an eight minute delay, the draw lowers and locks, providing the scanning equipment reveals nothing under the draw. The draw remains down for a period of eight minutes or while the approach track circuit is occupied.

(4) After the train has cleared, the draw opens and the lights return to flashing green.

(5) When the drawspan is in the closed position between 7:30 a.m. and 3:30 p.m. Monday through Saturday, while being painted, and no train is in the approach track circuit, it will be opened on the hour and half-hour to pass all accumulated vessels.

* * * * *

Dated: April 6, 1989.

J.L. Linnon,

Captain, USCG, Acting Commander, Seventh Coast Guard District.

[FR Doc. 89–8329 Filed 4–18–89; 8:45 am]

BILLING CODE 4910–14–M

33 CFR Part 165

[CGD11 89–11]

Safety Zone; San Pedro Bay, California

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a Safety Zone in the Port of Long Beach, CA. Dredging and landfill activities associated with the expansion of Pier J have created numerous hazards to waterway users in the area. This Safety Zone is necessary to protect vessels and the public from those hazards.

DATES: This regulation becomes effective on April 9, 1989. Comments on this regulation must be received on or before June 2, 1989.

ADDRESS: Comments should be mailed to Commander (mepps), Eleventh Coast Guard District, 400 Oceangate, Long Beach, CA 90822–5399. The comments will be available for inspection and copying at the Eleventh Coast Guard District Office, Room 709, 400 Oceangate, Long Beach, CA 90822–5399. Normal office hours are between 8:00 a.m. and 4:00 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Commander N.S. Porter, Chief, Marine Environment Protection/Port Safety Branch, Eleventh Coast Guard District, 400 Oceangate, Long Beach, CA 90822–5399. Phone number (213) 499–5333.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a Notice of Proposed Rulemaking was not published for this regulation and good cause exists for making it effective in less than 30 days from the date of publication. Following normal rulemaking procedures would have been contrary to the public interest since immediate action is needed to respond to actual hazards to vessels and persons in the area.

Although this regulation is published as a final rule without prior notice, an opportunity for public comment is nevertheless desirable to ensure that the regulation is both reasonable and workable. Accordingly, persons wishing to comment may do so by submitting written comments to the office listed under "**ADDRESS**" in this preamble.

BEST COPY AVAILABLE

VOL 54 ISS 74 AP 19 1989 UMI

Commenters should include their names and addresses, identify the docket number for the regulations, and give reasons for their comments. Based upon comments received, the regulations may be changed.

Drafting Information

The drafters of this regulation are Lieutenant Junior Grade John A. Meehan, project officer, Marine Safety Office Los Angeles/Long Beach, and Lieutenant Commander G.R. Wheatley, project attorney, Eleventh Coast Guard District Legal Office.

Discussion of Regulation

In September, 1988, construction began on the Pier J Expansion Project in the Port of Long Beach, CA. The project involves extensive dredging and landfill activities which will ultimately lead to the creation of 147 acres of new land and a new slip for deep draft vessels. When completed, the pier will extend one half mile further south toward the Long Beach Breakwater.

In January, 1989, the contractor for the landfill installed eight towers in the project area. The towers are located along the eastern, southern, and western perimeters of the area and each is marked with a white quick-flashing light. The towers are used as survey markers by the contractor and help to identify the project boundaries.

By late February, 1989, landfill activities had reduced the depth in the project area to approximately 25 feet below mean lower low water and created a significant hazard to the navigation of deep draft vessels. Dredging activities had also introduced numerous floating and submerged hazards which threatened the safe navigation of all vessels in the area.

In view of the hazards presented by this project, the Coast Guard is establishing a Safety Zone to ensure the safety of all persons and watercraft transiting in or near the project site. This Final Rule prohibits all vessels from entering the waters included within the zone unless specifically authorized by the Captain of the Port.

The Coast Guard expects the project to continue for another eighteen months. Regardless of the completion date, the Safety Zone will continue in place until the new landfill is marked by appropriate aids to navigation.

This regulation is issued pursuant to 33 U.S.C. 1225 and 1231 as set out in the authority citation for all of Part 165.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Final Regulation

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5.

2. Section 165.1113 is added to read as follows:

§ 165.1113 San Pedro Bay, California—safety zone.

(a) The following area is a Safety Zone: The waters of San Pedro Bay enclosed by a line beginning on the shore of Long Beach Pier J at latitude 33°44'19"N., longitude 118°12'15" W.; thence proceeding southerly to latitude 33°44'10" N., longitude 118°12'14" W.; thence southeasterly to latitude 33°43'52" N., longitude 118°11'42" W.; thence easterly to latitude 33°43'52" N., longitude 118°10'57" W.; thence northerly to latitude 33°44'19" N., longitude 118°10'57" W.; thence westerly to the shore of Pier J at latitude 33°44'19" N., longitude 118°11'07" W.; and thence along the southern shore of Pier J to the beginning point.

(b) Regulations: In accordance with the general regulations in § 165.23 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port.

Dated: April 9, 1989.

Terry Lucas,

Captain, U.S. Coast Guard, Acting Commander, Eleventh Coast Guard District.

[FR Doc. 89-9330 Filed 4-18-89; 8:45 am]

BILLING CODE 4910-14-M

POSTAL SERVICE

39 CFR Part 966

Rules of Practice in Proceedings Relative to Administrative Offsets Initiated by the Postal Inspection Service

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Judicial Officer of the Postal Service hereby issues the rules of procedure governing the conduct of hearings relative to administrative offsets initiated by the Postal Inspection Service.

EFFECTIVE DATE: April 19, 1989.

FOR FURTHER INFORMATION CONTACT: Associate Judicial Officer James D. Finn, Jr., (202) 268–2133.

SUPPLEMENTARY INFORMATION: Acting in accordance with authority delegated to him by 39 CFR 226.2(d)(1)(iv), the Judicial Officer adopts 39 CFR Part 966, the rules of practice governing proceedings relative to administrative offsets initiated by the Postal Inspection Service. The rules in this part apply to any hearing on the Inspection Service's determination of the existence or amount of a debt owed the Postal Service by a former postal employee, or on the terms of the Inspection Service's proposed debt repayment schedule.

List of Subjects in 39 CFR Part 966

Administrative practice and procedure, Postal Service.

Accordingly, 39 CFR is amended by adding the following new Part 966:

PART 966—RULES OF PRACTICE IN PROCEEDINGS RELATIVE TO ADMINISTRATIVE OFFSETS INITIATED BY THE POSTAL INSPECTION SERVICE

Sec.

966.1 Authority for rules.
966.2 Scope of rules.
966.3 Definitions.
966.4 Petition for a hearing and supplement to petition.
966.5 Effect of petition filing.
966.6 Filing, docketing and serving documents; computation of time; representation of parties.
966.7 Answer to petition.
966.8 Hearing Official authority and responsibilities.
966.9 Opportunity for oral hearing.
966.10 Initial decision.
966.11 Appeal of initial or tentative decision to Judicial Officer.
966.12 Waiver of rights.
966.13 Ex parte communications.

Authority: 39 U.S.C. 204, 401, 2601.

§ 966.1 Authority for rules.

These rules of practice are issued by the Judicial Officer pursuant to authority delegated by the Postmaster General.

§ 966.2 Scope of rules.

The rules in this part apply to any petition filed by a former postal employee:

(a) To challenge the Postal Service's determination that he or she is liable for a debt based on a loss from the mails or from Postal Service revenues; and/or

(b) To challenge the administrative offset schedule proposed by the Postal Service for collecting any such debt.

§ 966.3 Definitions.

(a) "Administrative Offset" refers to the withholding of money payable by the Postal Service or the United States to, or held by the Postal Service or the United States for, a former employee in order to satisfy a debt determined to be owed by the former employee to the Postal Service.

(b) "Chief Postal Inspector" refers to the Chief Postal Inspector of the Inspection Service Department or his or her representative.

(c) "Debt" refers to any amount determined by the Postal Service to be owed to the Postal Service by a former employee as a result of a loss from the mails or from Postal Service revenues.

(d) "Former Employee" refers to an individual whose employment with the Postal Service has ceased. An employee is considered formally separated from the Postal Service rolls as of close of business on the effective date of his or her separation Postal Service Form 50.

(e) "Hearing Official" refers to an Administrative Law Judge qualified to hear cases under the Administrative Procedure Act, an Administrative Judge appointed under the Contract Disputes Act of 1978, or any other qualified person licensed to practice law designated by the Judicial Officer to preside over a hearing conducted pursuant to these regulations.

(f) "Inspection Service" refers to the Inspection Service Department of the Postal Service.

(g) "Judicial Officer" refers to the Judicial Officer, Associate Judicial Officer, or Acting Judicial Officer of the Postal Service.

(h) "Reconsideration" refers to the review of a debt conducted by the Inspection Service at the request of the former employee alleged to be responsible for such debt following the former employee's receipt of a written request for payment.

(i) "Recorder" refers to the Recorder, Judicial Officer Department, United States Postal Service, 475 L'Enfant Plaza, SW., Washington, DC 20260–6100.

§ 966.4 Petition for a hearing and supplement to petition.

(a) A former employee, who is alleged to be responsible for a debt and who has previously requested and received reconsideration of the debt by the Inspection Service, may obtain review of:

(1) The Inspection Service's final determination of the existence or amount of the debt, or

(2) The administrative offset schedule proposed by the Inspection Service for collecting any such debt, by mailing, within thirty (30) calendar days of receiving written notice of the Inspection Service's determination upon reconsideration, a written, signed petition, requesting a written or oral hearing, to the Recorder, Judicial Officer Department, United States Postal Service, 475 L'Enfant Plaza, SW., Washington, DC 20260–6100.

A former employee must have previously requested the Inspection Service to reconsider the Postal Service's debt determination to be entitled to a hearing under this part.

(b) The petition must include the following:

(1) The words, "Petition for Review Under 39 CFR Part 966";

(2) The former employee's name and social security number;

(3) The former employee's home address and telephone number, and any other address and telephone number at which the former employee may be contacted about these proceedings;

(4) A statement of the date the former employee received the Inspection Service's final notice of debt determination and a copy of the notice;

(5) A statement indicating whether the former employee elects an oral hearing or a decision based solely on written submissions;

(6) If the former employee requests an oral hearing, a statement describing the evidence he or she will produce which makes an oral hearing necessary, including a list of witnesses, with their addresses, whom the former employee expects to call; a summary of the testimony the witnesses are expected to present; the city requested for the hearing site, with justification for holding the hearing in that city; and at least three proposed dates for the hearing at least forty-five (45) days after the filing of the petition for review;

(7) A statement of the grounds upon which the former employee objects to the Postal Service's determination of the debt or to the administrative offset schedule proposed by the Postal Service for collecting any such debt. This statement should identify with reasonable specificity and brevity the facts, evidence, and legal arguments, if any, which support the former employee's position; and

(8) Copies of all records in the former employee's possession which relate to the debt and which the former employee may enter into the record of the hearing.

(c) The former employee may, if necessary, file with the Recorder additional information as a supplement to the petition at any time prior to the filing of the answer to the petition under § 966.7, or at such later time as permitted by the Hearing Official upon a showing of good cause.

§ 966.5 Effect of petition filing.

Upon receipt and docketing of the former employee's petition, the Recorder will notify the Chief Postal Inspector that the petition has been filed and that a timely filed petition stays further collection action.

§ 966.6 Filing, docketing and serving documents; computation of time; representation of parties.

(a) *Filing.* All documents required under this part must be filed by the former employee or the Chief Postal Inspector in triplicate with the Recorder. (Normal Recorder office business hours are between 8:15 a.m. and 4:45 p.m., eastern standard or daylight saving time as appropriate during the year.) The Recorder will transmit a copy of each document filed to the other party, and the original to the Hearing Official.

(b) *Docketing.* The Recorder will maintain a docket record of proceedings under this part and will assign each petition a docket number. After notification of the docket number, the former employee and Chief Postal Inspector should refer to it on any further filings regarding the petition.

(c) *Time computation.* A filing period under the rules in this part excludes the day the period begins, and includes the last day of the period unless the last day is a Saturday, Sunday, or legal holiday, in which event the period runs until the close of business on the next business day.

(d) *Representation of parties.* After the filing of the petition, further document transmittals for, or communications with, the Postal Service shall be through its representative, the Chief Postal Inspector. If a former employee is represented by an attorney authorized to practice law in any of the United States or the District of Columbia or a territory of the United States, further transmissions of documents and other communications with the former employee shall be made through his or her attorney rather than directly with the former employee.

§ 966.7 Answer to petition.

Within thirty (30) days from notice of the petition, the Chief Postal Inspector shall file an answer to the petition, and attach all available relevant records and documents in support of the Postal Service's claim, or the administrative offset schedule proposed by the Postal Service for collecting any such claim; a list of witnesses the Postal Service intends to call if an oral hearing is requested and the request is granted; a synopsis of the testimony of each witness; a statement of concurrence or objection to the proposed location and dates for the oral hearing; and a statement of the basis for the determination of debt or offset schedule if not contained in the relevant records

VOL 54 ISS 74 AP 19 1989 UMI

or documents. If the former employee files a supplement to the petition, the Chief Postal Inspector may file any supplemental answer and records to support the position of the Postal Service within twenty (20) calendar days from the date of receipt of the supplement filed with the Recorder.

§ 966.8 Hearing Official authority and responsibilities.

In conducting a hearing under this part, the Hearing Official's authority includes, but is not limited to, the following:

(a) Ruling on all offers, motions, or requests by the parties;

(b) Issuing any notices, orders, or memoranda to the parties concerning the hearing procedures;

(c) Conducting telephone conferences with the parties to expedite the proceedings (a memorandum of a telephone conference will be transmitted to both parties);

(d) Determining if an oral hearing is necessary and setting the place, date, and time for such hearing;

(e) Administering oaths or affirmations to witnesses;

(f) Conducting the hearing in a manner to maintain discipline and decorum while assuring that relevant, reliable and probative evidence is elicited on the issues in dispute, and that irrelevant, immaterial or repetitious evidence is excluded;

(g) Establishing the record in the case;

(h) Issuing an initial decision or one on remand; and

(i) Granting, at the request of either party, reasonable time extensions.

§ 966.9 Opportunity for oral hearing.

An oral hearing generally will be held only in those cases which, in the opinion of the Hearing Official, cannot be resolved by a review of the documentary evidence, such as when the existence, or amount, of a debt turns on issues of credibility or veracity. When the Hearing Official determines that an oral hearing is not necessary, the decision shall be based solely on written submissions.

§ 966.10 Initial decision.

(a) After the receipt of written submissions or after the conclusion of the hearing and the receipt of any post-hearing briefs, the Hearing Official shall issue a written initial decision, including findings of fact and conclusions of law, which the Hearing Official relied upon in determining whether the former employee is indebted to the Postal Service, or in upholding or revising the administrative offset schedule proposed by the Postal Service for collecting a former employee's debt. When the Judicial Officer presides at a hearing he or she shall issue a final or a tentative decision. The initial or tentative decision shall become the final agency decision unless appeal is taken pursuant to § 966.11.

(b) The Hearing Official shall promptly send to each party a copy of the initial or tentative decision, and a statement describing the right of appeal to the Judicial Officer in accordance with § 966.11.

(c) Unless the former employee or Chief Postal Inspector appeals the Hearing Official's initial or tentative decision within thirty (30) days from receipt of the decision, such decision shall become the final agency decision, and an order to that effect will be issued by the Judicial Officer.

§ 966.11 Appeal of initial or tentative decision to Judicial Officer.

(a) *Notice of appeal and supporting brief.* (1) A former employee or the Chief Postal Inspector may appeal an adverse decision by a Hearing Official by filing a Notice of Appeal with the Recorder within thirty (30) days after receipt of the decision. The Judicial Officer may extend the filing period upon written application of either party for good cause shown.

(2) The Notice of Appeal must be accompanied by a written brief specifying exceptions to findings of fact and conclusions of law, and any reasons for such exceptions, to the Hearing Official's decision.

(3) No later than thirty (30) days after receiving the Notice of Appeal and accompanying brief, the opposing party may file a response with the Recorder.

(b) *Form of review.* (1) Review by the Judicial Officer will be based on the entire record and written submissions.

(2) Objections or new issues not raised in the hearing will not be considered unless the interested party demonstrates that the failure to raise the objection or issue before the Hearing Official was caused by extraordinary circumstances.

(3) The Judicial Officer shall have all powers of a Hearing Official and on appeal may order the hearing reopened for the presentation of additional evidence or, in his or her discretion, remand the case to the Hearing Official for further action.

(c) *Decision of Judicial Officer.* The Judicial Officer shall affirm, reverse, or modify any decision appealed under this section and shall promptly serve each party to the appeal with a copy of this or her decision and a statement that such decision constitutes the final agency decision.

§ 966.12 Waiver of rights.

The Hearing Official may determine the former employee has waived his or her right to a hearing and administrative offset may be initiated if the former employee:

(a) Files a petition for hearing after the end of the prescribed thirty (30) day period, and fails to demonstrate to the satisfaction of the Hearing Official good cause for the delay;

(b) Has received notice to appear at an oral hearing but fails to do so without showing circumstances beyond the former employee's control;

(c) Fails to file required submissions or to comply with orders of the Hearing Official; or

(d) Files a withdrawal of his or her petition for a hearing with the Recorder.

§ 966.13 Ex parte communications.

Ex parte communications between a Hearing Official or his or her staff and a party shall not be made. This prohibition does not apply to procedural matters. A memorandum of any such procedural communication will be transmitted to both parties.

James A. Cohen,
Judicial Officer.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[OPP-300196; FRL-3557-2]

Pesticide Tolerance for Clofentezine; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: In FR Doc. 89-6708, appearing at page 11704 in the **Federal Register** of March 22, 1989 (54 FR 11704; March 22, 1989), EPA added 40 CFR 180.446 establishing a tolerance of 0.5 part per million for the insecticide clofentezine in or on pears. The information in the "Date" heading inadvertently failed to include the effective date, which is hereby corrected to add the following sentence: "This regulation becomes effective on March 22, 1989."

FOR FURTHER INFORMATION CONTACT: Dennis Edwards, Jr., Product Manager (PM) 12, Registration Division (H-7505C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 202, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703) 557-2386.

Dated: April 7, 1989.

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-20

[FPMR Amdt. D-69]

Management of Buildings and Grounds

ACTION: Final rule.

AGENCY: General Services Administration.

SUMMARY: Currently the GSA Rules and Regulations Governing Public Buildings and Grounds prohibit the possession of firearms and dangerous weapons (41 CFR 101-20.313) with penalty provisions stipulated in 41 CFR 101-20.35. However, the enactment of section 930 of Title 18, U.S. Code supersedes the penalty provisions stated in 41 CFR 101-20.315. Accordingly, FPMR Subchapter D is being amended.

EFFECTIVE DATE: April 19, 1989.

FOR FURTHER INFORMATION CONTACT: Richard Hankinson (202-566-0887).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

41 CFR Part 101-39

[FPMR Amdt. G-69]

Transportation and Motor Vehicles

AGENCY: Federal Supply Service, GSA.

ACTION: Final rule.

SUMMARY: This regulation provides additional criteria for approval of vehicle modifications or the addition of accessory equipment to GSA Interagency Fleet Management System vehicles. The GSA policy concerning the installation of accessory equipment in GSA vehicles has sometimes been interpreted inconsistently in that agencies or agency personnel have installed equipment that is either illegal or reflects an inappropriate impression of the Government worker to the public.

EFFECTIVE DATE: April 19, 1989.

FOR FURTHER INFORMATION CONTACT: Mr. Michael Moses, Fleet Management Division (703-557-1273).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

Interagency fleet management system.

PART 101-39—INTERAGENCY FLEET MANAGEMENT SYSTEMS

1. The authority citation for Part 101-39 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

Subpart 101-39.3—Use and Care of Interagency Fleet Management System Vehicles

2. Section 101-39.304 is revised to read as follows:

§ 101-39.304 Modification or installation of accessory equipment.

The modification of a GSA Interagency Fleet Management System (IFMS) vehicle or the permanent installation of accessory equipment on these vehicles may be accomplished only when approved by GSA. For the purpose of this regulation, permanent installation means the actual bolting, fitting, or securing of an item to the vehicle. Such modification or installation of accessory equipment must be considered by the using agency as essential for the accomplishment of the agency's mission. The request for such modification or installation shall be forwarded to the appropriate GSA Regional Fleet Manager for consideration. Accessory equipment or other after-market items which project an inappropriate appearance, such as radar detectors, will not be used on IFMS vehicles. Decorative items (i.e., bumper stickers and decals) will not be used on IFMS vehicles unless authorized by the Director, Fleet Management Division, GSA.

Dated: March 23, 1989.

Richard G. Austin,
Acting Administrator of General Services.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Child Support Enforcement

45 CFR Parts 302, 303, and 305

RIN 0970-AA03

Child Support Enforcement Program; Implementation of Section 9103 of Public Law 99-509: Prohibition of Retroactive Modification of Child Support Arrearages

AGENCY: Office of Child Support Enforcement, HHS.

ACTION: Final rule.

SUMMARY: These final rules implement section 9103 of Pub. L. 99-509, the

VOL 54 ISS 74 AP 19 1989 UMI

Omnibus Budget Reconciliation Act of 1986, which amended section 466(a) of the Social Security Act (the Act), effective October 21, 1986. Section 9103 requires that, as a condition of State IV–D plan approval, States have in effect laws requiring the use of procedures to prohibit retroactive modification of child support arrearages. However, such procedures may permit modification with respect to any period during which there is pending a petition for modification, but only from the date that notice has been given, either directly or through the appropriate agent, to the obligee or (where the petitioner is the obligee) to the obligor. Specifically, State IV–D agencies must have in effect and use procedures whereby any payment or installment of support under any child support order is, on and after the date it is due, a judgment by operation of law, with the full force, effect, and attributes of a judgment of the State and is entitled, as such, to full faith and credit in such State and in any other State.

A clear implication of child support becoming a final judgment when due is that when there is more than one child support order for the same child, absent parents owe the amount of the order providing the greatest support. If, for example, a Uniform Reciprocal Enforcement of Support Act (URESA) order requires $150 child support while a divorce order requires $200, the full $200 becomes a final judgment. If the State of residence of the absent parent enforces $150 for current support, the absent parent still owes the additional $50 as an accumulated arrearage. It would generally be more efficient for the absent parent's State to enforce the original order, without the need to obtain a new or revised order. Interstate wage withholding offers this efficiency when the absent parent is a wage-earner. The Social Security Act requires that wage withholding systems include cases where the applicable support orders were issued in other States. It would be desirable to have similarly efficient processes for cases with other types of income and assets. The requirement that the Secretary promulgate rules necessary for efficient administration, so long as they are not inconsistent with other parts of the relevant statutes, authorizes the Secretary to require changes that would simplify and expedite interstate cases. The Department hopes that the Interstate Child Support Commission established by the Family Support Act of 1988 (Pub. L. 100–485) will suggest ways to move towards a more efficient process while still preserving due process rights.

While the effective date of this statute was October 21, 1986, under section 9103(b)(2) of Pub. L. 99–509, if a State demonstrates to the Secretary, HHS, that State legislation is required to conform the State IV–D plan to the requirements of this statute, a delay based on the need for legislation may be granted. In such a case, the State's plan would not be regarded as failing to comply solely by reason of its failure to meet the requirements imposed by the new amendments until the beginning of the fourth month beginning after the end of the first session of the State's legislature which ends on or after October 21, 1986.

EFFECTIVE DATE: April 19, 1989.

FOR FURTHER INFORMATION CONTACT: Michael Fitzgerald, Policy Branch, OCSE (202) 252–5366.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

Public reporting burden for the collections of information requirements at 45 CFR 302.70(a)(9), 303.106(a), 303.106(b) and 305.57 is estimated to average 10, 1,000, .5 and 1,000 minutes per response respectively, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Office of Child Support Enforcement, Family Support Administration, 370 L'Enfant Promenade SW., Washington, DC. 20447; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC. 20503.

Background

Section 9103 of Pub. L. 99–509 is a result of Congress' recognition of the disparity among States regarding the treatment of child support orders, and in particular, a concern about State laws and practices permitting modification of child support arrearages. Although most States permit child support orders to be modified only prospectively, thus affecting only future child support payments, some States have accorded child support orders a lesser stature than other money judgments, and have allowed child support awards to be modified retroactively. In such States, the court or administrative entity has had the authority to reduce or nullify arrearages by reducing the amounts owed for past periods.

Prior to enactment of section 9103 of Pub. L. 99–509, 18 States permitted child support orders to be modified retroactively. The vast majority of such retroactive modifications when they occurred had the effect of reducing the amount of child support ordered. Thus, for example, an order for $200 a month for child support, which was unpaid for 36 months, should accumulate an arrearage of $7,200. Yet, if the obligor was brought to court, having made no prior attempt to modify the order, the order might be reduced to $100 a month retroactive to 36 months prior to the date of modification. This has the effect of reducing the arrearage from $7,200 to $3,600. The order could be reduced without placing any diligence requirement on the absent parent to petition in a timely manner to reduce the order, if for some reason his or her ability to comply with the order had changed. Such laws further permitted arguments to be made about changed circumstances in prior periods at a time when evidence may not have been easily attained or available. Rebuttal, by the obligee, thus, was extremely difficult.

In interstate cases involving registration of out-of-State child support orders, where the absent parent resided in a State different from the one where his or her children resided or where the child support order was entered, the problem of retroactive modification was exacerbated. In such cases, the custodial parent usually could not be present when the case was heard in the absent parent's State and was thus unable to testify about any claimed past change in circumstances.

In addition to the 18 States which prior to enactment of Pub. L. 99–509 permitted retroactive modification of child support orders, 17 other States did not require reducing child support debts to final judgment as the payments became due. As a result, the child support debts were not entitled to full faith and credit in other States as is the case with other money judgments.

In light of this situation, section 9103 added a new requirement to section 466(a) of the Act which States must meet in order to have an approved title IV–D State Plan. Specifically, under section 466(a)(9), States must have in effect laws requiring the use of procedures under which any payment or installment on a child support order is a judgment, on and after the date each payment is due, and retroactive modification of child support orders is prohibited with the following exception. Modification

may be permitted with respect to any period during which there is pending a petition for modification, but only from the date notice of such petition has been given, either directly or through the appropriate agent, to the obligee or (where the obligee is the petitioner) to the obligor.

In the past, when an absent parent moved out of the State where a support obligation had been established, the IV–D agency representing the custodial parent often would be required to use the Uniform Reciprocal Enforcement of Support Act (URESA) in order to obtain an enforceable order in the absent parent's new State of residence. Using URESA is time consuming and frustrating for the custodial parent owed a support obligation. Under URESA, the absent parent generally has the opportunity to allege inability to pay the previously established support amount, which may result in a lower support order being entered. Under the requirement specified by section 9103, all child support orders in a State, including orders entered before October 21, 1986, can now be enforced by any other State (e.g., by registration under the Uniform Enforcement of Foreign Judgments Act) without creating a new child support order. Such a provision will ensure that the processing of interstate cases will be less time consuming and less costly when the custodial parent already has a child support order, and child support collections will increase because accumulated arrearage debts will stay intact and not be reduced or forgiven. Specific remedies to enforce these judgments will be determined by the State where the judgment was entered or is registered, pursuant to State law.

Section 9103 of Pub. L. 99–509 adds a ninth mandatory procedure to section 466(a) of the Act which requires States to have in effect laws requiring the use of certain procedures to increase the effectiveness of their child support enforcement programs in order to have an approved title IV–D State plan. The previously existing mandatory procedures are:

(1) Wage withholding;

(2) Expedited processes to establish and enforce child support obligations;

(3) State income tax refund offset;

(4) Imposition of liens against real and personal property;

(5) Establishment of paternity at least until the child's 18th birthday;

(6) Requiring an absent parent to give security or post a bond or some other guarantee to secure payment of support;

(7) Making information regarding the amount of overdue support owed by an absent parent available to consumer reporting agencies; and

(8) Provision for wage withholding in all child support orders which are issued or modified in the State.

The new mandatory procedure added by section 9103 requires that any payment or installment of support under any child support order, whether ordered through the State judicial system or through the State's expedited processes, is (on and after the date it is due):

(A) A judgment by operation of law, with the full force, effect, and attributes of a judgment of the State, including the ability to be enforced;

(B) entitled as a judgment to full faith and credit in such State and in any other State; and

(C) not subject to retroactive modification by such State or by any other State.

However, such procedures may permit modification with respect to any period during which there is pending a petition for modification, but only from the date that notice has been given, either directly or through the appropriate agent, to the obligee (or where the obligee is the petitioner) to the obligor.

While the effective date of this statute is October 21, 1986, under section 9103(b)(2) of Pub. L. 99–509, if a State demonstrates to the Secretary, HHS, that State legislation is required to conform the State IV–D plan to the requirements of the statute, a delay in implementation based on the need for legislation may be granted. In such a case, the State's IV–D plan would not be regarded as failing to comply with the requirements imposed by the amendment until the beginning of the fourth month beginning after the end of the first session of the State's legislature which ends on or after October 21, 1986.

Statutory Authority

This final rule is published under the authority of section 1102 of the Social Security Act (the Act) which requires the Secretary to publish regulations that may be necessary for the efficient administration of the functions for which he is responsible under the Act. Section 454(20) of the Act requires State plans to provide that States have in effect laws requiring the use of the procedures prescribed in section 466 of the Act to increase the effectiveness of their Child Support Enforcement programs, and have implemented procedures regarding such laws. Section 9103 of Pub. L. 99–509 added a new paragraph (9) under section 466(a) which requires that States have in effect laws requiring the use of procedures which provide that any payment or installment of support under any child support order is a judgment, entitled to full faith and credit, and not subject to retroactive modification.

Regulatory Provisions

This regulation revises § 302.70(a) to specify that the effective date for paragraphs (1) through (8) is October 1, 1985 and for paragraph (9) is October 21, 1986.

In addition, this regulation adds a new paragraph (9) under § 302.70(a) to require that any payment or installment of support under any child support order is, on and after the date it is due, a judgment, and may not be modified retroactively.

This regulation also amends 45 CFR Part 303 to add a new § 303.106 entitled Procedures to prohibit retroactive modification of child support arrearages. Paragraph (a) of this section requires States to have in effect and use procedures which provide that any payment of child support, on and after the date it is due, is a judgment, by operation of law. This requirement provides that the child support installment must become a judgment without the need for any action by an entity; it becomes a judgment simply by a payment falling due. Paragraph (a)(2) of § 303.106 requires that the judgment be entitled to full faith and credit in the originating State and in any other State. Full faith and credit is a Constitutional principle which provides that the various States must recognize the judgments of the other States within the United States and accord them the force and effect they would have in their home State.

Paragraph (a)(3) states that the judgment is not subject to retroactive modification, except as provided under paragraph (b) of this section. The intent of this requirement is to prohibit courts or administrative entities from forgiving or reducing arrearages.

Paragraph (b) provides for the exception referred to in paragraph (a)(3) that permits limited retroactive modification of child support orders. The first condition is that modification may be permitted by the State for any period during which there is pending a petition for modification. The second condition requires that the modification may only be permitted from the date that notice of such petition has been given, either directly or through the appropriate agent to the obligee or (where the obligee is the petitioner) to the obligor.

These regulations also amend the audit regulations by adding a new § 305.57 entitled Retroactive

VOL 54 ISS 74 AP 19 1989 UMI

modification of child support arrearages. This audit criterion provides that, in order to meet the requirements of title IV–D, the State must have laws in effect and be using procedures which require that any payment or installment of support under any child support order is, on and after the date it is due, a judgment, and may not be modified retroactively, except as provided in 45 CFR 303.106 of this chapter.

Public Comment

A notice of proposed rulemaking was published in the **Federal Register** (52 FR 34689) on September 14, 1987. The comment period ended on November 13, 1987. We received 12 written comments from State and local agencies, 8 from organizations and 2 from private citizens. Although no changes were made to the regulatory language itself as a result of comments, the comments and our responses are discussed below.

General Comments

1. *Comment:* One commenter objected to the proposed regulation stating that it is virtually identical to the statute and provides no guidance to the States which is inconsistent with section 1102 of the Social Security Act.

Response: We believe that Federal law and regulations regarding the prohibition of retroactive modification of support arrearages are clear and precise. Guidance is largely unnecessary because the law leaves little room for interpretation. The States should have little trouble implementing these provisions by close adherence to the statutory language.

2. *Comment:* One commenter indicated that the law regarding the prohibition of retroactive modification of support arrearages requires that the other party receive a notice of the petition but does not address sending subsequent notices of court proceedings to that party. The commenter said that notice of each step in the process would enable the custodial parent to participate if desired.

Response: Federal law and regulations only require the party requesting the modification to send the other party a notice regarding the petition to modify support arrearages. State due process requirements should ensure that all parties to a proceeding to modify support arrearages receive a notice regarding any subsequent proceedings. If the State, as assignee of the support rights, receives such notices, the IV–D agency should keep the custodial parent informed regarding the status of any action to modify support arrearages in accordance with the new law.

3. *Comment:* With respect to the delay in implementation built into the statute, a comment was received on the definition of the term "session" as any regular, special, budget, or other session of a State legislature. The commenter suggested that we work with Congress to get the definition of the term "session" revised to include only "regular" sessions of a State legislature.

Response: The term "session," as defined in the delay of implementation provision of the new law, is identical to the definition of the same term found in the delay of implementation provisions in the Child Support Enforcement Amendments of 1984. We believe that the definition of the term "session" as used in these provisions has encouraged the States to implement Federal requirements as soon as possible.

4. *Comment:* One commenter suggested that a Regulatory Flexibility Analysis be conducted due to the additional cost and effort that may be required because of the requirement that support payments are judgments on and after the date they are due.

Response: Under the Regulatory Flexibility Act of 1980 (Pub. L. 96–354), we are required to prepare a regulatory flexibility analysis for those rules which will have a significant economic impact on a substantial number of small entities. We believe that the requirement that payments become judgments on and after the date they are due will save the States money and time. The cost of interstate enforcement activities, in particular, will be reduced because there is no longer a need for a State to incur costs or expend efforts to obtain an in-State child support order before the State can enforce past-due support owed under another State's order. Since we believe that the net effect of these requirements will be cost savings, a regulatory flexibility analysis is not required.

Judgment

5. *Comment:* Two commenters indicated that, because any payment or installment is now a separate judgment on and after the date it is due, the collection of support will be more complicated, costly and time consuming. Also, the commenters stated that judgments are obtained for direct collection and to notify third parties, either creditors or potential lenders, that the obligor has a settled debt that can be applied as a lien against property. The commenters further stated that the requirement that each payment or installment of support is a judgment as of the date it is due will confuse third parties who must conduct business based on the current situation of the obligor.

Response: We do not believe that the establishment of separate judgments for each payment or installment of child support on the date it is due makes the collection of support more complicated, costly, and time consuming. States may collect past-due support without seeking additional court or administrative action to reduce the amount due to a judgment. Currently, the States maintain records on the amount of support owed and paid on a monthly or weekly basis. Many States maintain these records on efficient and effective automated systems at minimal cost. The maintenance of information regarding separate judgments should not place an additional burden on the States.

Creditors or potential lenders can seek credit information on absent parents from consumer credit reporting agencies which can request information on child support arrearages from the IV–D agencies, Clerks of Court, or other State payment registries. States should maintain payment records which include the current total of the child support arrearages for each child support case. Child support arrearages should be treated as any other debt, and, if in arrears, the obligation may result in a lien against property of the obligor in accordance with State law.

6. *Comment:* Several commenters indicated that the regulatory provisions regarding payments becoming judgments by operation of State law when they fall due should be revised to indicate that: (1) Judgments must be recorded monthly; (2) the judgment must be accompanied by a certification of the obligee that the amount of the arrearage is accurate; and (3) notice of the judgment must be sent to the obligor. These commenters believe that these changes will virtually eliminate requests from obligors to open or strike a judgment, and lessen the number of errors in the amounts of judgments which impact real estate searches and credit reports.

Response: We do not believe the commenters' suggested changes are warranted. State child support case payment records, in most States, should eliminate the need for: (1) Recording judgments periodically; or (2) obtaining certification from the obligee that the amount of the judgment (arrearage) is accurate. States that have inadequate child support payment records will have to make the changes necessary to maintain current and accurate record keeping systems. There is certainly no need to send a notice of each incremental change in the judgment to the obligor since he or she is responsible for meeting the obligation and will know when he or she has failed to do so. Finally, Federal law regarding the prohibition of retroactive modification of support arrearages should limit requests from obligors to open or strike a judgment.

7. *Comment:* One commenter objected to the regulatory provision that makes any child support payment or installment, under a support order, a judgment as of the date it is due because: (1) It is contrary to standard law and practice; (2) it raises a Constitutional issue regarding separation of powers; and (3) it violates the obligor's due process rights.

Response: Federal law provides that any payment or installment of support under any child support order is, on and after the date it is due, a judgment by operation of law, with the full force, effect, and attributes of a judgment of the State, including the ability to be enforced. The commenter did not explain how the principle of separation of powers is allegedly violated, but this requirement has long been the established law of many States and we are unaware of any challenges on Constitutional grounds. We believe that Congress is simply requiring States to afford child support debts the same status as other court or administratively ordered debts in the State that are considered judgments.

In addition, the commenter did not explain how due process was violated. The child support obligor's due process rights are protected under State law when the support obligation is established. Also, the obligor, subject to enforcement of a child support judgment, is entitled to the same due process protections that apply to the enforcement of other judgments in the State. For example, an obligor who alleges that all payments to the custodial parent have been made, may be entitled under State law to a hearing before the court or administrative authority.

8. *Comment:* One commenter asked how long it generally takes a court to act on a petition for modification of support. The commenter also recommended that the regulations specify a time frame within which a final judgment must be issued after a petition for modification of a support order is filed because the custodial parent may face problems without the additional support.

Response: Historically, there have been large backlogs of child support cases in State courts awaiting resolution. However, as a result of the Child Support Enforcement Amendments of 1984, Federal regulations governing the Child Support Enforcement program at 45 CFR 303.101 require the States to have in effect and use expedited processes (administrative and/or expedited judicial processes) to establish and enforce child support orders. Under expedited processes, actions to establish and enforce support orders in IV–D cases must be completed from the time of filing to the time of disposition within the following timeframes: (1) In 90 percent of all cases, within 3 months, (2) 98 percent in 6 months; and (3) 100 percent in 12 months. This standard also applies to the modification of support orders in IV–D cases under expedited processes unless complex issues are involved requiring judicial resolution (45 CFR 303.101(b)(4)).

Prohibition of Retroactive Modification

9. *Comment:* A commenter indicated that the prohibition of retroactive modification of support orders requirement does not provide exceptions for individuals who are unable to promptly file for modification due to severe injury or sudden lengthy illness. Several commenters objected to the prohibition of retroactive modification of support because it requires the obligor who obtains custody of a child or is temporarily out of work to immediately file a petition to modify the support order and applies to the obligor who may have to satisfy arrearages that accrued after a child died or was emancipated.

Response: Federal law does not provide for any exception to the prohibition of retroactive modification of support arrearages other than for the period after the date notice of the petition for modification is given until the modification occurs. Congress in Senate Report No. 99–348, page 155, and in the Conference Report No. 99–1012, Page 273, indicated that, if the non-custodial parent's circumstances change because of unemployment, illness or another such reason, the non-custodial parent is responsible for notifying the custodial parent and the court or entity that issued the child support order of the changed circumstances and his or her intention to modify the support order. The obligor is in the best position to know of a change in circumstances and bring it to the attention of the court or administrative authority.

It is the obligor's responsibility to take action promptly to seek modification of a support obligation based on a change in his or her circumstances. The obligor or his or her representative should immediately, upon the development of any circumstances that inhibit his or her ability to pay support, file a petition with the court or administrative authority to modify the support order. These circumstances might include: (1) The obligor is unable to pay support due to confinement or incarceration in a mental or penal institution; (2) the child goes to live with the obligor; (3) the child is emancipated or dies; (4) the obligor becomes permanently, or temporarily disabled, or seriously ill, with no benefits, earning capacity or assets; or (5) the obligor becomes unemployed. If the obligor cannot afford legal counsel, the obligor should seek assistance from any available public legal services.

Federal law and regulations do not preclude the States from having laws that permit automatic prospective suspension or prospective termination of the support obligation upon the development of specific circumstances such as the emancipation or death of a child. Such "modifications by operation of law" upon the occurrence of an event known to both parties, if applicable generally to all child support orders in the State, would not appear to contradict the intent of the law. We would caution, however, that any apparent "exceptions" to the general rule barring retroactive modification of support orders will be closely scrutinized for purposes of determining State IV–D plan conformity.

Enforcement of child support judgments should be treated the same as enforcement of other judgments in the State, and a child support judgment would also be subject to the equitable defenses that apply to all other judgments. Thus, if the obligor presents to the court or administrative authority a basis for laches or an equitable estoppel defense, there may be circumstances under which the court or administrative authority will decline to permit enforcement of the child support judgment. We do not, however, believe that a temporary loss of employment or even a change of actual custody of the child should result in a modification of support liability unless the court or administrative authority is duly notified and sanctions such modification.

10. *Comment:* Another commenter indicated that the provisions regarding the prohibition of retroactive modification of support arrearages result in deprivation of Constitutional rights, denial of due process, and lack of equity and fair play in cases in which there are changes in circumstances and, for various reasons, the obligor does not seek to modify the order. Several commenters objected to the prohibition of retroactive modification of support because the requirement will cause substantial litigation due to the denial of

VOL 54 ISS 74 AP 19 1989 UMI

property and other rights and due process to obligors.

Response: Federal law and regulations provide that child support judgments will be treated in the same manner as any other judgment in the State. A child support debtor whose circumstances change is entitled to the same fairness and equity defenses and due process rights as other judgment debtors in the State. An obligor subject to the enforcement of a child support judgment is entitled to the same due process protection and statutory exemptions that apply to the enforcement of other judgments within the State.

We encourage States to establish expedited procedures for modification of child support judgment orders whenever there is a substantial change in the circumstances of either party. State laws and court orders can provide for prompt, efficient modifications of support obligations when deemed appropriate. In addition, some occurrences (e.g., death or emancipation of a dependent child) might be construed under State law as triggering automatic prospective termination or modification of the support obligation to avoid inequitable results.

11. *Comment:* Three commenters objected to the prohibition of retroactive modification of support arrearages because it replaces the case-by-case review by the judiciary which they believe is necessary to ensure fairness and equity. For example, if the obligor loses his or her job or becomes seriously ill and lacks the funds or knowledge to pursue immediate modification of the support order, arrearages will accrue which otherwise might have been avoided. Several commenters objected to the prohibition of retroactive modification of support because it limits judges' discretion and authority and prohibits the obligor from challenging improperly calculated arrearages.

Response: Federal law and regulations will require some States to amend laws and to limit judicial discretion and authority regarding the retroactive modification of support arrearages. In a relatively small number of cases there may be situations where obligors fail to seek or are unable to obtain prompt modifications to which they may have been entitled. We believe, however, that this law remedies a greater inequity which previously occurred in many more cases where a child support obligor, through his or her own neglect or refusal to comply with the support order, incurred arrearages which were subsequently reduced or forgiven entirely by the court. In such situations the obligor's children paid the consequences through no fault or responsibility of their own. We encourage States to enact laws providing expedited procedures for prompt modification of support obligations whenever circumstances change (e.g., an obligor becomes incapacitated). In addition, the courts or administrative authority should provide guidance when child support orders are entered encouraging either party to notify the court or administrative authority when circumstances change.

Federal law and regulations do not prohibit the correction of improperly calculated arrearages; the IV–D agency, judiciary or administrative authority may correct any improperly calculated arrearages.

12. *Comment:* A commenter suggested that the proposed regulations be revised to permit retroactive reduction of support arrearages if a determination is made that failure to pay support was not willful. The commenter indicated that incarcerated individuals unable to obtain prompt legal representation would be assisted by this change. Another commenter indicated that the proposed regulations place a hardship on incarcerated individuals who are, for the most part, incapable of paying support, or securing legal counsel.

In addition, several commenters suggested that the regulations be revised to indicate that when a person is confined to jail, prison or a mental health institution or treatment facility, the initial date of confinement is constructive notice that a petition to revise the support obligation during the period of incarceration or confinement is pending. The commenters believe that this change is necessary because: (1) Many inmates do not have prompt access to legal assistance or the courts; (2) the ability to pay support is affected by incarceration or confinement; (3) support arrearages that accrue while an individual is confined or incarcerated cannot be modified once an individual is released; and (4) the accumulation of support arrearages while an individual is confined or incarcerated may discourage an individual from working while incarcerated or upon release.

Response: The obligor, including an incarcerated individual, is generally responsible for filing a request for modification of the support order with the appropriate court or administrative authority immediately upon any change in circumstances which affects the ability to pay, or need for support. The law does not provide any exception for obligors who failed to file in a timely manner for any reason including lack of knowledge regarding the process, prompt access to counsel, and lack of money. If the obligor cannot afford legal counsel, the obligor should seek assistance from available public legal services or should contact the court or administrative authority directly.

The Federal Government does not prescribe State requirements for notice of filing a petition to suspend or modify a support obligation. The State's own procedures of due process specify exactly what notice is required in the circumstances presented by the commenter. It would appear that States might enact laws that could provide for automatic prospective suspension of support obligations when a person is placed in a hospital or institution and does not have the assets or unearned income necessary to meet the support obligation if such laws applied generally to all judgment debtors in the State. Some obligors may, however, have assets or investment income which are adequate to meet their obligations even during periods of temporary unemployment. We believe that most modifications should be subject to approval of the court or administrative authority, and that the obligor is usually in the best position to bring changes in his or her circumstances to the court's or administrative authority's attention.

13. *Comment:* One commenter suggested that the regulations be revised to indicate that prohibition of retroactive modification of support arrearages in the 18 States that permitted such modification before the new law be a "rebuttable presumption" rather than an absolute prohibition.

Response: Federal law does not allow exceptions to the prohibition of retroactive modification of support arrearages for some States based on their past practices, and we believe the proposed change to the regulation would be improper. The prohibition applies on the same basis to all States; States may not use a "rebuttable presumption" standard.

14. *Comment:* One commenter suggested that the regulations be revised to permit the parties (obligee and obligor) to stipulate to a retroactive reduction of the child support arrearage if the obligor agrees to make an immediate lump sum payment. Several commenters suggested that the regulations be revised to permit retroactive modification of support arrearages by agreement of the parties. A commenter also asked whether a State law that permits a court approved agreement between the parties to retroactively modify a support order is consistent with section 9103 of Pub. Law 99–509. If not, the commenter further suggested that the regulations indicate

that this is not permissible. Another commenter suggested that the regulations be revised to clarify that the prohibition of retroactive modification of support arrearages does not provide for any judicial or parental discretion.

Response: Federal law and regulations provide that child support is a judgment on and after the date due with the full force, effect and attributes of a judgment of the State. Such support judgments may, however, be compromised or satisfied by specific agreement of the parties on the same grounds as exist for any other judgment in the State. Judgments involving child support arrearages assigned to the State under titles IV–A, IV–E and XIX of the Social Security Act, of course, may not be compromised by an agreement between the obligee and obligor unless the State, as assignee, also approves such an agreement. State law may require that any agreement affecting child support orders must be endorsed by the court or administrative authority to ensure that the best interests of the child are protected.

15. *Comment:* One commenter asked whether the law regarding the prohibition of retroactive modification of support arrearages applies to a custodial parent's request to increase the amount of arrearages and future payments. The commenter further asked whether, if the new law applies to this situation, does the modification apply as of the date the obligor receives notice of the petition.

Response: Federal law and regulations permit an upward modification of the support order and related arrearages for any period during which a petition is pending for modification, but only from the date notice has been given, either directly or through the appropriate agent, to the obligor.

16. *Comment:* One commenter asked about the extent of IV–D agency responsibility for judicial compliance with the prohibition of retroactive modification requirements.

Response: OCSE approval of a State plan amendment regarding the prohibition of retroactive modification of support arrearages requirements is dependent upon whether the State has in effect the necessary State laws and procedures required by the new Federal law. Judges would be required by State law to comply with the prohibition of retroactive modification requirements.

Federal law requires each State to operate a Child Support Enforcement program throughout the State in accordance with the requirements of title IV–D of the Social Security Act, including the prohibition of retroactive modification of support arrearages. To ensure that a State has an effective Child Support Enforcement program, OCSE conducts an audit of each State's Child Support Enforcement program, at least once every three years, to determine whether the State is in substantial compliance with the requirements of title IV–D of the Act. If, as the result of an audit, a determination is made that the State did not substantially comply with the requirements regarding the prohibition of retroactive modification of support, the State will be subject to a reduction of Federal funding under title IV–A of the Act.

17. *Comment:* One commenter suggested that the regulations be revised to specify that, at the time the support obligation is established, the obligor be notified of the requirements regarding the prohibition of retroactive modification of support arrearages. The commenter also suggested that the regulations be revised to require prison administrators to give immediate notice to inmates regarding the prohibition of retroactive modification of support arrearages requirements.

Response: Federal law and regulations do not prohibit the State from notifying the parties, at the time the support order is established, or, in the case of incarceration, at the time of incarceration, notifying the obligor, of the prohibition of retroactive modification of support arrearages requirements. We believe that the States are in the best position to determine the means, and under what circumstances, notice should be provided.

18. *Comment:* A comment was received on the requirement that arrearages may be modified, but only from the date notice of the petition for modification has been given to the obligee, or where the obligee is the petitioner, to the obligor. The commenter suggested that this provision refers to the date action is filed and notice is issued or the date the notice is issued if the notice is not issued on the same date the petition is filed, rather than the date notice is received by the opposing party. The commenter's rationale was that it is consistent with general law that the court's powers are invoked and exercisable as of the date the petition is filed and notice is sent to the other party. The commenter believes that the legislative history regarding the prohibition of retroactive modification of arrearages supports this position.

A second commenter suggested that the regulations be revised to permit retroactive modification of support arrearages as of the date the notice is filed, rather than the date of service on the obligor because most motions to modify include requests to increase the support order and the obligor will attempt to avoid service of process. Several other commenters also recommended that the regulations be revised to permit retroactive modification of support arrearages as of the date the petition is filed. One of these commenters indicated that the preamble does not address why the regulation requires the States to abandon the longstanding legal principle that a judgment may be modified retroactively at least to the date it is filed. Another commenter suggested that the regulations be revised to indicate that modification of support arrearages can take place during any period in which a petition for modification is pending if the party seeking modification of support arrearages shows diligence in providing notice to the other party because various tactics will be used by the obligor to avoid service of process.

Finally, a commenter asked that we explain the meaning of the word "given" as used in the phrase "the date notice of the petition has been given" in the proposed regulations.

Response: Federal law permits the retroactive modification of support arrearages during any period in which a petition for modification is pending, but only from the date that notice of the petition has been given, either directly or through the appropriate agent, to the obligee, or where the obligee is the petitioner, to the obligor. The regulatory requirement mirrors the Federal statutory language. We believe Congress intended that "date of notice" or "date notice is given" should be construed literally and in terms of acquiring personal jurisdiction over the other party. State law provides rules to determine when personal jurisdiction is acquired by service of notice of an action. Under these provisions, the "date of notice" or "date notice is given" should be interpreted by the State in the same way as it is generally applied to commence other civil litigation within the State. State law regarding the establishment of the date of notice that a petition has been filed dictates when the modification may be effective. The date of notice may be the same date on which the petition is filed if "notice is given" on the same date by publication or other means and personal service is not required under State law.

Although the effective date of any modification is tied to the date notice of the petition is given, we believe notice through the mail or other means may be sufficient so long as the State has

VOL 54 ISS 74 AP 19 1989 UMI

acquired personal jurisdiction over the other party under State law. Thus, the party named in the petition could not necessarily avoid the process server to delay the effective date of any modification. However, the date of notice is subject to State due process requirements. Consequently, some States may tie "date of notice" to actual receipt of personal service if that is the standard in the State for securing personal jurisdiction over the opposing party in a modification proceeding.

Regulatory Impact Analysis

The Secretary has determined, in accordance with Executive Order 12291 that this rule does not constitute a "major" rule for the following reasons:

(1) The annual effect on the economy is less than $100 million;

(2) This rule will not result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and

(3) This rule will not result in significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Analysis

Under the Regulatory Flexibility Act of 1980 (Pub. L. 96-354), we are required to prepare a regulatory flexibility analysis for those rules which will have a significant economic impact on a substantial number of small entities. For this rule, the principle impact is on State IV-D agencies who will be required to expend minimal effort, and on the judicial system. This provision could potentially save money for both the Federal Government and the States by increasing amounts available for collection and reducing the costs of collecting support. Further, the cost of interstate enforcement activities will be reduced by eliminating the need to obtain a child support order in more than one State. Therefore, a regulatory flexibility analysis is not required.

(Catalog of Federal Domestic Assistance Program No. 13.783, Child Support Enforcement Program.)

Dated: September 28, 1988.

Wayne A. Stanton.

Director, Office of Child Support Enforcement.

Approved: October 4, 1988.

Otis R. Bowen,

Secretary.

Editorial Note: This document was received by the Office of the Federal Register, April 14, 1989.

For the reasons set out in the preamble, Title 45, Chapter III of the Code of Federal Regulations is amended as follows:

PART 302—[AMENDED]

1. The authority citation for Part 302 continues to read as follows:

Authority: 42 U.S.C. 651 through 658, 660, 664, 666, 667, 1302, 1396a(a)(25), 1396b(d)(2), 1396b(o), 1396b(p) and 1396(k).

2. Section 302.70 is amended by amending paragraph (a) by: revising the introductory text; removing the word "and" at the end of paragraph (a)(7); removing the period at the end of paragraph (a)(8) and inserting "; and" in its place; and, adding paragraph (a)(9) to read as follows:

§ 302.70 Required State laws.

(a) *Required laws.* Effective October 1, 1985, with respect to paragraphs (a)(1) through (8) of this section, and effective October 21, 1986, with respect to paragraph (a)(9) of this section, the State plan shall provide that, in accordance with sections 454(20) and 466 of the Act, the State has in effect laws providing for and has implemented the following procedures to improve program effectiveness:

* * * * *

(9) Procedures which require that any payment or installment of support under any child support order, whether ordered through the State judicial system or through the expedited processes required by paragraph (a)(2) of this section, is (on and after the date it is due):

(i) A judgment by operation of law, with the full force, effect, and attributes of a judgment of the State, including the ability to be enforced;

(ii) Entitled as a judgment to full faith and credit in such State and in any other State; and

(iii) Not subject to retroactive modification by such State or by any other State, except as provided in § 303.106(b).

* * * * *

PART 303—[AMENDED]

3. The authority citation for Part 303 continues to read as follows:

Authority: 42 U.S.C. 651 through 658, 660, 663, 664, 666, 667, 1302, 1396a(a)(25), 1396b(d)(2), 1396b(o), 1396b(p) and 1396(k).

4. Part 303 is amended by adding § 303.106 to read as follows:

§ 303.106 Procedures to prohibit retroactive modification of child support arrearages.

(a) The State shall have in effect and use procedures which require that any payment or installment of support under any child support order is, on and after the date it is due:

(1) A judgment by operation of law, with the full force, effect, and attributes of a judgment of the State, including the ability to be enforced;

(2) Entitled as a judgment to full faith and credit in such State and in any other State; and

(3) Not subject to retroactive modification by such State or by any other State except as provided in paragraph (b) of this section.

(b) The procedures referred to in paragraph (a)(3) of this section may permit modification with respect to any period during which there is pending a petition for modification, but only from the date that notice of such petition has been given, either directly or through the appropriate agent, to the obligee or (where the obligee is the petitioner) to the obligor.

PART 305—[AMENDED]

5. The authority citation for Part 305 continues to read as follows:

Authority: 42 U.S.C. 603(b), 604(d), 652(a)(1) and (4), and 1302.

6. Part 305 is amended by adding § 305.57 to read as follows:

§ 305.57 Retroactive modification of child support arrearages.

For the purposes of this part, in order to be found in compliance with the State plan requirement to prohibit the retroactive modification of child support arrearages (45 CFR 302.70(a)(9)), a State must have in effect laws which provide that any payment or installment under any child support order is, on and after the date it is due, a judgment and be using procedures which prohibit retroactive modification of child support arrearages as provided in 45 CFR 303.106 of this chapter.

Proposed Rules

Federal Register
Vol. 54, No. 74
Wednesday, April 19, 1989

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 89-NM-22-AD]

Airworthiness Directives; Aerospatiale Model ATR42-300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to certain Aerospatiale Model ATR42-300 series airplanes, which would require modification of the fuselage emergency exit frame at shoot bolt and upper stop locations. This proposal is prompted by a fatigue and damage tolerance analysis of the fuselage emergency exit frame, which revealed the need to increase the thickness of the fitting base at the upper stop and shoot bolt locations. This condition, if not corrected, could lead to failure of the emergency exit frame and subsequent rapid decompression.

DATE: Comments must be received no later than June 6, 1989.

ADDRESS: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-22-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert McCracken, Standardization Branch, ANM-113; telephone (206) 431-1979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-22-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

Fatigue and damage tolerance analysis of the fuselage emergency exit frame on Aerospatiale Model ATR42-300 series airplanes has revealed that the thickness of the fitting base at the shoot bolt and upper stop locations is inadequate to prevent cracking. This condition, if not corrected, could lead to failure of the emegency exit frame and subsequent rapid decompression.

Aerospatiale has issued Service Bulletin ATR42-53-0024, Revision 2, dated May 16, 1988, which describes procedures for modification of the fuselage emergency exit frame to increase the thickness of the fitting base from 2 mm to 4.5 mm.

This airplane model is manufactured in France and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable bilateral airworthiness agreement.

Since this condition involves potential fatigue failure of the emergency exit structure, and is likely to exist or develop on airplanes of this model registered in the United States, the FAA is proposing an AD that would require modification of the emergency exit frame in accordance with the service bulletin previously described. Modification would be required prior to the accumulation of 12,000 landings, or within 60 days if airplanes have accumulated 12,000 or more landings.

It is estimated that 33 airplanes of U.S. registry would be affected by this AD, that it would take approximately 40 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. The required modification parts would be provided by the manufacturer at no charge to operators. Based on these figures, the total cost impact of this AD to U.S. operators is estimated to be $52,800.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model ATR42-300 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Aerospatiale: Applies to Model ATR42-300 series airplanes, Serial Numbers 003 through 052, certificated in any category. Compliance is required as indicated, unless previously accomplished.

To prevent failure of the emergency exit frame, accomplish the following:

A. Prior to the accumulation of 12,000 landings or within 60 days after the effective date of this AD, whichever occurs later, accomplish modification of the fuselage emergency exit frame in accordance with Aerospatiale Service Bulletin ATR42-53-0024, Revision 2, dated May 16, 1988.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM-113.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Aerospatiale, 316 Route de Bayonne, 31060 Toulouse, Cedex 03, France. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on April 7, 1989.

Darrell M. Pederson,
Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-NM-19-AD]

Airworthiness Directives; Boeing Model 727 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to Boeing Model 727 series airplanes, which would require inspection for cracks of the main landing gear (MLG) inboard door actuator rib fitting, and rework or replacement, if necessary. This proposal is prompted by a recent left MLG-up landing that resulted from a fractured MLG door actuator rib fitting. This condition, if not corrected, could result in non-extension of the MLG and damage to the airplane because of the wheels-up landing.

DATES: Comments must be received no later than June 5, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-19-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Stanton R. Wood, Airframe Branch, ANM-120S; telephone (206) 431-1924. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-19-AD, 17900 Pacific Highway South, C-68966 Seattle, Washington 98168.

Discussion

There have been several reported incidents of cracked main landing gear (MLG) inboard door actuator rib fittings on Boeing Model 727 series airplanes. In one case, one fitting on the left MLG door failed and resulted in a landing with the left MLG retracted. The cracked fittings occurred on airplanes which had accumulated between 20,000 and 50,000 landings. Cracking has been attributed to stress corrosion. This condition, if not corrected, could result in failure of the MLG to extend.

The FAA has reviewed and approved Boeing Service Bulletin 727-32-0364, dated December 15, 1988, which describes procedures for inspection, rework, and replacement of the MLG inboard door actuator rib fitting.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require inspection and rework and, if necessary, repair or replacement of the MLG inboard door actuator rib fitting in accordance with the service bulletin previously described.

There are approximately 1,695 Model 727 series airplanes in the worldwide fleet. It is estimated that 1,172 airplanes of U.S. registry would be affected by this AD, that it would take approximately 4 manhours per airplane to accomplish the required actions, and that the average

VOL
54
ISS
74
AP
19
1989
UMI

labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $187,520.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, would not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, Model 727 series airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposesd to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the folloiwng new airworthiness directive:

Boeing: Applies to all Model 727 series airplanes certified in any category. Compliance is required as indicated, unless previously accomplished.

To prevent failure of a main landing gear (MLG) inboard door from operating as a result of cracking in the actuator rib fitting, accomplish the following:

A. Prior to the accumulation of 20,000 landings, or within the next 1,000 landings after the effective date of this AD, whichever occurs later, accomplish the following in accordance with Boeing Service Bulletin 727-32-0364, dated December 15, 1988:

1. Conduct an eddy current or dye penetrant inspection of the MLG inboard door actuator rib fittings listed in figure 3, for cracks, in accordance with that figure of the service bulletin.

2. If no cracks are detected, rework prior to further flight, in accordance with paragraph b. of figure 3 of the service bulletin.

3. If cracks are detected in the MLG inboard door actuator rib fitting, rework or replace with properly reworked or new fitting, prior to further flight, in accordance with paragraph c. of figure 3 of the sevice bulletin.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Seattle Aircraft Certification Office.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Boeing Commercial Airplanes, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on April 6, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 89-NM-37-AD]

Airworthiness Directives; CASA Model C-212 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to revise an existing airworthiness directive (AD), applicable to CASA Model C-212 series airplanes, which currently requires incorporation of a revision to the FAA-approved maintenance inspection program that provides for structural inspections of the mechanical flap control system, and replacement, as necessary. That action was prompted by a structural reevaluation of the entire flap control system, which identified certain significant structural components which need to be inspected for damage, including corrosion and cracking, to assure the continued airworthiness of the flap system. This proposal would specify the compliance time for accomplishment of the initial inspection of the wing flap control system. This action is prompted by a further assessment of the wing flap control system inspection intervals, and the need to identify the initial inspection requirement. Corrosion or cracking in components of the wing flap control system, if not detected or corrected, could compromise the structural integrity of the flap system.

DATES: Comments must be received no later than May 15, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-37-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Contrucciones Aeronauticas, S.A. (CASA), Getafe, Madrid, Spain. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Robert McCracken, Standardization Branch, ANM-113; telephone (206) 431-1979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-37-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

On December 28, 1988, the FAA issued AD 88-02-08, Amendment 39-6111 (54 FR 1341; January 13, 1989), applicable to CASA Model C-212 series airplanes, which requires incorporation of a revision to the FAA-approved maintenance inspection program that would provide for structural inspections of the mechanical wing flap control system, and repair or replacement, as necessary. That action was prompted by a structural re-evaluation of the entire flap control system, which identified certain significant structural components which need to be inspected for damage, including corrosion and cracking, to assure the continued airworthiness of the flap system. This condition, if not corrected, could compromise the structural integrity of the wing flap control system.

Since issuance of that AD, a further assessment of the wing flap control system inspection intervals has revealed the need to perform the initial inspection when the airplane has accumulated 4,000 landings (or within 6 months after the effective date of this proposed amendment). This initial inspection compliance time was not specified in the existing AD.

This airplane model is manufactured in Spain and Indonesia and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Administration and the applicable bilateral airworthiness agreement.

Since this condition is likely to exist or develop on other airplanes of this same type design registered in the United States, an AD is proposed which would amend AD 88-02-08, to require that the initial supplemental structural inspection of the wing flap control system be accomplished prior to the accumulation of 4,000 landings or within 6 months after the effective date of this amendment, whichever occurs later, in accordance with CASA Document COM. 212-206, Revision 1, dated May 20, 1988. The repetitive inspection interval of 4,000 landings, as required by the existing AD, would remain unchanged. Additionally, the requirement to revise the FAA-approved maintenance inspection program would remain unchanged.

Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511) and have been assigned OMB Control Number 2120-0056.

It is estimated that 61 airplanes of U.S. registry would be affected by this AD, that it would take approximately 11 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $26,840. (This supplemental inspection would be repeated every 4,000 landings at this same cost.)

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because few, if any, CASA Model C-212 series airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By revising AD 88-02-08, Amendment 39-6111 (54 FR 1341; January 13, 1989), as follows:

CASA: Applies to all CASA Model C-212 series airplanes, certificated in any category. Compliance is required as indicated below, unless previously accomplished.

To ensure continuing structural integrity of the wing flap control system, accomplish the following:

A. Within six months after February 17, 1989 (the effective date of AD 88-02-08, Amendment 39-6111), incorporate a revision into the FAA-approved maintenance inspection program that will provide for inspection of the wing flap control system in accordance with CASA Document COM. 212-206, Revision 1, dated May 20, 1988. The non-destructive inspection techniques set forth in the CASA C-212 non-destructive procedures (27-50-01 through 27-50-05) provide acceptable methods for accomplishing the inspections required by this AD. All inspection results, positive or negative, must be reported to CASA Product Support, in accordance with instructions in the CASA Flap Control System Inspection Document. This Supplemental Structural Inspection (SSI) is to be repeated at intervals not to exceed 4,000 landings.

B. Prior to the accumulation of 4,000 landings, or within six months after the effective date of this amendment, whichever occur later, inspect the wing flap control system in accordance with CASA Document COM. 212-206, Revision 1, dated May 20, 1988.

C. Cracked structure or damaged components detected during the inspections required by paragraphs A. and B., above, must be replaced prior to further flight, in accordance with CASA Document COM. 212-206, Revision 1, dated May 20, 1988.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Standardization Branch, ANM-113, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Standardization Branch, ANM-113.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of the modifications required by this AD.

VOL 54 ISS 74 AP 19 1989 UMI

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Contrucciones Aeronauticas, S.A. (CASA), Getafe, Madrid, Spain. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on April 10, 1989.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 89-9340 Filed 4-18-89; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-NM-33-AD]

Airworthiness Directives; Lockheed Aeronautical Systems Co. Model L-1011-385-1, L-1011-385-1-14, L-1011-385-1-15, and L-1011-385-3 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to Lockheed Aeronautical Systems Company Model L-1011-385-1, L-1011-385-1-14, L-1011-385-1-15, and L-1011-3 series airplanes, which would require inspecting the Auxiliary Power Unit (APU) starter ground cable for loose ground stud terminations, and appropriate corrective action, as necessary, to eliminate the APU starter ground cable discrepancies. This proposal is prompted by a report of loose APU starter ground terminals, and deterioration of the grounding bracket due to electrical arcing at the ground studs. This condition, if not corrected, could result in a fire caused by arcing, since an eroded ground stud and a missing wire harness clamp could allow the starter ground cable to fall onto thee APU fuel shutoff values.

DATES: Comments must be received no later than June 1, 1989.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-33-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168. The applicable service information may be obtained from Lockheed Aeronautical Systems Company, P.O. Box 551, Burbank, California 91520, Attention: Commercial Order Administration, Dept. 65-33, Unit 20, Plant A-1. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South Seattle, Washington, or at 3229 East Spring Street, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Elvin K. Wheeler, Aerospace Engineer, Systems and Equipment Branch, ANM-132L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (213) 988-5344.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 89-NM-33-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The FAA has received a report where one L-1011 operator, experiencing difficulty in starting the APU, discovered that the two APU starter ground terminals, located just aft of the FS 1860 bulkhead and above the APU firewall fuel shut-off values, were loose, and the grounding bracket had deteriorated due to electrical arcing at the ground studs. A partial fleet check conducted by eight L-1011 operators revealed that, of 56 aircraft checked, 23 had some discrepancy in the ground stud/bracket installation. Of those 23, 5 had loose studs with no evidence of arcing and 12 were missing the required bracket mid-span cable clamp. This condition, if not corrected, could result in a fire caused by arcing, since an eroded ground stud and a missing wire harness clamp could allow the starter ground cable to fall onto the APU fuel shutoff valves.

The FAA has reviewed and approved Lockheed TriStar L-1011 Service Bulletin 093-49-062, dated September 19, 1988, which describes the inspection/correction procedures necessary to eliminate the APU starter ground cable discrepancies.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require inspection for proper installation of the APU starter ground cable, and correction, if necessary, in accordance with the service bulletin previously described.

There are approximately 241 Model L-1011-385 series airplanes in the worldwide fleet. It is estimated that 116 airplanes of U.S. registry would be affected by this AD, that it would take approximately 4.5 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $20,880.

The regulations proposed herein would not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities because of the minimal cost of compliance per airplane ($180). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Lockheed Aeronautical Systems Company: Applies to Model L-1011-385-1, L-1011-385-1-14, L-1011-385-1-15, and L-1011-385-3 series airplanes, as listed in Lockheed TriStar L-1011 Service Bulletin 093-49-062, dated September 19, 1988, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent a fire from arcing due to loose APU starter ground cables falling off the ground studs and onto the APU fuel shutoff valves, accomplish the following:

A. Within 6 months after the effective date of this airworthiness directive (AD), inspect the APU starter ground stud/bracket for proper installation and proper ground stud torque in accordance with the Accomplishment Instructions of Lockheed TriStar Service Bulletin 093-49-062, dated September 19, 1988. Any discrepancies identified must be corrected prior to further flight, in accordance with the service bulletin.

B. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

Note: The request should be forwarded through an FAA Principal Maintenance Inspector (PMI), who may add any comments and then send it to the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special Flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Lockheed Aeronautical Systems Company, P. O. Box 551, Burbank, California 91520, Attention: Commercial Order Administration, Dept. 65-33, Unit 20, Plant A-1. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Los Angeles Aircraft Certification Office, 3229 East Spring Street, Long Beach, California.

Issued in Seattle, Washington, on April 4, 1989.

Steven B. Wallace,

Acting Manager, Transport Airplane Directorate, Aircraft certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 89-ANE-02]

Airworthiness Directives; Pratt & Whitney (PW) JT8D-9, -9a, -11, -15, -15A, -17, -17A, -17R, and -17AR Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes to adopt a new airworthiness directive (AD) that would require replacement of the first stage fan blade retaining plates on certain PW JT8D engines. The AD requires replacing the original retaining plates, and the retaining plates which were introduced by PW Service Bulletin (SB) 5739, with a new improved retaining plate. The proposed AD is needed to prevent a first stage fan blade liberation which could result in fire, inflight shutdown, engine cowl release, or airframe damage.

DATES: Comments must be received on or before July 14, 1989.

ADDRESSES: Comments on the proposal may be mailed in duplicate to: Federal Aviation Administration, New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89-ANE-02, 12 New England Executive Park, Burlington, Massachusetts 01803, or delivered in duplicate to Room 311 at the above address.

Comments delivered must be marked: Docket No. 89-ANE-02.

Comments may be inspected at the New England Region, Office of the Assistant Chief Counsel, Room 311, between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays.

The applicable alert service bulletin (ASB) may be obtained from Pratt & Whitney, Publication Department, P.O. Box 611, Middletown, Connecticut 06457, or may be examined in the Regional Rules Docket.

FOR FURTHER INFORMATION CONTACT: Thomas Boudreau, Engine Certification Branch, ANE-141, Engine Certification Office, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273-7121.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the FAA before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules docket, at the address given above, for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: Comments to Docket No. 89-ANE-02. The postcard will be date/time stamped and returned to the commenter.

This document proposes to adopt a new AD mandating replacement of the first stage fan blade retaining plate on certain PW JT8D engines. The new retaining plate contains improved blade retention features.

There has been a total of nineteen first stage fan blade liberation events. Thirteen of these events resulted in fire, engine cowl release, or airframe damage. Fifteen of the nineteen blade liberation events occurred with the original retaining plates. However, four events occurred with improved retaining plates which were introduced by PW SB 5739, dated March 5, 1987. Also, there have been seven first stage fan blade liberation events caused by bird ingestion, all occurring on wing mounted engines containing the original retaining plates. Consequently, the risk of a blade liberation event is dependent on the aircraft installation in addition to the retaining plate design.

All nineteen events have occurred on JT8D-9 through JT8D-17AR engines. The

VOL 54 ISS 74 AP 19 1989 UMI

JT8D–1 through JT8D–7B engines incorporate a different retaining plate configuration which has had no history of first stage fan blade liberation.

The FAA has determined that the original first stage fan blade retaining plates for the JT8D–9 through JT8D–17AR engines, and the first stage fan blade retaining plates introduced by PW SB 5739, are inadequate for retaining first stage fan blades in the event of certain failures. An improved retaining plate is now available and should be incorporated into all applicable engines. Since this condition is likely to exist or develop in other engines of the same type design, the proposed AD would require replacement of first stage fan blade retaining plates on certain PW JT8D engines in accordance with PW Alert Service bulletin (ASB) 5841, dated February 15, 1989.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this proposed regulation involves approximately 5175 engines (domestic fleet) at an approximate total cost of four hundred thousand dollars. It has also been determined that few, if any, small entities within the meaning of the Regulatory Flexibility Act will be affected since the proposed rule affects only operators using aircraft in which JT8D–9 through JT8D–17AR engines are installed, none of which are believed to be small entities. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained from the Regional Rules Docket.

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration (FAA) proposes to amend Part 39 of the Federal Aviation Regulations (FAR) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421, and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive (AD):

Pratt & Whitney: Applies to Pratt & Whitney (PW) JT8D–9, –9A, –11, –15, –15A, –17, –17A, –17R, and –17AR turbofan engines. Compliance is required as indicated, unless already accomplished.

To prevent fire, inflight shutdown, engine cowl release, or airframe damage associated with a first stage fan blade liberation, remove certain first stage fan blade retaining plates in accordance with the Accomplishment Instructions of PW Alert Service Bulletin (ASB) 5841, dated February 15, 1989, and replace with an improved retaining plate as follows:

(a) Replace retaining plates Part Numbers (P/N) 520451, 616645, and 839616 with retaining plate P/N 803996 at the next stop visit but no later than:

(1) Two years after the effective date of this AD for wing mounted engines.

(2) Three years after the effective date of this AD for fuselage mounted engines.

(b) Replace retaining plates P/N's 760297, 793935, and 802710 with retaining plate P/N 803996 at the next shop visit but no later than four years after the effective date of this AD.

Notes: (1) A shop visit occurs following engine removal where the subsequent engine maintenance entails the following:

(a) Separation of a major engine flange (lettered or numbered), other than flanges mating with major sections of the nacelle or reverser. Separation of flanges purely for purposes of shipment, without subsequent internal maintenance, is not a "shop visit."

(b) Removal of a disk, hub, or spool.

(3) Future FAA approved first stage fan blade retaining plate designs may be used in lieu of the P/N 803996 retaining plate as an alternate method of compliance, as stated below.

(c) Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD may be accomplished.

(d) Upon submission of substantiating data by an owner or operator through an FAA Airworthiness Inspector, an alternate method of compliance with the requirements of this AD or adjustments to the compliance times specified in this AD, may be approved by the Manager, Engine Certification Office, ANE–140, Engine and Propeller Directorate, Aircraft Certification Service, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

Issued in Burlington, Massachusetts, on April 5, 1989.

Arthur J. Pidgeon,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

---

14 CFR Part 39

[Docket No. 89–CE–09–AD]

Airworthiness Directives; Beech 200 and 300 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This Notice proposes to adopt a new Airworthiness Directive (AD), applicable to certain Beech 200 and 300 series Airplanes, which would supersede AD 87–17–05R1, Amendment No. 39–5847, and mandate repetitive inspections and repair as required of wing fuel bay upper skin panels. Entry of moisture through the blind fastener rivets in the outer skin of the panels causes corrosion which results in debonding of these panels. The FAA has determined that the repairs and replacement panels specified in AD 87–17–05R1 are inefective in preventing such corrosion. The actions proposed herein will preclude stuctural weakening of these panels due to corrosion.

DATE: Comments must be received on or before June 3, 1989.

ADDRESSES: Beech Service Bulletin No. 2040, Rev. II, dated December 1988, and Beech Service Instructions No. C–12–0094, Rev. II, dated January 1989, applicable to this AD, may be obtained from Beech Aircraft Corporation, Commercial Services, Department 52, P.O. Box 85, Wichita, KS 67201–0085; telephone (316) 681–7111. This information may also be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–CE–09–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Don Campbell, Aerospace Engineer, Airframe Branch, ACE–120W, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946–4409.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. Comments are specifically invited on the overall regulatory, economic, environmental and energy aspects of the proposed rule. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 89–CE–09–AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

AD 87–17–05R1, Amendment No. 39–5847, was published in the **Federal Register** on February 17, 1988 (53 FR 4604). This AD requires repetitive inspections and repair if necessary, of a debond condition of the wing upper skin panels in the area bounded by the fuselage, nacelle, front spar, and rear spar on certain Beech 200 and 300 series airplanes. The area in question is a one piece, all aluminum, bonded honeycomb sandwich, which serves as the fuel bay upper cover, as well as a load carrying structural member. The debonding results when moisture leaks into the honeycomb via blind fasterners (rivets) in the outer face sheet of the panel. The moisture, in turn, causes corrosion to form inside the honeycomb, which attacks the face sheet bonds. Without corrective maintenance, the debonding can progress to a point where safe flight is jeopardized. If no debonding is detected, AD 87–17–05R1 requires sealing of all blind fasteners (rivets) per Service Bulletin No. 2040, Rev. I (or Service Instructions No. C–12–0094, Rev. I, for military airplanes). This involves an external application of sealant. If debonding is detected, the AD allows repairs by Beech Kit No. 101–4032–1S or –3S, after which the inspections continue. As an alternative, the debonded panel is replaced by a new panel P/N 101–120108–603 or –604, after which the inspections are no longer required.

In the 16 months since AD 87–17–05 was issued, it was determined that the present method of sealing is not always effective in keeping moisture out of the honeycomb core, and Beech Kits No. 101–4032–1S and –3S have been discontinued by the manufacturer. During this period, at least seven of the replacement panels, P/N 101–120108–603 or –604, are known to have debonded in service. As a result of these problems, Beech has revised the service information to provide an improved method, Kit No. 101–4048–1S, for sealing the blind rivets, and expanded the inspections to include the new replacement panels.

A new, temporary repair is also described in the revised service bulletin. This repair method may be used for up to one year from the time of modification in cases where immediate panel replacement is not feasible or desirable. However, a panel has been previously rebonded using Kit No. 101–4032–1S or –3S may not be repaired again using Kit No. 101–4048–1S. Partial replacement panels, which may be used in lieu of the complete panels, P/N 101–120108–603 or –604, are also referenced in the revised service information as follows:

Description	Number	Wing
Kit	10–4045–1S	Left
Repair Procedure	SRV.002	Left
Repair Procedure	SRV.018	Right

Regardless of whether a debonded panel is replaced or repaired, the repetitive inspections are necessary.

In view of the above, the FAA has determined that AD87–17–05R1 is no longer adequate and should be superseded.

Since the condition described is likely to exist or develop in other Beech 200 and 300 series airplanes of the same design, the proposed superseding AD would require repetitive inspections and, if necessary, temporary repair or replacement of all wing fuel by upper skin panels in accordance with Beech Service Bulletin No. 2040, Rev. II, dated December 1988, or Beech Service Instructions No. C–12–0094, Rev. II, dated January 1989, as appropriate.

The FAA has determined there are approximately 995 airplanes affected by the proposed AD. The cost of inspecting, sealing and repairing per the proposed AD is estimated to be $416 initially plus $234 annually (averaged over the fleet) per airplane. The total cost is estimated to be $415,000 initially plus $233,000 annually to the private sector. Warranty reimbursement is offered by Beech for a limited time for the cost of rivet sealing (Kit 101–4048–1S) and any repairs or panel replacements needed. The total cost of complying with the proposed AD is less than $100 million, the threshold amount for a significant rule. The cost of compliance with the proposed AD is so small that the expenses of compliance will not be a significant impact on any small entities operating these airplanes.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Therefore, I certify that this action (1) is not a major rule under the provisions of Executive Order 12291, (2) is not a significant rule under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the FAR as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

BEST COPY AVAILABLE

VOL 54 ISS 74 AP 19 1989 UMI

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By superseding AD 87-17-05R1, Amendment 39-5847, with the following new AD:

Beech: Applies to Models 200, B200, 200C, B200C, 200CT, B200CT, 200T, B200T, A200, A200C, A200CT and 300 (all serial numbers) airplanes equipped with wing fuel bay upper skin panels made with bonded (honeycomb sandwich) construction, certificated in any category.

Compliance: Required as indicated after the effective date of this AD unless previously accomplished.

To assure the continued structural integrity of the wing fuel bay upper skin panels, accomplish the following:

(a) Within the next calendar month after the effective date of this AD, check the airplane records or inspect the wing fuel bay upper skin panels (hereafter called "skin panels") for possible bonded (honeycomb sandwich) construction. Airplanes in the serial number range of BB-2 thru BB-613 were manufactured with a skin-and-stringer construction and are not affected by this AD unless bonded wing fuel bay upper skin panels were installed after manufacture. If the airplane has bonded skin panels, accomplish the following in accordance with Beech Service Bulletin No. 2040, Rev. II, dated December, 1988 (for civil registered airplanes), or Beech Service Instructions No. C-12-0094, Rev II, dated January, 1989 (for military airplanes), as applicable:

(1) If the skin panels are bonded and have blind rivets as shown in the shaded portions of Fig. 1 in the service bulletin, inspect the skin panels for debonding within the next 150 hours time-in-service (TIS) or 6 calendar months, whichever occurs first.

(i) If the skin panel has been previously repaired, per Beech Kit No. 101-4032-1S or 101-4032-3S,

(A) And there is debonding, prior to further flight remove and replace the skin panel and reinspect for debonding at 18 month intervals thereafter.

(B) And there is no debonding, prior to further flight reseal the blind rivets per instructions in Beech Kit 101-4048-1S and reinspect the skin panel for debonding within 6 calendar months, again within another 12 calendar months, and at 18 calendar month intervals thereafter.

(ii) If the skin panel has not been previously repaired,

(A) And there is debonding, either:

(1) Prior to further flight remove and replace the skin panel and reinspect for debonding at 18 calendar month intervals thereafter, or

(2) Prior to further flight install a temporary repair per Beech Repair Procedure No. SRV.001 which can be used for no longer than 12 calendar months for the time of modification, at which time remove the temporarily repaired panel and replace with a serviceable panel. Reinspect for debonding at 18 calendar month intervals thereafter.

(B) And there is no debonding, prior to further flight reseal the blind rivets and reinspect the skin panel for debonding within 6 calendar months, again within another 12 calendar months, and at 18 calendar month intervals thereafter.

(2) If the skin panels are bonded and do not have blind rivets as shown in the shaded portion of Fig. 1 in the service bulletin, inspect for debonding within the next 600 hours TIS or 18 calendar months, whichever occurs first.

Note 1: The following airplanes were manufactured with bonded skin panels without rivets: Models B200 (above serial number BB-1238), B200C (above serial numbers BL-127), B200 CT (above serial numbers BN-4), B200T (above serial numbers BT-30), 300 (above serial numbers FA-81 and all FF-serial numbers).

(i) If there is debonding, either:

(A) Prior to further flight remove and replace the skin panel and reinspect for debonding at 18 calendar month intervals thereafter, or

(B) Prior to further flight install a temporary repair per Beech Repair Procedure No. SRV.001, which can be used for no longer than 12 calendar months from the time of modification, at which time remove the temporarily repaired panel and replace with a serviceable panel. Reinspect for debonding at 18 calendar month intervals thereafter.

(ii) If there is no debonding, reinspect for debonding at 18 calendar month intervals thereafter.

(3) The following are approved replacement skin panels:

Note 2: These panels are bonded and do not have rivets.

(i) Complete replacement panels are Part Nos. 101-120108-603 (L.H.) and 101-120108-604 (R.H.).

(ii) Kit No. 101-4045 and Repair Procedure No. SRV.002 each provide a partial replacement panel (L.H. only).

(iii) Repair Procedure No. SRV.018 provides a partial replacement panel (R.H. only).

(b) Airplanes may be flown in accordance with FAR 21.197 to a location where the AD may be accomplished.

(c) The repetitive inspection intervals required by this AD may be adjusted up to 10 percent of the specified interval so as to coincide with other scheduled maintenance.

(d) An equivalent means of compliance with this AD may be used if approved by the Manager, Wichita Aircraft Certification Office, 1801 Airport Road, Room 100, Mid-Continent Airport, Wichita, Kansas 67209; telephone (316) 946-4400.

All persons affected by this directive may obtain copies of the documents referred to herein upon request to Beech Aircraft Corporation, Commercial Service, Department 52, Wichita, Kansas 67201-0085; or may examine these documents at the FAA, Office of the Assistant Chief Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

This amendment supersedes AD 87-17-05R1, Amendment 39-5847.

Issued in Kansas City, Missouri, on April 6, 1989.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

[Airspace Docket No. 88-ACE-19]

Proposed Revocation of Transition Area; Ida Grove, IA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This Notice proposes to revoke the transition area at Ida Grove, Iowa. The nondirectional radio beacon (NDB) at the Ida Grove, Iowa, Airport has been removed, thereby canceling the instrument approach procedure based on this navigational aid. Accordingly, the transition area is no longer required.

DATES: Comments must be received on or before May 31, 1989.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Manager, Traffic Management and Airspace Branch, Air Traffic Division, ACE-540, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 426-3408.

The official docket may be examined at the Office of the Assistant Chief Counsel, Central Region, Federal Aviation Administration, Room 1558, 601 East 12th Street, Kansas City, Missouri.

An informal docket may be examined at the Offices of the Manager, Traffic Management and Airspace Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis G. Earp, Airspace Specialist, Traffic Management and Airspace Branch, Air Traffic Division, ACE-540, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106. Telephone (816) 426-3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number, and be submitted in triplicate to the Traffic Management and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. All communications received on or before the closing date for comments will be considered before action is taken on the proposed amendment. The proposal contained in this Notice may be changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Traffic Management and Airspace Branch, 601 East 12th Street, Kansas City, Missouri 64106, or by calling (816) 426-3408.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for further NPRMs should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to Subpart G, § 71.161, of the Federal Aviation Regulations (14 CFR Part 71) to revoke the transition area at Ida Grove, Iowa. The NDB at the Ida Grove, Iowa, Municipal Airport has been removed. That action, in turn, canceled the instrument approach procedure predicated on this navigational aid. Accordingly, the Ida Grove, Iowa, transition area is no longer required and should be revoked.

Section 71.161 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E, January 3, 1989.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is proposed to be amended as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.161 [Amended]

2. By amending § 71.161 as follows:

Ida Grove, IA [Removed]

Issued in Kansas City, Missouri, on March 27, 1989.

Clarence E. Newbern,

Manager, Air Traffic Division.

[Airspace Docket No. 89-AWP-8]

Proposed Revision of Los Alamitos, CA, Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to revise the Los Alamitos control zone boundary where it adjoins the Long Beach, CA, control zone. This notice also proposes to eliminates the delegation of Los Alamitos control zone to Long Beach during the hours of non-activation of Los Alamitos, and release the control zone to public use when Los Alamitos is not active.

DATES: Comments must be received on or before May 31, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, Airspace and Procedures Branch, AWP-530, Docket No. 89-AWP-8, Air Traffic Division, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009.

The official docket may be examined in the Office of the Regional Counsel, Western-Pacific Region, Federal Aviation Administration, Room 6W14, 15000 Aviation Boulevard, Lawndale, California.

An informal docket may also be examined during normal business hours at the Office of the Manager, Airspace and Procedures Branch, Air Traffic Division at the above address.

FOR FURTHER INFORMATION CONTACT: Daniel K. Martin, Airspace and Procedures Specialist, Airspace and Procedures Branch, AWP-530, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261, telephone (213) 297-0166.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with the comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-AWP-8." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Airspace and Procedures Branch, Air Traffic Division, at 15000 Aviation Boulevard, Lawndale, California 90261, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Airspace and Procedures Branch, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revise the boundary of the Los Alamitos control zone where it adjoins the Long Beach, CA, control zone. This notice also proposes to change the delegation of the control zone to Long Beach during non-activation hours. This proposal would release the control zone airspace to public use during hours of non-activation. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. § 71.171 is amended as follows:

Los Alamitos AAF, CA [Revised]

Within a 5-mile radius of Los Alamitos Armed Forces Reserve Center (lat. 33°47'30"N., long. 118°02'50"W). Excluding that portion within the Long Beach, CA, control zone, and excluding the portion within a 1-mile radius of Meadowlark Airport (lat. 33°43'06"N., long. 118°02'13"W). This control zone is effective from 0700 to 2200 hours local time daily, or during specific times and dates established in advance by a Notice to Airmen which will be continuously published in the Airport/Facility Directory.

Issued in Los Angeles, California, on March 31, 1989

Merle D. Clure,

Assistant Manager, Air Traffic Division Western-Pacific Region.

14 CFR Part 71

[Docket No. 89-ANM-6]

Proposed Amendment, Miles City Control Zone, Miles City, MT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the Miles City Control Zone, Miles City, Montana, from full-time to part-time. A reduction in personnel staffing of the Miles City Flight Service Station has resulted in weather observations not being available 24-hours a day. This action will bring publications up-to-date giving continuous accurate information to the aviation public.

DATES: Comments must be received on or before June 6, 1989.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace & System Management Branch, ANM-530, Federal Aviation Administration, Docket No. 89-ANM-6, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

The official docket may be examined at the same address. An informal docket may also be examined during normal business hours at the address list above.

FOR FURTHER INFORMATION CONTACT: Art Corwin, ANM-537, Federal Aviation Administration, Docket No. 89-ANM-6, 17900 Pacific Higway South, C-68966, Seattle, Washington 98168, Telephone: (206) 431-2576.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 89-ANM-6." The postcard will be date/time stamped and returned to the Commenter. All communications received before the specified closing date for comments will be considered before taking any action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination at the address listed above both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Airspace & System Management Branch, 17900 Pacific Highway South, C-68966, Seattle, Washington, 98168. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular 11-2A which describes the application procedure.

The Proposal

The FAA proposes an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend the Miles City Control Zone, Miles City, Montana, from full time to part time. A reduction in personnel staffing of the Miles City Flight Service Station has resulted in weather observations not being available 24-hours a day, and therefore, full time control zone services will not be available. The amendment, if adopted, will allow for changes in the hours of effectiveness by issuances of Notices to Airmen when minor variations in time of designation are anticipated.

Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 74000.6E dated January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Polices and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Airspace Docket No. 89-ACE-01]

Proposed Alteration of Transition Area; Sheldon, IA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This Notice proposes to alter the 700-foot transition area at Sheldon, Iowa, to provide additional controlled airspace for aircraft executing a new instrument approach procedure to Runway 33 at the Sheldon, Iowa, Municipal Airport utilizing the Sheldon VOR/DME.

DATES: Comments must be received on or before May 31, 1989.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Manager, Traffic Management and Airspace Branch, Air Traffic Division, ACE-540, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 426-3408.

The official docket may be examined at the Office of the Assistance Chief Counsel, Central Region, Federal Aviation Administration, Room 1558, 601 East 12th Street, Kansas City, Missouri.

An informal docket may be examined at the Office of the Manager, Traffic Management and Airspace Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis G. Earp, Airspace Specialist, Traffic Management and Airspace Branch, Air Traffic Division, ACE-540, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 426-3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number, and be submitted in triplicate to the Traiffic Management and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. All communications received on or before the closing date for comments will be considered before action is taken on the proposed amendment. The proposal contained in this Notice may be changed in light of the comments received. All comments received will be available both before and after and closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Traffic Management and Airspace Branch, 601 East 12th Street, Kansas City, Missouri 64106, or by calling (816) 426-3408.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for further NPRMS should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) to alter the 700-foot transition area at Sheldon, Iowa. To enhance airport usage, Runway 33 at the Sheldon, Iowa, Municipal Airport requires additional controlled airspace for aircraft executing a new instrument approach procedure utilizing the Sheldon VOR/DME (DDL). The establishment of this new instrument approach procedure, based on this approach aid, would entail alteration of the transition areas at Sheldon, Iowa, at and above 700 feet above ground level within which aircraft are provided air traffic control service. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under instrument flight rules (IFR) from other aircraft operating under visual flight rules (VFR).

Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E, January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is routine metter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations, (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Sheldon, Iowa [Revised]

That airspace extending upward from 700 feet above the surface within a 5 mile radius of the Sheldon Municipal Airport (Lat. 43°12'37" N., Long. 98°50'04" W.); and within 3 miles each side of the 165° bearing from the airport extending from the 5 mile radius to 8 miles southeast of the airport; and within 3 miles each side of the 160° bearing from the airport extending from the 5 mile radius to 8.5 miles southeast of the airport.

Issued in Kansas City, Missouri, on March 27, 1989.

Clarance E. Newbern,
Manager, Air Traffic Division.

[Airspace Docket No. 89-ACE-02]

Proposed Designation of Transition Area; Minden, NE

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This Notice proposes to designate a 700-foot transition area at Minden, Nebraska, to provide controlled airspace for aircraft executing a new instrument approach procedure to the Pioneer Village Field, Minden, Nebraska, utilizing the Kearney VOR as a navigational aid. This proposed action will change the airport status for VFR to IFR.

DATES: Comments must be received on or before May 31, 1989.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Manager, Traffic Management and Airspace Branch, Air Traffic Division, ACE-540, 601 East 12th Street, Kansas City, Missouri 64106. Telephone (816) 426-3408.

The official docket may be examined at the Office of the Assistant Chief Counsel, Central Region, Federal Aviation Administration, Room 1558, 601 East 12th Street, Kansas City, Missouri.

An informal docket may be examined at the Office of the Manager, Traffic Management and Airspace Branch, Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Dale L. Carnine, Airspace Specialist, Traffic Management and Airspace Branch, Air Traffic Division, ACE-540, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 426-3408.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number, and be submitted in triplicate to the Traffic Management and Airspace Branch, Air Traffic Division, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106. All communications received on or before the closing date for comments will be considered before action on the proposed amendment. The proposal contained in this Notice may be changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Traffic Management and Airspace Branch, 601 East 12th Street, Kansas City, Missouri 64106, or by calling (816) 426-3408.

Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for further NPRMS should also request a copy of Advisory Circular No. 11-2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to Subpart G, § 71.181, of the Federal Aviation Regulations (14 CFR Part 71) to designate a 700 foot transition area at Minden, Nebraska. To enhance airport usage, a new instrument approach procedure is being developed for the Pioneer Village Field, Minden, Nebraska, utilizing the Kearney VOR as a navigational aid. This navigational aid will offer new navigational guidance for aircraft utilizing the airport. The establishment of this new instrument approach procedure based on this navigational aid would entail the designation of a transition area at Minden, Nebraska, at the above 700-feet above ground level within which aircraft are provided air traffic control service. Transition areas are designed to contain IFR operations in controlled airspace during times of terminal operation, and while aircraft transit between terminal and enroute environments. The intended effect of this action is to ensure segregation of aircraft using the approach procedure under instrument flight rules (IFR) from other aircraft operating under visual flight rules (VFR). This action would also change the airport status from VFR to IFR.

Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6E, January 3, 1989.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter than will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR 71

Aviation safety, Transition areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983; 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Pioneer Village Field, Minden, Nebraska [New]

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Pioneer Village Field (Lat. 40°30'47"N., Long. 98°56'42"W.) and within 3.75 miles each side of the 166° bearing from the Pioneer Village Field extending from the 5-mile radius to 11 miles southeast of the airport, excluding that portion which lies in the Kearney, Nebraska, transition area.

Issued in Kansas City, Missouri, on March 27, 1989.

Clearance E. Newbern,
Manager, Air Traffic Division.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD1 89-012]

Freeport Grand Prix, Long Beach, NY

AGENCY: Coast Guard, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard is considering a proposal that would establish permanent special local regulations for the Freeport Grand Prix. The Freeport Grand Prix is a high performance powerboat race held each year on the coastal Atlantic waters south of Long Beach, Long Island, New York. The event is sponsored by Liberty Marine of Freeport, NY. The potential hazards to participants, spectators and/or transiting vessels are such that, each year, in the interest of safety of life on the navigable waters of the United States, the Coast Guard district commander has issued special local regulations governing the conduct of the regatta. By adopting permanent regulations, the Coast Guard will continue to provide the same level of public safety at reduced administrative cost. Public notice of the exact dates of the regatta will be published each year in a **Federal Register** Notice and in the Coast Guard Local Notice to Mariners.

DATES: Comments must be received on or before June 5, 1989. These regulations would be effective from 11:00 a.m. to 3:00 p.m. on Aug. 5, 1989.

COMMENTS: Comments should be mailed to Commander (b), First Coast Guard District, Captain John Foster Williams Coast Guard Building, 408 Atlantic Avenue, Boston, MA 02210–2209. The comments and other material referenced in this notice will be available for inspection and copying in Room 428 at the same address. Normal office hours are between the hours of 7:30 a.m. and 4:00 p.m., Monday through Friday, except holidays. Comments may also be hand delivered.

FOR FURTHER INFORMATION CONTACT: Captain Ronald L. Blake, (617) 223–8310.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data or arguments. Persons submitting comments should include their names and addresses, identify this notice [CGD1 89–012) and the specific section of the proposal to which their comments apply, and give reasons for each comment.

The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentation will aid the rulemaking process. The receipt of comments will be acknowledged if a stamped self-addressed postcard or envelope is enclosed.

Drafting Information

The drafters of this notice are LT L. Brown, project officer, First Coast Guard District Boating Safety Division, and LT J.B. Gately, project attorney, First Coast Guard District Legal Division.

Discussion of Regulations

The Freeport Grand Prix is a high performance Indy 500 type powerboat race around an eight (8) mile rectangular course situated approximately one and one quarter (1¼) miles south of Long Beach, Long Island, New York. There will be up to 50 vessels participating. The sponsoring organization will provide eight to 12 patrol boats along with turning and finishing mark boats. The regulation will close a portion of the coastal Atlantic waters south of Long Beach, Long Island, New York to all traffic except law enforcement vessels, regatta participants, and official regatta patrol vessels. No vessels other than race participants and patrol craft will be allowed to enter the regulated area which is described below. The regulated area and immediately adjacent waters will be patrolled by several Coast Guard and Coast Guard Auxiliary vessels which will be assisted by local law enforcement authorities and the sponsor provided patrol boast.

Economic Assessment and Certification

These proposed regulations are considered to be nonmajor under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The event will draw a number of spectators and participants into the area which will aid the local economy. The primary commercial waterway, the Ambrose Channel, lies over three miles to the south of the regulated area and no adverse impact on commercial traffic is anticipated. Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 100 of Title 33, Code of Federal Regulations, as follows:

PART 100—[AMENDED]

1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. A new section 100.106 is added to read as follows:

§ 100.106 Freeport Grand Prix, Long Beach, New York

(a) *Regulated area.* The regulated area is a trapezoidal area on the coastal Atlantic waters of Long Island to the south of Long Beach, New York. The regulated area is one and one quarter (1¼) miles south of Long Beach and three and one quarter (3¼) miles north of the northern boundary of Ambrose Channel and is specifically bounded as follows:

(1) Northeast Corner: approximately one and one quarter miles southwest of Jones Inlet breakwater at coordinates 40–33–42 North; 073–35–42 West.

(2) Southeast Corner: southwest of Jones Inlet Approach Buoy (R "2"; Light List Number 685) at coordinates 40–31–45 North; 073–36–19 West.

(3) Southwest Corner: east of East Rockaway Approach Buoy (R "4"; Light List Number 690) at coordinates 40–31–31 North; 073–42–21 West.

(4) Northwest Corner: 40–33–30 North; 073–40–57 West.

(b) *Special local regulations.* Vessels not participating in, or operating as a safety/rescue patrol shall:

(1) Not operate within the regulated area.

(2) Immediately follow any specific instructions given by Coast Guard patrol craft.

(3) Exercise extreme caution when operating near the regulated area.

(c) *Effective Dates.* These regulations are effective at 11:00 a.m. on August 5, 1989 and terminate at 3:00 p.m. on August 5, 1989 and will be in effect each year thereafter during the same time period on the first or second Sunday of August as published in a **Federal Register** Notice and the Coast Guard Local Notice to Mariners.

Dated: April 11, 1989.

R.I. Rybacki,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.

BILLING CODE 4910-14-M

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 3

RIN 2900–AD19

Definition of Fraud

AGENCY: Department of Veterans Affairs.

ACTION: Proposed regulations.

SUMMARY: The Department of Veterans Affairs (VA) is proposing to amend its adjudication regulations concerning the definition of fraud. The amendment is necessary as the current definition of fraud, mandated by law, pertains exclusively to forfeiture. The effect of this amendment will be to establish a definition of fraud for all adjudication applications other than forfeiture.

DATES: Comments must be received on or before May 19, 1989. All comments will be available for public inspection until May 30, 1989. It is proposed to make these amendments effective 30 days following the date of final publication.

ADDRESSES: Interested persons are invested to submit written comments, suggestions, or objections regarding these regulations to the Secretary of Veteran Affairs (271A), Department of Veterans Affairs, 810 Vermont Avenue NW., Washington DC 20420. All written comments received will be available for public inspection only in room 132 at the above address only between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday (except holidays) until May 30, 1989.

FOR FURTHER INFORMATION CONTACT: Robert M. White, Chief, Regulations Staff, Compensation and Pension Service (211B), Veterans Benefits Administration, (202) 233–3005.

SUPPLEMENTARY INFORMATION: On pages 41644–46 of the **Federal Register** of November 18, 1986, the VA published proposed rules on the definition of fraud. Proposed changes to forfeiture regulations were included. Interested persons were given until December 17, 1986, to submit comments on the proposed rules. Two comments were received on the proposed definition of fraud. As no comments were received on the proposed changes to the forfeiture regulations, they were republished separately as final rules.

One commenter stated that the proposed rule will make it easier to prosecute those who blatantly provide false information to receive benefits for which they are not eligible. However, those who inadvertently fail to comply with required notification procedures, either through ignorance or an innocent misunderstanding of the rules, must be protected from potential accusations of fraud to the fullest extent possible.

The other commenter correctly pointed out that the proof needed to show fraud for the purpose of forefeiture (mandated by law) is less than that needed to prove common-law fraud. Proof of intent to defraud is an element of common-law fraud but no such intent must be proven in order to forfeit for fraud. The VA General Counsel has held that with the exception of forfeiture for fraud, it would be in appropriate to define fraud for the purposes of 38 CFR Part 3 other than with reference to its common-law meaning.

The other commenter also stated that the effective date provisions of 38 CFR 3.500(b) as to reduction or discontinuance of benefits were confusing as to whether or not they pertained to fraud. We disagree. Section 3.500(b)(1) pertains to the effective date of reduction or discontinuance of an erroneous award based on an act of commission or omission by a payee or with the payee's knowledge. This rule would apply whether or not the act of commission or omission is determined to be an act of fraud for other than forfeiture.

Both commenters stated the proposed rule should be in harmony with, not in conflict with, the regulations promulgating the Program Fraud Civil Remedies Act. This is not necessary as intent is specifically excluded as a requirement or criterion under the Program Fraud Civil Remedies Act.

The proposed changes are based on an opinion of the VA General Counsel, Op. G. C. 4–85. In that opinion, the General Consel, citing the rules of general case law, held that the failure of a claimant to disclose could amount to fraud and that such is an adjudicative determination. In making the adjudicative determination that failure to disclose is an act of fraud, the burden of proof rests with the VA.

As this constitutes a major change from the initial proposed definition of fraud, we are again publishing a proposed rule. This proposal defines "fraud" as used in 38 U.S.C. 103, 110, and 359.

The Secretary hereby certifies that these proposed regulatory amendments will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. The reason for this certification is that these amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these proposed amendments are exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604.

In accordance with Executive Order 12291, Federal Regulation, the Secretary has determined that these proposed regulatory amendments are non-major for the following reasons:

(1) They will not have an annual effect on the economy of $100 or more.

(2) They will not cause a major increase in costs or prices.

(3) They will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

(The Catalog of Federal Domestic Assistance Program numbers are 64.100 through 64.110.)

VOL 54 ISS 74 AP 19 1989 UMI

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health care, Pensions, Veterans.

Approved: March 31, 1989.

Edward J. Derwinski,

Secretary.

38 CFR, Part 3, Adjudication, is proposed to be amended to read:

PART 3—[AMENDED]

1. In § 3.1(g)(4) remove the citation at the end which reads "(Pub. L. 89-670)".

2. In § 3.1, new paragraph (aa) is added and the cross-references are revised to read as follows:

§ 3.1 Definitions.

* * * * *

(aa) "Fraud":

(1) As used in 38 U.S.C. 103 and implementing regulations, fraud means an intentional misrepresentation of fact, or the intentional failure to disclose pertinent facts, for the purpose of obtaining, or assisting an individual to obtain an annulment or divorce, with knowledge that the misrepresenation or fialure to disclose may result in the erroneous granting of an annulment or divorce; and

(Authority: 38 U.S.C. 210(c))

(2) As used in 38 U.S.C. 110 and 359 and implementing regulations, fraud means an intentional misrepresentation of fact, or the intentional failure to disclose pertinent facts, for the purpose of obtaining or retaining, or assisting an individual to obtain or retain, eligibility for Department of Veterans Affairs benefits, with knowledge that the misrepresentation or failure to disclose may result in the erroneous award or retention of such benefits.

(Authority: 38 U.S.C. 210(c))

Cross-References: Pension. See § 3.3. Compensation. See § 3.4. Dependency and indemnity compensation. See § 3.5. Preservation of disability ratings. See § 3.951. Service-connection. See § 3.957.

BILLING CODE 8320-01-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

Federal Motor Vehicle Safety Standards; Denial of Petition for Rulemaking

AGENCY: National Highway Traffic Safety Administration (NHISA), DOT.

ACTION: Denial of petition for rulemaking.

SUMMARY: This notice denies a petition for rulemaking by the Motor Vehicle Manufacturers Association (MVMA), asking this agency to amend Standard No. 208, *Occupant Crash Protection*. Standard No. 208 currently requires that all vertically adjustable seats be at the lowest vertical adjustment position when a vehicle is tested for compliance with the standard. MVMA asked that this provision be amended to specify that vertically adjustable seats be set at the manufacturer's "nominal design position." According to the MVMA petition, such seat positioning would be similar to the existing adjustment provisions for adjustable seat backs, would be more representative of likely vertical seat positioning by drivers operating the cars on the public roads, and would eliminate the potential burden of duplicative testing for manufacturers. The assertion of duplicative testing was based on the need for manufacturers to test both models of a vehicle, if the vehicle were offered with some models equipped with vertically adjustable seats and other models were equipped with seats that were not vertically adjustable and were positioned at some vertical height other than the lowest adjustment position for vertically adjustable seats.

NHTSA has decided to deny this petition. The procedures for positioning vertically adjustable seats for Standard No. 208 compliance testing have been in effect since 1973. Those procedures are objective and simple to administer during compliance testing. The agency would consider changing those procedures if there were some compelling reason to do so. However, the available information indicates that neither the agency nor any vehicle manufacturer has ever conducted the duplicative testing alleged in the MVMA petition, nor is it likely that such duplicative testing will be conducted in the future. Further, the available information indicates that the currently specified positioning procedures are representative of the seat positioning chosen by many drivers operating their cars on the public roads. Given this information, there appears to be no reason to consider changing the long-established seat positioning procedures. Accordingly, the MVMA petition is denied.

FOR FURTHER INFORMATION CONTACT: Dr. Richard Strombotne, Chief, Crashworthiness Division, NRM-12, NHTSA, 400 Seventh Street, SW., Washington, DC 20590 (202-366-2264).

SUPPLEMENTARY INFORMATION: Standard No. 208, *Occupant Crash Protection* (49 CFR 571.208) specifies the test conditions for the frontal, lateral, and rollover tests that are conducted by this agency to determine whether a vehicle complies with the injury criteria set forth in the standard. Section S8.1.2 of Standard No. 208 provides that seats that are separately adjustable in a vertical direction shall be tested at the lowest vertically adjustable position. The purpose of this provision is to ensure uniformity in positioning vertically-adjustable seats for Standard No. 208 compliance testing.

This provision had its genesis in a November 3, 1970 final rule (35 FR 16297) that established the first automatic restraint requirements in Standard No. 208. Ever since the July 1, 1973 effective date of that rule, Standard No. 208 has included a provision that vertically adjustable seats shall be at the lowest position for all compliance testing. This provision reflects the agency's belief that seat adjustment position may affect test results, thereby introducing needless test variability if a single adjustment position were not specified in the standard.

MVMA filed a petition for rulemaking with this agency, asking that section S8.1.2 be amended to provide that seats with any adjustable features, such as vertically adjustable power seats or seats with adjustable lumbar supports be set at the "nominal design riding position" before the car is subjected to a crash test in accordance with Standard No. 208. The "nominal design riding position" would be specified by the vehicle manufacturer and provided to NHTSA before compliance testing of the vehicle.

According to MVMA's petition, this requested change would be consistent with the requirement already in section S8.1.3 of Standard No. 208. That section specifies that reclining seat backs shall be placed at "the manufacturer's nominal design riding position." A description of this position is provided to the agency by the manufacturer prior to any compliance testing. Additionally, MVMA's petition claimed that positioning the seats according to the manufacturer's specifications would eliminate the potential for duplicative testing of the same vehicle. According to the petition, NHTSA would have to conduct two compliance tests of a vehicle if the vehicle were offered in some models with vertically adjustable seats an din other models with seats that were not vertically adjustable and if the non-adjustable seats were set at a height that was different than the lowest vertically adjustable position of the vertically adjustable seats. Finally, the MVMA petition argued that testing vertically adjustable seats at their "nominal design riding position" would be more representative of the vertical seat adjustment positions typically selected by drivers using their cars on the public roads.

Ordinarily, the agency would have performed its own analysis of the issues raised by the MVMA petition and published a grant or denial of the petition after completing that analysis. However, there were exceptional circumstances in this case that made it appropriate to allow the public an opportunity to comment on MVMA's petition before the agency made its decision on the petition. In response to the rulemaking notice proposing to incorporate the Hybrid III test dummy into Part 572 (50 FR 14602; April 12, 1985), Ford stated that it was unaware of any evidence showing that there is a safety difference between seats that are not vertically adjustable and those that are. Because Ford believed the vertical seat adjustment position had not been shown to affect safety, it stated that its certifications of vehicles that have some models with seats that are vertically adjustable and other models without vertically adjustable seats are based solely on the vertical position of the seats that are not adjustable.

NHTSA responded as follows to these comments in the preamble to the final rule adopting the Hybrid III test dummy:

The agency recognizes that the seat adjustment issue raised by Ford may lead to test variability. However, the agency does not have any data on the effect of Ford's suggested solution on the design of other manufacturer's power seats. The agency will solicit comments on Ford's proposal in the NPRM addressing additional Hybrid III injury criteria. 51 FR 26688, at 26696; July 25, 1986.

At the time the agency made this commitment to allow the public to comment on the vertical seat adjustment issue in Standard No. 208 testing, NHTSA believed that it would publish the NPRM addressing additional Hybrid III injury criteria very soon. However, it now appears that such a rulemaking notice will not be undertaken in the near future. To honor its previous commitment to allow the public to comment on the vertical seat adjustment issue, NHTSA decided to seek comments on the MVMA petition before making a final decision on the merits of that petition.

A notice requesting comments on the MVMA petition was published on May 2, 1988 (53 FR 15576). This notice asked the public for comments on the merits of the MVMA petition and asked for specific information on two points:

1. Whether the current vertical seat positioning procedures actually present a burden for manufacturers in their certification testing, and/or whether those procedures are otherwise incompatible with current seating system designs; and

2. Whether the alternative vertical seat positioning procedures proposed by MVMA would not present substantial practical problems and would not lessen the safety protection afforded to vehicle occupants.

The agency received six responses to this request for comments. All of the commenters were vehicle manufacturers and all supported the change requested in the MVMA petition. Chrysler commented that it had no data showing a testing burden as a result of the existing vertical seat positioning procedures, but alleged that such a problem might arise in the future if it introduced a vertical seat adjuster with a wider range of positions. Chrysler also suggested that requiring testing to be conducted with vertically-adjustable seats positioned at the manufacturer's "nominal design riding position" would make Standard No. 208 compliance testing more representative of the seat positioning when the vehicles are in use on the public roads. The comments filed by General Motors and Mercedes Benz were substantially similar to Chrysler's comments. BMW commented that the requested change would make vertical seat positioning more representative of real-world seat positioning.

Volkswagen provided some sled test data showing that dummies positioned in the lowest seating position experienced slightly higher levels of injury producing forces than dummies positioned in higher seating positions. However, Volkswagen argued that these higher force levels do not reflect any real world safety difference, since 50th percentile male drivers are unlikely to sit at the lowest seating position. Volkswagen stated that it supported the MVMA petition, in order to make Standard No. 208 compliance testing more representative of the seating position likely to be selected by actual front seat passengers using the car on the public roads.

Ford also commented that it supported the MVMA petition. In its comments, Ford stated that it did not have any data from controlled tests to demonstrate the effect of vertical seat adjustment positions on the various test dummy measurements of injury producing forces, but stated its belief that vertical seat adjustment could in some cases significantly affect the test dummy kinematics. Because of this possibility, Ford asked that, if the MVMA petition were granted, the new vertical seat adjustment procedures be optional until the use of the Hybrid III test dummy becomes mandatory in compliance testing.

After carefully considering these comments and other relevant information, the agency has decided to deny the MVMA petition for the following reasons. NHTSA is generally reluctant to change the test procedures in its safety standards unless there is some compelling reason to do so. This reluctance is primarily based upon the fact that the agency has already determined, through the rulemaking process, that the established test procedures satisfy all the criteria specified in the Safety Act. Additionally, the agency and the affected manufacturers have gained experience and a data bank of test results following the established test procedures. These facts establish a legitimate interest in retaining test procedures that have been established for the safety standards.

This is not to suggest that the agency will never consider changes to established test procedures. For example, it might be shown that the established test procedures no longer satisfy the criteria specified in the Safety Act, or that those procedures no longer serve the purposes for which they were established, or that those procedures are imposing an unnecessary restriction on an innovative technology. These circumstances would represent compelling reasons for NHTSA to consider changing some existing test procedures. A part of this consideration would necessarily include whether changed test procedures would result in a lessening of the safety protection afforded to vehicle occupants.

The issue ultimately raised by the MVMA petition, then, is whether there are any compelling reasons for the agency to consider changing the vertical seat positioning procedure in Standard No. 208. After again reviewing the MVMA petition in light of the comments received on it, the agency has concluded that there are no compelling reasons to consider changing the existing requirements.

The first reason suggested in the MVMA petition for changing the vertical seat positioning requirements was that a change would be consistent with the requirements of Standard No. 208 for adjustable seat backs, which are required to be placed at "the manufacturer's nominal design riding position." This point is correct, but it

VOL 54 ISS 74 AP 19 1989 UMI

ignores the fact that many adjustable vehicle features in vehicles are required to be set at specific positions during Standard No. 208 compliance testing. For instance, adjustable seats are positioned at the midpoint of their horizontal adjustment track (S8.1.2), and adjustable head restraints are positioned at their highest adjustment position (S8.1.3). The fact that the vertical seat position is established at a specific adjustment position, as are adjustable head restraints, instead of at the manufacturer's nominal design riding position, as are adjustable seat backs, is not a compelling reason for the agency to consider changing the vertical seat positioning requirements.

The second reason set forth in the MVMA petition for changing the vertical seat positioning requirements was that these requirements have the potential for burdening manufacturers with duplicative testing of vehicles that have some models equipped with vertically-adjustable seats and other models that do not have vertically-adjustable seats. While this assertion may be true, the information available to the agency indicates that this is not a problem at this time. Ford states in its comments on the Hybrid III test dummy rulemaking that when it offers vehicles with some models equipped with vertically-adjustable seats and other models not so equipped, it conducts compliance testing only on the models without vertically adjustable seats. See NHTSA Docket 74–14–N39–013. This statement shows that, for this manufacturer at least, the potential for duplicative testing has not resulted in any unnecessary testing burdens, because the manufacturer has not actually conducted any duplicative testing. None of the manufacturers that commented on the MVMA petition asserted that it presently conducts the duplicative testing alleged in the petition.

To this agency's knowledge, neither NHTSA nor any vehicle manufacturer has ever conducted the sort of duplicative testing alleged in the MVMA petition. Thus, there is no unnecessary burden imposed at present by the vertical seat positioning requirements in Standard No. 208. There is also no evidence suggesting that unnecessary or duplicative testing will be necessary in the future, since no manufacturer has indicated that it plans to conduct this type of testing in the future. Hence, while the agency agrees with MVMA's point that the current vertical seat positioning procedures might result in the need for duplicative testing in some cases, current information suggests this is a very unlikely possibility. The existence of an unlikely possibility is not a compelling reason to consider changing the seat positioning procedures.

The third reason offered in the MVMA petition for changing the seat positioning procedures was that the changed position would be more representative of the vertical seat adjustment positions that will be typically selected by drivers and passengers when the cars are in use on the public roads. In its comments, Ford provided what it termed a "limited sample" of the vertical seat adjustment positions chosen by 95 drivers of cars with vertically-adjustable seats. According to Ford, this sample showed that the nominal design riding position would be more representative of the vertical adjustment position selected by drivers than the lowest seating position.

NHTSA does not believe that the Ford survey could be used to draw any valid conclusions for the driving population as a whole. As Ford acknowledged in its comments, the survey sample size is so small that no statistically valid conclusions could be drawn from it. Additionally, Ford noted that the sample was 82 percent male, indicating that the sample is not entirely representative.

Even if NHTSA were to overlook these inherent limitations and accept the survey as valid and generally representative, the survey does not establish the nominal design riding position to be the most representative position. In Ford's survey, 32 of the 95 drivers had their seats set within 0.2 inches of the nominal design riding position, 22 of the 95 drivers had their seat adjusted more than 0.2 inches above the nominal design riding position, 18 had their seat adjusted more than 0.2 inches below the nominal design riding position but above the lowest adjustment position, and 23 of the 95 drivers had selected a seating position at or below the lowest vertical position at the longitudinal midpoint of the fore-aft seat adjustment position. This survey suggest that none of the vertical seat adjustment positions is selected by the majority of drivers. While the survey shows that more drivers chose to adjust their seat within 0.2 inches of the nominal design riding position than the lowest adjustment position, the difference in frequency is small. This small difference would not be a compelling reason for the agency to consider changing its seat positioning procedures.

Accordingly, NHTSA has concluded that there is no reasonable possibility that a rule amending the vertical seat positioning procedures for Standard No. 208 in accordance with MVMA's petition would be issued at the conclusion of the requested rulemaking proceeding. Therefore, MVMA's petition is denied.

Authority: 15 U.S.C. 1392, 1407, and 1410a; delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.

Issued on April 14, 1989.

Barry Felrice,

Associate Administrator for Rulemaking.

Vol. 54, No. 74
Wednesday, April 19, 1989

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Foster Grandparent and Senior Companion Programs

AGENCY: Action.

ACTION: Notice of revision of income eligibility levels for Foster Grandparent and Senior Companion Programs.

SUMMARY: This Notice revises the schedules of income eligibility levels for participation in the Foster Grandparent and Senior Companion Programs published in the **Federal Register**, June 22, 1988 (53 FR 120) and December 13, 1988 (53 FR 239). Because data used for determining FGP and SCP income eligibility levels is available at different times during the year, ACTION has determined that it will issue these guidelines twice a year so as to reflect the most current information and to assure the widest base of potential applicants.

The revised schedules are based on changes in the Poverty Income Guidelines from the Department of Health and Human Services (DHHS), effective February 16, 1989 (54 FR 31) and Supplemental Security Income (SSI) guidelines disseminated by the Social Security Administration, in October 1988. This revision adopts as the income eligibility level for each state the higher amount of either: (a) 125% of the DHHS Poverty Income Guidelines, or (b) 100% of the DHHS Poverty Income Guidelines plus the 1988 amount each state supplemented federal SSI, rounded to the next highest multiple of $5.00. When the Social Security Administration disseminates the 1989 state supplemental to the federal SSI, ACTION will revise its income eligibility guidelines for those states with SSI suplements above 125% of the DHHS Poverty Income Guidelines.

Schedule of Income Eligibility Levels: Foster Grandparent and Senior Companion Programs

1989 FGP/SCP INCOME ELIGIBILITY LEVELS FOR ALL STATES, (AND HAWAII) EXCEPT ALASKA, CALIFORNIA, COLORADO, CONNECTICUT, MASSACHUSETTS (BASED ON 125% OF DHHS POVERTY INCOME. GUIDELINES)

States	Household Units of							
	One	Two	Three	Four	Five	Six	Seven	Eight
All	$7,475	$10,025	$12,575	$15,125	$17,675	$20,225	$22,775	$25,325
Hawaii	8,590	11,525	14,465	17,400	20,340	23,275	26,215	29,150

(For household units with more than eight members, add $2,505 in all states and $2,940 in Hawaii for each additional member.)

Below are adjusted income eligibility levels, which reflect either 1988 SSI Supplements or 125% of the DHHS 1989 Poverty Income Guidelines, and shall apply to the following states.

State	Household units of							
	One	Two	Three	Four	Five	Six	Seven	Eight
AK	$10,870	$14,990	$17,440	$19,890	$22,340	$24,790	$27,240	$29,690
CA	9,170	15,630	17,590	19,550	21,510	23,470	25,430	27,390
CO	7,475	11,235	13,195	15,125	17,675	20,225	22,775	25,325
CT	10,610	14,475	16,435	18,395	20,355	22,315	24,275	26,235
MA	7,475	10,155	12,575	15,125	17,675	20,225	22,775	25,325

(For household units with more than eight members add $2,450 in AK, $1,960 in CA and CT, and $2,550 in CO and MA for each additional member.)

Any person whose income is not more than 100 percent of the DHHS Poverty Income Guideline for her/his specific household unit shall be given special consideration for participation in the Foster Grandparent and Senior Companion Programs. The revised income eligibility levels presented here are calculated from the base DHHS Poverty Income Guidelines now in effect.

VOL 54 ISS 74 AP 19 1989 UMI

1989 DHHS POVERTY INCOME GUIDELINES FOR ALL STATES

States	For Household units of							
	One	Two	Three	Four	Five	Six	Seven	Eight
All except HI & AK	$5,960	$8,020	$10,080	$12,100	$14,140	$16,160	$18,220	$20,280
Hawaii	6,870	9,220	11,570	13,920	16,270	18,620	20,970	23,320
Alaska	7,460	10,030	12,590	15,130	17,680	20,230	22,780	25,330

EFFECTIVE DATE: April 19, 1989.

FOR FURTHER INFORMATION CONTACT: Ray Tejada, Program Officer, Foster Grandparent Program/Senior Companion Program, 806 Connecticut Avenue, NW., M–1008, Washington, DC 20525 or telephone (202) 634–9394.

SUPPLEMENTARY INFORMATION: These ACTION programs are authorized pursuant to section 211 and 213 of the Domestic Volunteer Service Act of 1973, as amended, Pub. L. 93–113, 87 Stat. 394. The income eligibility levels are determined by the currently applicable guidelines published by DHHS pursuant to sections 652 and 673 (2) of the Omnibus Budget Reconciliation Act of 1981 which requires poverty guidelines to be adjusted for Consumer Price Index changes.

Signed in Washington, DC, April 13, 1989.

Donna M. Alvarado,

Director of ACTION.

BILLING CODE 6050-28-M

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

Grand Electric Cooperative, Inc.; Finding of No Significant Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA), pursuant to the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 *et seq.*), the Council on Environmental Quality Regulations (40 CFR Parts 1500–1508), and REA Environmental Policy and Procedures (7 CFR Part 1794), has made a Finding of No Significant Impact (FONSI) with respect to the construction of the Bowman-Ladner 115 kV transmission line and other related facilities. Other facilities include the expansion of the Bowman Substation and the construction of the Koch distribution substation. The proposed facilities will be located in Bowman County, North Dakota and Harding County, South Dakota. The proposed facilities will be built by the Grand Electric Cooperative, Inc. (Grand Electric), of Bison, South Dakota. The transmission line will be built to 115 kV specifications but initially energized at 69 kV.

FOR FURTHER INFORMATION CONTACT: REA's Environmental Assessment (EA) and FONSI and Grand Electric's Borrower's Environmental Report (BER) may be reviewed at the Office of the Director, Northwest Area—Electric, REA, Room 0230, South Agriculture Building, Washington, DC 20250, telephone (202) 382–1400; or the office of Grand Electric, Darrell D. Henderson, Manager, P. O. Box 39, Bison, South Dakota 57620, telephone (605) 244–5211, during regular business hours. Copies of the BER, EA and FONSI can be obtained from either of the contacts listed above. All comments or questions should be directed to the REA contact.

SUPPLEMENTARY INFORMATION: REA reviewed the BER submitted by Grand Electric and determined that it represents an accurate assessment of the environmental impacts of the proposed project. The project consists of a 115 kV transmission line approximately 48 kilometers (30 miles) in length and associated facilities. Associated facilities include the expansion of the Bowman Substation, located about 8 kilometers (5 miles) southeast of Bowman, Bowman County, North Dakota and the construction of the Koch distribution substation near Ladner in Harding County, South Dakota. The BER and EA adequately consider the potential impacts of the proposed project, and REA has concluded that approval of the project would not result in a major Federal action significantly affecting the quality of the human environment. REA determined that the proposed project will have no effect on air quality, water quality, floodplains, wetlands, important farmlands, prime rangelands or prime forest lands, Federal or State listed or proposed listing of threatened or endangered species or their critical habitat, or any property listed or eligible for listing in the *National Register of Historic Places*. REA identified no other matters of potential environmental concern related to the proposed project.

Various alternatives to the proposed project were considered including no action, rebuilding the existing transmission system, energy conservation, alternative substation sites, alternative transmission routes, and underground construction. REA determined that the proposed project is an environmentally acceptable alternative that meets Grand Electric's need with a minimum of adverse environmental impact. REA has concluded that project approval would not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, the preparation of an Environmental Impact Statement is not necessary.

In accordance with REA's Environmental Policies and Procedures, 7 CFR Part 1794, Grand Electric advertised in the newspapers requesting comments on the environmental aspects of the proposed project. No comments were received.

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.850–Rural Electrification Loans and Loan Guarantees. For the reasons set forth in the final rule related notice to 7 CFR Part 3015 Subpart V in 50 FR 47034, November 14, 1985, this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Date: April 13, 1989.

Frank W. Barnett,

Acting Assistant Administrator—Electric.

Bureau of Export Administration

Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee; Partially Closed Meeting

A meeting of the Computer Peripherals, Components and Related Test Equipment Technical Advisory Committee will be held May 16, 1989 at 9:30 a.m., Herbert C. Hoover Building, Room 1617F, 14th Street and Constitution Avenue, NW., Washington, DC.

The Committee advises the Office of Technology and Policy Analysis with respect to technical questions which affect the level of export controls applicable to computer peripherals and related test equipment or technology.

Agenda

General Session

1. Introduction of Members and Visitors.
2. Introduction of Invited Guests.
3. Presentation of Papers or Comments by the Public.
4. Election of Chairman.
5. COCOM Participation.
6. Decontrol of Winchester Drives.
7. Flow Charts of Graphics Workstation.
8. Discussion of 1522 Subgroup.
9. Discussion of Bulgarian 10 MB Drive.
10. Original Equipment Manufacture (OEM) Sales to the Bloc.
11. G–COM Disk Packs.
12. Discussion of 1565A Rewrite.

Executive Session

13. Discussion of matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The meeting will be open to the public and a limited number of seats will be available. To the extent time permits, members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting and can be directed to: Technical Support Staff, Office of Technology & Policy Analysis, Room 4069A, 14th & Constitution Avenue, NW., Washington, DC 20230.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 10, 1988, pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, that the series of meetings or portions of meetings of the Committee and of any Subcommittees thereof, dealing with the classified materials listed in 5 U.S.C. 552b(c)(1) shall be exempt from the provisions relating to public meetings found in section 10 (a)(1) and (a)(3), of the Federal Advisory Committee Act. The remaining series of meetings or portions thereof will be open to the public.

A copy of the Notice of Determination to close meetings or portions of meetings of the Committee is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, Washington, DC. For further information or copies of the minutes call Ruth D. Fitts, 202–377–4959.

Date: April 13, 1989.

Betty A. Ferrell,

Director, Technical Advisory Committee Unit, Office of Technology and Policy Analysis.

[FR Doc. 89-9294 Filed 4-18-89; 8:45 am]

BILLING CODE 3510-DT-M

National Oceanic and Atmospheric Administration

Intention to Adjust the Boundary of the Currituck Banks Component of the North Carolina National Estuarine Research Reserve

AGENCY: Marine and Estuarine Management Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, Commerce.

ACTION: Public notice.

SUMMARY: Notice is hereby given that the Division of Coastal Management, of the State of North Carolina, intends to adjust the boundary of the Currituck Banks Compenent of the North Carolina National Estuarine Research Reserve. The area authorized for trade is immediately adjacent to the existing boundary for the Currituck Banks Component as described in the Draft Management Plan dated September 1985, prepared jointly by the U.S. Department of Commerce, National Oceanic and Atmospheric Administration, Office of Ocean and Coastal Resource Management, and the State of North Carolina Division of Coastal Management.

This boundary adjustment is not intended to increase or decrease the Reserve property, but will merely shift a 42-acre inholding, owned by Monkey Island Investment Associates of Norfolk, Virginia, approximately 249 feet to the south. This tract is described as follows:

Beginning at an iron pipe in the mean high tide common boundary corner of the State of North Carolina and the Monkey Island Investments Associates, said corner being 2,124.68 feet north of the common property corner of northeastern corner of Ocean Hills subdivision and the southeastern boundary corner of State of North Carolina, thence S 87 degrees 10'22" W 744.10 feet to a point, thence N 87 degrees 10'22" E 390 feet to a point, thence S 13 degrees 36'31" E 61.08 feet to a point, thence S 87 degrees 10'22" W 390.00 feet to a point, thence S 13 degrees 36'31" E 880.20 feet to a point, thence N 87 degrees 10'22" E 390.00 feet to a point, thence N 13 degrees 36'31" W 61.08 feet to a point, thence N 87 degrees 10'22" E 622.44 feet to a point, thence N 87 degrees 10'22" E 187.44 feet to a point, thence N 14 degrees 33'36" W 1886.43 feet to a point, thence S 87 degrees 10'22" W 130.53 feet to a point and place of beginning containing 42.252 acres.

Any person wishing to comment on the proposed adjustment may forward written statements to the Division of Coastal Management, P.O. Box 27687, Raleigh, North Carolina, 27611 Attn: Reserve Coordinator. Comments must be received by the Division of Coastal Management no later than close of business on May 31, 1989.

Federal Domestic Assistance Catalog Number 11.420 (Coastal Zone Management) Estuarine Sanctuaries.

Thomas J. Maginnis,

Assistant Administrator for Ocean Services and Coastal Zone Management.

Dated: April 13, 1989.

BILLING CODE 3510-08-M

National Oceanic and Atmospheric Administration

Announcement of Stellwagen Bank (MA) as an Active Candidate for Designation as a National Marine Sanctuary; Intent To Prepare a Draft Environmental Impact Statement and Management Plan; Public Scoping Meetings

AGENCY: Office of Ocean and Coastal Resource Management (OCRM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice.

SUMMARY: NOAA is announcing Stellwagen Bank (5 nautical miles north of Cape Cod, Massachusetts) as an Active Candidate for designation as a National Marine Sanctuary, and its intent to prepare a draft environmental impact statement and management plan (DEIS/MP) on the proposal to designate. NOAA will also conduct public scoping meetings to assist in the development of the DEIS/MP. The study area includes an offshore area located 6.3 miles north of Provincetown, MA and measuring 31.8 miles by 19.1 miles. Approximately 605 square miles are encompassed in the study area.

Selection of a site as an Active Candidate formally initiates the National Environmental Policy Act (NEPA) process; NOAA will prepare a DEIS/MP to examine management, boundary and regulatory alternatives associated with Sanctuary designation.

VOL
54
ISS
74
AP
19
1989
UMI

NOAA will conduct public scoping meetings to gather information and comments from individuals, organizations, and government agencies on the range and significance of issues related to this proposal. Scoping meetings will be held at:

(1) Town Hall, Commercial Street, Provincetown, MA, 7:00 p.m., Tuesday, June 13, 1989;

(2) Conference Room, Sheraton-Portsmouth Hotel, 250 Market Street, Portsmouth NH, 7:00 p.m., Wednesday, June 14, 1989;

(3) Conference Room NOAA/Fisheries Building, 1 Blackburn Drive, Gloucester, MA, 7:00 p.m., Thursday, June 15, 1989; and

(4) Harbor View Room, New England Aquarium, Boston, MA, 1:00 p.m., Friday, June 16, 1989.

All interested persons are invited to attend.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph A. Uravitch, Chief, or Ms. Sherrard Foster, Project Manager, Marine and Estuarine Management Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, 1825 Connecticut Avenue, NW., Suite 714, Washington, DC 20235 (202/673-5122).

SUPPLEMENTARY INFORMATION:

Background and Selection Procedures

Title III of the Marine Protection, Research and Sanctuaries Act of 1972, as amended, 16 U.S.C. 1431 *et seq.* (the Act), authorizes the Secretary of Commerce to designate those areas of coastal and ocean waters, the Great Lakes and their connecting waters, and submerged lands over which the United States exercises jurisdiction, consistent with international law, as National Marine Sanctuaries. The purpose of designating National Marine Sanctuaries is to protect and manage distinctive areas of the marine environment for those conservation, recreational, ecological, historical, research, educational, or esthetic values which give these areas special national significance. The Act is administered by the National Oceanic and Atmospheric Administration (NOAA); through the Office of Ocean and Coastal Resource Management (OCRM); Marine and Estuarine Management Division (MEMD).

In January 1982, NOAA published a Program Development Plan (PDP) for the National Marine Sanctuary Program, describing the Program's mission and goals; site identification and selection criteria; and the nomination and designation process. In September 1982, NOAA issued proposed regulations for the continued operation of the Program (47 FR 39191). Pursuant to the PDP and those regulations, NOAA published a proposed Site Evaluation List (SEL), comprised of highly-qualified marine sites identified and recommended to NOAA by regional resource evaluation teams. SEL sites meet Program criteria for further evaluation as possible National Marine Sanctuaries. Team recommendations were made in accordance with the Program's mission and goals set forth in the PDP, in Section 922.1 of the final Program regulations, and in Appendix 1 of the regulations. The Stellwagen Bank study area was recommended by the Resource Evaluation Team for the North Atlantic Region, and was placed on the SEL in 1983 (48 FR 35568). In the normal process of National Marine Sanctuary designation, the Secretary of Commerce (through NOAA) will from time to time select sites from the SEL as Active Candidates, to initiate the process of such further evaluation.

Changes in the process for designating National Marine Sanctuaries were made by 1984 and 1988 Amendments to the Act (Title III of Pub. L. 96-498, and Title II of Pub. L. 100-627, codified at 16 U.S.C. 1431 *et seq*). NOAA's program operating final regulations (15 CFR Part 922, 53 FR 43502, October 28, 1988), reflect the provisions of the 1984 Amendments. Where there is a conflict between the current regulations and the 1988 Amendments, NOAA relies on the statutory Amendments.

The 1988 Amendments (section 304(b)) establish a finite period of time for designation of new National Marine Sanctuaries, i.e., 30 months from the Federal Register notice of Active Candidacy to a notice of designation (or findings regarding why such notice has not been published). Additionally, the 1988 Amendments specifically require (at section 304(a)) that a prospectus on the Stellwagen Bank proposal be submitted to Congress not later than September 30, 1990. NOAA is announcing Stellwagen Bank as an Active Candidate now in order to meet the required deadline for this submission to Congress. The Active Candidacy notice formally initiates the 30-month period during which NOAA must conduct the complete National Environmental Policy Act (NEPA) environmental impact analysis process, and publish either a notice of designation or findings regarding why such notice has not been published.

Following the scoping meetings announced in this notice, subsequent designation steps include preparation of the DEIS/MP document; public hearing(s); preparation of a final environmental impact statement/management plan; and recommendation for approval of the designation to the Secretary of Commerce or designee. Opportunities for public comment exist throughout this process, and will be announced in the Federal Register, the local media, and other appropriate channels.

Section 303 of the Act (16 U.S.C. 1433) and implementing regulations for the National Marine Sanctuary Program (at 15 CFR 922.33) establish procedures for evaluation of the suitability of active candidates as National Marine Sanctuaries. NOAA will determine to what extent designation will fulfill the purposes and policies of the Act, i.e., whether:

(1) The area is of special national significance due to its resource or human use value;

(2) Existing State and Federal authorities are inadequate to ensure coordinated and comprehensive conservation and management of the area, including resource protection, scientific research, and public education;

(3) Designation of the area as a National Marine Sanctuary will ensure coordinated and comprehensive conservation and management of the area not provided by existing authorities; and

(4) The area is of a size and nature that will permit comprehensive and coordinated conservation and management.

In making these determinations, NOAA will consider:

(1) The area's natural resource and ecological qualities, including its contribution to biological productivity; maintenance of ecosystem structure, maintenance of ecologically or commercially important or threatened species or species assemblages, and the biogeographic representation of the site;

(2) The area's historical, cultural, archeological, or paleontological significance;

(3) The present and potential uses of the area that depend on maintenance of the area's resources, including commercial and recreational fishing, subsistence uses, other commercial and recreational activities, an research and education;

(4) The present and potential activities that may adversely affect the factors identified in the considerations listed above;

(5) The existing State and Federal regulatory and management authorities applicable to the area and the adequacy of those authorities to fulfill the purposes and policies of the Act;

(6) The manageability of the area, including such factors as its size, its ability to be identified as a discrete ecological unit with definable boundaries, its accessibility, and its suitability for monitoring and enforcement activities;

(7) The public benefits to be derived from Sanctuary status, with emphasis on the benefits of long-term protection of nationally significant resources, vital habitats, and resources which generate tourism;

(8) The negative impacts produced by management restrictions on income-generating activities such as living and non-living resource development;

(9) The socioeconomic effects of Sanctuary designation; and

(10) The fiscal capability of NOAA to manage the area as a National Marine Sanctuary.

In preparing the DEIS/MP to examine the management, boundary and regulatory alternatives associated with Sanctuary designation, NOAA will solicit comments from interested individuals, groups and organizations, appropriate Congressional Committees, Federal agencies, responsible officials of State and local governments, and officials of the affected Regional Fishery Management Council. This will be done during the scoping meetings identified herein, to be conducted prior to preparation of the DEIS/MP. Comments will also be received during public hearings on the completed DEIS/MP.

Site Description

Natural Resources. Stellwagen Bank is a shallow, glacially-deposited gravel feature located approximately six miles (10.186 km) off the northern end of Cape Code, Massachusetts, in the southern Gulf of Maine. The Bank measures 18.75 miles in length and 6.25 miles in width at its widest point. Water depths over the Bank range from 61 feet along the scarp of the southwestern end, and 78 feet at the northwestern end, to a maximum of 120 feet at the southeast end of the Bank. Deeper waters surround the Bank; maximum depths exceeding 330 feet occur north of the Bank and within the study area. The Sanctuary study area occurs entirely within Federal waters. The study area is marked by the following coordinates: 70°14'N, 42°36'W (northeast point) by 70°35'N, 42°31'W (northwest point) by 70°26'N, 42°05'W (southwest point), by 70°04'N, 42°09'W (southeast point).

Oceanographic/Physical Characteristics. Oceanographic conditions and hydrography are highly varied in the vicinity of Stellwagen Bank. Surface circulation in the Gulf of Maine generally is counterclockwise, with currents moving southward along the Maine and New Hampshire coasts and into the Massachusetts Bay, where the flow turns gradually eastward across the northern edge of Georges Bank, further offshore. The moderate to high velocity, east-west tidal current sweeps the Bank's shallows, generating internal waves during summer months. Mixing of the water column is widespread during winter months, when isothermal conditions characterize the Bank's waters.

The Bank's profile is markedly asymmetric: the seaward edge is gentle, and the shoreward slope is steep (dropping from 27 to 80 meters over a horizontal distance of approximately one kilometer).

Regional Productivity. Primary biological productivity at Stellwagen Bank follows a temperate coastal zone cycle. Two distinct peak productivity periods are evident: the more extensive from March through May, and a second, shorter period from mid-September through October. Seasonal overturn and mixing of coastal waters with nutrient-rich waters from deeper strata produce a complex system of overlapping mid-water and benthic habitats. Predominantly sand and gravel substrates support benthic communities composed of polychaete worms, amphipods, and mollusks.

The extensive and cyclic biological productivity supports a variety of commercially important fishery resources. Over a dozen species are commercially harvested, including mackerel, bluefin tuna, blue fish, shad, menhaden, herring, striped bass, cod, haddock, flounder, quahog, and sea scallop. The predominant forage fish found at the Bank is the sand lance (*Ammodytes americanus*), which attracts several large fish species and a seasonal variety of balaenopterid cetacean species. The largest high-latitude population of humpback whales (*Megaptera novaengliae*) in the contiguous United States occurs seasonally at Stellwagen Bank, in addition to fin whales (*Balaenoptera physalus*), minke whales (*Balaenoptera acutorostrata*), northern right whales (*Eubalaena glacialis*), Atlantic white-sided dolphins (*Lagenorhynchus acutus*), white-beaked dolphins (*Lagenorhynchus albirostris*), and harbor porpoises (*Phocoena phocoena*). In addition to these frequently-observed species, orca whales (*Orcinus orca*), and pilot whales (*Globicephala melaena*) are also occasionally observed at Stellwagen Bank.

Particular scientific interest is focused on four species of large cetaceans (humpbacks, fins, minkes, and northern rights) using Stellwagen Bank as feeding and nursery grounds. With the exception of the minke whale, these species are all considered "endangered" pursuant to the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*).

Northern right whales are one of the most severely endangered cetracean species in the world; no more than 150 individuals are thought to remain in the western North Atlantic Ocean. Recorded sightings of right whales at Stellwagen Bank over the past four years indicate the Bank's importance for feeding and for nursing of calves: a significant number of identified northern right whales have been observed returning to the Bank season after season.

Fin whales exist in relatively large numbers throughout the world's non-tropical oceans, and approximately 3,600 to 6,300 exist in the North Atlantic Ocean. Fin whales associated with the Stellwagen Bank system are ubiquitous and apparently year-round residents.

Minke whales also exist in relatively large numbers worldwide (excluding tropical waters), although the size of the North Atlantic population is currently unknown.

The world population of humpback whales is believed to be not more than 8,000 animals geographically distributed into fifteen demographic groups. Approximately 2,000 humpbacks in the western North Atlantic Ocean comprise the largest, yet least studied, population in the world. More than 100 humpbacks return annually to Stellwagen Bank from mating and calving grounds in the eastern central Caribbean Sea. Research to date has focused on this species, and details of its movements are better documented than those of other cetaceans. Humpbacks enter the Stellwagen Bank system between mid-March and mid-April, and remain until mid-November (one of the longest residency periods known anywhere).

Diverse pelagic and coastal bird species seasonally forage at the Stellwagen Bank system. Among species known to frequent or migrate through the Bank area are: storm petrels, gulls, terns, brants, oldsquaws, scoters, ospreys, shearwaters, dovekies, puffins, fulmars, gannets, murres, loons, kittiwakes, phalaropes, and jaegers.

At least two species of sea turtles also feed in the general area of the Bank, the loggerhead *Carretta carretta*) and the leatherback (*Dermochelys coriacea*). Transient species include the Kemp's

VOL 54 ISS 74 AP 19 1989 UMI

ridley (*Lepidochelys kempi*) and the green (*Chelonia mydas*).

Human Uses. Waters over and around the Bank are used extensively for numerous purposes, including commercial and recreational fishing, commercial whale-watching, recreational boating, shipping, and research.

Commercial Uses. The most important activity directly dependent on resources of the Stellwagen Bank area is commercial fishing. Extensive fisheries include groundfish species, such as Atlantic cod, haddock, yellowtail flounder, winter flounder, and silver hake. Invertebrates include ocean quahogs, sea scallops, and American lobsters. Pelagic fisheries include Atlantic herring, mackerel, bluefin tuna, and bluefish. The New England commercial fishing fleet increased from 1,225 registered vessels in 1986 (5 gross tons or larger) to 1,334 such vessels in 1987; and total landings increased slightly from 275,300 tons to 277,600 tons during the same period. Revenues generated (adjusted value) exceeded $186 million in 1987.

Commercial whale-watching activities operating from Maine to Connecticut are largely focused on Stellwagen Bank and Jeffrey's Ledge (located north of Stellwagen Bank). During 1988, more than 40 commercial whale-watch vessels conducted trips to these areas from May through September (approximately 8,550 trips). Assuming full vessel capacity, visitation levels to these areas exceeded one million persons during the five-month period. Revenues in 1988 from commercial whale-watch operations are estimated at over $16 million.

Shipping lanes for commercial vessel traffic in and out of Boston traverse directly across Stellwagen Bank. During 1988, a total of 12,728 trips were made in and out of Boston by both self-propelled and non-self propelled vessels.

Recreational Uses. Recreational fishing in the Stellwagen Bank area is seasonal and primarily focused on scup, bluefish, summer and winter flounder, Atlantic mackerel, Atlantic cod, and pollack. Recreational boating is also a popular activity during summer months.

Research Activities. The biological abundance of the Stellwagen Bank system generates scientific research on cetaceans and the resources supporting them. Research and monitoring activities are also conducted on fisheries. Research facilities in the area include the Center for Coastal Studies (Provincetown); the University of Massachusetts (Boston); the New England Aquarium (Boston); Woods Hole Oceanographic Institution (Woods Hole); the Marine Biological Laboratory (Woods Hole); the Manomet Bird Observatory (Manomet); and the National Marine Fisheries Service (Gloucester and Woods Hole). Additional institutions or organizations having supported research activities in the vicinity of Stellwagen Bank include the College of the Atlantic; Gloucester Fishermen's Museum; University of Maine; University of Rhode Island; and Cape Cod Museum of Natural History.

The Designation Process

The management plan to be prepared for the proposed Sanctuary will specify the goals and objectives of Sanctuary designation and describe programs for resource protection, research and interpretation. The various administrative and regulatory alternatives for Sanctuary management will be analyzed in the environmental impact statement.

Opportunities for public participation in NOAA's development of a draft environmental impact statement and management plan will be provided through the June scoping meetings, solicitation of comments on the DEIS/MP document, and public hearings.

The June scoping meetings will attempt to identify issues in establishing a Stellwagen Bank National Marine Sanctuary and generate suggestions for resolving them. Topics for discussion will include the following: (1) Boundary alternatives; (2) management alternatives; (3) resource protection; (4) interpretive opportunities.

(Federal Domestic Assistance Catalogue Number 11.429 Marine Sanctuary Program)

Date: April 13, 1989.

Thomas J. Maginnis,

Assistant Administrator for Ocean Services and Coastal Zone Management.

BILLING CODE 3510-08-M

Marine Mammals; Application for Modification; Deborah A. Glockner-Ferrari and Mark J. Ferrari (P171A)

Notice is hereby given that Ms. Deborah A. Glockner-Ferrari and Mr. Mark J. Ferrari, 1728 San Luis Road, Walnut Creek, California 94596, requested a modification of Permit No. 538 issued on January 14, 1988 (51 FR 3093), under the authority of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531-1543), and the National Marine Fisheries Service regulations governing endangered fish and wildlife (50 CFR Parts 217-222).

Permit No. 538 authorizes the inadvertent harassment of an unspecified number of humpback whales (*Megaptera novaeangliae*) in the North Pacific during population studies using photographic techniques. Areas of activity include waters surrounding the Hawaiian Islands and waters of California and Alaska. The Permit Holder requests a modification to the Permit to allow population studies using photographic techniques on an opportunistic basis on all species encountered during their work with humpback whales studies. The incidental sightings include an unspecified number of bottlenose dolphin (*Tursiops truncatus*), spinner dolphin (*Stenella longirostris*), spotted dolphin (*Stenella attenuata*), false killer whale (*Pseudorca crassidens*), short-finned pilot whale (*Globicephala macrorhynchus*), killer whales (*Orcinus orca*), harbor porpoise (*Phocoena phocoena*), and Dall's porpoise (*Phocoenoides dalli*).

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this modification to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this modification request should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, 1335 East West Hwy., Room 7324, Silver Spring, Maryland 20910, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular modification would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries. All statements and opinions contained in this modification request are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above modification request are available for review by interested persons in the following offices:

Office of Protected Resources, National Marine Fisheries Service, 1335 East West Hwy., Room 7324, Silver Spring, Maryland 20910;

Director, Alaska Region, National Marine Fisheries Service, 709 West 9th Street, Federal Bldg., Juneau, Alaska 99802;

Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way, NE., BIN C15700, Seattle, Washington 98115; and

Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

Nancy Foster,

Director, Office of Protected Resources and Habitat Programs.

BILLING CODE 3510-22-M

National Technical Information Service

Intent to Grant Exclusive Patent License; AgriSense

The National Technical Information Service (NTIS), U.S. Department of Commerce, intends to grant to AgriSense, having a place of business in Fresno, California, an exclusive license in the United States and certain foreign countries to practice the invention entitled "A Novel System for Monitoring and Controlling the Papaya Fruit Fly", U.S. Patent Application Serial Number 7-240,312. The patent rights in this invention will assigned to the United States of America, as represented by the Secretary of Commerce.

The intended exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The intended license may be granted unless, within sixty days from the date of this published Notice, NTIS receives written evidence and argument which establishes that the grant of the intended license would not serve the public interest.

Inquiries, comments, and other materials relating to the proposed license must be submitted to Douglas J. Campion, Office of Federal Patent Licensing, NTIS, Box 1423, Springfield, VA 22151.

A copy of the instant patent application may be purchased from the NTIS Sales Desk by telephoning (703) 487-4650 or by writing to the Order Department, NTIS, 5285 Port Royal Road, Springfield, VA 22161.

Douglas J. Campion,

Associate Director, Office of Fedeal Patent Licensing, National Technical Information Service, U.S. Department of Commerce.

DEPARTMENT OF DEFENSE

Department of the Air Force

Scientific Advisory Board; Meeting

April 10, 1989.

The USAF Scientific Advisory Board Ad Hoc Committee on Munitions Effectiveness will meet on 10-11 May 1989 from 8:00 AM to 5:00 PM at The Pentagon, Washington, DC.

The purposes of this meeting are to assess the changes in the threat over the past ten years and to study how to take full advantage of potential technology improvements in the development and manufacturing of munitions. This meeting will involve discussions of classified defense matters listed in section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at (202) 697-4648.

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ST89-1541-000, et al.]

Southern Natural Gas; Self-Implementing Transactions

April 13, 1989.

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to Part 284 of the Commission's Regulations, and Sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA).[1]

The "Recipient" column in the following table indicates that entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction. A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeline or a local distribution company pursuant to § 284.102 of the Commission's Regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's Regulations and section 311(a)(2) of the NGPA. In those cases where Commission approval of a transportation rate is sought pursuant to § 284.123(b)(2), the table lists the proposed rate and the expiration date of the 150-day period for staff action. Any person seeking to participate in the proceeding to approve a rate listed in the table should file a motion to intervene with the Secretary of the Commission on or before May 1, 1989.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate pipeline or local distribution company pursuant to Section 284.163 of the Commission's Regulations and section 312 of the NGPA.

[1] Notice of a transaction does not constitute a determination that the terms and conditions of the proposed service will be approved or that the noticed filing is in compliance with the Commission's Regulations.

VOL 54 ISS 74 AP 19 1989 UMI

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to § 284.222 and a blanket certificate issued under § 284.221 of the Commission's Regulations.

A "G(LT)" or "G(LS)" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.224 of the Commission's Regulations.

A "G(HT)" or "G(HS)" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under §§ 284.224 of the Commission's Regulations.

Lois D. Cashell,
Secretary.

[Docket No. MT89-6-000]

Caprock Pipeline Co.; Proposed Changes in FERC Gas Tariff Pursuant to Order No. 497

April 13, 1989.

Take notice that on April 5, 1989, Caprock Pipeline Company, tendered the following tariff sheets for filing in the captioned docket pursuant to Order No. 497 and § 250.16 of the Commission's Regulations as part of its FERC Gas Tariff, Revised Original Volume No. 3:

Revised Original Sheet No. 19, Superseding
Original Sheet No. 19
Original Sheet No. 19.a through 19.1

Any person desiring to be heard or to protest the subject filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR §§ 385.214 and 385.21. All such motions or protests must be filed by April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ89-1-45-002]

Inter-City Minnesota Pipelines Ltd., Inc.; Tariff Filing

April 13, 1989.

Take notice that on April 7, 1989, Inter-City Minnesota Pipelines Ltd., Inc. ("Inter-City"), 245 Yorkland Boulevard, North York, Ontario, Canada M2J 1R1, filed Second Substitute First Revised Thirty-First Revised Sheet No. 4 to Original Volumes No. 1 of its FERC Gas Tariff.

Inter-City states the revised tariff sheet reflects its quarterly PGA. Inter-City requests that the tariff sheet be made effective February 1, 1989.

Copies of the filing were served on Inter-City's jurisdictional customers and interested state commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests must be filed on or before April 21, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

BILLING CODE 6717-01-M

[Docket No. TQ89-2-45-001]

Inter-City Minnesota Pipelines Ltd., Inc.; Tariff Filing

April 13, 1989.

Take notice that on April 7, 1989, Inter-City Minnesota Pipelines Ltd., Inc. ("Inter-City"), 245 Yorkland Boulevard, North York, Ontario, Canada M2J 1R1, tendered for filing a revised tariff sheet to Original Volume No. 1 of its FERC Gas Tariff to be effective May 1, 1988:

Original Volume No. 1
Substitute Thirty-Third Revised Sheet No. 4

Inter-City states that this revised tariff sheet is filed as Inter-City's quarterly PGA pursuant to Order Nos. 483 and 483-A.

Inter-City states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of

VOL 54 ISS 74 AP 19 1989 UMI

Practice and Procedure. All such motions or protests should be filed on or before April 21, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP89-14-005]

Inter-City Minnesota Pipelines Ltd., Inc.; Tariff Filing

April 13, 1989.

Take notice that on April 7, 1989, Inter-City Minnesota Pipelines Ltd., Inc. ("Inter-City"), 245 Yorkland Boulevard, North York, Ontario, Canada M2J 1R1, tendered for filing a revised tariff sheet to its FERC Gas Tariff.

Original Volume No. 1

Substitute Second
Substitute Thirty-Second Revised Sheet No. 4

Inter-City states that the revised tariff is filed pursuant to § 154.67 of the Commission's Regulations, and also complies with the Commission's orders issued in this docket on November 30, 1988 and March 28, 1989. Inter-City proposes the sheet to become effective May 1, 1989.

Inter-City states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any persons desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before April 21, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TC89-8-003]

Kentucky West Virginia Gas Co.; Tariff Filing

April 13, 1989.

Take notice that on March 30, 1989, Kentucky West Virginia Gas Company, (Kentucky West), P.O. Box 1388, Ashland, Kentucky 41105, filed in Docket No. TC89-8-003, the following revised tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1:

Original Sheet No. 54G(1)
Original Sheet No. 54G(2)
Original Sheet No. 54G(3)
Original Sheet No. 54G(4)

Kentucky West states that the tariff sheets filed herein contain the Index of Entitlements implementing its gas supply cutailment plan and are being filed in compliance with Ordering Paragraph (b) of the Commission's order issued October 31, 1988, in Docket Nos. TC88-8-000 and TC88-8-001.

With the filing of the Index of Entitlements, Kentucky West requests that the Commission cancel and reserve for future use those tariff sheets which contain the interim pro-rata curtailment plan:

First Revised Sheet No. 54K, Superseding Original Sheet No. 54K
First Revised Sheet No. 54L, Superseding Original Sheet No. 54L
First Revised Sheet No. 54M, Superseding Original Sheet No. 54M

Kentucky West has requested that the Commission authorize the tendered tariff sheets to become effective May 1, 1989.

Kentucky West states that copies of this filing have been served on all parties to this proceeding and on each of Kentucky West's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 24, 1989, file with the Federal Energy Regulation Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP89-61-003 and RP89-146-000]

Kentucky West Virginia Gas Co.; Compliance Filing

April 13, 1989.

Take notice that on April 3, 1989, Kentucky West Virginia Gas Company (Kentucky West) filed certain tariff sheets in compliance with the Commission's order of March 2, 1989.

Kentucky West states that these tariff sheets restate its base tariff rates effective March 2, 1989, employing the modified fixed-variable methodology and reflect its PGA filing which became effective March 1, 1989 in Docket No. TF89-3-46. Kentucky West states that it is filing these tariff sheets under protest and without prejudice to its position set forth in its request for rehearing filed on March 17, 1989.

Kentucky West states that copies of this filing are being served upon all parties to this proceeding and to each of its customers and the public service commissions of Kentucky, Pennsylvania, and West Virginia.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules and Practice and Procedure (18 CFR 385.214, 385.211 (1988)). All such motions or protests should be filed on or before April 20, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection

[Docket No. RP89-33-000]

Northern Border Pipeline Co.; Informal Settlement Conference

April 13, 1989.

Taken notice that on May 31, 1989, at 1:00 p.m. in the offices of the Commission at 825 North Capitol Street, Washington, DC, there will be an informal settlement conference to explore the potential resolution of the issues contained in the above-captioned proceeding. It is the intention of the parties to discuss settlement of all outstanding issues.

Any party, as defined by 18 CFR 385.102(c) (1988) is invited to attend. Any persons wishing to become a party must move to intervene and receive intervener status pursuant to 18 CFR 385.214.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket No. MT88-11-003]

Northwest Pipeline Corp.; Proposed Changes in FERC Gas Tariff Pursuant to Order No. 497

April 13, 1989.

Take notice that on March 31, 1989, Northwest Pipeline Corporation tendered the following tariff sheets for filing in the captioned docket pursuant to Order No. 497 and § 250.16 of the Commission's Regulations as part of its FERC Gas Tariff, Original Volume No. 1-A:

Second Revised Sheet No. 423
First Revised Sheet No. 423-A

Any person desiring to be heard or to protest the subject filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211. All such motions or protests must be filed by April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TQ89-2-29-001 and TQ89-3-29-001]

Transcontinental Gas Pipe Line Corp.; Proposed Changes in FERC Gas Tariff

April 13, 1989.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on April 10, 1989 the following tariff sheets to its FERC Gas Tariff Second Revision Volume No. 1. Such sheets are proposed to be effective February 1, and April 1, 1989.

Effective February 1, 1989

Substitute Fifty-Fifth Revised Sheet No. 12
Substitute Fifty-Second Revised Sheet No. 15

Effective April 1, 1989

Substitute Fifty-Sixth Revised Sheet No. 12
Substitute Fifty-Third Revised Sheet No. 15

Transco states that this filing revises certain tariff sheets accepted by the Commission in the above referenced dockets to incorporate the currently effective Commodity PSP charge of 11.1¢ per dt.

Transco states that copies of the instant filing are being mailed to its jurisdictional customers, State Commissions, and interested parties. In accordance with the provisions of § 154.16 of the Commission's Regulations, copies of this filing are available for public inspection during regular business hours, in a convenient form and place at Transco's main offices at 2800 Post Oak Boulevard in Houston, Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, in accordance with §§385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before April 21, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. RP88-68-011 and RP89-122-001]

Transcontinental Gas Pipe Line Corp.; Tariff Filing

April 13, 1989.

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on April 10, 1989 the following tariff sheets to Second Revised Volume No. 1 of its FERC Gas Tariff. Such sheets are proposed to be effective May 1, 1989.

First Revised Sheet No. 12-B
First Revised Sheet No. 12-C
First Revised Sheet No. 12-D

Transco states that the purpose of the instant filing is to calculate the PSP charges for the second Annual Recovery Period (Year 2) commencing May 1, 1989, as provided in §§ 29.4(a) and 29.6(a) of Transco's General Terms and Conditions. The allocation of the Year 2 Fixed Monthly PSP Charges are reflected on the tariff sheets submitted in the instant filing. Transco also states that the resulting Year 2 Commodity PSP Charges are the same as those currently in effect for the initial Annual Recovery Period.

Transco further states that copies of the instant filing are being mailed to its jurisdictional customers, State Commissions and interested parties. In accordance with the provisions of § 154.16 of the Commission's Regulations, copies of this filing are available for public inspection during regular business hours, in a convenient form and place at Transco's main offices at 2800 Post Oak Boulevard in Houston, Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests should be filed on or before April 21, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717-01-M

VOL 54 ISS 74 AP 19 1989 UMI

[Docket No. MT89-5-000]

West Texas Gathering Co.; Proposed Changes in FERC Gas Tariff Pursuant to Order No. 497

April 13, 1989.

Take notice that on April 5, 1989, West Texas Gathering Company tendered the following tariff sheets for filing in the captioned docket pursuant to Order No. 497 and § 250.16 of the Commission's Regulations as part of its FERC Gas Tariff, Revised Original Volume No. 2:

Revised Original Sheet No. 19, Superseding Original Sheet No. 19
Original Sheet No. 19.a through 19.1

Any person desiring to be heard or to protest the subject filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with 18 CFR 385.214 and 385.211. All such motions or protests must be filed by April 28, 1989. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,
Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3558-1]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and is available to the public for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 382-2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: National Residential Radon Survey. (EPA ICR No. 1396; OMB No. 2060-0173). This is a new collection.

Abstract: This survey will collect information on radon gas levels present in residential structures across the country as well as information on building construction and individual occupancy patterns. Radon measurement devices will be placed in randomly selected households for a period of one year. The information will be used to estimate the frequency distribution of annual average radon concentrations in housing nationwide and to investigate correlations between specific construction types and radon levels.

Burden Statement: The estimated public burden for this collection of information is 1 hour per response.

Respondents: Residential dwellers.

Estimated No. of Respondents: 7,500.

Estimated Total Burden on Respondents: 7,500 hours.

Frequency of Collection: One time only.

Expedited Review: The comment period for this collection of information is May 10, 1989.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to: Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch, 401 M Street, SW., Washington, DC 20460, and Nicolas Garcia, Office of Management and Budget, Office of Information and Regulatory Affairs, 726 Jackson Place, SW., Washington, DC 20503, (Telephone (202) 395-3084).

OMB Responses to Agency PRA Clearance Requests

EPA ICR # 370.09; Underground Injection Control Program Information; was approved 03/07/89; OMB # 2040-0042; expires 09/30/91.

EPA ICR # 1343; Reports for States to Make SARA Capacity Assurances; was approved 03/09/89; OMB # 2050-0099; expires 11/30/90.

EPA ICR # 1491; Notification of National Response Center for Release of Extremely Hazardous Substances Newly Designated as Hazardous Substances Under CERCLA; was approved 03/09/89; OMB # 2050-0102; expires 01/31/92.

EPA ICR # 0011.04; Selective Enforcement Auditing Reporting Requirements for Light-Duty Vehicles, Light-Duty Trucks and Heavy-Duty Engines; was approved 03/09/89; OMB # 2060-0064; expires 03/31/92.

EPA ICR # 1245.02; Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs; was disapproved 03/10/89.

EPA ICR # 0111.03; National Emission Standard for Asbestos (NESHAP); was disapproved 03/01/89.

Date: March 24, 1989.

Paul Lapsley, Director,
Information and Regulatory Systems Division.

Performance Evaluation Reports for Fiscal Year 1988; Section 105 Grants; Missouri, et al

AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice of availability of grantee performance evaluation reports.

SUMMARY: EPA's grant regulations (40 CFR 35.150) require the Agency to conduct yearly performance evaluations on the progress of the approved State/EPA Agreements. EPA's regulations (40 CFR 56.7) require that the Agency make available to the public the evaluation reports. EPA has conducted evaluations on the Missouri Department of Natural Resources, Nebraska Department of Environmental Control, Iowa Department of Natural Resources, and Kansas Department of Health and Environment. These evaluations were conducted to assess the agencies' performance under the grants made to them by EPA pursuant to section 105 of the Clean Air Act.

EFFECTIVE DATE: April 19, 1989.

ADDRESSES: Copies of the evaluation reports are available for public inspection at the EPA's Region VII Office, Air and Toxics Division, 726 Minnesota Avenue, Kansas City, Kansas 66101.

FOR FURTHER INFORMATION CONTACT: Carol D. LeValley at (913) 236-2893 (FTS 757-2893).

Date: April 3, 1989.

Morris Kay,
Regional Administrator.

Ciba-Geigy Corp.; Amended Pesticide Petition

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the filing of an amendment to pesticide petition (PP) 9F3706 by the Ciba-Geigy Corp.

ADDRESS: By mail, submit written comments to: Public Docket and Freedom of Information Section, Field Operations Division (H-7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA wihtout prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, cluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Lois Rossi, Product Manager (PM) 21, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Office location and telphone number: Rm. 227, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-1990.

SUPPLEMENTARY INFORMATION: EPA has received from the Ciba-Geigy Corp., Agricultural Division, P.O. Box 18300, Greensboro, NC 27419, an amendment to PP 9F3706, which proposed to amend 40 CFR 180.434 by proposing to establish a regulation to permit the combined residues of fungicide 1-[[2-2,4-dichlorophenyl]-4-propyl-1,3-dioxolan-2-yl]methyl)-1H-1,2,4-triazole and its metabolites determined as 2,4-dichlorobenzoic acid in or on kidney and liver of cattle, goats, hogs, horses, and sheet at 2.0 parts per million (ppm).

Ciba-Geigy originaly petitioned for tolerances for this pesticide in or on grass hay at 5.0 ppm and grass forage at 0.5 ppm. Notice of this petition was published in the Federal Register of February 22, 1989 (54 FR 7597). The petition was amended to add the raw agricultural commodity grass seed screenings at 19 ppm. Notice of this amended petition was published in the Federal Register of March 15, 198 (54 10715).

Authority: 21 U.S.C. 346a.

Dated: March 30, 1989.

Anne E. Lindsay,
Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[PP 8G3680/T576; FRL-3556-6]

Rohm and Haas Co.; Establishment of Temporary Tolerance

AGENCY: Environmental Protection Agency (EPA).
ACTION: Notice.

SUMMARY: EPA has established a temporary tolerance for residues of the fungicide alpha-butyl-alpha-[4-chlorophenyl]-1*H*-1,2,4-triazole-1-propanenitrile and its metabolites containing both the chlorophenyl and triazole rings (free and bound) in or on the raw agricultural commodity stone fruits group (except dried plums) at 2 parts per million.

DATE: This temporary tolerance expires October 31, 1990.

FOR FURTHER INFORMATION CONTACT: By mail:

Susan Lewis, Product Manager (PM) 21, Registration Division (H75C5C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Office location and telephone number: Rm 229, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703) 557-1900

SUPPLEMENTARY INFORMATION: Rohm and Haas Co., Independence Mall West, Philadelphia, PA 19105, has requested in pesticide petition (PP) 8G3680 the establishment of a temporary tolerance for residues of the fungicide alpha-butyl-alpha-(4-chlorophenyl)-1*H*-1,2,4-triazole-1-propanenitrile and its metabolites containing both the chlorophenyl and triazole rings (free and bound) in or on the raw agricultural commodity stone fruits groups (except dried plums) at 2 parts per million (ppm).

This temporary tolerance will permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of experimental use permit 707-EUP-119, which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (Pub. L. 95-396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that establishment of the temporary tolerance will protect the public health. Therefore, the temporary tolerance has been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Rohm and Haas Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employer of the EPA or the Food and Drug Administration.

This tolerance expires October 31, 1990. Residues not in excess of this amount remaining in or on the raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. This tolerance may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 610-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

Authority: 21 U.S.C. 346a(j).

Dated: March 30, 1989.

Anne E. Lindsay,
Director, Registration Division, Office of Pesticide Programs.

Receipt of Notification of Intent To Conduct Small-Scale Field Testing; Genetically Altered Microbial Pesticide; Ciba-Geigy Corp.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received a notification of intent to conduct small-scale field testing of a transconjugate strain of *Bacillus thuringiensis* derived using traditional cell culture techniques from the Ciba Geigy Corporation.

ADDRESS: By mail, submit written comments to: Public Docket and Freedom of Information Section, Field Operations Division (H7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

In person bring comments to: Rm. 246, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment(s) concerning this Notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked, will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for the inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. Information on the proposed test and all written comments will be available for public inspection in Room 246 at the Virginia address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Phillip Hutton, Product Manager (PM) 17, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

Office location and telephone number: Room 207, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703-557-2690).

SUPPLEMENTARY INFORMATION: A notification of intent to conduct small-scale field testing pursuant to the EPA's "Statement of Policy; Microbial Products Subject to the Federal Insecticide, Fungicide, and Rodenticide Act and the Toxic Substances Control Act" of June 26, 1986 (51 FR 23313), has been received from the Ciba-Geigy Corporation of Greensboro, North Carolina. The purpose of the proposed testing is to evaluate the efficacy of the transconjugate *Bocillus thuringiensis* strain towards lepidopterous insect pests of cabbage. The field test is to take place in California, Florida, Illinois, Mississippi, New York and Wisconsin for a combined acreage of 0.12 acre.

Following the review of the Ciba-Geigy Corporation application, EPA will decide whether or not an Experimental Use Permit is required.

Dated: April 2, 1989.

Anne E. Lindsay,

Director, Registration Division, Office of Pesticide Programs.

Receipt of a Notification Application To Conduct Field Testing Using a Non-Indigenous Microorganism

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces that EPA has received from Evans Biocontrol a notification application requesting permission to conduct small-scale field testing using a non-indigenous Brazilian isolate of *Beauveria bassiana* for control of Solenopsis invicta, the Red Imported Fire Ant.

ADDRESS:

By mail, submit written comments to: Public Docket and Freedom of Information Section, Field Operations Division (HJ7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 246, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 246 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Phil Hutton, Product Manager (PM) 17, Registration Division (H7505C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 207, CM#2, 1921 Jefferson Davis Highway, Arlington, VA (703) 557-2690.

SUPPLEMENTARY INFORMATION: EPA has received a notification of intent application from Evans Biocontrol requesting to use a Brazilian strain of *Beauveria bassiana* on nests of the Red Imported Fire Ant, Solenopsis invicta, on non-grazing pastureland in Florida to assess the environmental impact. Nest applications sites will be closely monitored to ensure that the bait does not spread from the fire ant nests. A longer term monitoring of the test site will be conducted to determine any persistence of this microorganism in the soil.

Following the review of this notification, EPA will decide whether or not an experimental use permit is required.

Dated: April 11, 1989.

Frank Sanders,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP-36164; FRL-3556-5]

Standard Evaluation Procedures; Availability of Final Guidance Documents

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability.

SUMMARY: This notice announces the availability of seven scientific review procedures outlined in the Standard Evaluation Procedures (SEPs), a standard set of guidance documents on how the Health Effects Division, Office of Pesticide Programs, EPA, evaluates studies and scientific data to ensure consistency of scientific review. These documents, described under **SUPPLEMENTARY INFORMATION,** are now available to the public and may be purchased through the National Technical Information Service (NTIS).

ADDRESS: Address orders to: National Technical Information Service, ATTN: Order Desk, 5285 Port Royal Road, Springfield, VA 22161, (703-487-4650).

FOR FURTHER INFORMATION CONTACT: By mail:

Maxie Jo Nelson, Health Effects Division (H7509C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Office location and telephone number: Rm 810, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-7484)

SUPPLEMENTARY INFORMATION: The SEPs are a standard set of guidance documents on how the Health Effects Division (HED) evaluates studies and scientific data to ensure consistency of scientific reviews. Not only do the SEPs serve as valuable internal reference documents and training aids for new staff, but these documents also inform the public and regulated community of important considerations in the evaluation of test data for determining chemical hazards.

The SEPs ensure a comprehensive, consistent treatment of major scientific topics in EPA's science reviews and provide interpretive policy guidance where appropriate, but are not so detailed that they inhibit creativity and independent thought. Throughout the remainder of this fiscal year, HED will be publishing three additional SEPs in the scientific discipline of chemistry. Thirty-seven SEPs have been published previously and are also available from NTIS, which is responsible for distribution of all SEPs after they have been completed. Prior to publication, each of the SEPs must undergo extensive peer review including Division, Office, Intra-Agency, and public comment; this announcement will serve to provide ordering information for the seven SEPs recently published.

Document title	NTIS order No.	Price (hard copy)	Price (microfiche)
Directions for Use	PB88-243225	13.95	6.95
Magnitude of the Residue: Processed Food/Feed Studies	PB88-243209	13.95	6.95
Product Chemistry	PB88-243191	13.95	6.95
Residues in Meat, Milk, Poultry, and Eggs: Dermal Treatments	PB88-243217	13.95	6.95
Specialty Applications	PB88-244454	13.95	6.95
Qualitative Nature of the Residue: Plant Metabolism	PB89-100333	13.95	6.95
Inhalation Toxicity Testing	PB89-100366	13.95	6.95

The order should specify the title of the SEP document, the NTIS order number, and whether hard copy (price code A03) or microfiche (price code A01) is requested. The NTIS order number is the same for both microfiche and hard copy. Send orders to the NTIS address provided above.

Dated: March 31, 1989.

William D. Barnam,

Acting Director, Health Effects Division, Office of Pesticide Programs.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: New.

Title: Hazard Mitigation Grant Program Application.

Abstract: Public Law 100-707, The Disaster Relief and Emergency Assistance Amendments of 1988 allows for States to apply for funding of hazard mitigation measures following a Federal declaration of a major disaster or emergency. States, local governments, and private non-profit organizations will be the recipients of the funds, and must meet the application requirements of 44 CFR Part 206, Subpart N.

Type of Respondents: State or local governments.

Estimate of Total Annual Reporting and Recordkeeping Burden: 1.

Number of Respondents: 1.

Estimated Average Burden Hours Per Response: 1.

Frequency of Response: Other. The program is only activated after a declaration for Federal disaster assistance.

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646-2624, 500 C Street SW., Washington, DC 20472.

Direct comments regarding the burden estimate or any aspect of this information collection, including suggestions for reducing this burden, to the FEMA Clearance Officer at the above address; and to Pamela Barr, (202) 395-7231, Office of Management and Budget, 3235 NEOB, Washington, DC 20503 within two weeks of this notice.

Date: April 12, 1989.

Gail L. Kercheval,

Acting Director, Office of Administrative Support.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 217–011215–001.

Title: Naviera Pacifico/N.V. CMB S.A. Space Charter Agreement.

Parties:

Naviera Pacifico C.A.
N.V. CMB S.A.

Synopsis: The proposed modification would permit the parties to discuss, negotiate, enter into and implement agreements or arrangements for procuring and utilizing marine terminal, stevedoring and related cargo handling facilities and services in connection with their existing space charter arrangements for excess capacity on their respective vessels.

By order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary.

Dated: April 13, 1989.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Citicorp, New York, NY; Requesting Relief From Conditions Imposed on the Acquisition of Thrift Institutions by Bank Holding Companies

Citicorp, New York, New York ("Citicorp"), has filed a notice requesting relief from the restrictions imposed by the Board by order, pursuant to section 4(c)(8) of the Bank Holding Company Act [12 U.S.C. 1843(c)(8)] ("BHC Act") and § 225.23(a)(3) of the Board's Regulation Y [12 CFR 225.23(a)(3)], on joint marketing operations between, and transactions among, thrift institution subsidiaries of Citicorp and their holding company affiliates. These conditions, commonly referred to as the "tandem operations restrictions," provide that:

(1) the thrift institutions would be operated as separate, independent, profit-oriented corporate entities and would not be operated in tandem with any other subsidiary of the bank holding company. In order to carry out this condition, the bank holding company and thrift institutions would limit their operations so that:

(a) no banking or other subsidiary of the bank holding company would link its deposit-taking activities to accounts at the thrift institutions in a sweeping arrangement or similar arrangement; and,

(b) the thrift institutions would not directly or indirectly solicit deposits or loans for any other subsidiary of the bank holding company and the bank holding company and its subsidiaries would not solicit deposits or loans for the thrift institutions; and

(2) to the extent necessary to insure independent operation of the thrift institution and prevent the improper diversion of funds, the thrift institutions would not engage in any transactions with the bank holding company or its other subsidiaries without prior approval of the appropriate Federal Reserve Bank.

Citicorp contends that these conditions prohibit normal and lawful business behavior, impose unnecessary costs and burdensome inefficiencies, limit services to consumers, and frustrate efforts to restore failed or failing thrift institutions to financial viability. Citicorp also argues that the tandem operations restrictions have worked as a significant deterrent to thrift acquisitions by bank holding companies, at a time when bank holding companies could help to fulfill the thrift industry's critical need for outside financial and managerial resources. In addition, Citicorp points to the provisions of the proposed Financial Institutions Reform, Recovery and Enforcement Act of 1989, which would authorize bank holding companies to acquire thrift institutions without restrictions on transactions between the thrift and its holding company affiliates except as required under sections 23A and 23B of the Federal Reserve Act, or as otherwise required by law.

The Board believes that, in considering action in this area, it is appropriate to seek public comment, in light of the significant public

participation that surrounded the original development of the conditions. Accordingly, the Board seeks public comment on whether the restrictions should be retained, modified or removed.

Comments regarding this notice, which would refer to Docket No. R–0663, must be received at the offices of the Board of Governors no later than May 19, 1989. All comments should be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC 20551, or delivered to the courtyard entrance, Eccles Building, 20th Street NW., between "C" Street and Constitution Avenue NW., Washington, DC, between 8:45 a.m. and 5:15 p.m. weekdays. Citicorp's request for relief is available for inspection at the offices of the Board of Governors.

Board of Governors of the Federal Reserve System, April 12, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 89–9298 Filed 4–18–89; 8:45 am]

BILLING CODE 6210–01–M

Capital City Bank Group, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 5, 1989.

A. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Capital City Bank Group, Inc.*, Tallahassee, Florida; to acquire 100 percent of the voting shares of Branford State Bank, Franford Florida.

B. Federal Reserve Bank of Chicago (David S. Epstein, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Farmers Savings Bank, Trustee of Farmers Savings Bank Employee Stock Ownership Plan & Trust*, West Union, Iowa; to become a bank holding company by acquiring 49.1 percent of the voting shares of Farmers Savings Bank, West Union, Iowa.

2. *Fistar Corporation*, Milwaukee, Wisconsin; to acquire 100 percent of the voting shares of Elkhorn Bankshares Corp., Elkhorn, Wisconsin, and thereby indirectly acquire State Bank of Elkhorn, Elkhorn, Wisconsin.

3. *F.W.S.F. Corporation*, Milwaukee, Wisconsin; to acquire 100 percent of the voting shares of Elkhorn Bankshares Corp., Elkhorn, Wisconsin, and thereby indirectly acquire State Bank of Elkhorn, Elkhorn, Wisconsin.

Board of Governors of the Federal Reserve System, April 13, 1989.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Westpac Banking Corp.; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 2, 1989.

A. Federal Reserve Bank of New York (William L. Rutledge, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Westpac Banking Corporation*, Sydney, Australia; to engage in making, acquiring, or servicing loans or other extensions of credit (including issuing letters of credit and accepting drafts) for the company's account or for the account of others, such as would be made by the following types of companies: (i) Consumer finance; (ii) credit card; (iii) mortgage; (iv) commercial finance; and (v) factoring pursuant to § 225.255(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, April 13, 1989.

BILLING CODE 6210–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Group Home for Recovering Substance Abusers; Guidelines

Pub. L. 100–690, The Anti-Drug Abuse Act of 1988, amended Subpart I of Part B of Title XIX of the Public Health Service Act by adding a new section 1916A establishing a program entitled Group Homes for Recovering Substance Abusers. In accordance with the law, guidelines for the operation of this new program follow:

VOL 54 ISS 74 AP 19 1989 UMI

Guidelines—Group Homes for Recovering Substance Abusers

Introduction

The Group Homes for Recovering Substance Abusers program provides for the nationwide establishment of self-help recovery housing services and a cost-effective method for many recovering individuals to avoid relapse.

Under the new law, recovering individuals will have the opportunity to develop a new alcohol and drug free lifestyle by accepting responsibility for operation of alcohol and drug free recovery housing. By having responsibility for operating a recovery house within a democratically run and self-supported system, individuals gain confidence in exercising responsibility without the use of alcohol and drugs. Note: there are no restrictions in the statute regarding the source of funds for self-support.)

Experience demonstrates that democratically operated, self-supported systems instill responsibility and accomplishment in the residents thereby making long-term abstinence from drug and alcohol use more viable. For these reasons, the new law utilizes the principle of making available small start-up loans rather than grants for supporting the costs of establishing recovery housing services.

It is important to note that the number of new houses started will depend upon the degree to which the new program is promoted and explained at both the State and Federal levels of Government. The concept is new, therefore, considerable education and promotion is necessary to achieve an understanding of its simplicity and how it works.

Purpose

The purpose of these guidelines is to assist States in establishing a revolving fund to provide loans to non-profit private entities for the costs of establishing programs for the provison of housing in which individuals recovering from alcohol or drug abuse may reside. The guidelines are intended to identify potential problems and to ensure that appropriate consideration is given to relevant issues in developing and establishing programs to implement the legislation.

The guidelines are not intended to supplant the functions or responsibilities of the States. They do not constitute Federal regulation but are *advisory* in nature and are intended to reflect a logical, reasonable approach which is consistent with the legislation.

Applicability

The information contained herein applies only to section 1916 A of the Public Health Service Act. All existing Federal, State, and local laws and regulations must continue to be complied with in implementing this new provision of law.

Structure

The guidelines address three basic elements necessary for the States to implement the legislation: (1) Establishing the fund; (2) establishing a loan management process; and (3) establishing quality control and accountability measures.

Authority

The Anti-Drug Abuse Act of 1988 (Pub. L. 100-690, approved November 18, 1988) amended Subpart I of part B of title XIX of the Public Health Service Act (42 U.S.C. 300x) by adding a new section 1916A establishing a program entitled Group Homes for Recovering Substance Abusers.

Generally, this section requires each State, as a contingency of receiving funds under the Alcohol and Drug Abuse and Mental Services (ADMS) Block Grant, to establish a revolving fund of at least $100,000 to provide loans to non-profit private entities for the provision of housing for four or more recovering individuals who want to rent a house or use other housing as self-supported and self-run alcohol and drug free recovery programs.

Specifically, section 1916A states:

(a) For fiscal year 1989, the Secretary may not make payments under section 1914 unless the State involved agrees—

(1) to establish, directly or through the provision of a grant or contract to a non-profit private entity, a revolving fund to make loans for the costs of establishing programs for the provision of housing in which individuals recovering from alcohol or drug abuse may reside in groups of not less than 4 individuals;

(2) to ensure that the programs are carried out in accordance with guidelines issued under subsection (c);

(3) to ensure that not less than $100,000 will be available for the revolving fund;

(4) to ensure that each loan made from the revolving fund does not exceed $4,000 and that each such loan is repaid to the revolving fund not later than 2 years after the date on which the loan is made;

(5) to ensure that each such loan is repaid through monthly installments and that a reasonable penalty is assessed for each failure to pay such periodic installments by the date specified in the loan agreement involved; and

(6) to ensure that such loans are made only to nonprofit private entities agreeing that, in the operation of the program established pursuant to the loan—

(A) the use of alcohol or any illegal drug in the housing provided by the program will be prohibited;

(B) any resident of the housing who violates such prohibition will be expelled from the housing;

(C) the costs of the housing, including fees for rent and utilities, will be paid by the residents of the housing, and

(D) the residents of the housing will, through a majority vote of the residents, otherwise establish policies governing residence in the housing, including the manner in which applications for residence in the housing are approved.

(b) For Fiscal Year 1989 and subsequent fiscal years, the Secretary may not make payments under section 1914 unless the State involved provides assurances satisfactory to the Secretary that the State has provided for the establishment and ongoing operation of a revolving fund in accordance with subsection (a).

(c) Not later than 90 days after the date of the enactment of the Comprehensive Alcohol, Drug Abuse, and Mental Health Amendments Act of 1988, the Secretary, acting through the Administrator, shall issue guidelines for the operation of programs described in subsection (a).

Establishment of the Fund

States must establish, directly or through provision of a grant or contract to a non-profit private entity, a revolving fund to make loans for the costs of establishing programs for the provision of housing in which individuals recovering from alcohol or drug abuse may reside in groups of not less than 4 individuals.

The Federal Government reiterates the basic principle under the ADMS Block Grant program that a State has discretion over the manner in which this new requirement is implemented so long as the State's position is not clearly erroneous.

Creation of the Fund

States are required to establish a revolving fund in the amount of $100,000. There is no legislative requirement concerning the source of monies required to establish the fund. Therefore, monies used to establish the revolving fund may come from any source not otherwise restricted by Federal, State, or local entities. As an example, States may accept contributions from outside sources; may use discretionary funds emanating from the ADMS Block Grant; or may use general State revenues.

The revolving fund is to be self-sustaining. Program-generated funds (e.g. loan paybacks) should be reinvested into the revolving fund as should interest or dividends earned by the account.

There are no legislative restrictions on spending patterns other than setting a limit of $4,000 per loan. Limitations addressing these and other factors are entirely at the State's discretion.

Purpose of the Fund

Funds are to be used to provide small start-up loans to groups of recovering individuals. States should identify and clearly define purposes for which the State will authorize the expenditure of funds. All of those purposes must be in accordance with the legislation.

Examples of legitimate uses of revolving fund loans are: security deposit; first month's rent; furniture such as beds; facility modifications (e.g. conversion of a basement into a game room or extra bedroom); purchase of amenities which foster healthy group living (e.g. dishwasher).

Management of the Fund

States must establish, directly or through the provision of a grant or contract to a non-profit private entity, a revolving fund.

If authorized by a State's law, the State may manage the revolving fund through commercial banks, or directly. States may opt to place management of the fund at any organizational position within their respective hierarchies, e.g., in the offices of the comptroller, housing authority, or health care system.

On the other hand, States may opt to or be required by State Constitution to estabish a fund management group through the provision of a grant or contract to a non-profit private entity. Examples of such entities are: State credit unions; community action groups; foundations; not-for-profit alcohol and drug abuse service providers.

In every case, the fund management group must abide by existing Federal, State, and local regulations governing the operation of financial entities as well as those governing private non-profit organizations. They must have demonstrated capabilities of administering such a program at a level of professionalism and in accordance with standards acceptable to the State including proper notification for late payments.

Establishment of criteria for selecting a fund management group is at the discretion of the State. Consideration should be given to the qualifications, expertise, experience, and capabilities of those organizations.

Recordkeeping and auditing of the fund management operation should be in accordance with established policies and procedures governing similar financial institutions in the State.

Loan Configuration

By law, individual loans for the establishment of programs to provide housing may not exceed $4,000 each. The loans are to be repaid within a 2-year period (See repayment requirements below).

There is no legislative limitation on the number of times a group may apply for a loan to start-up a new recovery house.

States should use their discretion in establishing methods of paying out the funds, e.g., in a lump sum, by monthly draw, or by reimbursement.

Designation of Loan Approval Authority

States may request assistance to approve/deny applications for loans from any entity (individual or group of individuals) meeting State-established criteria. Determinations of terms of office, appointment method, credentials required, etc., are at the discretion of the State. Examples are an advisory board of volunteers or a non-profit organization dedicated to the principle of self-help addiction recovery.

Borrower Eligibility Criteria

Generally, loan applicants may be considered eligible if they are non-profit private entities and agree to operate the housing in a self-run and self-supported manner, including responsibility by residents of the housing for repayment of the loan according to its terms, and assure that its residents are free of alcohol and drug use.

As stipulated in the legislation, prospective borrowers must be non-profit private entities. They must agree: (1) To maintain the house as an alcohol and drug free environment; (2) that residents of the house will remain alcohol and drug free; (3) that any resident of the house who violates the pledge will be expelled from the house; (4) that the costs of the housing, including rent and utilities, will be borne by the residents; and (5) that the house will be operated as a self-managed democracy.

In determining eligibility of prospective borrowers, States (or their designees) may wish to consider such elements as: assurances that the stated intended use of the funds is in accordance with the legislation; reasonable assurances that the group can manage their own alcohol and drug free recovery housing; an assessment of the group's "ability to pay;" and special populations, such as alcohol and drug dependent individuals who are homeless.

There is no legislative requirement that the group acquire sponsorship or affiliate with treatment, rehabilitation, or other groups. However, affiliation of the new group home with such organizations encourages the recovery community to provide quality control.

Application Procedure

Each State (or its designee) should establish a procedure and process for applying for a loan under this program. The loan approval authority may wish to require, as an example, the completion of application forms, or face to face interviews with prospective borrowers. Submission of evidence to support assertions is at the discretion of the State as is the method of verifying eligiblity.

Timelines, milestones, required documentation, and procedures should be clearly defined, written, and made available to all applicants.

Repayment Requirements

The law stipulates that each loan is to be repaid through monthly installments and that each such loan is to be repaid to the revolving fund not later than 2 years after the date on which the loan is made. Further, a reasonable penalty is to be assessed for each failure to pay such periodic installments by the date specified in the loan agreement.

Repayment schedules and prescribed penalties for late or missing payments should be established by the State. In the event a given group appears unable to satisfy the loan obligation, States may consider alerting the quality control group to determine what assistance the group in arrears might need.

Liability and recourse for default is to be determined by the State.

Quality Control

Quality control is simply the assurance that the homes stay alcohol and drug free, pay their bills, and are run democratically.

States may wish to establish a quality control group whose general purpose would be to see that the program is operated in a legal, viable, and effective manner. Membership in this group, its location in an organizational structure, its responsibilities, and its authorities would be established by the State.

By virtue of the requirement that a house be self-governed, the residents could be construed as a quality control group. The State may consider requiring

VOL
54
ISS
74
AP
19
1989
UMI

its fund management group to acquire corroboration that the recovery house is operating in compliance with its obligations.

Reporting

States may be requested to provide information on the establishment/operation of Group Homes under these Guidelines. Data reporting requirements, if any, will be addressed through the Alcohol and Drug Abuse and Mental Health Services (ADMS) Block Grant reporting mechanism.

Evaluation

States are advised that, as part of an overall effort to assess the quality and effectiveness of services programs, section 2039 of the Anti-Drug Abuse Act of 1988 requires the Secretary to evaluate alcohol and drug abuse treatment programs to determine the quality and appropriateness of various forms of treatment, including the effect of living in group housing. Therefore, it is recommended that programs established under this new provision of law have in place a system for measuring progress and effectiveness. The system should include periodic, objective measures by individuals who are not recipients of the loan or who have no direct responsibility with administering the loan.

Contact

These guidelines provide a brief summary of basic principles and issues relating to the administration of a revolving loan program to provide group homes for recovering alcohol and drug abusers. Further information may be obtained from Mr. Gary Palsgrove, Alcohol, Drug Abuse, and Mental Health Administration, 5600 Fishers Lane, Rockville, MD 20857. Mr. Palsgrove may be telephoned at 301–443–3820.

For additional program guidance, potential applicants should contact the appropriate State alcohol, drug abuse, or mental health authority.

The requirement for establishing the Group Homes for Recovering Substance Abusers program is contained in legislation which authorizes the Alcohol and Drug Abuse and Mental Health Services Block Grant program. See Catalog of Federal Domestic Assistance Number 13.992.

Joseph R. Leone,

Associate Administrator for Management, Alcohol, Drug Abuse and Mental Health Administration.

BILLING CODE 4160-20-M

Food and Drug Administration

[Docket No. 89N-0075]

Ormont Drug and Chemical Co., Inc.; Proposal to Withdraw Approval of NADA, Opportunity for Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is providing an opportunity for hearing on the proposal to withdraw approval of the new animal drug application (NADA) held by Parlam Division, Ormont Drug and Chemical Co., Inc. The NADA provides for the use of 25 percent squalene in mineral oil for removal of earwax in dogs and cats. FDA is proposing this action because the firm failed to file the required reports or to provide any information to identify itself and its correct mailing address as required by the agency's regulations.

DATES: A written hearing request by May 19, 1989. Data and analysis supporting the request for hearing by June 19, 1989.

ADDRESS: Written hearing request, data, information, and analysis to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Mohammad I. Sharar, Center for Veterinary Medicine (HFV–216), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4093.

SUPPLEMENTARY INFORMATION: The Center for Veterinary Medicine (CVM) is providing an opportunity for hearing on the proposal to withdraw approval of NADA 12–232 held by Parlam Division, Ormont Drug and Chemical Co., Inc., 520 South Dean St., Englewood, NJ 07631. The NADA provides for use of Sebumsol 25 percent (25 percent squalene in mineral oil) as a cerumenolytic agent for removal of earwax in dogs and cats. The NADA was orignally approved April 21, 1960. It was one of several which were the subject of a notice of opportunity for hearing on the proposed withdrawal of approval of the NADA's (36 FR 8065 at 8070; April 29, 1971) (See No. 178) on the basis of the sponsor's failure to submit the required reports as provided in a notice published in the **Federal Register** of July 9, 1966 (31 FR 9426). The 1971 notice required submission of certain data, including data supporting effectiveness of the products, to facilitate the National Academy of Sciences-National Research Council (NAS/NRC) review.

Parlam submitted data and information in response to the notice of opportunity for hearing of April 29, 1971, and requested evaluation before withdrawal of the product. After evaluation of Parlam's submission, FDA published an amended notice of opportunity for hearing (37 FR 7110; April 8, 1972) which stated that Sebumsol 25 percent is effective as a cerumenolytic agent for removal of earwax for dogs and cats. The sponsor was provided 6 months to submit adequate final printed labeling and documentation to support a regulation, and to submit adequate information as to current manufacturing, components and composition, and methods, facilities, and controls.

On October 17, 1980, the firm filed the required information with FDA. On April 21, 1981, FDA wrote the firm approving the submission as a supplement and requesting final printed labeling and updated manufacturing methods and controls. On July 7, 1981, the firm filed a drug experience report. The firm failed to file any further reports or information and was declared delinquent concerning those reports on June 30, 1983. Subsequently, FDA has been unable to contact the firm and has not received further contact from them. Additional investigation has revealed the firm is no longer at the address given in its application, and neither the firm nor its parent company has been located within the United States. Therefore, FDA has concluded that the firm is no longer manufacturing or marketing new animal drugs in the United States, and apparently, has abandoned the NADA.

Accordingly, CVM is proposing to withdraw approval of NADA 12–232 and all amendments and supplements thereto under section 512(e)(2)(A) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360b(e)(2)(A)). Notice is given to Parlam Division, Ormont Drug and Chemical Co., Inc., and to any other interested persons who may be adversely affected, that CVM proposes to issue an order under section 512(e)(2)(A) of the act withdrawing approval of NADA 12–232 and all amendments and supplements thereto on the grounds that the applicant has failed to file the required reports under 21 CFR 510.300. Furthermore, the firm failed to provide any information as required by 21 CFR 514.1(b)(1) to identify itself and its current mailing address.

In accordance with provisions of section 512 of the act and regulations promulgated under it (21 CFR Part 514) and under authority delegated to the Director, Center for Veterinary Medicine (21 CFR 5.84), CVM hereby provides an opportunity for hearing to show why approval of NADA 12–232 and all amendments and supplements to that application should not be withdrawn under section 512(e) of the act. Any hearing would be subject to the provisions of 21 CFR Part 12.

If Parlam Division, Ormont Drug and Chemical Co., Inc., decides to seek a hearing, the firm shall file on or before May 19, 1989 a written request for hearing and on or before June 19, 1989 the data, information, and analysis relied upon to support the request for hearing, as specified in 21 CFR 514.200.

Procedures and requirements governing the notice of opportunity for hearing, request for hearing, submission of data, information, and analysis to justify a hearing, other comments, and a grant or denial of hearing are contained in 21 CFR 514.200.

The failure of a sponsor to file a timely, written request for hearing as required by 21 CFR 514.200 shall constitute a waiver of the right to a hearing, as shall the failure of the sponsor to submit any data, information, or analysis in support of its hearing request. In either of those circumstances, CVM will summarily enter a final order withdrawing approval of the application.

A request for hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the documentation and analysis in the request for hearing that there is no genuine and substantial issue of fact that precludes the withdrawal of approval, or that the request for hearing is not made in the required format or with the required analysis, the Commissioner of Food and Drugs will enter summary judgment against the person who requests the hearing, making findings and conclusions, and denying a hearing. If a hearing is requested and is justified by the sponsor's response to this notice, the issues will be defined, an administrative law judge will be assigned, and a written notice of the time and place at which the hearing will begin will be issued as soon as practicable.

The agency has determined under 21 CFR 25.24(d)(3) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

All submissions under this notice shall be filed in four copies, and, except as provided in 21 CFR 10.20(j), may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (section 512, 82 Stat. 343–351 (21 U.S.C. 360b)) and under authority delegated to the Director, Center for Veterinary Medicine (21 CFR 5.84).

Dated: April 13, 1989.

Gerald B. Guest,

Director, Center for Veterinary Medicine.

[FR Doc. 89-9272 Filed 4-18-89; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 85F-0260]

National Pork Producers Council; Withdrawal of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the withdrawal, without prejudice to a future filing, of a petition (FAP 5M3867) proposing that the food additive regulations be amended to provide for the safe use of a source of gamma radiation, electron radiation, or x-radiation to control trichinae in pork and pork products.

FOR FURTHER INFORMATION CONTACT: Clyde A. Takeguchi, Center for Food Safety and Applied Nutrition (HFF–330), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5740.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of June 25, 1985 (50 FR 26270), FDA published a notice that it had filed a petition (FAP 5M3867) from the National Pork Producers Council, 1015 15th St. NW., Suite 402, Washington, DC 20005, that propose to amend the food additive regulations to provide for the safe use of sources of gamma radiation, electron radiation, and x-radiation to control trichinae in pork and pork products.

In the **Federal Register** of July 22, 1985 (50 FR 29658), FDA amended the food additive regulations in response to a petition by Radiation Technology, Inc., to permit gamma radiation treatment of pork to control *Trichinella spiralis*. In the **Federal Register** of April 18, 1986 (51 FR 13378), FDA amended the food additive regulations to permit the use of sources of election and x-radiation to treat pork.

The National Pork Producers Council believes that the intent of its additive petition has been met by the agency's actions discussed above, and has withdrawn the petition without prejudice to a future filing (21 CFR 171.7).

Dated: April 6, 1989.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

Public Health Service

Health Resources and Services Administration; National Vaccine Injury Compensation Program; List of Petitions Received

AGENCY: Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Public Health Service (PHS) is publishing this notice of petitions received under the National Vaccine Injury Compensation Program ("The Program"), as required by section 2112(b)(2) of the PHS Act, as amended. While the Secretary of Health and Human Services is named as the respondent in all proceedings brought by the filing of petitions for compensation under the Program, the United States Claims Court is charged by statute with responsibility for considering and acting upon the petitions.

FOR FURTHER INFORMATION CONTACT: For information about requirements for filing petitions, and the Program generally, contact the Clerk, United States Claims Court, 717 Madison Place NW., Washington, DC 20005, (202) 633–7257. For information on the Public Health Service's role in the Program, contact the Director, Vaccine Injury Compensation Program, Parklawn Building, 5600 Fishers Lane, Room 4–101, Rockville, MD 20857, (301) 443–6593.

SUPPLEMENTARY INFORMATION: The Program provides a system of no-fault compensation for certain individuals who have been injured by specified childhood vaccines. Subtitle 2 of Title XXI of the PHS Act, 42 U.S.C. 300aa–10 *et seq.*, provides that those seeking compensation are to file a petition with the U.S. Claims Court and to serve a copy of the petition on the Secretary of Health and Human Services, who is named as the respondent in each proceeding. The Secretary has delegated his responsibility under the Program to PHS. The Claims Court is directed by statute to appoint special masters to take evidence, conduct hearings as appropriate, and to submit to the Court proposed findings of fact and conclusions of law.

VOL 54 ISS 74 AP 19 1989 UMI

A petition may be filed with respect to injuries, disabilities, illnesses, conditions, and deaths resulting from vaccines described in the Vaccine Injury Table set forth at section 2114 of the PHS Act. This Table lists for each covered childhood vaccine the conditions which will lead to compensation and, for each condition, the time period for occurrence of the first symptoms or manifestation of onset or of significant aggravation after vaccine administration. Compensation may also be awarded for conditions not listed in the Table and for conditions that are manifested after the time periods specified in the Table, but only if the petitioner shows that the condition was caused by one of the listed vaccines.

Section 2112(b)(2) of the PHS Act, 42 U.S.C. 300aa–12(b)(2), requires that the Secretary publish in the **Federal Register** a notice of each petition filed. Set forth below is a list of petitions received by PHS from March 8 through April 5, 1989. Section 2112(b)(2) also provides that the special matter "shall afford all interested persons an opportunity to submit relevant, written information" relating to the following:

1. The existence of evidence "that there is not a preponderance of the evidence that the illness, disability, injury, conditions or death described in the petition is due to factors unrelated to the administration of the vaccine described in the petition," and

2. Any allegation in a petition that the petitioner either:

(a) "Sustained, or had significantly aggravated, any illness, disability, injury, or condition not set forth in the Vaccine Injury Table (see section 2114 of the PHS Act) but which was caused by" one of the vaccines referred to in the table, or

(b) "Sustained, or had significantly aggravated, any illness, disability, injury, or condition set forth in the Vaccine Injury Table the first symptom or manifestation of the onset or significant aggravation of which did not occur within the time period set forth in the Table but which was caused by a vaccine" referred to in the Table.

This notice will also serve as the special master's invitation to all interested persons to submit written information relevant to the issues described above in the case of the petitions listed below. Any person choosing to do so should file an original and three (3) copies of the information with the Clerk of the U.S. Claims Court at the address listed above (under the heading "For Further Information Contact"), with a copy to PHS addressed to Director, Bureau of Health Professions, 5600 Fishers Lane, Suite 8–05, Rockville, MD 20857. The Court's caption (Petitioner's Name v. Secretary of Health and Human Services) and the docket number assigned to the petition should be used as the caption for the written submission.

Chapter 35 of Title 44, United States Code, related to paperwork reduction, does not apply to information required for purposes of carrying out the Program.

List of Petitions Received

1. Barbara Holton and Ralph Holton on Behalf of Kasey Holton, Las Vegas, Nevada, Claims Court Docket No. 89–22V.

2. Michelle L. Jose and Daniel C. Jose on Behalf of Danielle Sue Jose, Loomis, California, Claims Court Docket No. 89–23V.

3. Diane Bunger and David Bunger on Behalf of Tara Bunger, San Jose, California, Claims Court Docket No. 89–24V.

4. Gloria Banuelos on Behalf of Anna Gloria Banuelos, Sacramento, California, Claims Court Docket No. 89–25V.

5. Diana Satterfield and Mark Satterfield on Behalf of Ryan Satterfield, Elf Grove, California, Claims Court Docket No. 89–26V.

6. Michael Latorre on Behalf of Marcus Raymond Latorre, Orange County, California, Claims Court Docket No. 89–27V.

7. Barbara Sexton and Ronald C. Sexton on Behalf of Andrew Sexton, Orangevale, California, Claims Court Docket No. 89–28V.

8. Maria Merrill on Behalf of Daniel Merrill, Sacramento, California, Claims Court Docket No. 89–29V.

9. Anna Jorge and Eduardo Jorge on Behalf of Nicole Cristine Jorge, Watsonville, California, Claims Court Docket No. 89–30V.

10. Joyce Alger and Edmund Alger on Behalf of Daniel Alger, Palm Bay, Florida, Claims Court Docket No. 89–31V.

11. Josephine Wright and Jerryl Wright on Behalf of Justin D. Wright, Indianapolis, Indiana, Claims Court Docket No. 89–32V.

12. Cindy A. Lemon on Behalf of Gretchen Lemon, Slidell, Louisiana, Claims Court Docket No. 89–33V.

Dated: April 13, 1989.

John H. Kelso,

Acting Administrator.

[FR Doc. 89-9268 Filed 4-18-89; 8:45 am]

BILLING CODE 4160-15-M

Statement of Organization, Functions, and Delegations of Authority; Food and Drug Administration

Part H, Chapter HF (Food and Drug Administration) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (35 FR 3685, February 25, 1970, as amended most recently in pertinent part at 51 FR 8032, March 7, 1986 and 54 FR 6338–9, February 9, 1989) is amended to reflect the transfer of a function in the Food and Drug Administration.

FDA proposes to transfer the Agency statistical support function to the Office of Planning and Evaluation from the Office of Health Affairs in the Center for Devices and Radiological Health.

Section HF–B Organization and Functions is amended as follows:

1. Delete subparagraph (b–2) Evaluation and Analysis Staff (HFAA4) in its entirety and insert a new subparagraph (b–2) Evaluation and Analysis Staff (HFAA4) reading as follows:

(b–2) *Evaluation and Analysis Staff (HFAA4).* Performs agency program and policy evaluations and analytical studies. Recommends alternative courses of action to increase effectiveness of Agency allocation of resources and to improve program and project performance.

Performs analyses of significantly broad Agency issues identified in the planning process. Recommends and/or implements steps to resolve these issues.

Assures that appropriate program evaluation activities are taken in Agency components. Monitors and coordinates these efforts to assure uniqueness and a contribution to Agency program goals.

Develops the annual evaluation plan for the Agency and coordinates with PHS/HHS.

Conducts special evaluation, analytical, and economic-related studies in support of Agency policy development and in resolution of broad Agency problems.

Evaluates impact of external factors on Agency programs, including consumer expectations and prospective legislation.

Evaluates the impact of Agency operations and policies on regulated industries and other Agency components.

Evaluates Program Management Systems (PMS) projects to provide a basis for Agency decisionmaking. Recommends PMS project selections for evaluation, conducts the evaluations, and provides written and/or oral reports to the Commissioner and/or program managers.

Approves survey methodology, design, and questionnaires within the Agency prior to Office of Management and Budget forms clearance under the Paperwork Reduction Act; reviews Memoranda of Need which require the collection of health research data and advises Agency components on the planning and design of health research studies.

Advises international health organizations (e.g., World Health Organization) on the use of program evaluation to strengthen program operations in member countries.

2. Delete paragraph (o–1–iii) Office of Health Affairs (HFW13) in its entirety, and insert a new paragraph (o–1–iii) Office of Health Affairs (HFW13) reading as follows:

(o–1–iii) *Office of Health Affairs (HFW13).* Advises the Center Director on medical and dental issues that affect Center policies, direction, and program goals.

Provides medical and dental consultation, advice, and guidance on policies, activities, and programs.

Provides senior medical review, support and assistance to Center regulatory activities and programs.

Develops, coordinates, and provides professional medical guidance on Center policies, position statements, and program activities that involve or significantly impact on radiological and medical device safety.

Provides medical and dental consultation and expertise to the Center and interagency groups and committees addressing radiological and medical device health concerns; acts as the Executive Secretariat for the Medical Radiation Advisory Committee.

Advises and assists in identification and selection of individuals to serve on the Center's Advisory and Classification Committees.

Plans, conducts, coordinates, and serves as Center medical representative on liaison activities with health professionals and their organizations to secure their input and assistance in the formulation and implementation of Center programs.

Participates in the planning and coordination of educational and informational programs for health professional organizations.

Date: April 11, 1989.

Wilford J. Forbush,

Director, Office of Management, PHS.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

[Docket No. N-89-1917; FR-2606]

Underutilized and Unutilized Federal Buildings and Real Property Determined To Be Suitable for Use for Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized and underutilized Federal property determined by HUD to be suitable for possible use for facilities to assist the homeless.

DATE: April 19, 1989.

ADDRESS: For further information, contact Morris Bourne, Director, Transitional Housing Development Staff, Room 9140, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone (202) 755–9075; TDD number for the hearing- and speech-impaired (202) 426–0015. (These telephone numbers are not toll-free.)

SUPPLEMENTARY INFORMATION: In accordance with the December 12, 1988 court order in *National Coalition for the Homeless v. Veterans Administration*, D.C.D.C. No. 88–2503–OG, HUD is publishing this Notice to identify Federal buildings and real property that HUD has determined are suitable for use for facilities to assist the homeless. The properties were identified from information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property.

The court order requires HUD to take certain steps to implement section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), which sets out a process by which unutilized or underutilized Federal properties may be made available to the homeless. Under section 501(a), HUD is to collect information from Federal landholding agencies about such properties and then to determine, under criteria developed in consultation with the Department of Health and Human Services (HHS) and the Administration of General Services (GSA), which of those properties are suitable for facilities to assist the homeless. The court order requires HUD to publish, on a weekly basis, a Notice in the **Federal Register** identifying property determined suitable.

The properties identified in this Notice may ultimately be available for use by public bodies and private nonprofit organizations to assist the homeless For detailed information on the procedure under section 510(a) that must be followed to apply for use of today's properties, the reader should consult HUD's Notice published February 7, 1988 at 54 FR 6034.

Although not required to do so by either section 501 or the court order, HUD is identifying property, from the information furnished by landholding agencies or GSA, determined unsuitable for use for facilities to assist the homeless, along with the reason for the finding. The court order prohibits the sale, transfer, or other disposition of property found unsuitable for a period of two weeks following the determination.

The contact for GSA properties listed in today's Notice is James Folliard, Federal Property Resources Services, GSA, 18th and F Streets NW, Washington, DC 20405 (202) 535–7067. Please refer to the GSA identification number of the property. The contact for Department of Transportation properties listed in today's Notice is Angelo Picillo, Administrative Services and Property Management, Department of Transportation, 400 Seventh Street SW., Washington, DC 20590 (202) 366–4246. (These are not toll-free telephone numbers.)

Dated: April 13, 1989.

James E. Schoenberger,

General Deputy Assistant Secretary for Housing—Federal Housing Commissioner.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[NM-940-09-4214-10; NM NM 55234]

Proposed Modification and Partial Termination of Public Land Order No. 6403 and Public Hearings; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The U.S. Department of Energy (DOE) has filed an application to modify a public land order which withdrew 10,240 acres of public land for research and development in connection with the Waste Isolation Pilot Plant (WIPP) Project. The land is still needed for research and development on the WIPP Project. This order also terminates the public land order as to paragraph 5. The land will remain closed to operation of the public laws including the mining laws. The land will remain open to mineral leasing.

FOR FURTHER INFORMATION CONTACT: Clarence F. Hougland, BLM, New Mexico State Office, P.O. Box 1449, Santa Fe, New Mexico 87504-1449, 505-988-6071.

SUPPLEMENTARY INFORMATION: On April 7, 1989, the DOE filed an application for modification of Public Land Order No. 6403, which withdrew the following described land from settlement, sale, location or entry under the general laws, including the mining laws, subject to valid existing rights:

New Mexico Principal Meridian

T. 22 S., R. 31 E.,
Sec. 15;
Sec. 16;
Sec. 17;
Sec. 18, lots 1, 2, 3, 4, inclusive, E½, and E½W½;
Sec. 19, lots 1, 2, 3, 4, inclusive, E½, and E½W½;
Sec. 20;
Sec. 21;
Sec. 22;
Sec. 27;
Sec. 28;
Sec. 29;
Sec. 30, lots, 1, 2, 3, 4, inclusive, E½, and E½W½;
Sec. 31, lots 1, 2, 3, 4, inclusive, E½, and E½W½;
Sec. 32;
Sec. 33;
Sec. 34.

The area described contains approximately 10,240 acres of public land in Eddy County, New Mexico.

The following land, within the above legal land description, will be reserved for the exclusive use of DOE for the WIPP Project:

A tract of land in Eddy County, New Mexico, being part of Sections 20, 21, 28, and 29, Township 22 South, Range 31 East, N.M.P.M., and being more particularly described as follows, to wit: Beginning at a point on the North line of said Section 20 which is S 89 degrees 57 minutes E a distance of 1,378.68 feet from the Northwest corner of said Section 20; Thence S 89 degrees 57 minutes E a distance of 3,900.00 feet to the corner common to Sections 16, 17, 20, and 21; Thence N 89 degrees 51 minutes E a distance of 3,160.68 feet to a point from which the corner common to Sections 15, 16, 21, and 22 bears N 89 degrees 51 minutes E a distance 2,120.00 feet; Thence S 00 degrees 01 minutes 16 seconds E a distance of 5,279.97 feet to a point on the line between Sections 21 and 28 from which the corner common to Sections 21, 22, 27, and 28 bears N 89 degrees 56 minutes E a distance of 2,118.71 feet and the corner common to Sections 20, 21, 28, and 29 bears S. 89 degrees 56 minutes W a distance of 3,160.63 feet; Thence continuing S 00 degrees 01 minutes 16 seconds E a distance of 3,697.74 feet to a point from which the corner common to Sections 27, 28, 33, and 34 bears South 1,580.0 feet and East 2,120.0 feet; Thence N 89 degrees 59 minutes 27 seconds W a distance of 3,159.63 feet to a point on the line between Sections 28 and 29 from which the corner common to Sections 20, 21, 28, and 29 bears N 00 degrees 02 minutes 35 seconds W a distance of 3,693.55 feet and the corner common to Sections 28, 29, 32, and 33 bears S 00 degrees 02 minutes 35 seconds E a distance of 1,580.51 feet; Thence continuing N 89 degrees 59 minutes 27 seconds W a distance of 3,697.93 feet to a point from which the corner common to Sections 29, 30, 31, and 32 bears S 00 degrees 01 minutes W 1,580.0 feet and N 89 degrees 59 minutes W 1,379.34 feet; Thence N 00 degrees 02 minutes 35 seconds W a distance of 3,696.32 feet to a point on the line between Sections 20 and 29 from which the corner common to Sections 20, 21, 28, and 29 bears S 89 degrees 57 minutes E a distance of 3,898.21 feet and the corner common to Sections 19, 20, 29, and 30 bears N 89 degrees 57 minutes W a distance of 1,381.13 feet; Thence continuing N 00 degrees 02 minutes 27 seconds W a distance of 5,275.39 feet to the point of beginning.

The area described contains 1,453.9 acres, more or less, in Eddy County, New Mexico.

The DOE requests this modification to change the purpose of the land withdrawal stated in paragraph 1 of Public Land Order No. 6403 to provide that the land is withdrawn for the purpose of the construction of full facilities for the WIPP Project of the DOE; the conducting of a test program by the DOE using retrievable radioactive waste at the site; and to protect the land pending a legislative withdrawal; to delete paragraph 5 of Public Land Order No. 6403, which prohibits the use of the withdrawn land for the transportation, storage, or burial of radioactive material; to increase the DOE exclusive control area from 640 acres to 1,453.9 acres to conform that area to security requirements; and to extend the term of the withdrawal through June 29, 1997, to provide sufficient time to conduct an operations and experimental program, and for retrieval of the waste, if necessary.

The DOE is preparing a Supplemental Environmental Impact Statement (SEIS) for this next phase of the WIPP project. The Draft SEIS is scheduled to be released for public review on April 21, 1989. Because DOE submitted an application to BLM for a land withdrawal, BLM is participating as a cooperating agency in the SEIS.

Notice is hereby given that public hearings will be held by DOE during the public comment period on the draft SEIS in the following cities: Boise, ID; Albuquerque, NM; Santa Fe, NM; Atlanta, GA; Denver, CO; and Pendleton, OR. As soon as the specific locations, dates and times are determined, information on these public hearings will be announced by DOE. Public comments on the SEIS as well as those obtained from the public hearings will be used by BLM in processing the application for a land withdrawal.

The application will be processed in accordance with the regulations set forth in 43 CFR Part 2300.

Because this represents a modification of an earlier public land order which withdrew the subject land, no temporary land use during segregation will occur.

Larry L. Woodard,

State Director.

April 13, 1989.

[NV-010-09-4132-08]

Intent To Prepare an Environmental Document on a Mining Plan of Operation; Scoping Period and Meeting; Barrick Goldstrike Mines, Inc.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare an environmental document on a mining plan of operation and notice of scoping period and meeting for Barrick Goldstrike Mines, Inc.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 and 43 CFR Part 3809, the Bureau of Land Management will be directing the preparation of an environmental document to be prepared by a third party contractor on the impacts of a proposed amendment to an existing Plan of Operation for gold mining by Barrick Goldstrike Mine Inc. in Elko and Eureaka counties, Nevada. The Bureau invites written comments and suggestions on the scope of its analysis.

DATES: Written comments on the proposed Plan of Operations amendment will be accepted until May 19, 1989. A public scoping open house will be held May 2, 1989 from 7 p.m. to 9 p.m. at the Bureau of Land Management, Elko District Office, 3900 E. Idaho, Elko, NV 89801 to identify interested parties, issues, concerns, and to encourage public participation. Representatives of Barrick Goldstrike Mines Inc. will be available to answer questions about the Plan of Operations amendment. Additional meetings may be held, as appropriate.

ADDRESS: Comments may be sent to the District Manager, Bureau of Land Management, P.O. Box 831, Elko, NV 89801. ATTN: Goldstrike Coordinator.

FOR FURTHER INFORMATION CONTACT: For additional information, write to the above address or call Nick Rieger at (702) 738-4071.

SUPPLEMENTARY INFORMATION: Barrick Goldstrike Mines Inc. of Elko, Nevada has submitted an amendment to its existing Plan of Operations for the Goldstrike Mine located in Township 36 North, Range 49 East and Township 36 North, Range 50 East; approximately 25 miles northeast of the town of Carlin, Nevada. The presently authorized operation includes open-pit mines, heap leach facilities, a crushing and agglomeration plant, administrative and maintenance buildings, and a 6,000 ton per day oxide mill and tailings impoundment involving a total of 2,372 acres, including 1779 acres of public land. The proposed action is to expand the Goldstrike Mine open pit mining and milling operations from approximating 6,000 tons per day to approximately 12,700 tons per day. While much of the proposed expansion is expected to be confined to previously disturbed areas, additional disturbance is anticipated on approximated 33 acres of private land and 1,770 acres of public land.

The issues expected to be analyzed in the document are impacts to cultural resources, wildlife and fisheries, water quantity and quanlity, soils and vegetation, and social and economic values. Disciplines represented on the interdisciplinary team that will review the Plan amendment and environmental documentation are: Wildlife, recreation, geology, cultural resources, soil, water and air quality, range management, lands and realty and land use planning.

A range of alternatives, stipulations and mitigation measures, including but not limited to alternative reclamation measures, monitoring requirements and the no action alternative, will be considered to evaluate and minimize enviromental impacts and to assure that this proposed action does not result in undue or unnecessary degradation of public lands.

Federal, state and local agencies and other individuals or organizations who may be interested in or affected by the Bureau's decision on the amended Plan of Operations are invited to participate in the scoping process with respect to this environmental analysis.

VOL 54 ISS 74 AP 19 1989 UMI

Date: April 6, 1989.

The area described contains 344,641.44 acres in Tooele County, Utah.

EFFECTIVE DATE: At 9 a.m. on April 20, 1989, the lands described above will be relieved of their segregative effect in accordance with the regulations under 43 2310.2-1(c), and opened to such forms of disposition as may be made by law including location and entry under the United States mining laws.

FOR FURTHER INFORMATION CONTACT: Mike Barnes, BLM Utah State Office, 324 South State Street, Suite 301, Salt Lake City, Utah 84111, (801) 539-4119.

Ted D. Stephenson,
Chief, Branch of Lands and Minerals Operations.

Proposed Withdrawal and Opportunity for Public Meeting; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management proposes to withdraw approximately 94,023 acres of public lands and/or minerals to protect the resource values within the Upper Missouri Wild and Scenic River management area as well as the Lewis and Clark and the Nez Perce National Historic Trail areas. The notice closes the land for up to 2 years from surface entry and mining. The lands have been and remain open to mineral leasing.

DATE: Comments and requests for a public meeting must be received by July 18, 1989.

ADDRESS: Comments and meeting requests should be sent to the Montana State Director, BLM, P.O. Box 36800, Billings, Montana 59107.

FOR FURTHER INFORMATION CONTACT: James Binando, BLM Montana State Office, 406-255-2935.

SUPPLEMENTARY INFORMATION: On April 12, 1989 a petition was approved allowing the Bureau of Land Management to file an application to withdraw all public lands and/or minerals within the following described areas from settlement, sale, location, or entry under the general land laws, including the mining laws, subject to valid existing rights:

The public lands and/or minerals within the areas described aggregate approximately 94,023 acres in Chouteau, Fergus, Blaine, and Phillips Counties.

The purpose of the proposed withdrawal is to protect the public values within the Designated Upper Missouri Wild and Scenic River Management area. Portions of the Lewis and Clark and the Nez Perce National Historic Trails are also included in the management area.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

Notice is hereby given that a public meeting will be held in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the undersigned officer within 90 days from the date of publication of this notice. A notice of the time and place of the public meeting will be published in the **Federal Register** at

VOL 54 ISS 74 AP 19 1989 UMI

lease 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR 2300.

For a period of 2 years from the date of publication of this notice in the **Federal Register**, the land will be segregated as specified above unless the application is denied or canceled or the withdrawal is approval prior to that date. The temporary uses which may be permitted during this segregative period are licenses, permits, cooperative agreements, or discretionary land use authorizations of a temporary nature, allowed only with the approval of an authorized officer of the Bureau of Land Management.

James Binando,

Acting Deputy State Director, Division of Lands and Renewable Resources.

April 12, 1989.

[AA-620-09-4111-01-2410]

Washington; Withdrawing All Lands in the Lake Chelan and Ross Lake National Recreation Areas

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Section 402(b) of the Act of October 2, 1968 (82 Stat. 928; 16 U.S.C. 90c-1b) allowed the leasing of minerals in the Lake Chelan and Ross Lake National Recreation Areas. However, section 206 of the Act of November 16, 1988 (Pub. L. 100-668) amended the Act of October 2, 1968, by withdrawing the lands from disposition by leasing. The purpose of this Notice is to inform the public that this change will be reflected in the next proposed revision to 43 CFR 3100 and 3500.

EFFECTIVE DATE: November 16, 1988.

ADDRESS: Inquiries should be sent to: Director (620), Bureau of Land Management, Room 602, Premier Building, 18th and C Streets NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Richard Hopkins, (202) 653-2195.

SUPPLEMENTARY INFORMATION: The Bureau's oil and gas leasing regulations appearing at 43 CFR Subpart 3100 and solid mineral leasing regulations at 43 CFR Subpart 3582 indicate that, while leasing is allowed by law in Ross Lake and Lake Chelan National Recreation Areas (§§ 3109.2(C)(3) and 3582.2-1(c)), all of Lake Chelan and a large portion of Ross Lake National Recreation Areas had been administratively closed to mineral leasing (§§ 3109.2(d)(3) and 3582.2-2(c)). A small portion of Ross Lake remained open to mineral leasing.

However, as of November 16, 1988, all lands once leasable by law in Lake Chelan and Ross National Recreation Areas were withdrawn from mineral leasing by section 206 of the Act of November 16, 1988 (Pub. L. 100-668). Accordingly, the above regulations and the regulations at §§ 3100.0-3(g)(4), 3500.0-3(c)(3), and 3560.3-2, will be revised at a future date.

Date: April 10, 1989.

Robert F. Burford,

Director, Bureau of Land Management.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 89-2]

Richard Artis Beach, M.D. Gulf Breeze, FL; Hearing

Notice is hereby given that on December 19, 1988, the Drug Enforcement Administration, Department of Justice, issued to Richard Artis Beach, M.D. an Order to Show Cause as to why the Drug Enforcement Administration should not revoke your DEA Certificate of Registration, AB6511427, and deny any pending applications for registration.

Thirty days have elapsed since the said Order to Show Cause was received by Respondent, and written request for a hearing having been filed with the Drug Enforcement Administration, notice is hereby given that a hearing in this matter will be held on Wednesday, June 21, 1989, commencing at 9:30 a.m., in the Judicial Building, 190 Governmental Center, Government Street, Courtroom 404, Pensacola, Florida.

Dated: April 12, 1989.

John C. Lawn,

Administrator, Drug Enforcement Administration.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (89-27)]

Intent to Grant an Exclusive Patent License; Macrodyne Inc.

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of intent to grant a patent license.

SUMMARY: NASA hereby gives notice of intent to grant Macrodyne Inc., of Schnectady, New York, a limited exclusive, royalty-bearing, revocable license to practice the invention as described in U.S. Patent No. 4,786, 168 for "Frequency Domain Laser Velocimeter Signal Processor," which issued November 22, 1988, to the Administrator of the National Aeronautics and Space Administration on behalf of the United States of America. The proposed exclusive license will be for a limited number of years and will contain appropriate terms, limitations and conditions to be negotiated in accordance with NASA Patent Licensing Regulations, 14 CFR Part 1245, Subpart 2. NASA will negotiate the final terms and conditions and grant the exclusive license, unless within 60 days of the Date of this Notice, the Director of Patent Licensing will review the written objections to the grant, together with supporting documentations. The Director of Patent Licensing will review all written responses to the Notice and then recommend to the Associate General Counsel (Intellectual Property) whether to grant exclusive license.

DATE: Comments to this notice must be received on or before June 19, 1989.

ADDRESS: National Aeronautics and Space Administration, Code GP, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Harry Lupuloff, (202) 453-2430.

Date: April 12, 1989.

Edward A. Frankle,

General Counsel.

BILLING CODE 4510-01-M

NUCLEAR REGULATORY COMMISSION

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from March 25, 1989 through April 7, 1989. The last biweekly notice was published on April 5, 1989 (54 FR 13756).

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration and Resources Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice. Written comments may also be delivered to Room P-216, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By May 19, 1989 the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Project Director*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Arkansas Power & Light Company, Docket No. 50-368, Arkansas Nuclear One, Unit 2 (ANO-2), Pope County, Arkansas

Date of amendment request: December 12, 1988

Description of amendment request: This amendment would change the ANO-2 Technical Specifications (TS) which describe the design features of the Spent Fuel Storage Pool. These changes will update the TS to conform with Amendment 43 (April 15, 1983) which increased the spent fuel storage capacity for ANO-2. This amendment also would make a number of editorial, clarifying and administrative corrections to the Technical Specifications. Remaining issues in the amendment request have been addressed in previous notices.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (51 FR 7751). One of the examples (i) of actions not likely to involve a significant hazards relates to a purely administrative change to technical specifications; for example, a change to achieve consistency throughout technical specifications, correction of an error, or a change in nomenclature.

This amendment would correct an administrative error in omission of spent fuel pool design feature information in the ANO-2 Technical Specifications. The new information should have been included in the February 17, 1983 request for TS change to reflect expansion of the spent fuel pool capacity for the plant. That requested change was approved in Amendment 43 which expanded storage from 485 spaces to 988 spaces. In addition the requested set of editorial changes are administrative in nature. The current changes would correct these administrative oversights, and therefore appear to be similar to example (i).

Since the application for amendment involves proposed changes that are similar to an example of an action that is considered not to involve significant hazards considerations, the Commission has made a proposed determination that

VOL 54 ISS 74 AP 19 1989 UMI

the application for amendment involves no significant hazards considerations.

Local Public Document Room location: Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801

Attorney for licensee: Nicholas S. Reynolds, Esq., Bishop, Cook, Purcell & Reynolds, 1400 L Street, NW., Washington, DC 20005-3502

NRC Project Director: Jose A. Calvo

Carolina Power & Light Company et al., Docket No. 50-325 and 50-324, Brunswick Steam Electric Plant, Units No. 1 and 2, Brunswick County, North Carolina

Date of application for amendment: September 4, 1987, as supplemented April 5, 1988, superseded February 20, 1989, and supplemented March 20, 1989.

Description of amendment request: Based on the guidance provided in NRC Generic Letter 88-16, the proposed change removes the values of cycle-specific parameter limits from the Brunswick Steam Electric Plant (BSEP) Technical Specifications (TS) and includes them in the Core Operating Limits Report (COLR). However, the COLR will be referenced in the TS, and will be periodically submitted to the Commission.

In addition, and based on the guidance in the NRC Safety Evaluation Report (SER) for Amendment 19 to General Electric Licensing Topical Report NEDE-24011-P-A, the proposed change eliminates BSEP Technical Specification 3/4.2.4, Linear Heat Generation Rate (LHGR), and the associated Total Peaking Factor (TPF). The use of TPF in the formulation of the Average Power Range Monitor (APRM) flow-biased scram and rod block setpoint setdown requirements of Specification 3/4.2.2 is being revised, along with associated definitions that are added, deleted, or revised. The associated revision of Technical Specification 3/4.2.1 specifies that only the most limiting lattice Average Planar Linear Heat Generation Rate [APLHGR) limit for multiple lattice fuel types will be specified.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a no significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Carolina Power & Light Company (CP&L) has reviewed the proposed changes to TS and has determined that the requested amendment does not involve a significant hazards consideration as follows:

Removal of Cycle-Specific Parameter Limits:

1. The proposed amendment does not involve a significant increase in probability or consequences of an accident previously evaluated. The abnormal operational transients analyzed in the BSEP Updated Final Safety Analysis Report will remain bounded. There will be no change in the operation of the facility as a result of the amendment. No safety-related equipment or function will be altered. The proposed amendment merely removes cycle-specific parameter limits from the Technical Specifications and references their inclusion in the CORE OPERATING LIMITS REPORT. NRC approved analytical methodology will continue to be used as the basis for the results that will now be reported in the CORE OPERATING LIMITS REPORT.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated. As stated above, no safety-related equipment, safety function, or plant operations will be altered as a result of this amendment. The requested change does not create any new accident mode. The proposed amendment is in accordance with the guidance provided in Generic Letter 88-16 for licensees requesting removal of the values of cycle-specific parameters from Technical Specifications. The establishment of these limits in accordance with an NRC-approved methodology and the incorporation of these limits into the CORE OPERATING LIMITS REPORT will ensure that proper steps have been taken to establish the values of these limits. Furthermore, the submittal of the CORE OPERATING LIMITS REPORT to the Commission will allow the Staff to continue to trend the values of these limits without the need for prior Staff approval of these limits and without introduction of an unreviewed safety question.

3. The proposed amendment does not alter the requirement that the plant be operated within the limits for cycle-specific parameters nor the required remedial actions that must be taken if these limits are not met. While it is recognized that such limits are essential to plant safety, the values of such limits can be determined in accordance with NRC-approved methods without affecting nuclear safety. The removal of the values of these limits from the BSEP Technical Specifications is coincident with their incorporation into the CORE OPERATING LIMITS REPORT that is submitted to the Commission. Hence, appropriate measures exist to control the values of these limits. Therefore, the proposed changes are administrative in nature and do not impact the operation of the facility in a manner that involves a reduction in the margin of safety. Indeed, as stated in Generic Letter 88-16, the proposed amendment is responsive to industry and NRC efforts on improvements in Technical Specifications, and will result in a resource savings for the licensee and the NRC by eliminating the majority of license amendment requests for changes in values of cycle-specific parameters in Technical Specifications. Indirectly, this is a safety improvement because the released resources may now be utilized on more consequential tasks.

Deletion of LHGR:

1. The proposed amendment does not involve a significant increase in the consequences of any accident previously evaluated. The NRC Safety Evaluation Report for Amendment 19 to GESTAR-II concluded that a change similar to the proposed change "...will, in practice, result in the same operating power distribution limits and safety margins as the current Technical Specifications." The essential redundancy of the Linear Heat Generation Rate and the Average Planar Linear Heat Generation Rate, and the equivalence of the formulation of the APRM flow-biased setpoint setdown requirement, has been established and is documented in the NRC Safety Evaluation Report for Amendment 19 of GESTAR-II. Since the same operating power distribution limits as current Technical Specifications will, in practice, be required, the proposed change does not involve a significant increase in the consequences of any accident previously evaluated.

The proposed change eliminates a thermal performance limit, modifies several definitions and provides an equivalent basis for adjusting APRM flow-biased setpoint setdown based on power distribution parameters. As such the change only affects power distribution parameters which do not influence the probability of any accident. Therefore, the proposed change does not result in a significant increase in the probability of any accident previously evaluated.

2. The proposed change does not alter the function of any component or system and, therefore, does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The margin of safety, as established by current Technical Specification power distribution limits, are [SIC] based on the assumptions and analyses documented in the BSEP Updated Final Safety Analysis Report. The proposed amendment will, in practice, result in the same power distribution limits as contained in current Technical Specifications; therefore, the proposed change does not involve a significant reduction in the margin of safety.

The staff has reviewed the CP&L determinations and is in basic agreement with them. Cycle-specific parameter limits will be referenced in the TS, but will be located in a licensee controlled document instead of located in the TS. The linear heat generation rate limit is essentially redundant to the average planar linear heat generation rate limit and the latter limit will be retained.

Local Public Document Room location: University of North Carolina at Wilmington, William Madison Randall Library, 601 S. College Road, Wilmington, North Carolina 28403-3297.

Attorney for licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602.

NRC Project Director: Elinor G. Adensam

Carolina Power & Light Company, Docket No. 50-400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of amendment request: February 22, 1989

Description of amendment request: The proposed amendment would change Technical Specification (TS) 3/4.1.1.3, "Moderator Temperature Coefficient," to allow a more negative moderator temperature coefficient (MTC) in the Limiting Condition for Operation, TS 3.1.1.3b, and in the associated Surveillance Requirement, TS 4.1.1.3b.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining whether a significant hazards consideration exists. A proposed amendment to an Operating License for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability of consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

As required by 10 CFR 50.91(a), the licensee has provided the following no significant hazards consideration determination:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously analyzed. Accident analyses do not explicitly input an MTC, but rather a constant moderator density coefficient (MDC). Converting the MDC used in the accident analyses to an MTC is a straight forward calculation which accounts for the rate of change of moderator density with temperature at the conditions of interest; namely, Hot Full Power (HFP). For those non-LOCA transients where analysis results are made more severe by assuming maximum moderator feedback, a constant MDC of 0.43 delta K/gm/cc has been assumed to exist throughout the transient. Converting this to a limiting MTC at HFP conditions gives about -56 pcm/° F. The proposed Technical Specification LCO MTC value of -49 pcm/° F conservatively assures that under other allowed operating conditions (such as rods at insertion limits, off-nominal temperature and pressure and xenon and axial offset variations) that the actual MTC will not exceed the analysis value. Hence, there is no effect on any design basis accident and no increases in the consequences of any design basis accident associated with this Technical Specification change.

For LOCA analyses (large and small break), the only significance of a change in MTC would be to the extent that it may affect generated decay heat. The reactivity assumptions in the large break and small break LOCA accident analyses assume a maximum decay heat generation according to the requirements of Appendix K. Consequently, any changes to the MTC would show no effect for the large and small break LOCA analyses.

As stated above, the safety analysis assumption remains conservative with respect to the proposed LCO limit value of -49 pcm/° F. Therefore, the proposed change in the LCO limit from -42 pcm/° F to -49 pcm/° F still assures that the accident analyses moderator temperature coefficient is not exceeded. The proposed changes do not impact the consequences of any design basis accident. Also, there are no failure modes associated with the proposed changes; therefore, there is no increase in the probability or consequences of any accident previously evaluated.

2. The proposed amendment does not create the possibility of a new or different kind of accident. There is no change in the plant design or in operating procedures. Additionally, there are no new failure modes introduced by the proposed changes; therefore, there can be no impact on plant response to the point where a different accident is created.

3. The proposed amendment does not involve a significant reduction in a margin of safety. The proposed changes have no impact on the consequences of an accident or on any of the protective boundaries. The bases to the MTC Technical Specification 3/4.1.1.3 states "The limitations on moderator temperature coefficient (MTC) are provided to ensure that the value of this coefficient remains within the limiting condition assumed in the FSAR accident and transient analyses." The proposed changes continue to satisfy this statement. The definition of the most limiting condition assumed in the safety analyses is changing from an extremely conservative and unrealistic assumption of Hot Full Power (HFP), all rods in (ARI), to a Most Negative Feasible MTC approach. The Most Negative Feasible MTC still provides a conservative estimate of the worst MTC, and the revised limits still provide assurance that the values used in the safety analyses remain bounding compared to those which may be experienced under real accident conditions. Based on the above discussion, there is no significant reduction in the margin of safety.

Based on the above, the licensee has concluded that the proposed amendment meets the three standards in 10 CFR 50.92 and, therefore, involves no significant hazards consideration.

The NRC staff has made a preliminary review of the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the requested amendment does not involve a significant hazards consideration.

Local Public Document Room location: Cameron Village Regional Library 1930 Clark Avenue, Raleigh, North Carolina 27605.

Attorney for licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602

NRC Project Director: Elinor G. Adensam

Carolina Power & Light Company, Docket No. 50-400, Shearon Harris Nuclear Power Plant, Unit 1, Wake and Chatham Counties, North Carolina

Date of amendment request: February 22, 1989

Description of amendment request: The proposed amendment would revise Surveillance Requirement 4.9.8.2 to delete the residual heat removal (RHR) flow requirement whenever the water level is below the reactor vessel flange. Currently, Surveillance Requirement 4.9.8.2 requires that at least one RHR loop be verified in operation and circulating reactor coolant at a flow rate of greater than or equal to 2500 gpm at least once per 12 hours when the reactor is in Mode 6 with irradiated fuel in the vessel and the water level above the top of the reactor vessel flange is less than 23 feet. The 2500 gpm flow requirement would be maintained when the water level is at or above the reactor vessel flange. The associated Bases section would also be revised to reflect this change.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining whether a significant hazards consideration exists. A proposed amendment to an Operating License for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability of consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

As required by 10 CFR 50.91(a), the licensee has provided the following no

VOL 54 ISS 74 AP 19 1989 UMI

significant hazards consideration determination:

1. The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The existing requirement of Specification 3/4.9.8.2 that at least one RHR loop be in operation ensures that: (1) sufficient cooling capacity is available to remove decay heat and maintain the water in the reactor vessel below 140° F as required in Mode 6, and (2) sufficient coolant circulation is maintained through the core to minimize the effect of a boron dilution incident and prevent boron stratification. The Mode 6 minimum flow limit of 2500 gpm was established to alleviate the potential for boron stratification under refueling conditions. However, achieving 2500 gpm flow rate at the reduced water levels of mid-loop operation could cause cavitation and eventual damage of the RHR pumps. Boron stratification is only a concern with the large volumes of water present when the refueling cavity is filled. Sufficient mixing exists, even at low RHR flow rates, to preclude boron stratification when the water level is below the reactor vessel flange. Administrative controls to isolate potential sources of non-borated water from the reactor, established in Technical Specification 3/4.9.1, prevent a boron dilution event while in Mode 6. Since boron stratification is not a concern at reduced RCS water inventories and the possibility for a boron dilution event is precluded by Technical Specification 3/4.9.1, the proposed revision to eliminate the minimum flow limit when the RCS water level is below the reactor vessel flange does not significantly increase the probability or consequences of an accident previously evaluated.

2. The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed amendment splits the existing surveillance requirement into two separate surveillances. The first, Surveillance Requirement 4.9.8.2.1, is applicable when the RCS water level is at or above the reactor vessel flange and maintains the 2500 gpm minimum flow limit. The second, Surveillance Requirement 4.9.8.2.2, is applicable when the RCS water level is below the reactor vessel flange and requires that one RHR loop be verified in operation and circulating reactor coolant at least once per 12 hours. This new surveillance requirement is identical to the existing Mode 5 Surveillance Requirement 4.4.1.4.2, the only difference being the plant mode. That is, prior to de-tensioning the reactor vessel head closure bolts with water temperature less than 140° F the plant is in Mode 5. Upon detensioning of the bolts, the plant is in Mode 6. There is no change in reactor vessel water level, however, at this point the existing Surveillance Requirement 4.9.8.2 establishes a minimum flow rate of 2500 gpm. This minimum flow requirement is not necessary when the water level is below the reactor vessel flange as demonstrated in the Bases for Specification 3/4.4.1, Reactor Coolant Loops and Coolant Circulation, which states that, in Mode 5, "... the operation of one reactor coolant pump or one RHR pump provides adequate flow to ensure mixing and prevent stratification." No Mode 5 minimum flow rate is established in Specification 3/4.4.1. Therefore, as long as the RCS water level is below the reactor vessel flange a minimum flow requirement is not necessary either in Mode 5 or Mode 6. Upon raising the water level above the reactor vessel flange, the proposed Surveillance Requirement 4.9.8.2.1 will be in effect and require a minimum flow rate of 2500 gpm. As such, the proposed amendment will not result in the plant being placed in a condition not currently allowed during Mode 5 operation and, therefore, does not create the possibility of a new or different kind of accident.

3. Eliminating the minimum RHR flow limit of 2500 gpm when the RCS water level is below the reactor vessel flange does not involve a significant reduction in the margin of safety. As stated above, the Mode 6 minimum flow limit of 2500 gpm was established to alleviate the potential for boron stratification under refueling conditions. Boron stratification is only a concern with the large volumes of water present when the refueling cavity is filled. Sufficient mixing exists, even at low RHR flow rates, to preclude boron stratification when the water level is below the reactor vessel flange. In addition, the proposed amendment does not result in the plant being placed in a condition not currently allowed by the existing Mode 5 Surveillance Requirement 4.4.1.4.2. Therefore, the proposed amendment does not result in a significant reduction in the margin of safety.

Based on the above, the licensee has concluded that the proposed amendment meets the three standards in 10 CFR 50.92 and, therefore, involves no significant hazards consideration.

The NRC staff has made a preliminary review of the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Accordingly, the Commission proposes to determine that the requested amendment does not involve a significant hazards consideration.

Local Public Document Room location: Cameron Village Regional Library, 1930 Clark Avenue, Raleigh, North Carolina 27605.

Attorney for licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602

NRC Project Director: Elinor G. Adensam

Commonwealth Edison Company, Docket Nos. 50-454 and 50-455, Byron Nuclear Station, Unit Nos. 1 and 2, Ogle County, Illinois; and Docket Nos. 50-456 and 50-457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois

Date of application for amendments: December 23, 1987, supplemented April 3, 1989.

Description of amendments request: The proposed amendment would revise Technical Specification Tables 3.3-1 and 4.3-1, as requested in Generic Letter 85-09 for Reactor Trip System Automatic Actuation using shunt trip coil attachments.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards considerations. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not:

1. Involves a significant increase in probability or consequences of an accident previously evaluated; or

2. Create the possibility of a new or different kind of accident from any accident previously evaluated; or

3. Involve a significant reduction in a margin of safety.

The proposed changes requested have been evaluated as presented below:

(1) The automatic actuation of the shut trip coil attachment provides an alternate method to open the reactor trip coil breakers. When a reactor trip signal is generated, there are diverse mechanisms to provide a reactor breaker trip which would minimize the possibility of an Anticipated Transient Without Scram (ATWS) occurring. The proposed changes revise the surveillances to require independent testing of the undervoltage and shunt trip coil attachment for the manual reactor trip and the reactor trip breakers.

These surveillances provide assurance of reactor trip breaker operability when required. Since there are now two diverse trip mechanisms, a change is also proposed to allow forty-eight (48) hours to restore one of the trip features when it becomes inoperable, before a reactor shutdown is required. This is conservative because it recognizes that there are two trip mechanisms instead of one and allows forty-eight (48) hours to restore the inoperable trip feature. This change is based on the allowable time referenced in the NRC Generic Letter 85-09. Removal of note 14, for the Braidwood Technical Specifications is administrative in nature.

(2) The proposed changes do not change the manner in which the reactor protection system provides plant protection. The addition of surveillance test requirements provides assurance that the Reactor functions will occur when required. Present plant equipment is not being altered to accommodate these changes, hence, no new failure mechanisms are introduced.

(3) The proposed changes are expected to increase the overall margin of safety because they provide periodic test requirements for the Reactor Trip Breakers. These proposed surveillance changes are designed to provide assurance of operability of the reactor trip and bypass breakers. Based on the preceding assessment, the staff believes these proposed amendments involve no significant hazards consideration.

NRC Project Director: Daniel R. Muller

Commonwealth Edison Company, Docket Nos. 50-373 and 50-374, LaSalle County Station, Unit Nos. 1 and 2, LaSalle County, Illinois

Date of application for amendments: January 30, 1989

Description of amendments request: The proposed amendments to Operating License No. NPF-11 and Operating License No. NPF-18 would revise the LaSalle Units 1 and 2 Technical Specifications by revising the MAPLHGR Limits Curves to reflect the higher nodal exposure values for specific fuel types.

The MAPLHGR limit curves of Technical Specification 3.2.1 for both Units 1 and 2 are being redrawn to reflect higher nodal exposure values for fuel types 8CRB176, 8CRB219, and BP8CRB299L. The purpose of the revision is that the full analyzed range of nodal exposures was not previously reflected and operation during Cycle 3 of each unit is expected to go beyond the limits of the existing curves.

The MAPLHGR limits of Technical Specification Figures 3.2.1-1 and 3.2.1-2 depict the maximum allowable Average Planar Linear Heat Generation Rate for the specific fuel types as a function of nodal exposure. The exposure dependent limits are analyzed by GE and approved by the NRC through reviews of General Electric Standard Application for Reloads (GESTAR). The site Technical Specifications then provide a controlling document to reflect these analyzed limits.

During the Cycle 2 reload licensing submittals for both LaSalle units (Amendment 40 for Unit 1 - NPF-11, Amendment 32 for Unit 2 - NPF-18), the MAPLHGR limit curves for fuel type 8CRB299L were drawn to the same exposures (30,000 MWD/STU) as the initial cycle fuel curves for simplification. The GE analyzed exposure range of up to 44,500 MWD/STU (49.0 GWD/MTU) was reviewed and approved in those submittals (GE "Supplemental Reload Licensing Submittal" documents 23A1843 and 23A4735 for Units 1 and 2, respectively). Redrawing of these curves is an administrative change only, and will adequately reflect the analyzed exposure range of the 8CRB299L bundles throughout their useable bundle lifetime.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether no significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has determined, and the NRC staff agrees, that the proposed amendment will not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated because these restrictions on power distribution are based on analysis performed with the NRC approved methods and are provided to ensure that these consequences of accidents remain within the existing criteria for LaSalle.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed revisions place restrictions on power distribution thus eliminating new or different kinds of accidents from those previously analyzed.

3. Involve a significant reduction in the margin of safety because the specification revisions provide limitations on the power distribution intended to ensure that the ECCS and fuel thermal mechanical criteria continue to be protected.

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Ogelsby, Illinois 61348.

Attorney to licensee: Michael I. Miller, Esquire; Sidley and Austin, One First National Plaza, Chicago, Illinois 60603.

NRC Project Director: Daniel R. Muller

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut; Northeast Nuclear Energy Company et al; Docket Nos. 50-245, 50-336, and 50-423, Millstone Nuclear Power Station Unit Nos. 1, 2, and 3, New London County, Connecticut

Date of amendment request: March 13, 1989

Description of amendment request: By an application dated March 13, 1989, Connecticut Yankee Atomic Power Company (CYAPCO) and Northeast Nuclear Energy Company (NNECO) proposed to amend the Technical Specifications (TS) of the Haddam Neck and Millstone Units 1, 2 and 3 plants. The amendment would delete Figure 6.2-1, "Offsite Organization," and Figure 6.2-2, "Unit Organization," from the Technical Specifications and would revise TS section 6 to require the inclusion of these organizational charts in the Quality Assurance Topical Report.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards in 10 CFR 50.92(c) for determining whether a significant hazards consideration exists. A proposed amendment to an Operating License for a facility involves a no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability of consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. CYAPCO/NNECO has reviewed the proposed change and provided the following analysis. The change would not:

1. Involve a significant increase in the probability of occurrence or consequences of an accident previously analyzed. The proposed changes are strictly administrative in nature. This administrative change will not increase the probability of occurrence or the consequences of an accident previously analyzed.

2. Create the possibility of a new or different kind of accident from any previously analyzed. Since there are no changes in the way the plant is operated, the potential for an unanalyzed accident is not created. No new failure modes are introduced. The proposed changes are administrative and have no affect on plant operation.

3. Involve a significant reduction in a margin of safety. The proposed changes

VOL 54 ISS 74 AP 19 1989 UMI

remove the offsite and onsite organization charts from the Technical Specifications and are strictly administrative. Similar organization charts are contained in the QA Topical Report, which is updated annually. Since the proposed changes do not affect the consequences of any accident previously analyzed, there is no reduction in the margin of safety.

The Commission staff has reviewed and agrees with the CYAPCO/NNECO analysis and believes that the licensees have met the three criteria for a no significant hazards consideration. Accordingly, the Commission proposes to determine that this change does not involve a significant hazards consideration.

Local Public Document Room location: Russell Library, 123 Broad Street, Middletown, Connecticut 06457 and Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

NRC Project Director: John F. Stolz

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of amendment request: November 21, 1985

Description of amendment request: The proposed amendment would revise the provisions in the Palisades Plant, Technical Specifications (TSs) with the addition of new sections relating to the Alternate Shutdown System.

Specifically, the proposed amendment would add Section 3.25, Alternate Shutdown System, which would require the operability of the Alternate Shutdown System whenever the reactor coolant temperature reaches or exceeds 325° F. This section specifically identifies the minimum equipment to be operable, their locations, and action to be taken in the event of inoperability of any specified equipment.

The proposed amendment would also add Section 4.20 which would require performance of periodic surveillance testing of certain Alternate Shutdown System equipment. This section specifically identifies the Alternate Shutdown System components subject to the surveillance requirements.

The amendment request also proposed other changes not described above. Those proposed changes will be discussed in a separate notice in the **Federal Register** when the Commission considers issuance of those changes.

Basis for proposed no significant hazards consideration determination: The Commission has made a proposed determination that the amendment involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.58, this means the operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The Commission has evaluated the proposed changes against the above criteria as follows:

A. The changes do not involve a significant increase in the probability or consequences or an accident previously evaluated because the Alternate Shutdown System design provides a means to control auxiliary feedwater in the event of a fire in the control room which results in loss of control from the main control room of the turbine-driven auxiliary feedwater pump. A third auxiliary feedwater pump provides a separate injection path to the steam generators in the event of a fire at the Alternate Hot Shutdown panel which results in loss of control of the normal auxiliary feedwater pumps. Therefore, since a postulated fire cannot disable the auxiliary feedwater function, the change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

B. For the same reasons as cited in paragraph A above, the change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

C. The change does not involve a significant reduction in a margin of safety because the Alternate Shutdown System provides assurances of the auxiliary feedwater function in the event of a fire that disables normal control of this function. Therefore, the margins of safety associated with operation of the plant are unchanged

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Attorney for licensee: Judd L. Bacon, Esq., Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Project Director: Theodore R. Quay, Acting.

Consumers Power Company, Docket No. 50-255, Palisades Plant, Van Buren County, Michigan

Date of amendment request: March 10, 1987

Description of amendment request: The proposed amendment would change the Technical Specifications to provide clarifications and editorial corrections to the Radiological Effluent Technical Specifications (RETS).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR Part 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase it the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed changes against the above standards as required by 10 CFR 50.91(a). The Commission's staff has reviewed the licensee's evaluation and agrees with it.

The licensee has concluded that:

(1) The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated. The changes are administrative in nature in that they: (a) clarify the existing requirements for sampling service water discharge (or effluents); (b) remove the surveillance requirements for the quarterly testing of the Hi Range Noble Gas Monitor high alarm annunciator which does not exist in the plant; and (c) corrects an editorial error in Technical Specification (TS) Amendment 85. None of these changes impact on plant design or operation and consequently the previously evaluated accidents are not altered.

(2) The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated since, as stated in (1) above, the changes are administrative and essentially clarify service water sampling requirements and/or correct existing TS errors.

(3) The proposed changes do not involve a significant reduction in a margin of safety since, as stated in (1) and (2) above, the changes are administrative and do not involve a change in the manner in which the plant is operated.

In addition, the proposed license amendment fits example (i) of the types of amendments that are considered not likely to involve significant hazards consideration published in the **Federal Register** on March 6, 1986 (51 FR 7751), in that it is considered to be a purely administrative changes to the TS; i.e., a change to achieve consistency throughout the TS, correct an error, or a change in nonmenclature.

Based on the above review, the staff proposes to determine that the licensee's request does not involve a significant hazards consideration.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Attorney for licensee: Judd L. Bacon, Esq., Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Project Director: Theodore R. Quay, Acting.

Detroit Edison Company, Docket No. 50-341, Fermi-2, Monroe County, Michigan

Date of amendment request: October 7, 1988

Description of amendment request: The proposed change deletes the requirement to perform response time testing of the High Drywell Pressure actuation of the High Pressure Coolant Injection (HPCI) System. The change will eliminate unnecessary operation of the HPCI system and thus enhance overall HPCI system reliability.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists [10 CFR 50.92(c)] for a proposed amendment to a facility operating license. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed change against the above standards as required by 10 CFR 50.92. The licensee concluded that:

(1) The change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The Fermi-2 ECCS analysis takes no credit for the High Drywell Pressure actuation of the HPCI system and the High Drywell Pressure signal has been found to precede the Low Reactor Water Level signal for all break sizes. Thus, the time response capability of the HPCI system can be conservatively verified by testing the system time response to only the Low Reactor Water Level actuation signal. The change reduces the number of HPCI system starts required for surveillance testing and thus increases the overall reliability of the HPCI system. This increased reliability acts to decrease the probability or consequences of previously evaluated accidents.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated. The change does not modify plant design or operation and therefore creates no new accident modes. The reduced response time testing does not create the possibility of a new or different kind of accident since the remaining functional test requirements ensure that any credible failure of the circuitry no longer response time tested is detected in a timely manner

(3) Involve a significant reduction in a margin of safety. As discussed in (1) above, the change acts to increase overall reliability of the HPCI system. As such, the change acts to increase the margin of safety. The margin of safety is maintained since the HPCI system is still conservatively response time tested and the circuitry which is no longer response time tested does not represent a credible mechanism for degradation of the HPCI system response time.

The staff has reviewed the licensee's evaluation and concurs with it. On the basis of the above consideration, the staff proposes to find that the changes do not involve a significant hazards consideration.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Attorney for licensee: John Flynn, Esq., Detroit Edison Company, 2000 Second Avenue, Detroit, Michigan 48226.

NRC Project Director: Theodore R. Quay, Acting.

Detroit Edison Company, Docket No. 50-341, Fermi-2, Monroe County, Michigan

Date of amendments request: November 14, 1988

Description of amendments request: The proposed amendment would delete the mass flow rate values associated with Steam Line Flow - High Trip Function of both the Reactor Core Isolation Cooling (RCIC) system isolation and High Pressure Coolant Injection (HPCI) system isolation as listed in Table 3.3.2-1 items 3.a.1 and 4.a.1, respectively. The change also finalizes the Trip Set Point and Allowable Values for these trip functions

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists [10 CFR 50.92(c)] for a proposed amendment to a facility operating license. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has evaluated the proposed change against the above standards as required by 10 CFR 50.92. The licensee concluded that:

(1) The proposed change to delete the mass flow rate and associated ** from Items 3.a.1 and 4.a.1 of Table 3.3.2-2 does not involve a significant increase in the probability or consequences of an accident previously evaluated. The mass flow rate value is not produced by the installed instrumentation and it is not necessary nor required for the Trip Setpoint to perform the function of isolation of the RCIC or HPCI system. The mass flow rate value was used in the design calculations of steam flow across the steam line orifice and was used in developing the differential pressure setpoints and allowable values. The high dp Trip Setpoint is not affected by the deletion of the mass flow rate value and **, nor is it changed by the proposed amendment. Therefore, the change will result in no change to the assumptions or scenarios used to evaluate the probability or consequences of evaluated accidents.

(2) The proposed change to delete the mass flow rate and associated ** from Items 3.a.1 and 4.a.1 of Table 3.3.2-2 does not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed change does not affect system operation, nor does it change the Trip Setpoints or Allowable Values based on dp, and no safety-related equipment is altered. The mass flow rate value is not required to prevent any accident. Trip Set Points and Allowable Values, based on dp, are retained "as is" for the two Items.

(3) The proposed change to delete the mass flow rate and associated ** from Items 3.a.1 and 4.a.1 of Table 3.3.2-2 does not involve a significant reduction in a margin of safety. The Trip signal generated by a high dp is not affected by this change and therefore the actuation and isolation function remains the same. Therefore, the removal of the mass flow rate numbers and associated ** does not reduce any margin of safety.

The staff has reviewed the licensee's evaluation and concurs with it. On the basis of the above consideration, the staff proposes to find that the changes do not involve a significant hazards consideration.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Attorney for licensee: John Flynn, Esq., Detroit Edison Company, 2000 Second Avenue, Detroit, Michigan 48226.

NRC Project Director: Theodore R. Quay, Acting.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: April 6, 1989

VOL 54 ISS 74 AP 19 1989 UMI

Description of amendment request: The proposed revision would allow the conduct of a demonstration program regarding interface compatibility between three rod control cluster assemblies (RCCAs) supplied by Babcock and Wilcox Fuel Company (BWFC) and Westinghouse fuel assemblies at Catawba Unit 2. It would also allow the comparison of the wear characteristics of various RCCA clad materials. This demonstration program would involve changing the description of the Control Rod Assemblies in Section 5.3.2 of the Technical Specifications (TSs) for Catawba Unit 2 only. Unit 1 is included because the TSs for both units are combined in one document.

Two of the demonstration assemblies consist of control rods fabricated with Armaloy plated 304 stainless steel cladding. The third assembly consists of control rods fabricated with chromium carbide coated Inconel 625 cladding. In-reactor experience with the chromium carbide coating has shown that the coating performs extremely well.

The three RCCAs supplied by BWFC maintain the same design features as the Westinghouse 17x17 RCCAs. All of the primary interfaces have been verified by onsite dimensional measurement inspections made at McGuire Units 1 and 2. In addition, a dummy RCCA was fabricated and shipped to Catawba Unit 2 for interface and handling checkout. The licensee's submittal provides a summary of the design information and thermal hydraulic compatibility analysis for the demonstration RCCAs.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed revision would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated because the change in the shutdown margin for the three demonstration RCCAs is negligible, and measurements would be performed during each cycle initial startup to verify the acceptability of the rod worths.

The proposed revision would not (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the demonstration RCCAs would function similarly to those designed by Westinghouse, and no new modes of operation are introduced.

Finally, the proposed revision would not (3) involve a significant reduction in a margin of safety because the BWFC RCCAs should perform in accordance with Catawba TS limits before Unit 2 would commence its operation following the current refueling outage.

Accordingly, the Commission proposes to determine that the amendments do not involve a significant hazards consideration.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242

NRC Project Director: David B. Matthews

Duquesne Light Company, Docket No. 50-334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of amendment request: March 2, 1989

Description of amendment request: The proposed amendment would revise the reactor trip system and engineered safety feature (ESF) actuation system instrumentation trip setpoints and allowable values, based upon the results of a re-analysis of the instrument channel inaccuracies. All the changes are located in Tables 2.2-1 and 3.3-4 of the Technical Specifications. The licensee submitted Westinghouse report WCAP-11419, "Westinghouse Setpoint Methodology for Protection Systems, Beaver Valley Unit 1," to support this amendment request. The changes are needed to keep the reactor trip and ESF actuation setpoints, after factoring in the revised allowances of inaccuracy, within limits assumed in the Final Safety Analysis Report.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed change does not involve a significant hazards consideration because:

(1) The basis of the reactor trip system and EFS actuation system trip settings are the limits in the safety analyses. The proposed changes to the trip settings and allowable values ensure that these safety analysis limits are maintained when the appropriate allowances for instrument channel inaccuracies, as revised, are considered. Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) The proposed amendment would not cause any changes in plant equipment or design. Therefore, it does not create the probability of an accident or a malfunction different from ones previously evaluated.

(3) These changes will not affect the assumptions or consequences of any safety analysis presented in the FSAR. Therefore, the amendment will not involve a significant reduction in a margin of safety.

Accordingly, the staff proposes to determine that this amendment does not involve a significant hazards consideration.

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Attorney for licensee: Gerald Charnoff, Esquire, Jay E. Silberg, Esquire, Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037.

NRC Project Director: John F. Stolz

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of amendment request: March 21, 1989

Description of amendment request: The proposed amendment would relocate the requirements for the examination and testing of snubbers. The licensee's proposal would substitute Technical Specification (TS) 4.0.5 and the NRC approved Revision 2 to the River Bend Station Inservice Inspection (ISI) program for the current TS 3/4.7.4, "Snubbers". TS 4.0.5 states, in part:

4.0.5 Surveillance Requirements for inservice inspection and testing of ASME code Class 1, 2, & 3 components shall be applicable as follows:

a. Inservice inspection of ASME Code — Class 1, 2, and 3 components and inservice testing of ASME Code Class 1, 2 and 3 pumps and valves shall be performed in accordance with Section XI of the ASME Boiler and Pressure Vessel Code and applicable Addenda as required by 10 CFR 50, Section 50.55a(g), except where specific written relief has been granted by the Commission pursuant to 10 CFR 50, Section 50.55a(g)(6)(i).

Snubber inspection requirements are included in Article IWF, Section 11 of the ASME Code and Revision 2 of the River Bend Station (RBS) ISI program. Thus, TS 4.0.5 and the ISI program would define the snubber requirements.

Because of the proposed relocation of the snubber examination and testing requirements, the licensee's proposal would delete TS 3/4.7.4, Figure 4.7.4-1, "Sample Plan for Snubber Functional Test", and Bases Section 3/4.7.4.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee provided an analysis that addressed the above three standards in the amendment application.

1. No significant increase in the probability of consequences of an accident previously evaluated results from the proposed change because:

The proposed change does not result in a change to the plant design or inspection and testing. As such, the proposed change does not change the response of the plant or equipment required for safety as described in Chapters 6 and 15 of the RBS Updated Safety Analysis Report. The NRC approved RBS ISI Plan continues to exceed the minimum inspection requirements of ASME Section XI for snubbers. The scope of actual examinations has not been reduced.

The requirements of the current Technical Specifications governing snubber inspections at RBS have been incorporated into the NRC approved RBS ISI Plan with the following exceptions:

A. Limiting Condition for Operation

A more conservative approach will be utilized by considering a system inoperable to which an operable snubber is attached, without allowing for a 72 hour component evaluation period prior to this determination. This is in keeping with ASME Section XI and the current Technical Specification definition of OPERABILITY. This change is intended to conform the RBS Technical Specifications with the NRC approved RBS ISI Plan, the requirements of ASME Section XI and the current definition of OPERABILITY.

B. The proposed change will include snubber load capacity as an additional criterion for sample type selection. Snubber sample selection based on load capacity as a criterion provides a more complete cross section of plant snubber population, and therefore, allows for more accurate test results and failure mode evaluation. Since only accessibility determines the scope of subsequent visual inspection, this additional criterion will have no impact on the scope of subsequent surveillances.

C. Visual Inspections

The proposed change to allow subsequent examinations of inaccessible snubber during reactor shutdown follows the guidelines for successive inspections as specified in ASME Section XI, the NRC approved Revision 2 to the RBS ISI Plan and Revision 2 to the Standard Technical Specifications. Allowing these examinations to be delayed until the next reactor shutdown of sufficient duration will also allow increased plant availability and will substantially decrease man-rem exposures as a result of these examinations.

Since these proposed changes do not result in a change to plant design or operating modes and do not result in a reduction in the scope of required snubber examinations, there is no significant increase in the probability or consequences of any accident previously evaluated.

2. The proposed change will not create the possibility of a new or different kind of accident than any previously evaluated because:

This proposal entails the transfer of responsibility for snubber inspections to comparable programs, both of which comply with the minimum requirements of ASME Section XI. The quantitative and qualitative scope of snubber examinations has not been reduced below the minimum requirements of ASME Section XI. Since the proposed change does not result in a change to the plant design or operating modes or reduce the scope of subsequent examinations, the proposed change cannot introduce the possibility of a new or different kind of accident than previously evaluated.

3. The proposed change does not involve a significant reduction in the margin of safety because:

The approach to snubber and system operability proposed in this amendment request is more conservative than that found in the current Technical Specifications. This added conservatism will act to increase, not decrease, any existing margin of safety. Additionally, the proposed change does not reduce the scope of subsequent examinations. Further, subsequent revisions to the RBS ISI Plan are required to be submitted for NRC review and approval prior to implementation. Therefore, the proposed change will not decrease the margin of safety.

Based on the above considerations, the proposed change does not increase the probability or the consequences of a previously evaluated accident, does not create the possibility of a new or different kind of accident from any previously evaluated, and does not involve a reduction in the margin of safety. Therefore, Gulf States Utilities company proposes that no significant hazards are involved.

The staff has reviewed the licensee's no significant hazards consideration determination. Based on the review and the above discussion, the staff proposed to determine that the proposed changes do not involve a significant hazards consideration.

NRC Project Director: Jose A. Calvo

Illinois Power Company, Soyland Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: December 21, 1988

Description of amendment request: The proposed amendment would revise Technical Specifications 3.6.2.7 to delete a limitation on the period of approval for drywell purge and vent system operation. The specific limitation is a footnote which states that the allowed system operation is applicable for the period from initial fuel load to 3 months after completion of the first refueling outage. The submittal states that this limitation should have only been included for the operation of the containment purge system and was inappropriately included for the drywell purge and vent system.

Basis for proposed no significant hazards consideration determination: The staff has evaluated this proposed amendment and determined that it involves no significant hazards consideration. According to 10 CFR 50.92(c), a proposed amendment to an operating license involves no significant hazards consideration if operation of the facility in accordance with the amendment would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed change would only allow continued limited use of the drywell purge and vent system. The use of the system for pressure control was previously evaluated and approved by

VOL 54 ISS 74 AP 19 1989 UMI

the NRC in Clinton's Supplemental Safety Evaluation Report 5.

The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change introduces no changes to plant design or operation of the facility.

The proposed changes do not involve a significant reduction in a margin of safety because the changes do not alter the criteria for system operation. It only allows the system operation to continue past the original limited period.

For the reasons stated above, the staff believes this proposed amendment involves no significant hazards consideration.
